Why

THE MONETARY TIMES OF
CANADA IS ONE OF THE
BEST ADVERTISING MEDIUMS

1.—Reputation. "*The Monetary Times*" is conducted upon lines which have gained for it the highest reputation for integrity and independence of judgment, and its opinions and pronouncements as regards new issues offered for public subscription, and other like matters with which it essentially deals, are respected accordingly.

2.—Circulation. "*The Monetary Times*" has the largest circulation of any financial and insurance weekly in Canada. It circulates extensively not only throughout Canada but also in the United Kingdom and in every financial center throughout the world.

3.—Readers. "*The Monetary Times*" by the nature of its contents is of interest to all classes of investors. It appeals to a vast and constantly increasing number of readers, including Government and Municipal Authorities, Bankers, Insurance Officials, Directors, Managers and Secretaries of Companies and members of the various Stock Exchanges—by the great majority of whom the paper is not only read, but carefully filed for reference.

4.—Prominence of Advertisements. The space available for advertisements being strictly limited, announcements appearing therein secure very marked prominence.

We can guarantee all advertisements either alongside or opposite reading matter.

5.—Advertising Policy. Advertisements which are apparently designed to entrap the unwary, to induce people to part with hard-earned savings, and to tempt necessitous debtors to take almost the only step which could possibly make their financial troubles greater, are consistently declined by "*The Monetary Times*". The business of newspaper publishing is not in the opinion of the owners of "*The Monetary Times*," one which is free from moral responsibility.

For these reasons "*The Monetary Times*" offers an excellent, if not absolutely unique, medium for the announcements of all who desire to cultivate business with a clientèle of the highest class.

Sample copies and advertising rates cheerfully supplied.

Assets.

1. NATURAL RESOURCES:
440,951,000 acres of tillable land.
22,506 square miles, or 148,490,000,000 tons of coal in western provinces alone.
WATER POWER—Estimated, 17,000,000 horse-power; developed, 1,016,521 horse-power.
TIMBER—About 170,000,000 acres. Between 500 and 700 billion feet board measure. Canada stands third among nations of the world.
Large supplies of iron ores, nickel, silver, gold.
Large supplies of natural gas, chiefly in Alberta.
2. CLIMATE.
3. CHARACTER OF POPULATION.
4. LAWS AND GOVERNMENT—Judiciary and administration of laws.
5. RELATION TO THE BRITISH EMPIRE.
6. HIGH RATIO OF PER CAPITA PRODUCTION—Last year's new wealth averaged \$100.
7. ANNUAL INCOME FROM IMMIGRATION AND TOURIST TRAFFIC—Total income from immigrants 1900-1914, \$630,739,975. \$140,000,000 in same period from tourists.
8. CONDITIONS THAT WILL CONTINUE TO COMMAND IMMIGRATION OF PRODUCERS—2,500,000 total immigration 1900-1914, of which 900,000 came from United States and 1,000,000 from Britain. Will largely offset enlisted losses.
9. SOCIAL AND ECONOMIC PROBLEMS—Less complicated than in other countries, e.g., the United States.
10. INCREASED MARKET FOR SECURITIES IN UNITED STATES—Canadian bonds sold in the United States since outbreak of the war exceed \$300,000,000. In 1915 United States bought 60 per cent. of total Canadian issues, against 3.9 per cent. of total in 1909.
11. CANADA'S NATIONAL PLANT—In the departments of transportation, communication, and city development completed and sufficient for a ten-year period of normal growth.
12. GROWING SENTIMENT AGAINST INDISCRIMINATE RECRUITING OF PRODUCERS—Will have advantageous effect in preserving economic fabric.

13. CANADA IS ADOPTING THE WISE COURSE—Providing for the dependents of her soldiers and for soldiers incapacitated by raising from private sources her Patriotic Fund, thus avoiding the initiation of the government pension system, with all its patronage and other evils.
14. SPIRIT OF CO-OPERATION—Between capital, farming, and industrial interests, as evidenced by the Winnipeg Conference, and political feasibility of putting war management in hands of leading business men.
15. CANADA NOW WELL STARTED—Period of her greatest proportionate development in primary production—similar to the United States after the civil war. This indicated by the percentage of increase in the following departments for the decade 1901-1911:

Per cent.

Agricultural production	36.8
Lumber production	54.0
Mining production	154.0
Hunting and trapping	35.0
Manufactures	142.3
Steam railway earnings	262.9
Shipping traffic	129.2

Liabilities.

1. LARGE PLANT AND OVERHEAD EXPENSE—In proportion to population.
2. LACK OF CONSTITUTIONAL RESTRAINT—On the popular will as expressed through the legislatures, except as courts base decisions on body of decisions in the past.
3. HEAVY MUNICIPAL DEBTS—Per capita and burden in cities of unrealizable taxes.
4. INCREASING TAXATION—National debt at end of 1915—\$408,112,214—an increase of only \$68,070,162 since 1911, even though at war a year and a half. Note that government officially announces that taxes will be on surplus business incomes, and not on land. There will be no tax on farm land or farm income, the encouragement of Canada's basic wealth-producing industry being all-important in the view of the government.
5. BURDEN OF TWO TRANSCONTINENTAL ROADS—Not now fully earning their charges.

THE INCOME ACCOUNT

Income.

1. TOTAL VALUE OF ALL NATURAL PRODUCTS IN 1915—Farms, forests, mines, and fisheries—\$1,123,169,535—nearly \$150,000,000 more than in any previous year of Canada's history.
2. EXPORTS EXCEEDED IMPORTS IN 1915—\$201,700,000. This against an unfavorable balance in 1913 of \$198,500,000. The favorable balance for the last twelve months was \$250,000,000.
3. EXCESS OF DOMINION REVENUES OVER EXPENDITURES FOR 1915—\$45,000,000. Plus new taxes, this surplus will go a long way toward financing the cost of war out of current revenues. Taxes in 1915 realized \$175,000,000.
4. TREASURY IS CARRYING GOLD RESERVE—Against Dominion currency issue of \$115,000,000, or, 64.2 per cent.
5. TOTAL CANADIAN BANK DEPOSITS END OF FEBRUARY, 1916, \$1,118,068,276—An increase of \$115,000,000 in the year.
6. TOTAL WAR ORDERS FROM BRITAIN—At close of 1915, \$303,000,000. Estimated that total war expenditures within calendar year 1916 will equal \$600,000,000. Each new credit is expended in Canada, so that considerably more than Canada's total debt will be spent within the Dominion. The conclusion of economists is that the war has brought Canada more than it has cost her in money.
7. IMMIGRATION OF GOOD FARMERS CONTINUES—21,819 came from United States in last fiscal year—reported six times as many as returned to the United States. Almost as many more came to Canada from other countries.
8. GOOD DEMAND AND HIGH PRICES—For all products, especially for farm and mineral products, which are essentially sources of new wealth.
9. SPECULATION ELIMINATED—Value of real property reduced to sub-normal position. Good foundation for sound progress. Banks still exercising control with caution.
10. FARMING METHODS IMPROVING—And mixed farming becoming general, as opposed to single crop growing. This will have a healthy effect on future course of land values and land settlement.

Outgo.

1. EXPENDITURE ON WAR ACCOUNT—
August, 1914 \$ 50,000,000
February, 1915 ... 100,000,000
Now asked 250,000,000 \$400,000,000
2. INTEREST CHARGES PER ANNUM—On outstanding borrowings estimated at \$190,000,000.
3. LOSS OF PRODUCING POWER—Of enlisted men. Over 300,000 men withdrawn from civil life. Offset in fact that many were engaged in construction work and would now be out of employment if not in the army.—(The New York Annalist.)

A young Englishman, married, writes *The Monetary Times*, stating his desire to obtain a position in Toronto. In the old country his experience consisted of office work in a large yarn mill. The past few years have been spent at clerical work in the claim department of an express company in the United States. System, neatness and accuracy are some of his stronger points.

JUNE FIRE LOSSES

Loss was Smaller—Record of Causes and Structures Damaged and Destroyed

The Monetary Times' estimate of Canada's fire loss during June amounted to \$494,557, compared with May loss of \$1,850,205 and \$773,269 for the corresponding period of last year. The following is the estimate for the June losses:—

Fires exceeding \$10,000	\$263,500
Small fires	166,550
Estimates for unreported fires	64,507

\$494,557

The fires reported in June at which the losses amounted to \$10,000 and over were:—

Brockville, Ont.—June 2.....	Block	\$100,000
Sussex, N.B.—June 8	Institute building...	25,000
Stratford, Ont.—June 13.....	Factory	13,500
Hamilton, Ont.—June 14	Factory	25,000
Atlin, B.C.—June 17	Hotel, stores, etc. ..	70,000
Edmonton, Alta.—June 19.....	Factory	10,000
St. John, N.B.—June 23.....	Paper company's warehouse	25,000
Hamilton, Ont.—June 27	Boathouses	10,000
St. John, N.B.—June 30.....	Flour sheds	75,000

Among the causes were: Lightning 3, incendiary 2, furnace 2, cigar stub 1, explosion 1, spontaneous 1, boys and matches 1, gasoline 1.

The structures damaged and destroyed included 15 residences, 7 stores, 5 factories, 5 stables, 3 boathouses, 2 hotels, 2 blocks, 1 paper mill, 1 restaurant, 1 sash and door factory, 1 lumber mill, 1 garage, 1 icehouse, 1 orphanage, 1 institute, 1 elevator, 1 church.

The following table, compiled by *The Monetary Times*, shows deaths caused by fire during the first five months of 1916 compared with previous returns:—

	1909.	1910.	1911.	1912.	1913.	1914.	1915.	1916.
January	16	27	27	27	14	26	3	10
February	8	15	12	11	21	18	11	20
March	16	20	18	24	22	27	23	23
April	18	37	20	15	14	22	14	6
May	21	15	28	18	33	8	5	14
June	16	52	13	6	18	12	2	6

The fires at which the fatalities occurred were:—

Thorold, Ont.—May 28	Playing with matches.....	1
Quebec, Que.—June 2	Gasoline iron exploded....	2
Cumberland, B.C.—June 3.....	Burning residence	1
Windsor, Ont.—June 23	Burning residence	1
Toronto, Ont.		1

RUBBER SHARES TO BE SOLD HERE

A rubber share brokerage office was opened in Montreal and Toronto this week by Clayton, Ridge and Company, tea, coffee and rubber brokers, of London, England. The company, whose head office for Canada is at the Royal Bank Building, Toronto, has had many years' experience of the Mincing Lane markets, and of the British Rubber Share Exchange. In a circular explaining the business, it is stated that the plantation rubber industry has been developed by British tea and coffee merchants and growers, and is principally located in Ceylon, Java, Straits Settlements, Borneo, etc., and has been specially fostered by the progressive government of the Federated Malay States.

"The British public boomed the numerous plantation rubber company flotations prematurely in 1910," says the circular, "and then afterwards realized there was six years to wait for dividends. To-day, in 1916, and still more in 1917, the dividends are being paid out handsomely by the numerous sound companies, and the British public being busy with the war, many of the best shares can be bought through us to-day at one-third or one-quarter of the boom prices, and with quarterly dividends now included."

It will be interesting to see how the Canadian investment and speculative public receive this new enterprise.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Rossland, B.C.—Bids close on July 20th for \$20,000 5 per cent. bonds.

New Westminster, B.C.—A temporary loan of \$138,000 is being arranged.

Calgary, Alta.—A temporary credit of \$500,000 is being arranged by the city.

Lethbridge, Alta.—The city obtained 82.25 net with interest for its issue of \$420,000 bonds.

Trail, B.C.—A by-law for the issuance of \$15,000 fire hall bonds was voted upon on Tuesday.

Carleton County, Ont.—Tenders close on July 19th for \$40,000 5½ per cent. bonds. Mr. C. McNab, County Clerk.

Niagara Falls, Ont.—For the purpose of consolidating some bond issues, the council has passed a by-law authorizing the borrowing of \$15,538.83 in 5 per cent. 20-year bonds.

North Vancouver, B.C.—For an issue of \$225,000 6 per cent. treasury notes three bids were considered as follows:—

Canadian Financiers Trust Company, Vancouver	97
Terry, Briggs & Company, Toledo	96.68
Ferris & Hardgrove, Spokane	94.10

Trail, B.C.—For the \$7,500 school bonds, there were six bids: Messrs. R. C. Matthews & Company received the award. The bids were as below:—Messrs. Wolverton & Company, Vancouver, representing R. C. Matthews & Company, Toronto, 92.00; Messrs. A. F. Carrothers & Company, Edmonton, 91.83; Bond & Debenture Corporation of Canada, Limited, Winnipeg, 88.00; Mr. W. Kennedy, Vancouver, representing A. C. Frost & Company, of Chicago, 87.32; Messrs. C. H. Burgess & Company, Toronto, 87.12; Messrs. Ferris & Hardgrove, Spokane, 85.00.

Kingston, Ont.—For an issue of \$60,000 5 per cent. 20-year bonds which were awarded to Messrs. Wood, Gundy & Company, Toronto, the bids were:—Wood, Gundy & Company, 98.65; Royal Securities Corporation, 98.52; H. R. Wood & Company, 98.43; Imperial Bank, 98.386; Canada Bond Corporation, 98.14; Mulholland, Bird & Graham, 97.97; Brent, Noxon & Company, 97.89; Quebec Bond Company, 97.72; Ames & Company, 97.71; Jarvis & Company, 97.635; Burgess & Company, 97.61; W. A. McKenzie, 97.17; G. A. Stimson, 97.15; Macdonald, Bullock & Company, 96.80; R. C. Matthews & Company, 96.51.

Truro, N.S.—The issue of \$23,700 5 per cent. 30-year bonds was awarded to the Eastern Securities Company, Limited, of Halifax, at 98.11. The other tenders were:—

Hew R. Wood and Company, Montreal	98.077
J. C. Mackintosh & Company, Halifax	97.19
W. F. Mahon, Halifax	96.81
F. B. MacCurdy & Company, Halifax	96.40
J. M. Robinson & Sons, St. John	96.37
Dominion Securities Corporation, Toronto	96.09
Sterling Securities, Limited	95.57
Brent, Noxon & Company, Toronto	95.27
Eastern Investment Company, Halifax	91.40

Toronto, Ont.—Mr. T. Bradshaw, finance commissioner, has drawn the attention of the board of control to the large increase in the city's debt and the consequent burden which it is imposing upon the citizens in the nature of debt charges, and he stated that this demands the most careful consideration.

The already heavy bond debt will be added to, by no less than \$7,672,814, making the total \$98,494,439, when bonds are issued under the twelve money by-laws which were presented to council. The additional annual sum which will require to be raised throughout the term of these new loans, to pay interest and principal thereon, is \$1,010,889. Of this amount, \$425,367 represents "owner's share" of local improvement debt, and will be a direct charge on the taxpayers of the properties specially benefited; the balance, \$585,522, being the debt charges for works and expenditure of a general character such as, sewers, patriotic grant, bridges, schools, industrial farms, etc.,—will fall upon the general body of tax-

payers throughout the city. This last amount represents exactly one mill on the present assessment.

The present outlook is so uncertain that we cannot expect for some time to come, any important increase in our assessment figures, and as there are no new sources of revenue appearing on the horizon, we must contemplate as one of the effects of these new loans, an increase of one mill in our 1917 taxation rate.

In view of (a) the number of works, additional to those hereinbefore referred to, either partially or wholly completed, which have not yet been permanently financed, and which will still further increase the debt charges; (b) other important projects to which the city is committed to carry through within the next few years; and (c) obligations, financial and otherwise, in connection with the present war: that before any new capital expenditure is authorized, Mr. Bradshaw suggests a thorough "stock-taking" of affairs be undertaken, a careful review of the whole situation made, and a definite policy in respect thereto, decided upon.

In view of the world-wide struggle, the duration of which is uncertain, and the inability to gauge what conditions will be at its close, Toronto should adopt an extremely conservative policy in undertaking any new works whatever.

The city's credit, unquestionably, ranks high: it should be the aim to strengthen and conserve it, rather than to strain or impair it, in order that it may be well prepared, financially, to undertake in the near future, the important projects which will then arise for decision and action.

MAY ISSUE \$5,000,000 BONDS

The proposed scheme of the Vancouver harbor commissioners involves the issuance of bonds to the extent of \$5,000,000. Some exception to the plan has been taken by the Vancouver board of trade.

CANADIANS GETTING ORDERS IN NEWFOUNDLAND

Mr. W. B. Nicholson, Canadian trade commissioner, -St. John's, Newfoundland, writes: "Canadian commercial travellers calling at this office state that local importers are placing large orders for Canadian goods for fall delivery. One traveller, representing a Canadian hat factory, sold \$6,000 worth of caps to one firm, and in a few days sold over \$26,000 worth of goods. Other travellers report record trips this season."

ABITIBI LAND AND FORESTS COMPANY'S BONDS

An offering of \$57,000 7 per cent. 5-year bonds of the Abitibi Lands and Forests, Limited, is being made by Messrs. Peabody, Houghteling and Company, Chicago. The bonds are secured by first mortgage on 40 lots and residences, etc., at Iroquois Falls, Ont. The principal and interest are a direct obligation of the Abitibi Lands and Forests, Limited, which owns the townsite of Iroquois Falls, and 5,000 acres of land surrounding it. Payment of principal and interest is guaranteed by the Abitibi Power and Paper Company, Limited.

CANADIAN NORTHERN NOTES OVERSUBSCRIBED

The issue of \$6,000,000 of Canadian Northern Railway notes, offered in New York last week, was subscribed in one day. The issue consisted of one and two-years 6 per cent. secured notes, of which \$3,000,000 mature in July, 1917, and a similar amount in July, 1918, the collateral security being Dominion and provincial government guaranteed, long-term bonds. The issuing syndicate consisted of Wm. A. Read and Company, of New York and the Dominion Securities Corporation, Toronto.

The Canadian Northern sold \$11,500,000 5 per cent. 2-year notes in New York in August last. They were offered to the public at 98½.

Mr. Johnston Ewart Hodgins, A.C.I.I. has been appointed inspector of the St. Lawrence and British Empire Underwriters Agencies. Mr. Hodgins was formerly with the Norwich Union. Previous to settling in Canada he occupied important positions in Ireland. He was also a lecturer in connection with the Belfast Insurance Institute.

ECONOMIC VALUE OF LIFE INSURANCE

Agents Are Necessary to Supply the Need of the People
—Value of Policy in Business

"Life insurance bears the relationship to thrift that the modern utilization of by-products, largely wasted in former years, bears to many of our leading manufacturing enterprises of to-day. Small sums accumulated periodically, which would otherwise be wasted, are made to total a substantial sum." This was a remark used by Professor S. S. Hueber, Wharton School of Finance, in an address at Philadelphia.

He further said: "The community absolutely needs life insurance, and life insurance, if its beneficent influence is to be spread far and wide among United States and Canadian households, absolutely needs the agent. All voluntary schemes of life insurance, whether governmental or private, which eliminated the solicitor, have proved practical failures, and have demonstrated beyond a doubt that life insurance is of such a nature that, although a necessity of life, it must nevertheless be sold, and sold tactfully and persuasively."

Family as a Business.

"It has always seemed incomprehensible that an institution which so vitally affects the well-being of nearly every individual should have been so late in forming a part of our educational system as regards both the public and the practitioner. The subject has been practically neglected by our economists, and the thousands upon thousands of students taking economics in our colleges and high schools, and who later become leaders in the community, are given a mere smattering in the subject.

"As a protector of the family, the very corner-stone of society, life insurance has no substitute. It furnishes the only certain method of capitalizing the value of the income producer for the benefit of the family, and in this respect is a universal duty, a religious obligation, and a beneficiary's right. The care of his family is a man's greatest and most important business. The family should be established and run as a business and on a sound business basis. It should be protected against needless bankruptcy. The death or disability of the head of this business should not involve its impairment or dissolution any more than the death of the head of a bank, railroad, or store. Every corporation and firm represents capitalized earning capacity and good-will. Why, then, when men and women are about to organize the business called a family, should there not be a capitalization in the form of a life insurance policy of the only real value behind the business?"

Insurance an Economic Bridge.

"Life insurance is becoming a great conservator of business as regards the protection of the valuable lives in the business as well as its credit foundation. I believe that life insurance will eventually prove the economic means wherewith to bridge that ever-widening gap between capital and labor. Bankers are also rapidly awakening to the fact that he who carries adequate life insurance, even though it be only family insurance, has by that act stamped himself as a well-balanced and calculating individual as contrasted with one disposed to run the gauntlet of a gamble."

WINNIPEG MAY MARKET LOAN

The city of Winnipeg may market a loan in the near future. This city has not sold any bonds for some time. Mayor Waugh (who will become chairman of the Greater Winnipeg Water Board at the end of the year) and the city treasurer, are visiting Montreal and other eastern points in connection with the loan.

Sir George Paish says England must raise \$25,000,000 daily for the war, and that her power to do so is problematical. Of this sum he says \$5,000,000 can be created by selling securities abroad; \$7,500,000 through proposed taxation and about \$7,500,000 out of savings of the people, leaving \$5,000,000 to be raised. He suggests that the wealthy class borrow up to \$1,500,000,000 to lend to the government.

BUSINESS INSURANCE PREMIUMS AND TAX

They Can Be Treated as Rest and Added to Capital, Says
Taxation Officer

How are the premiums paid on business insurance policies to be treated in connection with the business profits war tax act? This is one of the many interesting points which have been raised regarding the new tax. While the finance department at Ottawa cannot be expected to answer hypothetical questions as to the operation of the act, in this case, at the request of *The Monetary Times*, Mr. R. W. Breadner, taxation officer, has given the following ruling:—

Premium Paid Is Asset.

"The premium paid on such a policy would be an asset and, therefore, could not be deducted as an expense from gross profits. At the commencement of the accounting period following the period in which the premium was paid, the amount could be treated as rest and be added to capital for the purpose of the business profits war tax act."

This ruling is the result of a conference between the insurance and finance departments, Ottawa.

Insurance Superintendent's View.

Mr. G. D. Finlayson, discussing the point with *The Monetary Times*, said:—

"While I think, as a general principle, every allowance should be made in schemes of taxation for insurance in favor of one's dependents, I think that business insurance as ordinarily practised partakes more of the nature of an ordinary financial transaction and the philanthropic side of insurance is almost entirely lost. Business insurance may really be regarded as a form of investment or sinking fund, and if the principle of exemption of premiums payable on such insurance were recognized, it would be possible for a company to escape taxation simply by effecting a sufficiently large amount of insurance.

"My view, therefore, would be that so far as the business profits war tax act is concerned, it would be impracticable to allow these premiums to be deducted from the profits."

CLEARING HOUSE RETURNS

The following are the bank clearing house returns for weeks ended June 29th, 1916, and June 30th, 1915, with changes:—

	Week ended June 29, '16.	*Week ended June 30, '15.	Changes.
Montreal	\$ 71,143,677	\$33,185,967	+ \$37,957,710
Toronto	56,320,154	28,196,295	+ 28,123,859
Winnipeg	32,421,876	12,678,611	+ 19,743,265
Vancouver	5,940,942	4,392,508	+ 1,548,434
Ottawa	4,919,402	2,625,050	+ 2,294,352
Calgary	3,873,052	3,123,568	+ 749,484
Hamilton	3,871,494	2,241,661	+ 1,629,833
Quebec	3,408,215	2,354,067	+ 1,054,148
Edmonton	1,762,083	1,391,942	+ 370,141
Halifax	2,033,374	1,330,156	+ 703,218
London	1,600,053	1,234,930	+ 434,123
Regina	1,781,077	887,073	+ 893,104
St. John	1,664,680	1,030,146	+ 624,934

THE TARIFF

On another page is printed an article commenting upon that of Mr. G. Frank Beer in *The Monetary Times* of May 26th on the tariff in its relation to national problems. Mr. Beer's article, it will be recalled, contended that sufficient intelligent study had not been given to the basis upon which the tariff is built and upon which our protective policy is founded. His article has attracted wide attention, bringing a heavy mail regarding it both to its author and to *The Monetary Times*.

The article printed in the current issue is from the pen of Mr. R. McKenzie, secretary-treasurer of the Manitoba Grain Growers' Association. Therein he probably expresses the views of public opinion in the prairie provinces as to the effect of the tariff on production. Our Western readers are almost unanimous in the statement that a cause of the financial troubles in the West is the fact that the viewpoint of the rural population and representatives of the agricultural industry have not been taken into consideration in framing our trade policies. In other words, our trade policies are determined by men associated with financial and commercial interests, men who concede that business success depends on the prosperity of farmers. Mr. McKenzie puts the point in this way: "Their knowledge of the needs of agriculture and how to increase production is purely theoretical and their views colored by their business environment. They are imbued with the idea that a trade policy that is good for their enterprise must be good for the farmer. They legislate for their own good, fully convinced that it therefore must be in the interests of the country. The farming industry is not consulted and any representation made by representatives of the industry is brushed aside. Our problem can only be solved by all the interests getting together and legislating for the common good."

This view was expressed recently by the Regina Leader in these words: "The West is ready—it always has been ready—for a give-and-take policy in tariff matters. But it is not ready, and is less ready now than ever before, to calmly submit to the unfair, illogical, one-sided tariff now in effect in Canada. The sooner this is realized in the East and the quicker the big interests who have so long been the all-powerful influence in the framing of the tariff schedules, adopt a policy of compromise the better it will be for all parties concerned, and infinitely better for Canada as a whole."

The tariff question will be one of the most important issues in the near future, partly because of the international tariff situation created by the war and partly because of the insistent voice of Western Canada. *The Monetary Times* has been pleased to open its columns to this discussion (inaugurated by Mr. Beer's article), which may help to bring the conflicting views more in harmony.

FIRE PREVENTION

Fire waste is still a heavy item in this country. So-called experts continue to talk glibly of fire prevention as a sort of science to the mysteries of which we shall be admitted in the dim future. The greatest cause of the fire waste is plain, everyday carelessness. The best antidote is commonsense and carefulness. The art of fire prevention is nothing more than stopping fires from originating. When the man who has a fire pays a little more for his experience, the number of fires will become less. When a man really feels that he pays for carelessness, then does he economize.

WAR AND LIFE INSURANCE

Information is being gathered by the Association of Life Insurance Presidents as to the effect of present war methods on the mortality of insured lives. Only fragmentary data are as yet available. The full experience will not be obtainable until several years after the end of the war. What figures are available now are being brought together and studied with the hope of having something for the guidance of life insurance companies in the event of the United States ever becoming involved in war. Previous wars might give an experience of some value in the case of war with Mexico. Fighting there would be somewhat similar to that of the Boer war which lasted two years and five months. The total number of deaths in the British forces was 21,916, of which 14,382 were due to disease. The annual mortality in that war among officers and men was 3.9 per cent., 1.3 per cent. representing battle wounds, and 2.6 per cent. disease. At the time of the Civil War, life insurance in the United States was in its infancy and covered comparatively few war risks; while in the Spanish-American War, the exposure was not enough to produce a basis for definite calculations.

If the United States were involved in war with Germany, the mortality experience of previous wars would be of very little value to life insurance companies, although some figures of value in regard to the experience in the present war should soon be available. One American company last year roughly estimated as a result of its own experience, that the average extra mortality due to the present war is about 3½ per cent. of the sum assured. This is made up of a minimum extra for officers of about

7½ per cent., and for privates of about 1½ per cent. of the sum assured. Those calculations, however, are based on limited data. In a group of ten British companies the war claims constituted 10 per cent. of the total death claims during the first year of the war.

Not until the present struggle ceases will actuaries be able to determine rates which will protect not only those who fight for their country but also the large number of existing policyholders.

FINANCING EXPORT TRADE

Sir Thomas White, finance minister, did well to bring officially to the attention of Canadian bankers last week, the desirability of Canada being financially prepared for a

greatly increased export business with Russia and the other Allies after the war. Our bankers have undoubtedly given this matter consideration but the fact that the government has asked the banks to consider it, should give preparations for export trade a much-needed impetus.

According to Ottawa dispatches, thought will be given to the question of establishing, if deemed necessary, financial agencies for the purpose of advising upon and dealing with Russian and other foreign credits. At present it is felt that little more can be done than to mature and prepare well in advance plans for facilitating future business of this character. The war orders placed in Canada this year will probably total \$600,000,000. When war ceases, export trade should take the place of much of this war order business, which will also cease when peace arrives.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Nova Scotia Car Works.—Before Justice Chisholm at the supreme court chambers, Halifax, on Tuesday, tenders for the Nova Scotia Car Works were received from F. B. McCurdy and Company for \$153,000 and Nova Scotia Steel and Coal Company for \$152,500. Mr. J. R. Douglas and other shareholders in an affidavit stated that if possible he would buy the property for the shareholders and would give more than the tenders offered. It was ultimately decided by all concerned to sell the property at auction, July 26th, the reserve price to be \$154,000.

Detroit United Railway.—For the first five months of the year the net earnings show a gain of \$448,307, or 29.4 per cent. The figures for the period from January to May are \$1,967,678, against \$1,519,371 for the corresponding months of last year. Gross earnings increased from \$4,970,316 last year to \$6,160,389, while working expenses were slightly over \$700,000 higher at \$4,192,711. After interest and taxes, total net income from all sources amounted to \$1,165,817, compared with \$713,315 last year.

For the month of May net earnings of \$418,616 were nearly \$100,000 above the same month last year.

Winnipeg Electric Railway.—The company's monthly returns, compared with those of last year, are as follows:—

	1916.	1915.
January	\$108,475	\$136,476
February	108,250	120,093
March	111,900	106,159
April	111,035	87,520
May		86,750
June		84,645
July		79,553
August		68,677
September		76,726
October		104,970
November		134,958
December		166,694

Montreal Water and Power Company.—The company's gross revenue, \$775,513, is practically the same as for the previous year, but as the total amount, with the exception of \$700, was derived from the franchise territory of the company in comparison with extraordinary revenue in previous years to an amount as large as \$60,000, and last year about \$20,000, the revenue from the franchise customers of the company increased sufficiently to more than offset the loss in special revenue, and was the highest in its history.

Operating expenses of every description were some \$9,000 less than the preceding year, so that the gross profit netted the company \$204,066, as against \$195,727 in the year 1914-15.

Bond requirements absorbed some \$27,000, and \$14,000 was provided to cover losses of meters, motors and bad debts.

The general depreciation account has been further strengthened by the addition of \$60,000 and the balance of profits, viz., \$102,567, has been carried forward, but is subject to the federal war tax.

During the year the company has paid off debentures of \$250,000; capital liabilities to municipalities, \$36,500, and on account of new Outremont reservoir some \$200,000, all without increasing the bond or share capital. The new Outremont reservoir has been completed and added to the company's system.

New construction other than the completion of the Outremont reservoir was not on a large scale, but there has been added over three and a half miles of mains, some 650 new services, and a new six million gallon daily capacity pump has been bought and erected at the Clarke Avenue station.

Western Canada Power Company.—Mr. C. H. Cahan, in explaining the terms of the reorganization, states that the noteholders' protective committee, representing over 90 per cent. of all the outstanding notes, after a thorough investigation into the affairs of the company, have agreed to accept two ordinary shares of \$100 each for every \$100 par value of notes held by them. They are really paying \$50 in cash per share for each ordinary share received by them in exchange for their notes.

On the other hand, the present shareholders must subscribe for 4,678 preferred shares at \$80 per share, thus contributing \$374,240 in cash to assist in paying off the current liabilities of the company in order to insure the success of the present plan of reorganization. And, in case there is no over-subscription, the present shareholders will, upon the completion of the proposed reconstruction, have five fully-paid ordinary shares for every two preferred shares subscribed and paid for by them, respectively. These are the same ordinary shares for which the noteholders are paying \$50 per share as above stated.

It is estimated that the proposed issue of \$5,000,000 of ordinary shares of the present company will be distributed approximately as follows:—

Holders of notes receive shares at \$50 each	\$3,600,000
Present holders, 24,950 ordinary shares, one share in five	499,000
Subscribers for 4,678 preferred shares, two ordinary for each preferred share	935,600

Total issue ordinary shares \$5,034,600

This will necessitate the issue of 346 shares in excess of the proposed issue of 50,000 shares of the total par value of \$5,000,000; but several persons interested in the success of the plan have agreed to contribute, gratis, this excess of 346 shares, if it is deemed absolutely necessary for its success.

The transfer of the Norton-Griffiths contract at East St. John harbor, N.B., to a syndicate of New York and Canadian capitalists is stated to be planned. This syndicate contemplates the completion and operation of the dry dock by a subsidiary company. Incorporation for this and other purposes has been granted to the St. John Dry Dock and Shipbuilding Company, Limited, with a capital of \$1,000,000.

CANADIAN RAILROAD FINANCING IN NEW YORK

Premier Borden is Thought to Have Tested Market Opinion as to Future Loan

As a result of Premier Borden's visit to New York, on his way to Washington, Wall Street has many stories as to forthcoming Canadian railroad loans. A New York despatch, dated Wednesday, read as follows: "Prospects of a large loan by a group of New York bankers to Canadian railways, approximating \$100,000,000, was the chief topic of discussion in Wall Street banking circles to-day. Canadian borrowing in this market has met with popular approval here, and it was predicted that if the negotiations for the loan were carried through the issue would be marketed with as great success as the numerous Dominion and municipal issues which are now closely held by American investors.

New York Bankers.

"Members of a group of bankers, it was said, have assured Premier Borden that they stand ready and willing to furnish the necessary capital, providing the Canadian government will guarantee the issue when it is made. These bankers, it is said, assured Premier Borden and his committee that the loan with Canada in back of it could be sold to investors here on an interest basis almost as low as the Canadian government bonds."

Testing Market Opinion.

Premier Borden is visiting the United States with the object of obtaining the advice and services of practical railroad men in regard to the Canadian railroad situation. A commission of railroad experts, probably three, will study this matter and report to the government. There is little doubt that the premier discussed with leading New York bankers the financial phases of our railroad problem, which, whether or not nationalization is ultimately favored, are among the most important factors and those leading to the present situation. With the good record of Canadian securities and credit generally, especially in the New York market, since the outbreak of war, it is quite probable that the premier received assurances that if a large Canadian railroad loan were decided upon, it would have the support of leading New York bankers. Inquiries by *The Monetary Times* at Ottawa seem to indicate that the question has not been under consideration by the government.

A Canadian Northern issue of \$6,000,000 6 per cent. 1 and 2-year notes was sold by Wm. A. Read and Company, New York, and the Dominion Securities Corporation, Toronto, in the New York market last week in one day, and other financing, of which *The Monetary Times* is not at liberty to write at present, is in contemplation.

WINNIPEG LIFE UNDERWRITERS' ACTIVITIES

At the Winnipeg Life Underwriters' meeting a membership campaign was inaugurated in view of the coming Hamilton convention. Mr. G. Hunt, Imperial Life Insurance Company, Toronto, pointed out to the agents present the advantages of being a member of a life underwriters' association, and said that the Life Officers' Association are establishing a black-listing bureau, which means the ultimate driving out of the profession the undesirable floating element whose sole aim is to give the minimum of service for the maximum of salary.

Mr. A. E. Ham, Manitoba's commissioner of insurance, said that during the last year 112 complaints had been carefully investigated, some of which were trivial; that six agents had their license cancelled; that several agents had been reprimanded. There were, he intimated, some 1,600 agents in the province of Manitoba. Mr. W. McBride has been made a life member of the Winnipeg Association.

According to the Wisconsin supreme court, death as a result of typhoid fever contracted from drinking polluted water supplied by an employer, is "accidental" in the sense of the compensation act of that state.

RECENT FIRES

The Monetary Times Weekly Register of Fire Losses and Insurance

Atlin, B.C.—June 17—Royal Hotel, stores and residences. Loss, \$50,000.
Brantford, Ont.—June 30—Brant Cafe. Loss and cause not stated.
Sarnia, Ont.—June 28—Mr. G. Hood's residence, 162 North Vidal Street. Insured.

NEW INCORPORATIONS

Thirty-four New Charters—Mining Companies Have Largest Capital

Canada's new companies incorporated this week number 34. The head offices of these companies are located in three provinces. The total capitalization amounts to \$8,315,000.

The largest companies are:—

The Amm Natural Gas and Gasoline Company, Limited	\$2,000,000
Kirk Gold Mines Company, Limited	2,000,000
Silverado Mining Company, Limited	1,000,000
Standard Film Service, Limited	1,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	18	\$6,644,000
Quebec	10	1,526,000
British Columbia	6	145,000
	34	\$8,315,000

The following is a list of charters granted during this week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Fernie, B.C.—The Fernie Land Company, Limited, \$10,000.

Norquay, Sask.—The Norquay Trading Company, Limited, \$15,000.

Alberni, B.C.—Pioneer Feed, Coal and Oil Company, Limited, \$10,000.

Mossbank, Sask.—The Mossbank Farmers' Elevator Company, Limited, \$20,000.

Cuelph, Ont.—H. Murton, Limited, \$16,000. C. L. Dunbar, L. W. Goetz, Ethel Anderson.

Moncton, N.B.—J. A. Marven, Limited, \$300,000. S. L. Holder, G. Jamieson, F. M. Brown.

Kenora, Ont.—Shragges', Limited, \$80,000. A. Shragge; Elizabeth Shragge, J. F. MacGillivray.

Berlin, Ont.—The Ideal Paving Company, Limited, \$40,000. W. Douglas, R. J. Gibson, Clara Johnston.

Cobalt, Ont.—Silverado Mining Company, Limited, \$1,000,000. D. R. O'Gorman, T. W. Parker, D. Quinn.

Sudbury, Ont.—Gamble-Robinson, Sudbury, Limited, \$40,000. F. F. Gamble, C. J. Sanders, R. E. Digby.

Bowesville, Ont.—The Bowesville Telephone Company, Limited, \$3,000. D. J. O'Brien, C. H. Day, J. J. O'Meara.

Victoria, B.C.—Cameron-Genoa Mills Shipbuilders, Limited, \$25,000; Randall, Greenshaw and Company, Limited, \$10,000.

Prince Edward Island.—The Gaffney Brothers Silver Black Fox Company, Limited, \$30,000. C. B. Gaffney, W. A. Prescott, J. A. Gaffney.

Dundas, Ont.—The Chapman Engine and Manufacturing Company, Limited, \$250,000. S. H. Chapman, G. W. Williams, F. E. Lennard.

Wilmington, Del.—Brutus Mining Company, \$100,000; Mandy Mining Company, \$100,000; Tonopah Canadian Mines, Company, \$100,000.

Vancouver, B.C.—Banner Shoe Store, Limited, \$10,000; Rainsford and Company, Limited, \$20,000; East Half of Lot Three, Block Five, Old Granville Townsite, Limited, \$75,000; Broadway Theatre Company, Limited, \$20,000.

Windsor, Ont.—Straus Realty, Limited, \$140,000. D. R. Dupuis, J. L. Selling, J. Ackerman; Remington UMC of Canada, Limited, \$25,000. J. A. Worrell, W. D. Gwynne, C. E. Bell; the Turner Wheel and Machine Company, Limited, \$20,000. H. E. Guppy, G. F. Turner, W. T. Turner.

TORONTO CITY AGENCY FOR FIRE COMPANY

A fire insurance company desires a city agent in Toronto. The company will furnish free office, with help for the first year and pay a commission of 25 per cent. on business obtained. A man with experience in the fire insurance business is desired. Correspondence on this matter can be addressed to *The Monetary Times*.

MANITOBA TO ISSUE BONDS?

Hon. Edward Brown, provincial treasurer of Manitoba, is reported to be in New York in connection with further borrowing for his province.

Manitoba sold \$1,000,000 of 5 per cent. three-year bonds in January at 97½ interest. Another block of similar bonds, amounting to \$1,073,000, was sold in March. All of the first issue, and approximately \$800,000 of the second issue, was marketed in the United States.

NORTHERN ASSURANCE COMPANY

Established in Aberdeen 80 years ago, and in Canada since 1867, the Northern Assurance Company has during that long period, extended its operations to many parts of the world. In this country it writes only fire insurance and has built up a substantial business on sound lines. At the end of 1915 it had in force here risks amounting to \$89,765,775. The net cash premium income for the year was \$770,010. The gross amount of policies new and renewed in 1915, was \$68,448,611. The net amount paid for losses was \$385,857. The ratio of losses to premiums was 52.31 per cent., a favorable experience.

For more than 30 years, the management of the company's affairs in Canada has been in charge of Mr. Robert W. Tyre, who is one of the best-known underwriters on this continent. Under his management the company has steadily increased both its prestige and business in Canada. Last year an increase of \$34,000 was recorded in the net premiums received in this country.

The Northern is one of the strongest of the British companies. The financial statement just published, indicates the excellent security available for policyholders. The reserve for unexpired risks is maintained in the high ratio of 50 per cent. of the 1915 premium income, equal to \$3,297,890, and in addition a conflagration reserve of \$6,000,000 is held. The fire funds of the Northern, including the balance of profit and loss account carried forward of \$605,175, amount altogether to \$10,293,065, giving the high proportion of about 150 per cent. of the fire premium income last year, apart from the paid-up and subscribed capital. The total assets of the company are in excess of \$42,000,000 after the investments held have been written down to existing market values.

It has Correspondents in all Cities of importance throughout Canada, the United States, the United Kingdom, the Continent of Europe, and the British Colonies.

Collections made in all parts of the Dominion and returns promptly remitted at lowest rates of exchange. Letters of Credit and Travellers' Cheques issued available in all parts of the world.

CANADA'S TARIFF POLICY

Views of the Western Provinces as to Protection—Farming Must Be Made More Profitable

[The following letter comes from Mr. R. G. McKenzie, secretary-treasurer of the Manitoba Grain Growers' Association, Winnipeg, in regard to Mr. G. Frank Beer's article on the Canadian tariff which appeared in *The Monetary Times* on May 26th.]

To the Editor:—

An article appeared in *The Monetary Times* of May 26th, by Mr. G. Frank Beer on "Canada's Tariff Policy After the War," dealing at length with the question of how to levy custom duties so as to encourage production for exportation to meet the charges on money borrowed by Canada for public and industrial purposes.

Canada was carrying an enormous burden of debt before the war. With the added cost of the war a burden is imposed that requires the highest type of statesmanship to provide for without incurring the danger of unduly suppressing the development of production—that is to say, impose a tax that will stimulate production and at the same time provide sufficient revenue.

Mr. Beer's article throughout indicates that he regards custom duties as the established method of providing the greater part of the national revenue, and that the problem confronting us is not that of providing new sources of revenue, or substituting for import duties some other form of taxation to meet our obligations, but to distribute the burden more equitably and at the same time contribute to the development of our natural resources and the production of farm crops, which are the main sources on which we must rely for meeting the national debt—in short, that the problem to be solved is to adjust the burden now imposed on the development of our natural resources by the protective element in custom duties.

Back to Hamilton's Time.

It is true that customs duties rank among the most ancient methods for levying revenue for public purposes. In feudal times, the lord of the manor levied taxes on his vassals in warrant or some ancient grant or privilege, upon cattle or goods, or bridge, or ferry, or toll gate, or point of passage from one country or province to another. The rich and poor had to contribute alike to these taxes according to their ability to pay (in that respect they were an improvement on our system). In countries like the United Kingdom customs duties came in process of time to be levied at the sea-ports and these applied only to the imports from foreign countries and for some years back on goods not manufactured or produced at home. There was no suggestion of protection to home manufacturers.

The element of protection as a theory adopted in custom duties is a modern conception and dates back in the United States to the year 1791, when Alexander Hamilton, secretary of the United States treasury, made a report to Congress on the best method of encouraging manufacturers. His basic argument was in favor of temporary duties on manufactured goods imported from abroad until such time as the "infant" industry might take firm root. Hamilton considered that the duties would not have to be very high, or have to be very long continued in order to accomplish their legitimate end, after which they would become unnecessary and would naturally be abolished. He admitted that import duties were taxation to the consumer, and therefore burdens, but burdens which might well be temporarily borne for the ultimate advantage arising from cheaper goods and diversified industries.

More Protection and Higher Prices.

The experience of the century and a quarter that has elapsed since the introduction of the element of protection in import duties in the United States has proved conclusively that Hamilton's theory of the results of protection was a myth, in so far as the growth of the industries would make protection unnecessary and cause it to be abolished, but on the contrary, as the industries gained strength and political power, they became more insistent for increased protection

against competition, at the same time increasing the selling price of their goods, causing the burden of taxation on the consumer to increase proportionally.

The same argument was used in favor of the National Policy when introduced in Canada in 1878, and a similar result ensued. The consumer was pleaded with to submit to burdens which might be borne temporarily in order to develop diversified industries and reduce the cost of goods thereby. Our experience is, that at no time were manufacturers more insistent for more protection and goods were never higher in price.

Apologists for protection no longer deny that protection is a burden on the consumer. Mr. Beer clearly recognizes this fact, but goes on the assumption that while protection is a burden on the consumer and producers (other than manufacturers), it can be and should be so adjusted as to press less heavily on producers than it now does. The remedy he suggests is the appointing of a commission to make an investigation so as to furnish a basis on which the necessary adjustment can be made.

Cannot be Done.

Efforts have been made ever since the protective element has been introduced into customs duties to make such adjustment, without any satisfactory results, for the simple reason that it cannot be done, because protection destroys the balance of equity in taxation. Further, the method of collecting revenue through customs duties by virtue of which one group of individuals is placed in a position where they can levy toll on their neighbors is inherently unsound. Wherein should we tax the money invested in agriculture for the benefit of capital invested in manufactures? On what principle of justice can a government give a group of men who invest \$100,000 in a manufacturing industry, the legal right of levying a tax on ten men who invest ten thousand each in land to create wealth for the country?

As a means of securing revenue in Canada import duties are an expensive failure inasmuch as for every dollar paid into the Dominion Treasury two or three dollars go into the pockets of manufacturers.

Sir Richard Cartwright, than whom in his day there was no better authority in Canada on statistics and fiscal questions, made the statement in 1893 that if you add together the sum that has been paid into the treasury and the larger sum that has been extracted from the pockets of the people for the benefit of a few private and favored individuals, you will find that the total for the last fourteen years is hardly less than one billion dollars.

Protective Taxation Indefensible.

I quote the following from the article in the *Encyclopaedia Britannica* on Taxation:—"Sir John A. Macdonald, the great Protectionist Prime Minister of Canada, in a conversation with the present writer in 1892, avowed without hesitation that protective taxation in Canada was indefensible on economic grounds, and he defended it chiefly for political reasons. Politically, one may differ from him, but economists as such, must either be silent when political reasons are alleged for taxes that are against fundamental maxims, or must be content to point out the cost of the taxes in order that the community concerned may decide whether the object in view is obtainable by means of the taxation and is worth the price."

The effect of a protective duty is to raise the price of goods to the consumer—consequently, it automatically decreases production by increasing the cost. No less an authority than Sir George Foster, minister of trade and commerce, has stated that a protective duty is no use unless it raises the price of goods. The raising of revenue is only an incident in the present Canadian tariff.

Competition Among Manufacturers.

For a time after the inauguration of the National Policy the effect of protection was tempered to the consumer by competition among the home manufacturers. Being immune from competition by protection against foreign manufacturers they conceived the idea of ridding themselves of competition among themselves by combinations. Not until these combinations got effective control did the blighting effect of protection on farm production become most clearly in evidence. In *The Monetary Times Annual*, January, 1912, a reference was

OFFICERS OF THE BANK
R. Campbell, General Manager L. M. McCarthy, Supt. Branches
V. F. Cronyn, Supt. Eastern Branches J. P. Roberts, Supt. B.C. Branches

made to industrial amalgamations in Canada in the following terms:—

"The number of industrial amalgamations consummated in Canada from January, 1909, to December, 1911, was 41.

"The aggregate authorized capitalization, including bonds, of 39 of these mergers was \$334,938,266.

"The 41 amalgamations absorbed 196 individual companies.

"The aggregate capitalization of 190 of these individual companies was approximately \$124,766,380, which amount, in various ways, was increased upon amalgamation.

"The 28 securities issued to the public, resulting from the amalgamation movement, totalled \$44,071,666.

"With thirteen of these, amounting to \$15,950,000, an aggregate bonus of \$6,567,500 was given.

"The facts and figures above illustrate the growing extensiveness of the tendency to amalgamate. Operations have not been confined to one, or a few classes of commodities. Companies handling soap, cereals, asbestos, bread, flour, milk, cars, leather, lumber, cement, dried fish, carriages, bolts and nuts, steel, coal, ice, felts, shoes, furs, crockery, paint and jewellery have all seen apparent or real gain in a combination of interests. Arrangements have also been made between navigation, light and power, brewery, canning, retail box trade, and other companies. These instances are sufficient to exemplify the widespread nature of the new feature in our commercial and financial progress, which is slowly painting a new economic map of the Dominion."

The outstanding facts in connection with these consolidations is the very large increase in capital—mostly composed of watered stock. The experience of the Maple Leaf Milling Company illustrates how these combinations of capital work out. The capital of this company consists of \$2,500,000 preferred stock and \$2,500,000 common stock; a large percentage of the common stock was given the purchasers of the preferred as a bonus. The flour mills are protected in their raw material by what is equivalent to an export of ten cents per bushel duty on wheat going to the United States. They have the home market for flour to themselves by import duty of sixty cents per barrel on flour with the result that this common stock which represents nothing but the paper it is written on, was announced worth 90 per cent.

The only people in Canada who contribute to the revenue by customs duties are the purchasers of foreign goods, and the only way to increase the revenue from that source is to encourage importations of dutiable goods.

Boot and Shoe Industry.

As an illustration of how protection affects revenue and cost of goods, take the case of the boot and shoe industry of which the census bureau gives the following information for the census year 1910:—

Value of manufactured products	\$33,987,248
Number of employees	17,227
Paid salaries and wages	7,698,333

Average wage per employee—\$446 per annum, or \$1.50 per day—not a very attractive wage, about one-half what an ordinary day laborer receives in Winnipeg.

For the year ending March 30th, 1911, Canada imported \$2,045,835 of boots and shoes, on which was paid \$585,996.71 duty. Of this importation \$292,014 was from Britain, duty paid \$59,999.52—the balance \$1,742,699 from United States, duty \$522,809.70—equal to 30%. Our imports from the States were six times as much as from Britain.

The value of home product is given at \$33,987,248, of which \$60,935 worth was exported (over half going to the United States)—presumably the balance was consumed in Canada.

Assuming that manufacturers add the full extent of their protection to the selling price of their product when sold in the home market, the people of Canada paid an account of 30% protection on boots and shoes last census year.

To the government customs duties..... \$ 585,996.71
To manufacturers (after deducting the exports) 10,177,893.90

Total \$10,763,890.61

The boot and shoe manufacturers paid in wages and salaries \$ 7,698,330.00

Leaving a balance of \$ 3,065,560.61

The people of Canada paid on account of protection to the boot and shoe industry more than the total wages and salaries paid to the employees of the boot and shoe manufacturers during the census year. If they added only two-thirds of their protection the people paid their wage bill.

Difference in Prices.

The wholesaler who imports goods adds to the invoice price the cost of his goods delivered in his warehouse, eliminating all cost but custom duties out of our calculation in the case of boots and shoes.

A wholesaler imports boots invoiced him at \$2.

	Under Protection.	Under Free Trade.
Invoice price	\$2.00	\$2.00
Duty at 30%	.60	
	\$2.60	
Add 20% profit	.52	.40
	\$3.12	\$2.40
Selling price to retailer		
Retailer adds 25% profit.....	.78	.60
	\$3.90	\$3.00
Sells to consumer		

Consumer pays \$3.90 for boots under protection that he could get for \$3.00 under free trade—no one but the manufacturer gets the benefit of difference, \$3.00 a day under free trade is as good as \$3.90 under protection in the purchasing of boots for a wage earner.

A farmer selling wheat at 75 cents could secure a pair of boots under free trade for 4 bushels. He has to give 5 1-5 bushels under protection. In other words every fifth bushel goes to the manufacturer. The boot and shoe industry added a mere trifle to the export business of Canada. Added \$585,000 to the revenue—taxed the people over ten million dollars for this in support of that industry.

Cotton goods manufactured \$24,584,931
Cotton goods entered for home consumption.. 21,118,954

Making \$45,703,885

consumed in Canada. Government collected \$4,774,320.31 duty (a trifle over 22½%) which the people paid to the revenue and on top of that \$5,400,000 to the manufacturers. This industry exported \$217,594, which was their contribution to our volume of export that year.

As to Agricultural Implements.

Agricultural implements manufactured, \$20,722,722, added to our volume of export \$5,921,818. The farmers paid the government \$901,135.70 in duty and the manufacturers a tax of \$2,960,180.80. The ethics of modern business is to get all you can for what you have to sell, and I assume the manufacturers take advantage of the full extent of their protection. Western farmers import a considerable quantity of farm implements from the United States, which after paying duty can be delivered on the farm cheaper than Canadian goods. The following list is an example of the duty paid:—16-inch sulky plough, \$7.28; 12-inch gang plough, \$11; 14-inch walking plough, \$2.48; 20-inch D.D. drill, \$20.40; 16 x 16 disc harrow with tongue truck, \$7.12; 3¼ x 10 wagon, \$22.53; No. 106 top buggy, \$21.25; mower, 5-ft., \$3.90; rake, 10-ft., \$4.56; 70-bushel manure spreader, \$17.60.

Those conditions resulted in not only retarding progress in increased development, but are also driving people off the land. According to the Dominion census of 1911, the acreage under field crop in Manitoba, Saskatchewan and Alberta in 1900 was 3,600,119 acres. This crop area was increased in the decade ending 1911 to 17,677,091 acres. In the four years 1908-1911 when the growth of the prairie provinces was at its height, the acreage under crop increased 4,300,000, nearly 50%. The next three years showed an increase of less than 95,000 acres. It is estimated that upwards of 3,000,000 acres of land were brought under cultivation in 1910, and a like amount in 1911, since which very little land was broken until last summer. Further, this arrest of progress in develop-

ment of farm operations was in the face of the fact that, according to immigration officials, over 519,213 immigrants were placed in the prairie provinces during that period.

The report of the department of the interior for the year ending March 31st, 1914, indicates that there are available for farming in the three provinces 145,271,128 acres, of which 120,000,000 have passed out of the hands of the Crown into private ownership. Of these 120,000,000 less than 20,000,000 were in crop last year, still leaving over 125,000,000 of the best land under the sun for growing cereal crops to be brought under the plough. The report of the department of the interior shows that 50,100,000 acres (including military homesteads) are under homesteads. This means that 313,125 patents were issued to homesteaders. The census of 1911 reports 199,537 farms occupied in that year in Manitoba, Saskatchewan and Alberta. In view of the large quantity of land sold by railway companies and others in addition to land granted to homesteaders there must have been a great trekking of farmers from the land since the prairie provinces were first opened to settlers. This clearly indicates that the problem of increased production of farm crops is not so much to get people on the land as keeping those who have gone on the land by making farming profitable and attractive. Clearly the trouble is not with the land or the men. There are no farmers anywhere that produce as much wealth per capita as the prairie farmers, yet the experience of many of them, when they sell their crop, pay their bills incurred in producing the crop, is that they have not enough left to clothe themselves and their families properly.

Mr. Beer points out that manufacturers contributed only 12% of the export trade in 1914, and goes on to say, "Industry cannot afford to be content with the home market, leaving to agriculture the burden of paying, as is so largely the case, in this instance, for all imports including raw material for manufacturing and the interest on the foreign debts." Neither can Canada afford to continue an economic system that paralyzes agricultural production and deprives herself of the use of the hidden wealth remaining dormant in the millions of acres of fertile soil.

Sources of Revenue.

The only way import duties can be made an effective instrument for collecting revenue is by imposing an excise duty on goods manufactured in Canada equal to the customs duties, as is now being done in Great Britain. This would in a measure, have the effect of the tax paid by consumers to manufacturers going to the government.

There is yet another source of revenue available, which the government has not touched, and one that would not only provide ample revenue, but would also be a strong factor in increasing production—that is taxation on land values. Space will not permit me to elaborate on this, but the question is becoming acute. The consideration of that method of taxation will be forced on the attention of the government by an enlightened public opinion. Let me, however, point out one fact. In the three prairie provinces we have 100,000,000 acres of virgin soil largely held by non-residents, many of them foreign residents. All this land is adjacent to transportation facilities and held out of production for a rise in price. It passed from the Crown at \$1.00 per acre or less, now held at anywhere from \$10.00 to \$30.00 an acre, and sometimes a great deal more. As values increase by settlement it will be still further raised in price. The holders of this land if subject to taxation by the government for revenue purposes would be induced to dispose of their holdings to settlers at prices that they could afford to pay. These settlers would at once become producers, create wealth, and add to our volume of export. Taxation of land values produce revenue and increase production. No possible adjustment of customs duties can do that. Taxation of land values would impose a burden of taxation on the wealthy man who is holding land out of use for a rise in price, and would enable the man who is producing to increase from year to year his production by the improvements effected on his holdings from the increment of profit which now goes to the manufacturers.

Exports of Canadian wheat during the present month show that the crop is being transported out of the country with great expedition this year. The total for this June was 21,003,485 bushels as compared with 6,611,879 in the corresponding month last year.

"LOP-SIDED TARIFF," AS SEEN FROM REGINA

Demand for Free Wheat Policy—East Should Confer with West

The suggestion that "the western farmers will hoist the banner of free trade," expressed by Mr. Vere C. Brown, superintendent of the western branches of the Canadian Bank of Commerce, in his comments on Mr. G. Frank Beer's article on tariffs after the war, printed in *The Monetary Times* on May 26th, has brought the following editorial from the Regina Leader:—

"The Regina Leader is not aware that the farmers of Western Canada have ever demanded unlimited free trade, nor do we imagine they propose to do so in the near future. They have asked for the gradual elimination of all customs duties on imports from Great Britain and all British dominions with the object of achieving complete free trade within the Empire within a stated period of years, just as we have free trade between the several Canadian provinces. We see no reason why the farmers should depart from this policy; if anything, the war has but added strength to the reasonableness and wisdom of it.

"Western farmers will most assuredly demand that the existing tariff schedules be revised with a view to the imposition of customs taxation upon a more equitable basis than at present prevails. The tariff is now lop-sided, bearing altogether too heavily upon the great mass of producers and consumers, and too lightly upon those who can afford the luxuries as well as the necessities of life.

To Confer Benefits on Manufacturers.

"The present tariff is likewise framed to confer enormous benefits upon manufacturers, while, on the other hand, it not only does not confer benefits on other industries, but actually acts as a detriment to them.

"For example, not only western farmers, but western interests in general will continue to demand the adoption of the free wheat policy. Free wheat would be a boon of almost incalculable value to the west, and at the same time it would work no injury to any other section of the Dominion, and to no Canadian industry. With free wheat the farmers of the west would be in a better position to meet such taxation demands as are made upon them, and there would assuredly be greater readiness to accept certain duties which other parts of the Dominion regard as a necessary protection.

"But at present the farmers of the west have good reason for feeling that in tariff matters they are ground between the upper and nether millstones; that the tariff operates to increase the price of the goods they have to buy and to depress the price of the produce they have to sell.

"The west is ready—it always has been ready—for a give-and-take policy in tariff matters. But it is not ready, and is less ready now than ever before, to calmly submit to the unfair, illogical, one-sided tariff now in effect in Canada. The sooner this is realized in the east and the quicker the big interests, who have so long been the all-powerful influence in the framing of the tariff schedules adopt a policy of compromise, the better it will be for all parties concerned, and infinitely better for Canada as a whole."

DOMINION'S TRADE GROWS

Canada's exports in May amounted to \$27,734,477, and in the two months of the fiscal year to \$49,307,555, as compared with \$16,121,149 in May last year and \$29,342,807 in the two months' period.

Another feature of the monthly statement is the rise in imports of free goods, as well as in dutiable commodities. Dutiable imports in May amounted to \$39,740,167, as against \$19,851,612 in May last year, while imports of free goods increased from \$14,539,196 in May last year to \$29,857,645.

Imports of all classes inclusive of coin and bullion amounted last month to \$70,230,181, compared with \$35,046,944 in the same period last year. May, including bullion, amounted to \$94,654,295, as against \$42,080,486. The grand total of all Canadian trade for May was \$176,873,466, and for the two months of the fiscal year \$284,555,958. The total for May last year was \$80,023,321, and for the two months \$145,244,352.

Exports of agricultural products during the month just closed rose to \$47,433,750, an increase of no less than \$34,687,623. Other exports also show substantial increases.

GEORGIAN BAY CANAL

Are We Justified in Spending \$125,000,000 on Its Construction?—Interim Report

An interim report of the Georgian Bay Canal Commission has been presented by Mr. W. Sanford Evans, chairman of the commission. In an introductory statement it is pointed out that, under the authority of parliament, a survey and investigation of the practicability and probable cost of the long-mooted proposition to construct a deep waterway from Georgian Bay to the harbor of Montreal, by way of the French and Ottawa Rivers, was initiated in 1904 under a board of engineers. In 1909 this board submitted a report (Georgian Bay Ship Canal Report upon Survey, with Plans and Estimates of Cost, 1908), the plans providing for a waterway 22 feet deep, with a length of 440 miles, in which there would be 28 miles of canal excavation, 66 miles of channel dredging, and 346 miles of river and lake; with 27 locks of a minimum length of 650 feet, with 65 feet clear width and 22 feet clear depth, the lift ranging from 5 feet to 50 feet; and with a minimum water supply in the summit basin, capable of being increased, which would permit of 20 lockages per day throughout a season of about 210 days. The cost, originally placed at \$100,000,000, was, in view of increases in the cost of materials, subsequently estimated at \$125,000,000.

In 1914 a Royal Commission was issued for a report upon the "commercial feasibility" of such a canal, and in general upon many elements of the transportation problem in Canada. The engineers had reported that the canal was practicable, but the report of the Georgian Bay Canal Commission was to be upon the question whether or not it would pay Canada to spend \$125,000,000 upon this public work.

To Have Economic Justification.

A canal is constructed to carry traffic, says the report, and from the national standpoint might have economic justification:—

(1) If existing traffic facilities are congested, or in danger of congestion within a period of time for which provision should now be considered, and if the proposed canal offers adequate and satisfactory additional facilities.

(2) Even if actual congestion is not threatened, then if a sufficiently great volume of traffic is likely to be affected by the building of the canal so that the decreased cost or the increased convenience will bear a remunerative relation to the capital invested.

Under this heading there would be two inquiries:—

(a) As to the volume of traffic that would probably use the canal itself;

(b) As to the volume of traffic likely to be affected by the competitive influence of the canal, through the effect of the new route on the rates and conveniences of other routes.

(3) If its construction would probably promote the development of traffic to a greater extent or at a more rapid rate than an alternative improvement in facilities, and to a degree commensurate with the cost.

(4) If in connection with its construction collateral assets or benefits might be created, of which water-powers may be taken as one example, which, properly appraised, might so supplement the traffic advantages as to make the total national return appear profitable.

This interim report does not deal with possible collateral values created by the building of the proposed Georgian Bay Canal, which must later be enquired into, but solely with the problem of traffic. Neither does the report deal with the important question of local traffic, but only with the problem of through traffic.

Weight of Freight.

In the present report the quantities, and not the values, of freight traffic are taken into consideration, whenever these can be obtained, and less attention is paid to freight rates than to the general conditions that underlie freight rates.

It is the weight, or the bulk, of freight traffic that chiefly creates a transportation problem, and not its value. Cargoes and carloads are measured by tons and not by dollars. To illustrate: In the fiscal year, 1912-13, Canada imported unset diamonds to the value of \$3,846,350. If put into one package, these diamonds would probably weigh about 44 pounds, and the whole package could be thrown into the corner of

the small safe in one express car. In the same fiscal year Canada imported large quantities of soft coal, aggregating over five times the value of the diamonds. Taking for comparison the quantity of soft coal which at the entered price would give a value equal to the diamonds, we have a freight tonnage of 1,923,175 tons. According to the report of the department of railways and canals, there were in that year on all the railways in Canada a total of 14,746 coal cars, with an average capacity of 38½ tons. If all these cars were assembled to carry the above amount of coal, each car would have a little over 3½ loads. Put in another way, if these cars were made up into trains of forty cars each, and twelve such trains were despatched per day, it would take 104 days to move the load. Here we have a big transportation problem, whereas the same value in diamonds offers no transportation problem at all, but only an insurance or police problem. It may be much more profitable for a country to produce or trade in goods that must be weighed by ounces or pounds, but it is only tons, no matter what their value, that can fill vessels or cars and that require new canals, deeper channels, more railway lines and heavier rails and bridges.

No Recommendations Made.

Freight rates do not always explain traffic movements, and are sometimes symptoms rather than causes. A relative cheapness of rates will not always divert traffic from other routes; for traffic often seems to move upstream against higher rates. There are many conditions which determine the routing of traffic, and it is impossible to reach sound, practical conclusions by studying freight tariffs alone. What has been sought in the present investigation is the causes of traffic movements, whether these causes have manifested themselves in freight rates or not. There may be artificial interferences with the operation of these fundamental causes, such as may arise from the exercise of governmental regulation on the one side, or from conferences, affiliations, pools, or combinations on the other, but it has not been possible in the time to trace the influence on the courses of traffic that may have been exerted by these means.

No recommendations are made in the report, which is under the signature of W. Sanford Evans, chairman of the Georgian Bay Commission. The government have sufficient problems in hand with the war and the railroad situation at present, which probably accounts for the exclusion of recommendations from the present report.

AUSTRALIA'S LOAN IN LONDON

Few loans except those for war purposes have been made in London since the outbreak of war. The successful underwriting there last week of £4,000,000 Australian Commonwealth 5½ per cent. bonds, has therefore attracted considerable interest in financial circles here. The bonds are redeemable 1920-1922. The issue was made at par and is convertible into stock free of stamp duty. A discount will be allowed for payment in full, and at this rate, taking into account redemption at par, the yield works out at about 5.75 per cent. This is the first occasion on which the Commonwealth of Australia has appeared as a borrower in the London market, previous loans having been issued internally. In some quarters there was a disposition to criticize the rate of interest as too high, but in this connection the fact that the bonds mature in four to six years must be taken into consideration.

The general opinion is that the terms were generous, having regard to the level of other colonial securities. There is some discussion of the fact that the British government should have sanctioned such an important loan at this time, when the question of another big war loan is under discussion. The issue of the 4½ per cent. war loan in June of last year was preceded by the offer of a number of colonial 4½ per cent. loans. May the inference be drawn, asks the London Financier, that the interest on the next big British government loan will be 5½ per cent.? There seems no obvious reason for adopting such a course in view of the popularity of the 5 per cent. exchequer bonds. Even a 5½ per cent. loan at par would give a net yield of only £3 18s. 9d. per cent., after deducting income tax at the maximum rate, though, allowing for the discount on payment in full, a clear 4 per cent. yield might be shown.

SEED LIENS GAVE UNFAVORABLE IMPRESSION

Loan Company's President States Great Harm was Done
by Precedent Established

The distribution of seed grain by the federal government has created much discussion all over Canada, and I have no hesitation in stating that it will take this country many years to live down the unfavorable impression brought about by placing seed grain liens ahead of mortgages and other vested interests appearing on the title to the property, was a remark of Mr. W. Toole, president of the Mortgage Loans Association, of Alberta, at the annual meeting of the association. All classes were agreed that assistance was necessary, in fact, a national requirement, and, as not only Canada but the empire has benefited in such a great time of need, it is hardly fair that the individual mortgagees, who had, prior to the government assistance, granted every leniency and consideration in the way of extensions of time should practically lose their security by reason of the seed grain lien taking priority over the mortgages.

It was such a shock to the loaning institutions that many of them do not yet realize their position, but the greatest harm has been done by the precedent established, that vested interests are treated with absolute indifference. Governmental assistance made necessary by reason of crop failure or other causes is not new in the history of this Dominion, or many other parts of our empire, but it is the first occasion with which I am familiar where vested interests have not received more consideration.

Charge Against Title.

If it were felt that the government should have security other than lien on the crop, then the registration should have taken its proper place as a charge against the title. In any event, it would have been a simple matter to so administer the relief by naming a date after which liens, if filed, would have to take their rotation on the title, so that the mortgagee, and those anxious to increase or make new loans to anyone in the province might rely on a search at the proper land titles office, which would have much facilitated investment business.

Last summer, when it was evident that a bountiful crop would be harvested, the Alberta association joined with Saskatchewan and Manitoba associations in presenting to the federal government the seriousness of the situation as affecting mortgage investments in Western Canada, and earnestly requested that efforts be made to increase the efficiency of that department, so that full advances for seed grain be collected out of the crop of the current year in every case where the debtors had sufficient grain to enable them to make such payment. The efforts, so far as the Alberta association is aware, brought little result.

Attorney-General's Assistance.

Attorney-General Hon. C. W. Cross was written to, stating that the time for registering these seed grain liens was rapidly approaching, and suggesting that it would be a great benefit to mortgagees if they were furnished with notices of registration, and he replied, thanking the association for the suggestion, which he thought was a good one, and stating that he had issued instructions to the registrars at Edmonton and Calgary that it should be followed. Notices have been sent to mortgagees, and the information has been of the greatest assistance. This association would now like to make arrangements with the federal government to furnish each mortgagee or encumbrance with a statement of account as at January 1st, 1916, and to advise of subsequent payments. If that information could be obtained, said Mr. Toole, it would facilitate the money lending business in the province. Many members of the association have complained of the great difficulty they are experiencing in getting definite information so that new loans can be disbursed without much unnecessary delay and consequent expense and disappointment to the borrower. This unsatisfactory state of affairs in connection with seed grain administration has been brought to the attention of Mr. R. B. Bennett, K.C., and he states that he has been promised an improvement of existing conditions regarding administration of seed grain liens.

The lobster packers of eastern Canada are continuing their representation to the French government to have the embargo against lobsters raised, but so far without result.

JUNE MUNICIPAL BOND SALES

Ottawa and Calgary Made Issues of Over One Million Dollars—Good Market for Ontario Municipals

The municipal bond sales in Canada for June, as compiled by *The Monetary Times*, amounted to \$4,428,100, compared with \$2,649,000 for May and \$2,395,744 for the corresponding period of last year.

Comparing the record of June, 1915, with that of the month just ended, the bond sales are as follow:—

	1915.	1916.
Canada	\$2,395,744	\$4,428,100
United States		2,136,226
	\$2,395,744	\$6,564,326

The municipal bond sales in Canada during the first six months of the past five years, according to *The Monetary Times'* bond record, were as follow:—

	1912.	1913.	1914.	1915.	1916.
Jan.	\$2,133,531	\$1,337,500	\$1,953,137	\$1,784,947	\$1,909,441
Feb.	2,596,378	1,038,806	5,995,336	3,047,011	1,419,909
Mar.	1,926,716	335,492	5,123,176	2,572,357	2,027,741
April	927,160	3,693,857	2,847,953	8,603,094	1,979,852
May	1,928,748	880,630	6,400,755	3,464,281	2,649,000
June	1,690,344	2,435,726	4,617,857	2,395,744	4,428,100

Canadian municipal bonds sold in the United States during the first six months of 1916, compared with sales of 1915, were as follow:—

	1914.	1915.	1916.
January	\$ 50,000	\$ 340,000	\$3,183,215
February	18,000	6,471,000	899,500
March	25,000	6,543,947	595,000
April	1,750,000	7,100,825	2,158,000
May	2,100,000	600,000	7,219,000
June			2,136,226

The following are the particulars of the sales in Canada by provinces:—

Ontario	\$2,015,655
Quebec	1,793,000
British Columbia	232,500
Saskatchewan	213,945
Nova Scotia	124,700
Alberta	30,000
	\$4,409,800

The following are the details:—

SASKATCHEWAN'S CROP IS ENCOURAGING

The latest report of the Saskatchewan department of agriculture is encouraging. All crops are making headway. Wheat is from nine to 12 inches high, oats from five to eight and barley from three to six inches. The weather during the past two weeks has been cool and showery and warmer weather is wanted. Plenty of moisture is assured, for the ground is practically soaked. The following is a summary of the acreage:—

	Wheat.	Oats.	Barley.	Flax.
1916	6,058,441	3,025,210	281,809	556,310
1915	6,884,874	2,846,949	272,299	550,674

GOLD FROM OTTAWA

Present Movement to New York Involves About
\$100,000,000

With the arrival in New York of \$10,000,000 of gold last week from London, the total imports by the United States of that metal since the present movement started on May 11th, exceeds \$109,000,000, divided as follows: From Ottawa to New York, \$79,246,000; from Ottawa to Philadelphia, \$20,000,000; from London to New York, \$10,000,000; total, \$109,246,000.

Origin of the Gold?

Practically the entire amount has been consigned to J. P. Morgan and Company, agents of the British treasury. The question of the origin of the gold that went from Ottawa has no place at present in print and is causing considerable guessing in New York. Here is one version: "Early in the war the Germans captured a British treasure ship, containing a large consignment of the precious metal bound to London from South Africa. This undoubtedly became responsible for great subsequent caution, and the presumption has been that by means of warships the metal has been transported to Canada to be readily available to meet the situation in connection with the sterling exchanges which recently has become current in New York. It was at first supposed that the metal was coming from the Bank of England's branch that was established at Ottawa soon after the war started. But it is now evident that it must have come from a special government store not connected with the official English bank, for the bullion supply of Threadneedle Street has shown a steady increase during the entire period of the movement."

How Gold Depository Works.

Regarding the Bank of England gold depository at Ottawa, it is interesting to recall that the minister of finance recently informed *The Monetary Times* that the arrangement under which he was authorized to receive gold in trust for the Bank of England was as follows:—

The minimum of the transaction was established at \$20,000; shipments to be made in kegs or boxes and a statement that the amount was to be held in trust for the Bank of England to accompany the shipment, which was to be addressed to the Minister of Finance and Receiver-General of Canada, Ottawa; the minister to be advised also as to whom the proceeds were to be paid in London.

On the gold being received and checked, the Bank of England was advised by cable of the amount and to whom the proceeds were payable in London. The rate established by that institution for gold was 77/6d. per ounce for standard fine bars and 76/3/4d. per ounce for eagles. If sovereigns were accompanied by a guarantee from the person shipping same that they were of correct standard weight—namely, 122.5 grains for sovereigns and 61.125 for half-sovereigns, the bank would pay out a like amount in pounds in London, less three pence per ounce to cover freight and insurance.

SEVENTY MILLION BUSHELS TO EXPORT

Wheat still available for export from last year's western crop has been estimated at 70,000,000 bushels, by Mr. W. A. Black, of the Ogilvie Flour Mills Company, the estimate in bushels being based on the following figures:—

Northwest crop, 1915, 365,000,000; inspected to June 24, 292,344,000; in transit not inspected, 4,000,000; in interior elevators, 23,000,000; used for seed and feed, 24,000,000; ground in country mills not inspected, 5,000,000; less for double inspections, 3,000,000; and still in farmers' hands, 19,656,000.

The amount of wheat available on June 24 was as follows: Wheat in farmers' hands, 19,656,000; in interior elevators, 23,000,000; in transit not inspected, 4,000,000; in transit east of Winnipeg, 2,500,000; in transit on lakes, 5,000,000; Canadian visible: Port Arthur and Fort William, 14,830,000; eastern public elevators, 9,358,000; domestic requirements to September 30 are 13,000,000; less private stocks, not included in above, 5,000,000; leaving available for export, 70,344,000.

ALASKA NORTHERN RAILWAY SUIT

Defunct Sovereign Bank Asset in Courts Again—Position
of Canadian Bondholders

A dispatch from Alaska states that suit for \$450,000 has been filed in the United States District Court at Anchorage against the Alaska Northern Railway Company by John E. Ballaine, and that it may prevent payment due on July 5th of the final payment of \$650,000 due to the Canadian bondholders from the government for the railroad, which was taken over as a part of the Federal railroad system of the United States between Seward and Fairbanks. The dispatch continues:—

"Mr. Ballaine, who was one of the promoters of the Alaska Central Railroad, later the Alaska Northern, brought suit to recover \$450,000 alleged to be due him because of the action of the Canadian bondholders last year in keeping him out of possession of the Seward townsite at the time the lots had that value. The complaint recites that the federal courts decided the townsite belonged to Ballaine, and had not been included in the transfer of the railway property of the old Alaska Central to the reorganized Alaska Northern, which subsequently was sold to the government. Papers in the suit filed to-day were served on the Alaska Engineering Commission as the government still holds \$650,000 of \$1,250,000 for which the Canadian bondholders sold the railroad. Officers of the Alaska Engineering Commission had not decided to-day whether the filing of the suit clouded title to the property to such an extent as to prevent payment of the final instalment due the bondholders July 5th."

Payment Has Been Made.

The Monetary Times is informed on good authority, however, that payment has already been made to the Canadian bondholders, the transaction taking place on July 1st.

The road has been a fruitful cause of litigation. In June, 1915, questioning the right of some of the defendants to sell the Alaska Northern Railway to the United States government to form part of the government railway in Alaska, E. A. Shedd and Company, bankers, of Chicago; John R. Thompson, city treasurer of Chicago, and others, this week filed suit in the supreme court of the district of British Columbia asking that a receiver be appointed to receive the purchase price, says a Washington dispatch. Some of the defendants then were Franklin K. Lane, secretary of the department of the interior; William G. McAdoo, secretary of the treasury; John Burke, treasurer of the United States; the American Surety and Trust Company, the Sovereign Bank of Canada, the International Assets, Limited, W. E. Stavert, F. G. Jemmett, W. J. Boland and G. T. Clarkson.

Railroad is Sold.

Associate Justice Wendell P. Stafford issued a rule for the defendant government officials to show cause why they should not be restrained by an order of the court "from paying defendants W. E. Stavert, F. G. Jemmett, W. J. Boland, G. T. Clarkson, or the International Assets, Limited, the sum of \$1,150,000 or any part thereof, and the American Security and Trust Company from surrendering possession of the stocks, bonds and securities, the subject of the contract mentioned in the bill."

The railroad is now sold and the money paid, according to advices to *The Monetary Times*. At mile 198 on this road, excellent naval coal has been discovered.

UNITED STATES FIRMS OFFER CANADIAN BONDS

Various investment lists recently issued in the United States include Canadian offerings.

Messrs. Peabody, Houghteling and Company, 10 South La Salle Street, Chicago, offer bonds of Abitibi Power and Paper Company, Limited, Atlantic Sugar Refineries, Limited, Town of Iroquois Falls, Ont., William Pearson Company, Limited, etc.

Messrs. Kissel, Kinnicutt and Company, New York, are offering \$100,000 5 per cent. first mortgage sinking fund bonds, due 1940, of the Pennsylvania Water and Power Company. Toronto and Montreal capital is represented on the directorate of this company.

MUNITIONS CREDITS HERE

Total of \$151,000,000 Has Been Advanced to Date by Government and Banks

With the \$25,000,000 loan to the Imperial munitions board, arranged at Ottawa last week by the Canadian banks, the total of such advances by the banks to date is \$101,000,000. Adding the \$50,000,000 advanced for similar purposes by the Dominion government, from the proceeds of the November war loan, the total loans made to the Imperial government for the purchase of munitions here, have been \$151,000,000.

Sir Frederick Williams-Taylor, general manager of the Bank of Montreal, left New York last week on his way to London to complete arrangements with the Imperial government for the \$25,000,000 loan arranged last week. In an interview in New York, Sir Frederick said:—

Terms Favorable to Canada.

"The inducement to the banks to make this additional advance is that war contracts to a similar or greater extent shall be placed in Canada. It is in this relation that I am going to London. This means that Canadian banks are financing the Imperial government to the extent in question. Per contra, the Imperial government, as is well known, is financing Canada to a similar, or greater, extent."

It was suggested to Sir Frederick that the terms of this \$25,000,000 advance by the Canadian banks are extremely favorable to Canada, as the banks not only reap the interest on the money advanced, but exact in addition that contracts for an amount exceeding \$25,000,000 shall be placed with Canadian munitions manufacturers. Sir Frederick assented and emphasized the fact that the profits to be derived by the munitions manufacturers from orders to be placed through J. P. Morgan and Company was the principal inducement for the present loan.

Rediscount Facilities.

An Ottawa dispatch states that the \$25,000,000 transaction was greatly facilitated by the offer of the minister of finance to rediscount at any time the Imperial treasury bills held as collateral for the advances. Available bank funds are so large that it is not probable that such rediscounting will be at all necessary, but the fact that facilities for rediscounting have been provided has made possible the transaction on so large a scale.

Sir Frederick Williams-Taylor's remark as to the Imperial government's advances referred to the Imperial treasury's provision for part of our war expenditures. The total of such advances up to February last was £27,000,000, or approximately \$135,000,000. Since the time sterling exchange declined seriously (in June, 1915), the Dominion government has been able to finance its war expenditures without assistance from the Imperial treasury. Referring to this matter in his budget speech in February, Sir Thomas White, finance minister said: "Had we been obliged, during the period in question, to bring funds for this purpose from London to Canada, we should not only have made a heavy loss on the transactions, but would have been in direct competition with the Imperial treasury in selling sterling exchange for the purpose of meeting their obligations maturing due upon orders for munitions and supplies placed on this side of the Atlantic. By reason of our improving revenues and our borrowings in the United States and Canada, it has not been necessary for us to negotiate any sterling bills since June, 1915."

British Loan to Canada.

Last fall the Dominion government arranged for a total authorized loan of £30,000,000, or about \$150,000,000, from the Imperial treasury to be availed of if necessary, at the rate not exceeding £2,500,000 (\$12,500,000) a month during the present calendar year. "It will be our earnest endeavor," said Sir Thomas White in regard to this loan, "to avail ourselves as little as possible of this generous provision on the part of the Imperial government, sustaining as it is the heavy burden of financing its own unparalleled war expenses and making loans on a vast scale to the Allies."

Messrs. Mulholland, Bird and Graham, Toronto, include in their July list, Dominion of Canada war loan bonds, Anglo-French external loan, as well as a number of Ontario municipalities and townships.

COMPETITION FOR CANADIAN BONDS

British Municipals Will Be Welcome in New York, is the Impression

The announcement from London that the larger British municipalities will issue their securities in the United States, free of all British taxation, and referred to in *The Monetary Times* last week, was well received in New York financial circles. The departure is regarded there as an indication of the wide character New York City is assuming as a money centre. Until the war, only domestic municipal issues had interested banks and investors in the United States. Early last year, however, came the offering of Canadian provincial and municipal issues in that market. They had hitherto found a market principally in London. Last year's Canadian offerings were well received on the other side of the border. According to the records of *The Monetary Times*, Canadian municipal issues have accounted for \$55,000,000 of the total Canadian borrowings of \$290,000,000 in the United States since the outbreak of war.

British Municipals Welcome.

"The British municipals will be every bit as welcome," says the Wall Street Journal, commenting on this matter. "In their case, of course, the cities are not new borrowers and will probably be carrying more or less large debts. As security, however, such rich manufacturing and industrial centres as Manchester, Birmingham and Liverpool have a credit of the first order. Their existing debts will not be regarded as a detriment any more than the large indebtedness already carried by the city of New York, whose credit remains unquestioned. These British municipalities will doubtless have to show their outstanding indebtedness in relation to taxable property and other values when appealing to this market."

New York is Sampling.

"Regardless of what may be the international scope of this market after the war, when things are restored to normal once more, the fact remains that New York is gradually sampling a new and varied description of foreign loans. Our bankers have not only invested in the nearby Canadian government and municipal loans, but they have also advanced money to another British colonial possession—namely, Newfoundland. Numerous South American governments have obtained funds in this market since the war. In Europe, belligerent and neutral countries are among our borrowers. England, France, Russia and Italy have brought out issues here under varying recommendations. Our bankers have also loaned money to Germany. Now China has come forward seeking a loan here. Some of these borrowers are putting up collateral of a nature which tends to still further enlarge the interest of American bankers in foreign affairs."

LOG PRODUCTION IN BRITISH COLUMBIA

(Staff Correspondence.)

Vancouver, July 1st.

With a big production of logs in British Columbia during the past few months, there has been a strong agitation to shut down the camps for a month in the middle of summer, but it does not look as if this will be brought about. The matter has been discussed by the British Columbia Loggers' Association without a unanimous decision. Production will thus continue until such a surplus is piled up that prices are affected, and then a shutdown will be imperative. An application was made some time ago to the government at Victoria to restrain the unlimited export of logs, it being contended by some manufacturers that logs were hard to get. There are plenty now, and the export, too, has fallen off, following the operation of camps in Washington and the strike of shingle weavers there, which lessened the demand for cedar. In May, 94,771,871 feet of logs were scaled in British Columbia, one of the largest totals on record. There is now a surplus of about 40,000,000 feet on hand, and this will increase.

On Vancouver Island, there is general activity in the industry and also in the Kootenay, while on the mainland coast, where the larger sawmills are, activity is fair.

CONTROL OF CANADIAN PACIFIC

International Phases of the Stock—Results of the Past Year's Operations

Considerable interest is being shown in Canadian Pacific Railway affairs owing to the position its securities hold in the world's international markets.

A New York dispatch this week said:—"The admission of Canadian Pacific Railway stock to the British treasury list implies that income from it will be subject to a surtax of 10 per cent. that it is proposed to impose on United States securities in process of mobilization. In that event there is reason to expect large offerings of stock in the United States market, since Canadian Pacific is largely held in England, and it is even suggested that the exigencies of war times might result in a change of control of the big Canadian system to the United States, a suggestion with which *The Monetary Times* cannot agree.

Large blocks of stock sold for German account were taken in New York before the war and in the weeks following the re-opening of the stock exchange, so that United States stock holdings are greater than ever before, though still far short of a majority.

Included In Error.

The British dollar securities committee have issued a second list of securities which must be either sold to them or deposited with them, or be subject to the special income tax of 2s. in the £ on and after July 1st. No Canadian security is included, but some associated companies are, such as Duluth, South Shore, and Atlantic first mortgage bonds, and Wisconsin Central first general mortgage, and Wisconsin Central Superior and Duluth Division bonds.

In consequence of the inclusion by "error" of Canadian Pacific shares in the former list quite a number of shares are being sold to, or deposited with, the committee, in ignorance, of the fact that Canadian Pacific shares *are not to be subject to the special income tax*, says the Canadian Gazette.

Gross Show Large Gain.

While complete returns are not available, preliminary estimates show that the Canadian Pacific Railway during its last fiscal year had gross earnings of \$128,932,000 as compared with \$98,343,000. This is an increase of \$30,589,000. It is reported that the road, for the fiscal year ending June 30th, would show receipts on "special accounts" amounting to \$18,000,000, as against \$10,969,323 in 1915 and \$8,587,870 in 1914. Of the 1916 "special income" \$12,000,000 was earned by the steamship department.

The weekly earnings for June are as below:—

	1916.	1915.	
June 7	\$2,674,000	\$1,585,000	+ \$1,089,000
June 14	2,629,000	1,623,000	+ 1,006,000
June 21	2,631,000	1,619,000	+ 1,012,000
June 30	3,409,000	2,163,000	+ 1,246,000
	<u>\$11,343,000</u>	<u>\$6,990,000</u>	<u>+ \$4,353,000</u>

The Canadian Pacific Railway monthly statement for May showed the following earnings and expenditures:—

	May.	
	1916.	1915.
Gross	\$12,472,167	\$7,261,495
Expenses ...	8,096,884	4,818,493
Net	4,372,282	2,443,002

Eleven Months.

	1916.	1915.	Increase.
Gross	\$117,589,275	\$91,353,175	\$26,236,100
Expenses ...	72,052,988	60,456,579	11,596,409
Net	45,536,287	30,896,596	14,639,691

German Holdings of Stock.

The British public trustee has notified all who have claims upon the National Bank of Deutschland that they must make known their claims to him, as the custodian of alien assets in this country, by July 13th. It is well known that this bank was a large holder of Canadian Pacific Railway shares, and that the sales of them, to a considerable extent, were made in this market prior to the war. Further, a large number of these shares were not taken out of the bank's name. As the company can only recognize holders as they

stand in their books, the British holders of such shares have been without their dividend for nearly two years.

The following are the weekly earnings for June of the other Canadian transcontinental lines, the Grand Trunk and Canadian Northern:—

Grand Trunk Railway.

June 7	\$1,107,091	\$ 959,977	+ \$ 148,114
June 14	1,113,418	949,313	+ 164,105
June 21	1,152,440	989,072	+ 163,368
June 30	1,736,084	1,506,151	+ 229,933

Canadian Northern Railway.

June 7	\$ 629,700	\$ 409,400	+ \$ 220,300
June 14	880,400	403,500	+ 476,900
June 21	744,300	413,800	+ 330,500
June 30	1,122,800	522,900	+ 599,900

EDMONTON'S BOND SALE

The city of Edmonton received and accepted a bid of 98% and interest from Messrs. Julian Garrett, Limited, Edmonton, on account of Messrs. Otis and Company, Cleveland, Ohio, for the \$2,000,000 6 per cent. 2-year tax debentures. The resolution calling for tenders stated:—

"That the option given to the Imperial Bank for the purchase of \$2,000,000 worth of tax debenture issue, as stated in a letter written by Mayor W. T. Henry to the Imperial Bank and dated the 19th day of May, 1916, be and the same is hereby cancelled and withdrawn and the commissioners be authorized to call for tenders for the purchase of the \$2,000,000 debentures, offer to be received not later than noon on Monday, July 3, 1916."

But the Imperial Bank does not admit the right of the council to cancel the option given the bank by Mayor Henry's letter for the purchase of the \$2,000,000 short-term debentures on tax arrears at 98, and intends to hold the city to the terms thereof. City clerk Cox has stated that he had received a letter to that effect from the bank authorities.

The option given the bank by the mayor's letter allows the right of purchase up to July 31st. The city council, however, contend that this was in error, and that the time that should have been stated was July 1st.

HINTS FOR TRADE EXTENSION ABROAD

At this time when Canada is making wide preparations for an extension in foreign trade, the following hints taken from the British Board of Trade Journal may be of interest to Canadian manufacturers who may be considering the question of entering a new market:—

When it is remembered that success or failure depends at least as much on the organization of a business campaign as on the intrinsic value of the goods offered as compared with those of competitors, the manufacturer contemplating extending his business in a new market will realize the desirability of himself making a preliminary visit to the district. He will thus be in a position to judge for himself the extent of the business to be done and to prepare an organization which will diminish as far as possible the disadvantages due to his inevitable absence.

The most deliberate care and attention should be given to the choice of a representative. Such a man, besides having a complete knowledge of the language and customs of the locality in which he works, should be a thorough expert in his trade and be able to adapt his knowledge to local requirements. He should not be treated as a mere employee and above all he should not be paid a fixed salary only, but his remuneration should be arranged on a commission basis with an adequately generous allowance for expenses. Shipping agents, who are British subjects, should be chosen wherever possible.

Emphasis is laid on the desirability of commercial travellers being provided with sufficient samples, price lists, catalogues, etc., in the language of the country; on the economy to be obtained by groups of non-competitive manufacturers combining to send one representative; the need to conform to local tastes as to the manner of presentation of the article, packing and labelling, etc.; the need of certain markets for giving long credits; and for quoting inclusive prices—factory to customer's warehouse or shops—for goods.

THE NORTHERN ASSURANCE COMPANY

ESTABLISHED 1836 LIMITED

The **Eightieth Annual General Meeting** of The Northern Assurance Company, Limited, was held in the Offices of the Company at Aberdeen, on Wednesday, May 3, 1916, when the Directors' Report was presented.

FIRE DEPARTMENT

The **PREMIUMS** received last year amounted to **\$6,609,145**, showing an increase of **\$17,455** in comparison with those of the previous year. The **LOSSES** amounted to **\$3,395,300**, or 51.4 per cent. of the premiums.

The **EXPENSES OF MANAGEMENT** (including commission to agents and charges of every kind) came to **\$2,494,140**, or 37.8 per cent. of the premiums.

FIRE REVENUE ACCOUNT

Amount of Fire Insurance Fund at the beginning of the year viz:—

READY JULY 15th

LEGAL NOTICE

THE DIARSENOL COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 8th day of June, 1916, incorporating Ernest Neil Macallum and Charles Newton Candee, the younger, manufacturing chemists; James Frederick Edgar, barrister-at-law, and Lily Mae Lewis, stenographer, of the City of Toronto, in the Province of Ontario, and George Patrick Mackie, of the Village of Scarboro, in the said Province of Ontario, bookkeeper, for the following purposes, viz.:—(a) To manufacture, buy, sell, deal in, import and export chemicals, medicinal preparations and other products, and generally carry on wholesale business as manufacturers, buyers and vendors of all kinds of medicines and chemicals, patented articles, machinery, scientific apparatus, surgical instruments and supplies, and to carry on the trade of chemists, druggists, apothecaries, and traders, importers and exporters, and manufacturers of medicinal and pharmaceutical preparations; (b) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (d) To apply for, purchase or otherwise acquire, any patents, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired; (e) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (f) To take, or otherwise acquire and hold, shares in any other company having objects altogether or in part similar to those of the company, or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (g) To enter into any arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (h) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (i) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business, and in particular any machinery, plant, stock in trade; (j) To construct, improve, maintain, work, manage, carry out or control any roads, ways,

branches or sidings, bridges, reservoirs, watercourses, wharves, manufacturing, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (k) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (l) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (m) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company; (n) To apply for, secure, acquire by assignment, transfer, purchase, or otherwise, and to exercise, carry out and enjoy any charter, license, power, authority, franchise, concession, rights or privilege, which any government or authority or any corporation or other public body may be empowered to grant and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's shares, bonds and assets to defray the necessary costs, charges and expenses thereof; (o) To procure the company to be registered and recognized in any foreign country and to designate persons therein according to the laws of such foreign country to represent this company and to accept service for and on behalf of the company of any process or suit; (p) To raise and assist in raising money for, and to aid, by way of bonus, loan, promise, endorsement, guarantee of bonds, debentures or other securities or otherwise, any other company or corporation, and to guarantee the performance of contracts by any such company, corporation, or by any other person or persons with whom the company may have business relations; (q) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (r) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (s) To do all or any of the above things as principals, agents, contractors or otherwise, and either alone or in conjunction with others; (t) To do all such other things as are incidental or conducive to the attainment of the above objects; (u) To acquire and take over as a going concern any business or operations now or hereafter carried on by any person, firm or corporation engaged in or empowered to engage in any business within the powers of the company, and to pay for the same either in cash or wholly or partly by shares, debentures or other securities of the company; (v) To purchase, hold, sell and dispose of shares of the capital stock of any other company or corporation having objects in whole or in part similar to those of the company, and to invest its funds in the purchase of any such stock and to pay for the same either in cash or shares of the capital stock or debentures of the company, or partly in cash and partly in capital stock or debentures of the company. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Diarsenol Company, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 13th day of June, 1916.

THOMAS MULVEY.

Under Secretary of State.

51-2

SUES BANK FOR ALLEGED NEGLIGENCE

The Banbury banking case is to be tried in London on July 17th. Captain Banbury, who visited Canada in 1912, and made various investments at other points, also visited Victoria, with a social introduction from Sir Edward Clouston, and while there made enquiry of the manager of the Bank of Montreal regarding an investment of approximately \$125,000.

Captain Banbury came into touch with the Westholme Lumber Company, who had a contract with the city of Victoria to bring water from Sooke Lake, but who were having difficulty in financing it. Captain Banbury finally decided to lend the Westholme Lumber Company \$125,000, upon which he was to receive 8 per cent. interest, and 12½ per cent. of the profits that might arise from the contract, taking as security a second mortgage on their properties. Ultimately the Westholme Lumber Company were unable to carry out their undertaking and as a result, Captain Banbury has taken action against the Bank of Montreal, claiming damages for alleged negligence and breach of duty.

The case was tried before Lord Chief Justice Reading, but the jury disagreed, and the new trial has been set for the above-mentioned date.

A cable dispatch from London states that Sir Frederick Williams-Taylor, general manager of the Bank of Montreal, was to sail for England on the 29th inst., in order that he might give evidence.

PRICE BROTHERS SELLS NOTES

An issue of \$500,000 6 per cent. collateral trust notes of Price Brothers and Company, Limited, has been acquired by the Royal Securities Corporation, Montreal. These notes mature serially from July 1, 1917, to July 1, 1921. The collateral behind the notes will consist of a first mortgage on the hydro-electric development of the Shipshaw Power Company, which was organized and is owned and operated by Messrs. Price Brothers and Company.

Through this financing a new unit will be added to the newsprint mill and additions to other plants made which will increase the company's production of sulphite and ground wood pulp. Additions to the pulp-making plants will be completed and in operation, it is expected, by October 1st of the current year. The company's production will then be increased to 55,000 tons of ground wood pulp a year and to 25,000 tons of sulphite pulp. The paper unit will probably be in operation by February 1, 1917, and will bring the company's output of newsprint up to 62,000 tons per annum.

The Civic Investment and Industrial Company, the company consolidating the Montreal Light, Heat and Power Company and the Cedars Rapids Manufacturing and Power Company, with Quebec charter, has increased its capital stock from \$100,000 to \$75,000,000.

If you don't make a Will

The courts will appoint an administrator, usually chosen from the "next of kin."

The estate will then be divided among the "next of kin," which often is not in accordance with your wishes.

Your children will not receive any proceeds (except by special permission from the courts, which means extra expense) until they are 21 years of age, which may mean privation to them.

There will be more legal costs, and it will cost more to wind up the estate than if you make a will.

Make your will now, while sound in mind and body, and before any accidents happen.

Let us help you draw your will—our knowledge and experience will prevent costly blunders.

We make no charge for this service, and will keep your will in our Safety Deposit Vaults free, when we are appointed as executors. The officers of the Company are at all times anxious to respond to inquiries.

DIVIDENDS AND NOTICES

THE NOVA SCOTIA STEEL AND COAL COMPANY, LIMITED

DIVIDEND NOTICE

A Dividend of two per cent. on the Preferred Shares of the Company, for the quarter ending June 30th, 1916, has been declared payable July 15th, 1916, to shareholders of record of June 30th, 1916.

By Order of the Directors.

THOMAS GREEN,

Cashier.

New Glasgow, N.S.,

June 23rd, 1916.

MARCUS LOEW'S THEATRES, LIMITED

Notice is hereby given that a Dividend of 1½ per cent. for the quarter ending 30th June, 1916, being at the rate of seven per cent. per annum on the Preference Shares of Marcus Loew's Theatres, Limited, has this day been declared payable on 15th July, 1916, to shareholders of record on 30th June, 1916.

By Order of the Board.

SAMUEL D. FOWLER,

Secretary,

Toronto, 30th June, 1916.

DOMINION LINENS, Limited

Notice is hereby given that the half-yearly dividend of 3½% (being at the rate of 7% per annum) has been declared on the Preferred Shares of this Company, payable July 15th, 1916, to Shareholders of record the 30th day of June, 1916.

By Order of the Board.

H. A. HIGNELL,

Secretary-Treasurer.

Guelph, 4th of July, 1916.

Another United States company, the International Paper Company, of New York, will establish a plant in Canada. It has made plans for the erection in Canada of a newsprint mill of 200 tons capacity. This mill will produce newsprint, round wood pulp and a surplus production of sulphite pulp. Construction will be begun as soon as building material can be purchased advantageously.

Expressing appreciation of the Canadian bankers' loan of \$25,000,000 to finance munition purchases here, the following message from the Colonial Secretary has been received by the Governor-General: "I learn with very great pleasure that the Canadian bankers have arranged for a further credit of \$25,000,000 for Imperial munitions payments in the Dominion. Please convey to them my appreciation of his Majesty's government for their patriotic action. Assistance which Dominion is giving, and will, I hope, be able to continue to give in financing Canadian purchases and so relieving pressure of American exchange, is not the least valuable of her contributions to the common cause."

A statement that the liquidator's report of the Alvo von Alvensleben Company, Limited, shows that the liabilities of the company amount to \$1,500,000, and the realizable assets to only \$6,000, of which \$5,000 has been collected, was recently made in supreme court chambers, Vancouver, by Mr. Jacob Singer, solicitor for the North Coast Company, vendors of the Balmoral Hotel at Victoria. Alvensleben is a German, who was resident in British Columbia for several years, and whose operations were criticized by *The Monetary Times*. He is now in the United States and has left a tangled financial trail behind him in British Columbia. He was associated with the late W. R. Arnold in certain deals.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 3c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

WANTED—A gentleman who has been accustomed to earning \$100 a week or more; whose personality will get him an interview with anyone, and whose ability enables him to turn interviews into sales. We have an opening on a permanent proposition where great opportunity for advancement exists. Apply 614 C.P.R. Building, Toronto, after 4.30 p.m.

A MARRIED man, aged thirty, with fourteen years' Canadian Banking experience desires a change and will accept position with Commercial or Financial firm in Toronto or Montreal. Can furnish references as to ability and integrity. Prospect of advancement the first consideration. Reply to Box 495, *The Monetary Times*, Toronto.

ACCOUNTANT and Bookkeeper; age 30; over 12 years' experience in bookkeeping and financial work, seeks position with Financial or Commercial Firm, having good prospects. Reply Box 497, *The Monetary Times*, Toronto.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

RAILROADS AND MAILS

A Washington dispatch says: In a report to the post-master-general, United States postal experts, who visited Canada to investigate the subject, show that the space method of paying the railroads for carrying the mails is in successful operation in that country. It is brought out that the Canadian railroads are carrying mail on the space basis at rates much lower than are proposed in the legislation now pending in Congress which seeks to apply the space basis in the United States.

The Grand Trunk Railroad, one of the largest operating in Canada, has petitioned the Canadian post office department for the adoption in Canada of the scale of rates contained in the mail pay section of the post office appropriation bill as passed by the House of Representatives.

The Canadian Pacific has proposed to the Canadian authorities a scale of rates formulated upon the plan followed by the House of Representatives in the post office bill.

Both the Grand Trunk and the Canadian Pacific operate in the United States also. In a formal petition to the post-master-general of Canada, the Grand Trunk, after setting forth the rates proposed for adoption in the United States, says:—

"The railways of the United States are unanimous in their opposition to the adoption of these rates, which they consider unfair and a radical departure from the rates heretofore paid them for mail service. Although they are opposing the adoption of these rates, we feel we can reasonably accept them at this time, owing to the radical difference in the weight limit of the parcel post, which in the United States is fifty pounds as compared with eleven pounds in Canada."

The Canadian government's directors on the Canadian Northern and Grand Trunk Pacific boards, in accordance with the loan arrangements are Messrs. W. K. George, Toronto, H. A. Richardson, Kingston, and W. J. Christie, Winnipeg, on the Canadian Northern board; and Messrs. J. B. Fraser, Ottawa, Jules Hone, Montreal, and Peter McAra, Winnipeg, on the Grand Trunk Pacific board.

You Can Improve Your Position

Have you heard of the Sales and Intelligence Departments of the Canada Life?

They give special assistance to the Company's representatives.

They teach a man the insurance business by correspondence and personal assistance free of charge

Then they place him in a position and help him to make good

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this. All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Still Popular

Public favor has made Nineteen Hundred and Fifteen a record year for the Sun Life of Canada.

Canadian Business issued and paid for was larger by \$1,746,961 than in any previous year in the Company's history.

Total business issued and paid for was \$34,873,851—the largest amount ever issued by any Canadian life company.

Assurances in force at December 31st last totalled \$257,404,160—much the largest amount carried by any Canadian life company.

A Sun Life of Canada policy is a safe and profitable policy to buy and to hold.

*NOTE.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending April, 1916, amounted to \$34,152,875 as against \$132,231,434 for the same period of 1914-15. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

PERSONAL NOTES

Mr. H. T. Champion, of the firm of Alloway and Champion, Winnipeg, died last week. The late Mr. Champion was well known in Canada and was one of Winnipeg's old timers.

Mr. Henning Helin, technical manager of the Wayagamack Pulp and Paper Company, has been made a director of the company, filling the vacancy caused by the death of Mr. J. Reid Wilson.

Sir John Gibson has been elected to the board of directors of the Toronto General Trusts Corporation, to fill the vacancy caused by the death of the Hon. J. J. Foy. Sir John Gibson will succeed the late Mr. Foy as vice-president, and Mr. Wellington Francis, K.C., was made a member of the inspection committee.

Mr. Arthur B. Wood, actuary of the Sun Life of Canada, is one of the committee of seven appointed by the Actuarial Society of America, to take charge of the necessary investigation for the compilation of a new mortality table, to replace the American Experience Table. The collection of data, to which some of the Canadian companies are contributing, is now proceeding. Mr. Wood is one of the most capable actuaries of this continent, and his appointment to the committee is a compliment to the Canadian insurance business.

Judge E. H. Gary, chairman and chief executive of the United States Steel Corporation, says that the government and business interests of the United States should begin a careful plan of co-operation to prepare for the reaction of peace that will follow the European war within a relatively limited period. In his opinion the United States must be ready to adapt herself to changed conditions that will result from the present great expansion. Business men should realize the danger of overproduction, overextension of credit and liability, overconfidence, and should proceed with cautious aggressiveness.

Mr. R. Martens, of Martens and Company, Limited, of Russia, recently left London for Petrograd, after spending a couple of weeks in London on his way back to Russia from the United States and Canada. Mr. Martens is taking with him a staff of 15—engineers and specialists in industrial processes—who will tour Russia and Siberia as far as Omsk, in order to investigate on the spot Russia's needs for manufactured goods and the products which she can export. Six of these 15 gentlemen are Canadians, mainly graduates of McGill. The remainder are American, British and French. The first-hand information they gain will be placed at the disposal of manufacturers of the Allied countries, so that, when the war ends, these manufacturers will have a good knowledge of trade conditions in Russia. While in Canada Mr. Martens saw the general managers of the Export Association of Canada, with headquarters at Montreal, and agreed to co-operate with them in placing before Canadian manufacturers the opportunities that will exist in Russia in the future for trade.

Mr. Macarow, who has been made general manager of the Merchants Bank, is another of Canada's bankers who has devoted all his business years to the banking profession. Not yet 50 years old, he takes the managerial reins of an important bank at a critical and interesting time in the world's financial history. Mr. Macarow will probably have to help with the solution of a number of important financial problems during war times and the period to follow. That he is thoroughly fitted for the task, his lengthy banking experience and good judgment have long ago proved. He is a keen business man, comparatively rapid and almost invariably accurate in his decisions, and has the sort of personality which is an asset to any good institution. Mr. Macarow commenced his career as general clerk in the service of the institution of which he is now one of the executives. At 16 he became a clerk at Kingston, his birthplace. Two years later, in 1886, he was transferred to the general manager's office, where he acted as one of Mr. Hague's secretaries, which position he held until 1888. Then he went to Toronto, and remained there until 1893, when he went to Montreal. There, he has occupied many offices in the service of the bank, advancing, until in December, 1905, he became local manager, succeeding Mr. Ramsay. When the management decided to make Mr. E. F. Hebden a director, with the office of managing director, Mr. Macarow was selected for the position of general manager.

Loans on Life Insurance Policies

RAPID as Has Been the Growth of the Assets, the Increase in Policy Loans Has Been Nearly Twice as Great—How Loans Increase in Abnormal Times—Drastic Restrictions Would Be Unwise—Analysis of the Situation in Canada.

By R. W. BARTON, A.I.A.

THE granting of loans upon life policies is compulsory in Canada, under the Dominion Insurance Act, and the proportion of funds so invested is therefore only to a very limited extent under the control of life companies. In fact, this control is practically confined to the option of a company to defer the loan for a period of three months and to charge 7 per cent. thereon, provided such provision is stated in the policy.

A marked increase in the proportion of the total funds of the companies so called for, has been noted in Canada and also in the United States, where similar compulsory regulations are in force.

The meaning and dangers involved in this increase were subjects considered at the meeting in New York of the Association of Life Insurance Presidents in 1913 and the subject has been dealt with on several occasions previously in *The Monetary Times*. The increase still continues and the statistics available point to probable further increase in future.

At the end of 1915, out of total assets amounting to \$274,273,018, Canadian life companies had loaned to policyholders by way of cash loans and premium obligations on policies in force, \$39,311,402, or 14.34 per cent. of their total assets; an increase in five years of \$18,902,179 in amount and nearly 2½ per cent. in proportion.

The following table shows the total assets and the loans, including premium obligations, upon policies of Canadian life companies, at five-yearly intervals since 1890 and the proportion which these loans bear to the assets.

Canadian Life Companies.

Year.	Total assets.	Loans on policies.	Percentage.
1890	\$ 20,740,444	\$ 1,716,561	8.28
1895	35,323,297	3,582,862	10.14
1900	59,504,066	6,014,022	10.11
1905	102,438,415	9,679,244	9.45
1910	170,804,631	20,409,223	11.95
1915	274,273,018	39,311,402	14.34

This shows that rapid as has been the growth of the assets, the increase in loans on policies has been nearly twice as great and that the proportion is still rising.

A better idea of the continuous increase in proportion is obtained from the following table showing the growth in percentage each year from 1900 to 1915.

Percentage of Loans on Policies to Total Assets.

Year.	Percentage.	Year.	Percentage.
1901	9.7	1909	12.0
1902	9.6	1910	12.0
1903	9.7	1911	12.0
1904	9.7	1912	12.2
1905	9.4	1913	13.2
1906	9.7	1914	14.0
1907	11.2	1915	14.3
1908	12.1		

The large increase in 1907 and 1908 is accounted for by hard times in Canada during and after the financial crisis in the United States market in 1907, while the collapse of the land boom in Central and Western Canada in 1913 and the war conditions of 1914 and 1915 are plainly reflected in the higher percentages of those years. In the latter years, the situation was no doubt a good deal relieved by the great harvest and large contracts for war supplies, or a larger proportion might have been called for.

A comparison, over the past ten years, of the increase in assets each year with the increase in policy loans, shows to what extent the annual surplus is called upon to meet the demand for these loans.

Year.	Increase in assets.	Increase in policy loans.	Percentage.
1906	\$12,122,419	\$1,312,202	10.82
1907	10,617,381	2,966,066	27.94
1908	13,313,164	2,693,334	20.23
1909	15,298,913	1,658,805	10.84
1910	17,014,340	1,999,572	11.75
1911	19,917,727	2,550,817	12.81
1912	20,910,517	2,919,823	13.96
1913	21,611,621	4,995,446	23.11
1914	24,582,443	5,333,158	21.69
1915	16,446,079	3,102,935	18.87

Here the increasing proportion absorbed each year is well marked, while the effect of the hard times of 1907-1908 (which never amounted to a crisis in Canada) and the

events of 1913, 1914 and 1915, already referred to, appear more clearly than in the previous table.

It is evident, therefore, that policy loans are being more and more sought by policyholders and that Canadian companies must be prepared to invest a still greater proportion of their funds in this way. While in times of financial stress exceptional calls for large sums at short notice are nearly sure to be made.

How Age Affects Companies.

The following table constructed from the figures of six representative Canadian companies of varying ages and stages of development shows, as might be expected, that these percentages increase with the age of the company.

They also serve as a warning that in a group of companies, the younger ones reduce the average percentage of the group and, therefore, that before making exact deductions it is important to investigate the data of each company.

Percentage of Policy Loans to Total Assets.

Company.	Started.	1905.	1910.	1915.
Canada	1847	11.97	14.41	15.93
Mutual	1870	10.94	12.54	14.28
Sun	1871	8.13	10.89	12.05
Great-West	1892	6.36	10.04	14.33
Imperial	1897	4.42	9.21	14.29
All Canadian companies		9.45	11.95	14.34

The figures are consistent and increase with the growth of the company. The case of the Sun Company at first sight appears to be an exception, but this is due to the fact that the total assets include reserves for annuities granted. The Sun is the only company that has granted very considerable annuities. Its reserves on this account amount to over \$11,000,000. If this is allowed for and the percentage calculated to the balance of the assets, the proportion is normal. The absorption by the Sun of other and younger companies has also tended to keep down the percentage shown by this company.

United States Life Companies.

The following table has been compiled from the compendium of official life insurance reports relating to some 250 American life companies, published by The Spectator Company of New York.

United States Life Companies.

Year.	Total Assets.	Policy Loans.	American Canadian	
			Percent- age.	Percent- age.
1904 ...	\$2,498,960,968	\$189,738,779	7.59	9.7
1905 ...	2,706,186,867	225,568,149	8.33	9.4
1906 ...	2,924,253,848	265,902,863	9.06	9.7

1911 ...	4,164,491,688	541,789,999	13.10	12.0
1912 ...	4,409,292,521	587,704,733	13.33	12.23
1913 ...	4,658,696,337	657,994,947	14.12	13.24
1914 ...	4,935,252,793	735,348,014	14.90	14.04

As already explained, a closer analysis of the individual companies included in the group would be required

before any but general deductions could safely be drawn from these figures.

It is plain, however, that the increase in proportion of these loans to total assets is marked and continuous, as in Canada.

Proportion of New Loans to Annual Surplus.

The next table of annual increases in total assets and policy loans, with percentages, shows this still more clearly.

Year.	Increase in assets.	Increase in policy loans.	American Canadian	
			Percent- age.	Percent- age.
1904 ...	\$233,739,775	\$31,171,170	13.34	
1905 ...	207,225,899	35,829,370	17.29	
1906 ...	218,066,981	40,334,714	18.50	10.82
1907 ...	128,478,505	82,556,117	64.26	27.94
1908 ...	327,561,737	65,800,329	20.09	20.23
1909 ...	263,563,881	32,017,159	12.15	10.84
1910 ...	232,019,088	48,823,386	21.04	11.75
1911 ...	288,614,629	46,690,145	16.18	12.81
1912 ...	244,800,833	45,914,734	18.76	13.96
1913 ...	249,403,816	70,290,214	28.18	23.11
1914 ...	276,556,456	77,353,067	27.97	21.69

The figures for 1915 are not yet available.

The percentage of increase is noticeably greater in the United States than in the Canadian companies. In the absence of a complete analysis of the individual companies in the United States group, the true reason for this is not clear.

Again, a feature is common, however, to both groups. In years of exceptional economic disturbance, the increase in assets shrinks, while the demand for policy loans greatly expands. This is very noticeable in 1907, the year of the last financial panic in the United States market. It must, however, also be remembered that in that year the companies felt the aftermath of the government investigation of certain prominent United States life companies, which may be responsible for some of the exceptional increase.

In 1907, the increase in assets was nearly 60 per cent. less than the increase in 1906; while policy loans jumped from 18.50 per cent. of the 1906 increase, to 64.26 per cent. of the increase in 1907. This is probably the most significant feature of the tables.

The disturbance due to the war in 1914 and its fore-shadow in 1913, is seen in the large amounts loaned in those years.

Selected United States Companies' Experience.

The following table is compiled from the figures of three large United States ordinary life companies, to illustrate how the percentages compare with Canadian companies to-day.

Company.	Founded.	Percentage of loans to assets.	
		1914.	1915.
Equitable of United States	1843	16.48	17.85
New York Life	1845	18.45	19.40
Mutual of New York	1843	14.53	14.88

These figures, in two cases, show a higher percentage than the oldest Canadian companies and so indicate to what a much greater extent these loans may increase in Canada as the domestic companies increase in age. The reason the figures are lower in the third case has not yet been investigated by the writer.

This table is based upon figures given in a recent issue of the London Statist.

British Life Companies.

Year.	Total assets.	Policy loans.	Percentage.
1895	£240,397,866	£12,141,048	5.05
1905	366,717,138	19,364,110	5.28
1915	551,150,362	32,621,554	5.92

NOTE:—This table is in sterling.

A much smaller percentage of funds invested in these loans appears than is the case on the North American continent.

Those familiar with business customs in Great Britain will probably agree that this is largely due to three causes. First, it is not the practice in Great Britain to debit premiums against a policy; *i.e.*, the premium obligations or premium notes of United States and Canada. These premium obligations are not shown separately in statements of all Canadian companies, so it is difficult to determine what proportion they form of the total loans.

Second, the custom of placing life policies in marriage settlements is common in England and neither trustees nor assured usually have power to borrow on them.

The third and perhaps chief cause is that policies in Great Britain are very largely used as collateral security for bank loans and overdrafts.

English and Scotch Offices.

A separate examination of the figures of the leading English and Scotch offices shows that some of the large Scotch companies lend more freely than their English rivals. Any direct comparison is difficult, however, as the form in which returns are required by the British Board of Trade makes it very laborious to obtain a uniform basis of comparison, which the point is not of sufficient importance to undertake.

Deductions from General Investigation.

The deductions that may be safely drawn from the tables are that policy loans are somewhat rapidly increasing in Canada and that in view of the United States experience they must be expected to rise still higher.

That in years of financial stringency exceptional calls will be made upon the companies and that during periods of financial panic they must be prepared to find cash, at short notice, for large amounts.

In the United States experience in 1907—the panic year—more than 64 per cent. of the increase in assets of that year was absorbed by policy loans. Figures are not available to show how much of this was cash loans and how much premium obligations, but it is important insofar as cash does not have to be provided in respect of premium obligations, whereas it does for cash loans.

It will be noted that the surplus receipts of each year have easily provided the loans granted in that year, but that while the receipts are spread throughout the year, the loans may be chiefly called for during a brief critical period.

Companies Embarrassed by Legislation.

In addition to these features, however, there are other points to be considered, due to the requirements of federal, provincial and foreign legislation.

As an instance, the government of Japan requires a foreign company writing business within its jurisdiction to invest and deposit 60 per cent. of the policy reserves in respect of such business, in Japanese government securities. So that, what with government requirements and the policyholders' right to borrow, there is a liability

in respect of such policies, in excess of that anticipated by the Dominion Act, or provided for by the companies.

Similar positions may arise in respect of a Canadian provincial company doing business in a province other than that wherein it obtained its charter and in the case of foreign companies doing business under provincial licenses in Canada.

Danger of Further Drastic Legislation.

Prospects of further drastic legislation also threaten life companies. Only recently Sir Thomas White stated in the House that it would be no hardship if compulsory investment by life companies in Canadian government securities was made permanent, instead of only a war measure as at present.

The danger lies not so much in the class of security selected as in the increasing tendency of governments to control life company investments, without assuming any corresponding responsibility for possible losses on this account.

That this is no imaginary danger anyone must admit who is familiar with the history of British Consols during the past 20 years.

Life Companies Aware of Responsibilities.

A generation ago actuaries pointed out the responsibilities assumed by life offices in undertaking the banking function of finding money at call, to provide guaranteed loans and surrender values. The guarantees were further made compulsory by legislative enactment and the companies accepted the responsibilities open-eyed. Thus was introduced the possibility of a limited "run" upon life companies in a time of panic.

Life Companies' Risk Limited.

Banks, individually and collectively, have at all times been subject to the danger of a "run," to a much greater extent than life insurance institutions can ever be.

In comparison with the banks' risk, that of life companies is so limited that in return for the benefit of the present system of loans, policyholders can well forego the cost it entails to make due provision to protect it.

Life companies are not competing with the banks for this business, but by taking it have relieved them, and there is still a wide field for further co-operation.

The tendency of governments to such wide control of investments of life companies seems the greater danger to the real interests of policyholders.

The Policyholder's View.

There is a wide margin between the desirability of discouraging policy loans and the possibility of their becoming a danger. Whatever lessons are to be learned from the statistics it must be recognized that any further drastic restrictions on a policyholder's power to borrow on his policy will, in the eyes of the public, make life assurance lose half its usefulness and most of its attraction.

The great strides made by life assurance in recent years on the North American continent are largely due to the fact that the money paid in premiums is not regarded as entirely locked up.

In the eyes of most Canadian and United States policyholders, a life assurance company is now a savings bank as well as a life assurance institution.

The view of the borrower is not that he is borrowing a percentage of the reserve held by the company, but that he is borrowing his own money which represents probably only a small percentage of the face value of the policy.

The manager of a savings bank would not chide him for withdrawing his savings; why should a life company?

Is it to be argued, or believed, that the granting of loans upon policies is to the detriment of the policyholder, or his family, more often than the power to mortgage his home, his farm, or any other property?

A life policyholder, *ipso facto*, is one of the most thrifty members of the community, and as much entitled as anyone to do what he likes with his own. If the policyholder is to be protected against himself, by not letting him borrow on his policy, who is going to protect him when his endowment assurance matures?

Only Justification for Drastic Legislation.

Life companies see tragedies in families at the death of the breadwinner due to insufficient and neglected assurance. Banks witness tragedies in life on the failure of their customers in business. Each, by giving such advice to the public, as their experience suggests, can help those willing to learn, to avoid the dangers that have caused disaster; but to try by legislation to stop borrowing, or the use of savings, is as hopeless as to try to regulate currency by government fiat. History proves that neither human nature nor currency has ever been made good by act of parliament.

With this in mind, only if the dangers of the present system are shown to be insurmountable, would the companies be justified in seeking drastic legislation to restrict policyholders' rights.

Federal and Provincial Legislatures.

An early settlement of the conflicting claims and rights of the federal and provincial legislatures is urgently needed. When these are decided, probably a slight modification of the existing Dominion Insurance Act might achieve all that is necessary.

A power to vary the rate of interest to meet the option of selection a policyholder now has against the company, when rates of interest are high, is especially desirable. This and other modifications are under discussion so need not be elaborated here.

It has often been proposed that life companies should combine for the purpose of advertising. This, for several reasons, has not yet been adopted; but at least a combined campaign, in the press and by lecture, on the general

principles and advantages of life assurance, should produce results well worth the small cost it would entail. A closer touch might be encouraged between the head office and the policyholder by means of leaflets issued with renewal receipts.

A direct letter from head office to all cash borrowers of insurable age suggesting additional assurance, with a further reminder when the interest becomes payable, has proved effective.

The repayment of loans is encouraged when they can be repaid in whole or in part at any time without notice. Some companies do allow this but few policyholders seem to know it.

Hints from British Practice.

Instead of debiting a premium against a policy the British practice is to grant, upon payment of a small fine, an extension of the days of grace for a definite period of one, two or three months. This scheme has some objections, but on the whole works well and undoubtedly helps to keep down both loans and surrenders.

Policies in Canada are seldom placed in marriage settlement except under the beneficiary clause. This is probably owing to the difficulty of finding trustees. The possibility of one trustee being, say, in Alaska and another in Japan, when their signatures are needed, has always been a drawback. This would seem a fitting function for trust companies to assume, while the prospective funds they would handle might attract them to act either without charge, or for a nominal fee, until the policy moneys matured.

The chartered banks of Canada have not taken kindly to life policies as collateral security—a very usual practice in England. It seems such a useful and obvious protection that a more general use in this way may be confidently looked for, to the benefit of banks and policyholders and the relief of life companies. Along these lines it may be that some reduction can be made in the percentage of funds demanded for this class of security and so attain a desirable end.

It is well known that far too little assurance is carried, even by the majority of policyholders, but drastic restriction of the present powers of borrowing has not yet been shown necessary and might easily prove a remedy more dangerous than the disease.

CHICOUTIMI PULP COMPANY

The Chicoutimi Pulp Company's profits for the year ended December 31st, were \$355,914. Of this bond interest absorbed \$141,015, interest on advances \$73,270, patriotic fund \$1,000, bad debts \$9,329, and the balance carried forward was \$131,299.

In his remarks on the year's operations, Hon. N. Garneau stated that the condition of transatlantic shipping due to the war worked some hardships since several of the ships under charter to carry pulp to European customers were requisitioned by the British Admiralty. This has been but a temporary annoyance. Specially good prices have been received on pulp unshipped and thereby released from contracts.

The Ouatichouan mill, which was purchased by the company in 1914, reached a high point of 66½ tons of 2,240 pounds in a single day of 24 hours. During the current year, it is planned to add another 15,000 tons' capacity to this mill, which can be accomplished for an outlay of less than \$100,000 capital.

The mills at Chicoutimi produced as much as 314 tons in a single day.

The sum of \$47,766.23 was expended upon maintenance and renewals, and \$9,329.28 charged off for bad accounts.

A new company, the Ha! Ha! Bay Sulphite Company, is being organized by some of the company's English custom-

ers, and a mill will be built, of 30,000 tons annual capacity, for sulphite pulp. This company will buy all of its wood from the Chicoutimi Pulp Company on a favorable basis.

Deliveries of wood will begin during 1916, and the requirements of the new mill will bring increased revenue to the subsidiaries, the Roberval-Saguenay Railway Company, and La Compagnie Générale du Port de Chicoutimi. This contract, which becomes operative in 1916, finances the Chicoutimi Pulp Company's annual payments to the Chicoutimi Freehold Estates.

The conditions, growing out of the present war, worked great changes in the pulp and paper industry of Europe, which, it is felt, said President Garneau, must inure to the benefit of the company in its future operations. In fact, were the company in position to accept them, ten-year contracts could be made for twice its present production at advanced prices. The shutting off of German and Scandinavian pulp from England has turned her attention more strongly to Canada, which is to-day only supplying a small percentage of her imports, and, of this, by far the most comes from the Chicoutimi Company.

The company's assets are shown in the balance sheet as \$9,797,093. On the liabilities side the unrealized capital surplus is \$1,149,837 less discount on bonds of \$83,937, and the undivided profits are \$156,865.

LIVING COSTS

One of the chief reasons for the increase in Eastern freight rates is the substantial gain in railroad expenses. The cost of fuel to operate 100 miles was 30 per cent. higher in 1914 than in 1907. While from 1899 to 1914 train-mile earnings increased 89 per cent., the cost of service per train-mile increased 112 per cent., notwithstanding economies attributable to locomotive power, lower rates, better loading, and increased traffic. Between 1910 and 1914 earnings increased 10.6 per cent. and expenses 17.27 per cent. In 1915, earnings increased 5.3 per cent. and expenses 12.4 per cent. Railway ties now cost 45 per cent. more. In the five years from 1909 to 1914 railroad salaries and wages increased 52 per cent. The Dominion Railway Board state that the increases which they have permitted in freight rates are justifiable "entirely on the mere fact of the increases in railroad expenses and having regard to traffic of normal years." In short, the cost of living for the railroad has appreciated just as it has in other spheres.

High prices usually accompany periods of prosperity and good business. Living costs were high here throughout the period of abnormal activity which culminated in 1912. A tendency towards lower prices was evident in the two years following. But since the outbreak of war, because of our large crop last year and the substantial war orders placed here, business has been active, a war prosperity has prevailed and prices have advanced so that the cost of living is becoming once again an acute factor. With the arrival of a period of depression after the war prices will probably decline again. When money is circulating abundantly, and credit is satisfactory, everybody ask and get high figures for goods and service.

NORTH PERTH, ONTARIO

In the North Perth constituency of Ontario this week, a Liberal candidate defeated the Conservative nominee and transformed a government majority of 1,117 into an opposition majority of 627. In a strongly Conservative province, that is an event which must have had substantial cause. The explanations of Ontario's cabinet ministers (and we write as a journal which has never entered partisan politics) have missed the vital reasons. The statement of one minister, for instance, that North Perth in some respects is an unusual riding, that conditions there are not uniform and especially the statement "I do not regard it at all as an indication of the sentiment of the province," are belittling the significance of the result.

The Ontario government may easily discover the reasons which accounted for the defeat of their candidate by reading the heart of the rank and file. They are ignorant of or blind to the dissatisfaction of members of their own party and of voters at large. The Ontario cabinet has become an autocratic institution in a democratic country. That is the verdict of hundreds of Conservatives who will take the strongest possible measures, as they say themselves, "to teach the government a lesson." The dislike of autocracy shared by the opposition and by independent voters who are becoming more numerous as years pass because of the unsatisfactory political state.

The same argument applies to federal politics and to politics in other provinces. The political machine has been running the country, the people being generally regarded as automatic parts of the machine to be cranked at will. While the blame for the present condition rests with the country at large, the time has come when the people are beginning to revolt. They do not like autocracy, or premiers (some without backbones, some without honesty), or bribery and corruption in high places, all of which they have had in the last few years in nauseating quantities. If politicians refuse to read the signs they will have to taste defeat at the polls. Defeat of such mistaken ideas of government is good for the country. There is much truth in the remark of the somewhat erratic W. F. Maclean, M.P. (South York), that "the rest of Canada will vote with Perth if Mr. Hearst, Mr. Cochrane and Sir Robert Borden invite them to do so."

BUSINESS INSURANCE AND NEW TAXES

Insurance men have been greatly interested in the statement made by the Dominion government to *The Monetary Times* last week as to how premiums paid on business insurance policies will be treated in connection with the business profits war tax act. At the request of *The Monetary Times*, Mr. R. W. Breadner, taxation officer, gave the following ruling: "The premium paid on such a policy would be an asset and, therefore, could not be deducted as an expense from gross profits. At the commencement of the accounting period following the period in which the premium was paid, the amount could be treated as rest and be added to capital for the purpose of the business profits war tax act."

Business insurance is properly regarded by the government more as an ordinary financial than a philanthropic transaction and, as Mr. G. D. Finlayson, Dominion insurance superintendent, says, "it is really a form of investment or sinking fund." While the business of life insurance generally is exempt from the provisions of the

act, business insurance premiums are to be treated as noted above. The fact that the premiums paid may be treated, by those insuring, in the balance sheet as part of the reserve fund and added to capital for the purposes of the new tax, is an encouragement to the writing of a larger volume of business insurance.

Mr. W. J. Graham, of the Equitable Life Assurance Society, New York, who will address the Canadian life agents at Hamilton, on business insurance, speaking recently as to the prospects of that line, prophesied that the amount of insurance of various kinds that can and will be written by the intelligent use of business insurance policies over the next ten years will be a rapidly increasing sum. "It is nationally viewed," said Mr. Graham, "as one of the great opportunities for service and possible employment of the agent, be he the type of writing the smaller cases and capable of handling the smaller business insurance, or be he the type of writing the larger cases which make him feel at ease in the presence of the mighty. No business is so small but that life insurance may be of service to it, and few businesses are so large but that the volume of life insurance available might be an important consideration to the success of the business if intelligently applied to the lives concerned."

NEW RAILROAD EQUIPMENT

One paragraph of the official summary of the Eastern freight rates decision will particularly interest those industrial plants which cater to the needs of the railroads. It is pointed out that economical financing of the Grand

Trunk has been rendered extremely difficult and that appropriations of all kinds have been cut and repairs have been postponed. On December 31st, 1915, over 4,000 cars were held for repairs, notwithstanding the lighter traffic of the year.

In order to keep the equipment in proper shape it will be necessary to obtain 1,249 new freight cars at an expenditure of \$2,238,000. Normal track renewals would require 431 miles; for the period of 1913 to 1915, inclusive, the track renewals were only 45 per cent. of this standard; and for the year 1915 the renewals fell to 67 miles. The renewal work on bridges and culverts during 1915 is \$20,000 below the average yearly expenditure of the period of 1906 to 1915.

A similar position applies, to some extent, not only to the Grand Trunk but to the other railroads of the country and as the railway board say in their finding "The economies so made, cannot continue indefinitely without great loss and inconvenience to the public."

It was pointed out in *The Monetary Times* of January 7th last that by the time the war ceases, a long period will have passed when practically no renewals will have been made and little new work undertaken by the railroads. They have continued destroying cars without replacement and have been doing as little as possible in the way of repairs, rebuilding of tracks and other works. With the coming of peace there will therefore be a substantial accumulation of railroad work. It will probably take a long time to overtake what has been postponed during the war and postponement cannot be continued indefinitely. This factor should have a fairly important bearing on general industrial conditions at that time.

RAILWAY RATES FOR CARRYING MAIL

Comment of United States Official—Amount of Mail in Republic and Dominion

"If it were true, as it is not, that the Canadian space basis for railway mail pay had been adopted as a permanent system and after deliberate and scientific investigation, it would be no criterion for similar action in the United States, because the conditions are so different," is the remark of Mr. R. Peters, chairman of the United States committee on railway mail pay. "Relatively the postal business of Canada is a small retail business in comparison with the great tonnage of the postal traffic in the United States."

"The difference is emphatically shown in the postal revenues of the two countries for the fiscal year 1915:—

United States	\$287,248,165
Canada	16,444,792

"Also in the postal expenditures which, for the fiscal year 1915, were:—

United States	\$298,546,026
Canada	16,907,644

"In each case the amount is less than 6 per cent. of the corresponding amount for the United States.

Agreement for One Year.

"The details of the arrangement made for compensating the Canadian railroads, which took effect February 1st, 1914, are fully shown in the hearings of the joint congressional commission.

"1st—The statement was for one year.

"2nd—It was calculated to add about \$786,000 a year to the previous pay of about \$3,000,000.

"3rd—It was agreed that if the introduction of the parcel post (then about to be established) increased the amount of mails and required extra accommodations, the pay would be increased.

"4th—It was conditioned upon a weight limit of 11 pounds for the parcel post.

"5th—It was a step toward improving the existing relations, but concededly inadequate. The rate per car-mile was made 16 cents, in spite of the fact that passenger car earnings averaged 31.27 cents per car-mile. The Canadian railways had shown that the actual cost for operating expenses was 24 cents per car-mile, without including any allowance for interest, dividends, or surplus.

Had Helped Railway.

"6th—The government held that the mail pay should not exceed the cost of operation, because the government had aided practically all of the railways during the period of construction by land grants and subsidies, or both. (The Canada Year Book for 1914 states that there were land grants amounting to 55,740,249 acres, and financial aid to the railways not owned by the government amounting to \$233,772,640.)

"The subsidies granted generally to the railways in Canada have created a special reciprocal obligation not existent in the United States. Where land grants were made to railways in the United States, the railways received only 80 per cent. of the usual rates."

The amount of life insurance policies paid in New York last year was \$35,025,000. Philadelphia was second with \$14,081,000, and Chicago third with \$13,800,000. No other places reached \$10,000,000, and only two, Boston and St. Louis, exceeded \$5,000,000. Montreal, with \$2,516,000 was 17th on the list, and Toronto, with \$1,208,000 was 33rd. In all, ten Canadian cities reported payments of over \$100,000 last year, Vancouver having \$693,000, and Winnipeg \$521,000, the others being Quebec, St. John, Hamilton, Ottawa, Victoria and Halifax.

Mr. G. Burruss, president of the well-known fire insurance firm of Messrs. Burruss & Sweatman, Toronto, died last week. The late Mr. Burruss some years ago was special agent of the Western Fire Insurance Company at Richmond, Virginia, and at Baltimore. He was widely known among fire underwriters, especially to the older men in the south-eastern field, having for several years represented the Western and British-America Assurance companies in Virginia and contiguous territory. While in the employ of these companies he suffered an illness, but when he recovered, he came to Toronto in the employ of the Western and British-America companies, with which he has been associated in the United States. Later he entered the agency field with Mr. Sweatman. The agency is to be continued in the same name under the supervision of Mr. H. S. Sweatman.

WAR LOAN IN SEPTEMBER

The second domestic Canadian war loan will be issued in September. The terms will be announced a few days before the issue.

MANITOBA AND WINNIPEG FINANCING

Province and City are Retiring Debts in London and Re-floating in New York

An important financing scheme for Manitoba province and Winnipeg city has practically been arranged with the British Treasury officials. It involves the borrowing of funds in New York with which to pay the entire debt of the province and of the city, due in London. The amount involved, it is understood, is approximately \$44,000,000. The idea is that of Honorable Edward Brown, provincial treasurer of Manitoba, who has consulted the British Treasury board through its American agents, Messrs. J. P. Morgan & Company, and who has also interviewed the leading bond houses in Canada and the United States with a view to their participation in the transaction. The negotiations have been proceeding for several months.

By paying these debts in London and re-financing in New York, the province will save several million dollars in its capital obligations and a large sum in interest charges during future years. The province owes about \$16,000,000 in London. British funds will be released to that extent, and can be devoted to war financing.

It is stated that the province has obtained a first loan of \$10,000,000 in New York, retiring money borrowed in London in 1912 by the Roblin government and being a consolidation of a number of issues. Agents of Messrs. J. P. Morgan & Company recently spent two weeks in Winnipeg examining the resources of the province and the city.

City Borrows \$9,000,000.

According to Winnipeg despatches, Mayor Waugh returned to that city on Monday and announced that the money borrowed by the city in 1912 in London, amounting to \$9,000,000, has been paid off, the city saving \$2,000,000 in the transaction, owing to the difference in exchange, and in the prices at which the bonds were bought in London. The city paid off each \$100 indebtedness with \$76.25.

Assuming the conversion of the complete issues agreed upon, the amount which the city would save on the operation would be on principal account the sum of \$1,876,462. This amounts roughly to 20 per cent. of the whole issue concerned, and the percentage of benefit to the city will apply to the exact proportion of the securities converted.

At the present time the saving in interest will amount to about \$3,400 per annum. In the course of years there would be, in all probability, a much greater saving in interest.

British Treasury's Position.

When the scheme was first broached, the British treasury apparently did not receive it enthusiastically, and some difficulty was found in getting the officials to consider such a reorganization scheme at present. This is the first occasion since the outbreak of war that the Treasury has given any consideration to such a scheme promoted by a provincial government or municipality. Apparently the obstacles have now been overcome and the plan will be proceeded with. It is not known yet whether the Treasury officials will exercise their full powers under the mobilization of securities scheme, but London cable messages indicate that this will be the case.

Large holders in Great Britain of Manitoba province and Winnipeg securities will probably be notified by the British Treasury that it is desirable for them to turn in their securities to the government. When the volume of securities under the mobilization scheme began to decline, the British authorities instituted a tax of about 25 per cent. to be paid by investors who persisted in holding the securities which the treasury desired to purchase. This had the effect of releasing a number of securities which otherwise would have been held by British investors. Similar pressure could be applied in the case of the Canadian securities in question if it were thought desirable.

As these securities are mobilized in London, say to the extent of three or four million dollars, they will be purchased there, retired, and new issues will be made in the New York market for similar amounts. This process will continue until the Manitoba provincial and Winnipeg city debts in London are paid off. The provincial and municipal debts of those two borrowers will then have been transferred to New York. The transaction will, as noted above, effect a considerable saving for the borrowers. These securities, issued mostly at par in London some years ago, are now selling ten or more points below par. They will be purchased at that price. The

province will, therefore, be able to wipe out its debt in London, at a considerable discount.

Important Canadian and United States banking houses will participate in the scheme when all the arrangements are complete. *The Monetary Times* understands that if the results of the present experiment are satisfactory, more especially to the British authorities, similar financing will be undertaken by Saskatchewan. The financing of these two provinces and of the city of Winnipeg may ultimately involve \$70,000,000.

In response to inquiries of *The Monetary Times*, Messrs. J. P. Morgan and Company, New York, made the following statement: "The details of the scheme have yet to be worked out. We are not in a position to make an announcement at the present time."

LIFE INSURANCE IN BRITISH COLUMBIA

Life insurance premiums totalling \$2,761,258, on a total insurance of \$83,204,991, were collected last year in British Columbia, according to returns which Mr. E. F. Gunther, provincial superintendent of insurance, has issued. The business was divided among 34 companies licensed to do business in British Columbia. The companies have invested in the province \$16,228,300, of which \$8,630,515 is invested on mortgage and \$7,597,785 on other securities. The amount of new business written during the year 1915 aggregated \$15,474,900. Claims paid totalled \$1,021,605, and unsettled claims on December 31 aggregated \$384,000, of which \$230,500 were disputed.

The following table shows the premium income and the total amount of insurance carried by the various companies at the end of the year:—

Name of company.	Premiums.	In force.

"As a young man, when I was first looking forward to the obligations of manhood and the duties of fatherhood, I realized that there was only one way in which a poor man without capital could protect his family from the vicissitudes of fortune and make proper security against the day which must come to us all, and that was through life insurance. And I have been interested in life insurance, adding to my holdings in life insurance from that time to this. If I were to die to-night, to a very large extent the entire protection of my family would consist of life insurance policies."—Charles E. Hughes, United States presidential candidate, speaking in New York in 1908.

Shawinigan Falls, Que.—Tenders are desired for \$100,000 6 per cent. 20-year bonds. C. H. Hamand, secretary-treasurer.

Windsor, Ont.—Tenders are being sought for \$196,850 5 and 5½ per cent. bonds, to-day being closing date for same. M. A. Dickinson, acting clerk.

Orillia, Ont.—A request for the issuance of \$110,000 5½ per cent. 30-year bonds for power equipment was presented to the council by the utility commission.

Fitzroy Township, Ont.—Bids close July 28th for \$14,000 5 per cent. 30-year instalment bonds. W. Boyle, township clerk, Kinburn. (Official announcement appears on another page.)

St. Thomas, Ont.—The Monarch Knitting Company are asking the city to provide a loan of \$50,000 for the erection of a hosiery factory, and a by-law is to be submitted to the ratepayers.

Trenton, N.S.—For the \$30,000 5 per cent. 20-year street paving bonds Mr. W. Fraser, town clerk, received four offers, and that of Messrs. W. F. Mahon and Company, Halifax, was accepted and half the amount sold to this firm:—

Messrs. W. F. Mahon and Company	93.31
Eastern Securities Company	91.79
J. C. Macintosh and Company	91.61
Eastern Investment Company	91.61

British Columbia.—Certificates of approval have been issued by the municipal department of the province as follows: Port Alberni, bonds, \$10,000, street improvements, 10-years, 6 per cent., payable half-yearly (authorizing by-law certified August 1st, 1914.); Prince George, bonds, \$80,000, waterworks, 15-years, 6 per cent., payable half-yearly; Prince George, bonds, \$10,000, civic building, ten years, 6 per cent., payable half-yearly; Prince George, bonds, \$45,000, electric light, 15-years, 6 per cent., payable half-yearly; Prince George, bonds, \$15,000, street improvements, 10-years, 6 per cent., payable half-yearly.

Edmonton, Alta.—In connection with the sale of \$2,000,000 short-term bonds, which, as stated in the last issue of *The Monetary Times*, were awarded to Messrs. Julian Garrett, Limited, Edmonton, on account of Messrs. Otis and Company, Cleveland, the written opinion of Mr. Wallbridge, of Wallbridge, Henwood and Gibson, was received by the city council, this concurring with that of City Solicitor Bown, which absolves the city from any liability towards the Imperial Bank in the matter of the cancelled option given under Mayor Henry's letter. Mr. Wallbridge says: "We quite agree with the opinion of the city solicitor that the option having been given without consideration, was subject to revocation and having been revoked before acceptance, did not become binding."

Saskatchewan.—The following is a list of bond applications granted by the local government:—

School Districts.—Beausite, \$1,200. J. M. Renand, Marcelin; Conquest, \$7,500. C. S. Elsey, Conquest; Neuve Chappelle, \$1,665. T. M. Henderson, White Bear; Moose Pond, \$1,700. P. O. Fish, Verwood; Brushwood, \$1,200. E. Simpson, St. Brieux; Keatley, \$1,600. Wm. Burke, Keatley; Stoney Ridge, \$1,600. J. J. Cameron, Last Mountain.

Rural Telephone Companies.—Ituna, \$9,000. J. A. Watson, Ituna; Luseland East, \$11,000. J. B. McConica, Luseland; Harris, \$31,000. O. W. Brown, Harris; Crosswoods, \$15,000. F. H. Wilson, Southey; Pheasant Hills, \$1,600. J. W. Matthews, Melville; White Shore, \$7,000. J. Yustin,

Handel; Kerrobert Southern, \$15,700. D. H. Maginnes, Kerrobert; Crocus Bell, \$1,100. E. Unsworth, Kinley.

Villages.—Luseland, \$2,000. W. H. Colman, Luseland; St. Brieux, \$1,500. A. Archibald, St. Brieux.

City.—Weyburn, \$4,402.52, \$3,877.06, \$561.14. E. H. Phillips, City Clerk, Weyburn.

MUNICIPAL BONDS AWARDED

Welland County, Ont.—\$100,000, to Messrs. Æmilus Jarvis & Company, Toronto.

Hull, Que.—\$146,000 5½ per cent. 10-year bonds, to Royal Securities Corporation, Montreal.

Frontenac County, Ont.—\$30,000 5 per cent. 10 instalments, to the Imperial Bank, Toronto.

Northumberland County, N.B.—\$30,000 5 per cent. 40-year bonds at 100.25, to Mr. M. McKay.

Saskatchewan.—The following is a list of bonds reported sold by the local government board:—

School Districts.—Landestrew, No. 3698, \$1,600; Bellfield, No. 3690, \$1,200; Ceylon, No. 351, \$2,000; Lund, No. 3710, \$1,000; Henrietta, No. 19, \$1,500; West Plains, No. 3575, \$1,600; Round Hills, No. 3704, \$1,400; Verdun, No. 3693, \$1,600; Poplar Valley, No. 3646, \$1,150.

Rural Telephone Companies.—Hillsdale, \$450; Central Butte, \$11,500; Echo, \$10,000.

Villages.—Robsart, \$2,800.

OFFICERS WHO WILL LOOK AFTER BUSINESS TAX

The following officers will administer the business profits war tax act:—

Commissioner of Taxation—R. W. Breadner, Finance Department, Ottawa, Ont.

Inspectors of Taxation—Major J. P. Edwards, Room 401, Dennis Building, Halifax; Arthur W. Sharp, 57 Princess Street, St. John; Evariste Rochette, 203 St. John Street, Quebec; Peter F. McCaffrey, Post Office Building, Montreal; Arthur Labbe, Post Office Building, Montreal; J. B. Kilgour, 59 Victoria Street, Toronto; Hugh D. Paterson, 59 Victoria Street, Toronto; Berkeley G. Lowe, Customs Building, Hamilton; George R. Tambling, Bank of Toronto Chambers, London; W. L. Ball, Union Bank Building, Winnipeg; Herbert N. White, Customs Building, Calgary; A. G. McCandless, 211 Winch Building, Vancouver.

CONSERVATION OF EMPIRE'S RESOURCES

Sir George Foster, minister of trade and commerce, who was one of the British representatives of the economic conference at Paris, in an interview in London, emphasized the importance of the deliberations of the conference in regard to the conservation of natural resources. "Probably," he remarked, "nations in the past have been slack in properly valuing their raw materials, the essential elements of national development. In one way, it would be just as foolish to allow foreign and alien interests to get possession of the primary bases of production, as it would be to allow their armies to take possession of the fortifications and defences of the country. A distinguishing feature of the resolutions passed by the conference is that weight is given to that phase of national development, and provision is made for conserving those basic natural resources for the nations possessing them, primarily, and for the benefit of the Allies in sequence.

"The Empire will, no doubt, now take full cognizance of the importance of this matter, and in all its different parts will, by careful examination and exploitation, not only use those resources, but develop and conserve them within national and Empire lines. There is no line of conquest so rich in possibilities as the conquest of the almost immeasurable resources of the Empire for the uses of civilization and the happiness of its citizens. For my own country, indeed, for the Overseas Dominions generally, this phase of the subject is of vast importance."

London, Eng., Branches, 6 Princes Street, E.C., and
West End Branch, Haymarket, S.W.

The Bank, having over 315 Branches in Canada, extending from Halifax to Prince Rupert, offers excellent facilities for the transaction of every description of Banking business. It has Correspondents in all Cities of importance throughout Canada, the United States, the United Kingdom, the Continent of Europe, and the British Colonies.

Collections made in all parts of the Dominion and returns promptly remitted at lowest rates of exchange. Letters of Credit and Travellers' Cheques issued available in all parts of the world.

Life Insurance Men of Canada at Hamilton

FIELD Men and Agency Managers Will Meet to Discuss the Problems of the Business—Economic Value of Life Insurance in Relation to the Individual, the Family and the State—Minimizing the Evil of Loans on Insurance Policies—Life Insurance From the Business Man's Standpoint—Does the Rate Book Contain too Many Plans?

THE men who are selling life insurance in Canada are meeting in annual convention at Hamilton on July 19th-22nd. This is a parliament of the field men of the life insurance business, a business which swings hundreds of millions of dollars in investments, a livelihood for thousands of families, and protection for all except those who have been blind to the value of a life insurance policy. The convention will discuss a large number of topics, including the minimizing of the evil of loans on insurance policies, the economic value of life insurance and the question of cutting rates.

The gathering is of great importance, not only to the insurance men getting the business, but also to the head office staff, to the chief executives of insurance companies,

and to the public. That this fact is recognized has been indicated by a number of the big powers of the insurance world dropping in at past conventions to hear the discussions and to offer a few suggestions. These meetings are bringing head office and field staff into close touch, each with the other's problems.

There are too many who still have an insufficiently intimate acquaintance with the life insurance agent and his policies. It might prove an interesting and instructive innovation were the life insurance men to arrange their programme so as to give an afternoon session for the benefit of the general public. Special talks and topics could be chosen for that session and free discussion allowed.

SUICIDE AND LIFE INSURANCE

The contesting by several life insurance companies doing business in Canada, of the payment of policies on the life of W. R. Arnold, Vancouver, has aroused considerable interest. Only those policies taken out just prior to his death, are being contested, and on the ground that Arnold committed suicide. It is very seldom that Canadian companies contest the payment of policies. Indeed, only when the gravest doubts arise is such an event likely. In the first judgment handed out in this case, Chief Justice Hunter said:—

"I think the companies were quite justified in resisting this claim for payment of these policies; that there was reasonable ground for defending the case, upon the theory of suicide, for there are a great many circumstances which until fully investigated would naturally suggest that that is what happened. And for this reason, I think the companies were justified, out of regard to other policyholders, in requiring that a judicial investigation should be had before they paid these claims. They not only were justified because they are trustees for the other policyholders, but also in the public interest. It certainly cannot be in the public interest that bogus insurance claims shall be paid without contest and without the matter being thoroughly thrashed out. It certainly is in the public interest to keep down the rates for insurance, and if large claims for insurance are obtained fraudulently with a view to ultimate suicide, and have to be paid by the companies, it is easy to see that the insurance rates would have to rise in order to allow the companies to do business. So that I say that both out of the fact that they are trustees for other policyholders, and from the public interest, I think the companies are justified in this case in resisting the claim until it was made the subject of judicial investigation."

This clearly indicates that the policies were contested chiefly in the interests of policyholders. Life insurance companies have learned that the absolute protection of their policyholders' interests is one of the best recommendations of their wares.

BANKS AS LIFE INSURANCE SALESMEN

The recommendation of comptroller of the currency Williams, of the United States, that congress amend the federal reserve act so as to permit national banks in villages of less than 3,000 inhabitants to act as agents for fire and life insurance, and for loans on real estate, has aroused considerable interest among life insurance agents in Canada and the United States. Some of the insurance journals have sarcastic references to the proposal, one of them suggesting that the comptroller of currency "should permit the banks to sell fish, delicatessen and musical instruments, and also to do watch repairing and plain sewing," adding "If comptroller Williams wants to make a country bank a public utility, he should extend its usefulness not only to insuring lives and selling real estate, but to supplying milk, morning papers and servant girls."

Much insurance is placed through bank managers in Canada and this has been the subject of some complaint by life insurance agents. During the discussion at their Toronto convention last year of the part-time agent problem, this point was raised several times and some strong criticism was heard. "How can a bank manager truly and faithfully serve his bank if he is at the same time dickering with an insurance agency?" asked one of the agents. "He either degenerates into a second-rate banker or an indifferent insurance agent, or both, and time and again irregularities have occurred in consequence. In fact, in some parts of the United States, special laws have been passed forbidding the practice." The agents were inclined to think, as one said, that "it is a poor state of affairs when a banker is able to say to a client seeking a perfectly legitimate business accommodation, 'Yes, we can swing that thing, if you allow me to have the placing of the insurance you propose putting on.' " There will probably always be a certain amount of insurance business done through the medium of the banker. As to whether the volume of such business has reached a debatable point and whether such business needs regulation, there is doubt.

RESPONSIBILITY OF THE AGENT

In a certain section where both Canadian and United States companies are doing business, a life insurance agent made a false step. He was in touch with a group of prospects, simple and confiding. Taking advantage of their lack of business knowledge, he sold them unsuitable policies and that was not the worst of his actions. The result was that the business of life insurance was harmed in that community and as the agent chanced to represent a United States company, all companies of that country were boycotted. Even Canadian companies found serious obstacles to writing business there because misgivings existed in regard to any kind of life insurance, a condition created by the action of that one agent.

It is an illustration of the responsibility of the life insurance agent for the safekeeping of the good name of life insurance. It means that he must not misrepresent the policy he is selling or another company's policy. It means that he must sell the policy suited to the prospect or the one the prospect desires and not particularly the policy which he has set his mind on selling. He must talk life insurance generally as well as his company particularly. He must remember that the young man who buys a \$1,000 policy to-day, may easily become the business man who will purchase a \$50,000 policy fifteen years hence. An irresponsible life insurance agent is a nuisance to himself, to the insuring public and to the business of insurance.

LIFE UNDERWRITERS' ASSOCIATION

At Hamilton this week life insurance salesmen from all parts of Canada will gather to discuss their business problems. How to minimize the loan evil, how to train agents, how to keep business on the books, and how to advertise will have attention. A Hamilton manufacturer will explain the business man's viewpoint of insurance. Ways and means of selling life insurance will be discussed, the tricks of the trade analyzed and improvements suggested. The convention is being held under the auspices of the Dominion Life Underwriters' Association, an organization of life insurance salesmen. When it was initiated ten years ago the life insurance business in Canada was only beginning to get away from the conviction that every agent was an enemy of his fellow agent and every company an enemy of other companies. Those who have been in the business many years tell amusing stories of the atmosphere of tragic suspicion in which insurance agents and head office officials used to carry on their business. The Dominion Life Underwriters' Association was brought into existence to stop that sort of thing among life insurance agents, to remedy several evils and to teach the agent to know that every man who sells a good life insurance contract, is doing a good turn for the business generally.

The first result of the movement was the creation of what the office boy would call "a state of mush." The change from daggers drawn to brotherly love, peace and good-will was too remarkable to achieve business results. But with a tremendous amount of energy and gas thrown into what was dubbed "the association movement," the affecting condition continued for several years. Then the members of the association began to ask themselves whether the Association was not missing the point. They came to the conclusion that a little mush goes a long way,

that it neither sells life insurance nor butters the agent's bread. This was recognized by those at the head of affairs and at the conventions following, business problems were discussed instead of poets quoted and a general love feast held. Last year's convention at Toronto was probably the most businesslike of the nine held to that date. The Hamilton delegation introduced the subject of a rebate case which had been discovered and proved in their district. They wanted action taken and asked bluntly what good was the Dominion Life Underwriters' Association to salesmen if the Association intended only to preach and not to practise. That incident gave the finishing touch to the transformation of the Association to an organization which is really helping the life insurance salesmen and the life insurance business. This year's convention at Hamilton is likely to be the best of the ten from that point of view. There will be in attendance there many men who are going solely to learn how to write more business and perhaps to discover where to write it.

MUST HAVE INSURANCE SALESMEN

The experiment of State life insurance has not proved a success in the neighboring republic. In Wisconsin, a conspicuous example, it has proved a complete failure. In operation three years, the State had on January 1st last only \$289,600 of business in force, an amount which a number of individual agents on this continent would consider a fair half year's business. A large block of the amount which the State was able to write is represented by 100 policyholders who were students in the State University and all insured at one time for the benefit of a class memorial. Last year the new business issued was \$70,500 only. The average member of the Dominion Life Underwriters' Association could make a better record than that.

Wisconsin's experience proves again that the agent is indispensable in the life insurance business. The public will not buy life insurance, even although it is a necessity, as they will buy goods in the store, and which are frequently luxuries. Life insurance has to be sold by an expert selling organization. The requirements of each prospective purchaser must be studied. The one best argument, of a hundred good ones, which will appeal to the prospect, must be found. That is a work which no one can do more efficiently, to the benefit of all concerned, than the life insurance agent.

CARRIED LARGE LIFE INSURANCE

The late Andrew J. Graham, the Chicago banker who died recently, carried nearly \$800,000 of life insurance. The largest policy was a term policy for \$300,000 in the Mutual Life of New York, taken out about five years ago to protect a business venture. In addition he had a policy for \$52,000 in the Metropolitan Life and policies for \$50,000 each in the New England Mutual, the Northwestern Mutual and the Prudential. Some of these \$50,000 policies were made payable to his sons. Mr. Graham also had \$20,000 in the National Life of Chicago, \$12,000 in the Home Life, and a number of smaller policies, many of them taken out a number of years ago. Mr. Graham was a leading Democratic politician, running for the Democratic nomination for mayor of Chicago a few years ago, and for this reason belonging to as many fraternal insurance orders as possible. It is estimated that he had between \$60,000 and \$70,000 of insurance in those organizations.

ASSESSMENT LIFE INSURANCE

What the Figures of Fraternal Insurance Organizations Show—Old Line Life Companies' Motto is Safety First

BY WILLIAM H. ORR.

Let us take a look at what 20 of the largest assessment life insurance associations are doing. From the table below, it will be seen that some of them are growing in size, and others are beginning to go to pieces, by the loss of membership. Of the 170 societies found in the chart from which we quote, 91 show an increase of size during the four years—1910 to 1914 inclusive—while the other 79 show decreasing membership, and increasing death losses.

In the matter of present largest amount of insurance in force for the year 1914, the 20 associations below compare as to their business reported in the year 1910 as follows, from the largest to the smallest:—

Name and Location.	Year of Record.	Admitted Assets.	Insurance Written.	Total In Force.
Royal Arcanum, Boston	1914	\$ 6,501,491	\$14,800,500	\$407,413,000
Maccabees, Detroit	1910	7,401,110	20,033,500	489,897,730
American Yeomen, Philadelphia ...	1914	13,650,121	86,988,950	385,926,774
Royal Neighbors, Rock Island ...	1910	10,344,479	27,880,500	333,525,337
I. O. Foresters, Toronto	1914	3,243,312	49,934,500	257,500,500
Kts. & Ladies of Security, Topeka	1910	1,734,735	49,602,000	187,372,000
Woodmen of W., Denver, Col. ...	1914	2,379,382	20,582,250	260,235,750
Railway Trainmen, Cleveland	1910	748,738	36,798,250	223,012,500
Loco. Engineers, Cleveland	1914	23,821,413	15,235,944	196,412,733
Cath. Foresters, Chicago	1910	16,691,733	20,962,378	240,170,989
Woodmen Circle, Omaha	1914	2,737,518	37,470,000	186,700,000
Ladies Maccabees, Port Huron ...	1910	1,833,681	26,245,000	120,986,000
Ladies Cath. Ben., Erie, Pa.	1914	6,864,047	11,762,000	180,324,400
Loco. Firemen, Peoria, Ill.	1910	4,025,473	15,093,000	185,252,700
National Union, Toledo, O.	1914	3,890,431	21,467,150	172,423,250
Knights Columbus, New Haven, Ct.	1910	2,428,661	27,678,000	130,173,850
Ben Hur Tribe, Crawfordville ...	1914	804,349	6,922,500	150,243,750
Fraternal Aid, Denver, Col. ...	1910	437,556	13,080,000	123,765,000
Kts. of Pythias, Indianapolis	1914	4,677,963	6,734,000	146,876,500
Heptasophs, Baltimore	1910	2,531,265	12,560,500	148,197,000
	1914	4,248,405	27,026,100	141,636,500
	1910	1,750,718	23,207,800	83,670,000
	1914	8,442,421	13,661,500	123,271,711
	1910	4,980,345	11,014,500	104,280,886
	1914	3,142,844	7,778,000	120,065,000
	1910	1,912,268	4,086,500	97,011,500
	1914	3,061,050	9,879,000	115,982,000
	1910	1,162,155	21,585,000	96,611,000
	1914	2,708,278	7,487,000	113,761,000
	1910	2,191,151	10,110,000	123,849,000
	1914	5,354,910	12,776,000	113,427,950
	1910	3,192,843	9,667,000	83,187,000
	1914	1,607,333	16,319,275	111,303,705
	1910	1,615,513	18,318,650	114,469,250
	1914	1,161,695	9,954,500	98,795,945
	1910	344,493	5,224,400	39,081,150
	1914	7,067,882	18,028,946	98,686,234
	1910	3,463,516	17,313,205	106,137,705
	1914	2,009,993	2,211,500	99,345,500
	1910	1,098,815	4,734,000	97,470,000

Promises to Pay at Death.

If we were to add up the amount of "promises to pay," it would be found that these 20 alone, with the other two still larger ones added, were carrying something in excess of \$5,917,000,000 of life insurance at the close of 1914. This is in the case of only 22 of the total 170 associations reporting their figures to the "Pocket Register." There are also billions upon billions under contract upon the books of all the regular life insurance companies of the continent. What a contrast such a benevolent state of things presents to what was the case in the early years of the present writer's 60 years of business life!

It will be noticed in the final column of the above figures that, while most of the 20 societies show some progress during the four years—from 1910 to 1914—some of them appear to have laboured in vain in that respect. Eight of them have not only failed, with all the new business they secured, to keep their ranks on the up-grade, but have lost all the new and a good part of the old business as well. Some of it went by heavy death losses, but more of it by dissatisfaction and lapse. Generally speaking, when the membership is on the wane, the death rate stands to run in the other direction. Take a few examples from among the 20.

The Maccabees and the American Yeomen, from near the head of the table, and the Woodmen Circle near the foot, are all three seen to have brought in, and held on to, a very large proportionate number of new members. Hence their calls by death have a low average per \$1,000 of risk carried, during

the four years. In 1910 they ran \$9.30, \$5.60 and \$7.40, while in 1914 the same three had a rate of \$6.50, \$6.30 and \$7.00. This shows that the influx of new blood reduced the average of the year 1910 (which for the three was \$7.43), down to \$6.60 in 1914.

On the other hand, notice that in the case of another three—viz., the Royal Arcanum, the Independent Order of Foresters and the Heptasophs—all of them now about 35 years old, and rapidly losing their membership—the deaths per \$1,000 of risk, cost them in 1910, respectively, \$14.60, \$9 and \$13.30, while in 1914 the figures were \$15.40, \$10.40 and \$15.60. These figures show an average during 1910 of \$12.30 and in 1914 an increase to \$13.80. Compared with the three younger and more actively growing associations, these three, through age and loss of membership, show a death rate more than double that of the prosperous ones. Of course, they will all get there, as the troubles of age come upon them, and then will begin to come the testing time, as to how long their very small provision of assets will stand the heavy drain.

Question of Safety First.

Most of the 20 show a slight increase of assets during the four years, and a few of them have quite a large sum laid by, but none, except the Independent Order of Foresters, Toronto, so far as we know, make any considerable pretence of actual solvency. There was undoubtedly an honest endeavor, at a very late period in its history, to make use of expert advice as to its liabilities, yet there must remain for many years to come, a serious doubt as to how much should be provided in good solidly invested assets, at this late date, to come anywhere near meeting the losses caused during the past years, when nobody was paying more than about one-third of what he should have paid. From the large number who died no collection of the shortage can now be made. Those of that time who did not die during the period of inadequate rates, are now having a heavy deduction made from their widows' and orphans' \$1,000, to cover their own past rate-deficiency, as fast as they die, in their old age. But if that is all it does, then it can easily be seen that from somewhere, sometime, there must be found the means to fill the gap caused by those previous deaths.

What the Blue Books Show.

In the Ottawa insurance reports for 1914 and 1915 important information is given as to the meaning of those liens upon the certificates of the old men. That is, those who joined previously to January 1st, 1899—about 15 years ago or more.

After a detailed statement showing that the total assets of the society were \$22,677,596 on December 31st, 1914, there is this footnote: "In addition to these assets, the society has liens on certificates issued prior to January 1st, 1899, amounting, with accrued interest thereon, to \$19,583,848. These liens," the footnote goes on to say, "were imposed by a single assessment levied on each such certificate, and, if not paid, remained as a lien upon the same, bearing interest at 4 per cent. compounded annually."

Adding the above two sums together, of assets in hand, and liens against the certificates, the following shows the condition of the Independent Order of Foresters on December 31st, 1914, viz.:—

Accumulated invested funds	\$22,677,596
Liens placed against the older certificates	19,583,848
Total realized and assessed resources.....	\$42,261,444
The reserve liability is given as	41,274,504
Which shows the real surplus, or capital, to be.....	\$ 986,940

That is a margin for safety of only 2 1/3 per cent. above the total liabilities. How far below what the actuaries and the insurance superintendents deem this size of margin to be, may be seen from a few quotations from the reports of old line insurance companies as follows:—

Company.	Assets.	Liabilities.	Surplus.	%
Canada Life	\$56,103,710	\$48,932,584	\$7,171,125	13
Confederation	19,814,850	17,524,580	2,290,269	12
Mutual Life	24,306,233	20,487,754	3,818,479	15
Sun Life	64,605,314	57,433,862	7,171,452	11
Average of the four....	\$41,207,527	\$36,094,695	\$5,112,831	12 1/2
I.O.F., with liens	42,261,444	41,274,504	986,940	2 1/3

It is evident, therefore, from these figures, that to be in such safe and solvent condition as are the regular com-

The Division of an Estate

The duty of distributing an estate in exact accord with the directions given by will or by legal provision, is often beset with difficulties for the personal executor.

The impartial character of a trust company, on the other hand, and its position outside the range of personal influence, are guarantees of an unbiased treatment of the problems of distribution.

Consultation invited.

National Trust Company Limited

Capital Paid-up, \$1,500,000. Reserve, \$1,500,000

18-22 KING STREET EAST, TORONTO.

panies, at least four millions more should be on hand. This would not make provision for the cost of the many cases that may have to be defended in the courts of other countries than Canada, on account of the page upon page of abstracts of decisions against the power to levy liens, as already determined in the United States courts.

In 1913, when it was proposed to adopt the lien plan, a thorough investigation was made by the superintendents of insurance of the three states of Illinois, Wisconsin and Nebraska, and their report, with the opinions of actuaries, and questions and answers in full, occupy a pamphlet of 98 pages. In 14 different states, it is therein shown, judgments of court have been rendered to the effect that the imposing of a lien is illegal, so far as relates to certificate holders in those states. Also, in 14 cases in the federal courts, decisions are quoted showing that the contracts are to be construed as being made in the state in which the holder lives. How the society can expect to pull through without making a greatly increased assessment upon all its members, both new and old, it is difficult to discover.

There are only three other societies reporting to the Dominion government, as to the business they do in Canada, and their transactions are small compared with the Independent Order of Foresters, as will be seen from the following statement:—

Companies.	In Force.	Deaths, 1914.
Catholic Mutual Benefit Association.....	\$ 29,764,000	\$ 426,000
Commercial Travellers Mutual Benefit Society	2,213,000	39,000
I.O.F. (Canadian business)	79,951,314	1,800,672
Woodmen of the World	7,080,500	107,000
Totals for 1914	\$119,008,014	\$2,372,672
Totals for 1913	136,244,519	2,213,885

The insurance blue-books, with the reports for the year 1915 will not be available for some time yet.

GUARDIAN ASSURANCE COMPANY, LIMITED

One of the oldest and influential insurance companies of the world, the Guardian, has just presented its report and accounts for 1915. This company, which has a world-wide reputation and is doing business in Great Britain, Australia, New Zealand, South Africa and Canada, was established in 1821. It has subscribed capital of approximately \$10,000,000. In Canada the company writes fire, accident, sickness, guarantee, burglary and plate glass insurance. It had \$114,416,912 of fire insurance at risk at the end of 1915 in Canada. Last year, the company received \$1,128,911 gross cash for premiums, the net amount being \$970,601. The company is also transacting a rapidly increasing business in its other lines. The head office of the Canadian branch is at Montreal, where Mr. H. M. Lambert, who combines expert underwriting knowledge with a pleasing personality, is branch manager. He has the able assistance of Mr. B. E. Hards, assistant manager. The trustees of the Canadian branch are Messrs. Bienvieu, K. W. Blackwell and J. O. Gravel.

The report of the directors and the accounts presented at the company's annual meeting in London a few weeks ago, reflect an improvement in the already strong position of the corporation. There were increases in the business in the life and fire departments, and a slight decrease in that of the miscellaneous department.

In consequence of the continued depreciation caused by the war, the directors have given special attention to the valuation of the company's securities. They have disregarded nominal or minimum prices as entirely inadequate, and have re-valued all the securities on the basis of an increased yield corresponding to the rise in the value of money at the present time.

Offerings of securities giving attractive yields suitable for Ontario trustee investments are contained in a special list issued by Messrs. W. L. McKinnon & Company, Toronto.

Western Distributors, Limited, has been for some time in the hands of the Imperial Canadian Trust Company, who have carried on the business. A new company has now been formed, the name of which will be The Western Distributors, Limited. It will be backed by English capital, furnished through the London (England) office of J. H. C. Willoughby-Sumner Company, Regina.

ENLISTMENT AND LIFE INSURANCE

Occupations of Enlisted Men—Many "Prospects" Still Available

The heavy enlistment in most parts of the country has reduced the available number of life insurance prospects. One result is that men of older years are being canvassed. At the same time, comparatively new fields are being developed. Group insurance is one of the later activities. The insurance of a number of lives under one policy appeals to employers of large office and factory forces. Business insurance written for large amounts to protect partners or associates in case of the death of an active director or manager of a commercial enterprise, is making headway and will probably show expansion during the next few years. One case occurred recently in which a Canadian industrial company was able to maintain its dividends during its current fiscal year only because it had drawn a substantial amount representing business insurance on the life of one of its partners. The insurance of business women is another branch which has not been highly developed, although some agents are doubtful as to whether a very large proportion of such business would stay on the books.

Are Difficulties Overestimated?

It is just possible that life insurance salesmen are placing too much stress upon the obstacle of enlistment, so far as their business is concerned. What are the occupations of the enlisted men? While it has been impossible for the military authorities to prepare a greatly detailed classification, the following statement shows the seven classes into which the recruits secured up to February 15th, 1916, have been mainly divided:—

Classes.	Number Enlisted.	Percentage of Total Enlistments.
Professional men	16,153	6.14
Business men	6,530	2.48
Clerks	48,777	18.54
Manual labor	170,369	64.75
Farmers, including farm laborers	14,200	5.40
Ranchers	2,844	1.08
Students	4,238	1.61
Total up to February 15th...	263,111	100.00

Many Prospects at Home.

These figures indicate that manual laborers have supplied nearly 65 per cent. of the total enlistments up to February 15th last. A great proportion of that class of prospects would probably hold industrial policies. Clerks have contributed nearly 19 per cent., and the average policies in that group would be from \$1,000 to \$2,000. Under the head of professional and business men, there were still available for life insurance canvass in February last 91.38 per cent., mostly men underinsured or not insured at all. Farmers, including farm laborers, contributed 5.40 per cent. to the enlistment, and there were therefore 94.60 per cent. in that class available as prospects. As agriculture was well rewarded for its labors last year and the outlook is good this year, the agricultural community should offer satisfactory prospects to the life insurance salesman at present.

Many are Underinsured.

Much new business might be written by emphasizing, in canvassing, the under-insurance of the prospect. The majority of those carrying policies are underinsured. It costs \$1,000 to equip and maintain each Canadian in the firing line for one year. Surely, as Mr. H. C. Cox has said, every man left at home is worth to his dependants the sum which Canada is paying to have him and them protected. "This would suggest," said Mr. Cox, "the insuring of this great human asset for the enormous sum of three thousand millions of dollars, while we have at present in force a little more than one thousand millions, covering only about one-sixth of those who could, and should, avail themselves of the service and help of life assurance. It is therefore obvious that our people are seriously underinsured; a matter of import to all of us since the lack of such protection as the insurance companies afford tends to increase the possibility of her citizens becoming a charge upon the state."

INSURANCE TAXATION IN CANADA

Summary of the Taxation Measures of Each Province in the Dominion

When the insurance commissioners of the United States met in convention at St. Louis a few months ago, it was reported to them that the Canadian government was levying burdensome taxes on companies domiciled in the United States and a committee was instructed to report suggestions for protective measures if the Dominion is treating United States companies unfairly. But insurance taxation is heavy on all companies doing business in Canada. The Dominion government, however, recognizes the injustice of taxing life insurance premiums. The latest evidence of this was the exemption from the business profits war tax act which went into force this month, of the life insurance business.

The following particulars of the taxation in Canada of insurance companies, compiled by *The Monetary Times*, is of interest.

Dominion.—Under the business profits taxation of the March, 1916, session, all insurance companies, with the exception of life companies, are taxed 25 per cent. of net profits exceeding 7 per cent. in the case of an incorporated company and exceeding 10 per cent. in the case of a business owned by any other person. This war tax is operative from January 1st, 1915, to December 31st, 1917. Non-Canadian companies' capital, for the purposes of this measure, is deemed to be such portion of its paid-up capital stock as shall bear the same proportion to the amount paid up on its entire capital stock as the value of its assets in Canada bears to the value of its total assets.

Ontario.—All insurance companies \$30,000 per annum. This tax may be reduced by the provincial treasurer at his discretion. Registration fee \$150 per annum.

Provincial companies pay a license fee of \$50 per annum and their percentage of \$5,000, which is assessed on all companies licensed by the province.

Quebec.—All life companies—1¼ per cent. of gross premiums (minimum, \$400). Other insurance companies—1 per cent. of premiums (minimum, \$250). These taxes are imposed under the Commercial Corporations Tax Act of the province. There is another tax which the province is beginning to collect this year, imposed by the Act for the Prevention of Fires (3 Geo. V., chap. 38, 1912). This is an annual tax of ¼ of 1 per cent. on the aggregate amount of the gross premium or assessment collected by each fire insurance company in the province.

Nova Scotia.—Taxation for insurance companies is 1¼ per cent. of the premium income for life companies, and 1 per cent. for other insurance companies.

Manitoba.—All insurance companies, except mutual fire or hail insurance companies, to pay—

When gross premiums received by the company are:—

	Tax % of
\$ 50,000 or less	1
\$ 50,000 or more	1¼
\$100,000 or more	1½
\$150,000 or more	1¾
\$200,000 or more	2

For mutual fire and hail insurance companies tax is calculated on gross premiums received by such companies in cash in respect of the insurance transacted on the cash plan. There is a tax of ¼ per cent. on insurance companies' interest on investments which are over \$25,000.

British Columbia.—Fire insurance companies, 2 per cent. on premiums and 1 per cent. on income in the province from other sources. All other insurance companies, 1 per cent. on income in the province from all sources.

Saskatchewan.—All insurance companies, 1 per cent. of premiums. License fee \$200 annually. Renewal of registration under the companies act, \$10.

Prince Edward Island.—

	Per annum.
Life insurance companies	\$225
Fire insurance companies—with head office not in the province	150
Fire insurance companies—with head office in the province	75
Accident insurance companies	50
Guarantee insurance companies	10
Guarantee and accident insurance companies...	60

All the above taxes are payable half yearly, in advance, on June 1st and December 1st.

Alberta.—Every insurance corporation which undertakes insurance within the province other than the renewal from time to time of life insurance policies must pay an annual tax as follows:—

Every company undertaking—

(a) Life insurance	\$300
(b) Fire, storm, cyclone, tornado, inland marine, inland transportation and sprinkler leakage insurance	300
(c) Hail insurance	200
(d) Accident, sickness and guarantee insurance...	200
(e) Plate glass insurance	50
(f) Storm, cyclone and tornado insurance.....	50
(g) Inland marine and inland transportation insurance	50
(h) Sprinkler leakage insurance	50
(i) Mutual fire insurance—	
(i) If provincial	50
(ii) If Dominion or foreign	100
(j) One or more of all other classes of insurance...	100

Every underwriter's agency undertaking one or more of all classes of insurance

Every friendly society, having less than 100 members in the province, undertaking any one or more of the classes of insurance named below

Every friendly society, having 100 members or more in the province, undertaking—

(a) Sickness and funeral benefit insurance, and having its head office—	
(i) Within Canada	25
(ii) Without Canada	50
(b) Life insurance, including sickness and funeral benefit insurance, and having its head office—	
(i) Within Canada	50
(ii) Without Canada	100

MORE FACTORIES FOR CANADA?

Mr. Charles Blair, of Stockport, England, is in communication with Mr. Charles Webster, commissioner of the industrial bureau, Winnipeg, as to the prospect of establishing in that city a \$400,000 factory to produce surgical dressings. This factory, when completed, would employ from 500 to 600 persons.

The establishment, probably at Sarnia, of a chemical plant for the manufacture primarily of dyestuffs, and kindred pounds of dyestuffs and 14,000 pounds of high explosives is now under consideration by Toronto and New York interests. If established, it will be associated with the Federal Dyestuff and Chemical Corporation, of New York, a \$2,000,000 corporation, which is said to be producing 24,000 pounds of dyestuffs and 14,000 pounds of high explosives daily. By January 1, it is estimated that this company will produce 100 separate shades, and by the late autumn will have increased its capacity to 60 tons per day.

Mr. Walter A. Guile, Jr., vice-president of the Federal Dye Corporation, who has been consulted by Toronto capital concerning the project, was in that city last week.

Mr. W. D. Ross, Toronto, vice-president of the Nova Scotia Steel and Coal Company, and Mr. R. R. Bongard, are said to be interested in this enterprise.

Mr. A. J. Ralston, managing director of the National Life Assurance Company of Canada, states that the increase in the company's new business for the half-year ending June 30th, compared with the corresponding half-year of 1913, was approximately \$1,000,000. The new business in June was almost \$1,000,000. The policies actually issued and placed during the first six months of this year were approximately \$3,500,000. The lapse ratio shows a 50 per cent. decrease. The company shows an increase of \$86,000 in cash receipts and again reports not a dollar of interest or principal on any of invested funds overdue or in arrears. The war mortality for the first six months this year is \$34,000. The total mortality for the six months is \$24,000 greater than for the first six months of last year. The average rate of interest earned was 6 per cent. net.

FOR LIFE UNDERWRITERS' NOTEBOOKS

Gleanings from the Field Across the Line—Efficiency and Analyses

As Canadian life underwriters are gathering at Hamilton, so those of the north-western states got together at Minneapolis recently, and the following hints suggested there are worth the notice of the Canadian insurance salesman.

The first thing that a salesman ought to do is to sit down with his proposition and see just what it is made up of; how it works; what is its appeal to the average person to whom he may offer it; who can and will buy it; and what there is in it for the buyer. The latter item is most important, for if we once forget that all sales must give the buyer full value for his money and must carry with them a tangible service, that moment our failure begins to assume definite form.—J. H. Mitchell, Minneapolis.

Qualities of Successful Underwriter.

The most important of the qualities that enter into success, to my mind, are courage, energy, persistence, initiative and character. Courage is the quality that sustains a man's heart in tackling difficulty. It makes him stand up under the burden and heat of the day, and encounter each new difficulty with zest and with a determination to overcome it. Energy is the steam of the boiler, the driving power. It enables a man to keep going and not flag in his energy. It is that peculiar, indefinable power in a man that keeps him going. Persistence is the bulldog quality of tenacity, the ability to hang on. That quality that says, "Never say die." It is the quality that insures a man against being baffled by difficulties; what we sometimes call "sand" or "grit." Initiative is the power to plan, and to administer. It is the power that distinguishes the master from the slave, the leader from the followers. It is the characteristic that distinguishes the human from the machine. Character is that pervasive and intangible thing that sees to it that all other qualities are used to right ends. It is the compass of a man's life. Without this all the other qualities mentioned will simply make of a man an educated and finished rascal.—Mr. R. R. Price, director of University Extension, University of Minnesota.

Evils for the Agent to Eliminate.

Canadian life underwriters, along with their confreres in the United States, have their attention drawn to the following evils which it is necessary to eliminate. Mr. A. C. Larson, secretary of the National Association of Life Underwriters, lists them thus: Rebating—that evil of evils that shrinks your pocket-book and places distrust in the mind of your prospect. Twisting—that evil which, like a thief in the night, enters your home and robs you of a well-won victory, and which does more to create doubt and skepticism in the minds of the people than anything else. Proselyting—that evil that tears down your brother's fences and makes a farce of business ethics. Misrepresentation—a lie in its truest sense, which blots the fair escutcheon of our institution. Moral laxity—an evil that might be likened to a wolf in sheep's clothing, in other words, a man who does business legally right but morally wrong. These are some of the evils that must be done away with, for they sap the life growth of the grandest structure on earth.

What the Company Expects.

A life insurance company expects of the agent three things:—

- 1st. Applications.
- 2nd. Delivery of policies with settlements according to the company's rules.
- 3rd. Prompt remittance of net premiums when policies are delivered or within 60 days if notes are taken.

While the first and second propositions are all important, well understood, and tons of literature are printed and distributed annually telling "How it is done," the third proposition is equally important in making the successful agent, for, if the agent fails to report his outstanding business promptly and satisfactory to his cashier, as is frequently the case with a new man, such agent to some extent becomes discouraged and depressed thereby and his growth into a successful insurance man will be greatly retarded.—F. H. Scofield, La Crosse, Wis.

WOMEN AS LIFE INSURANCE AGENTS

Their Employment Here Becoming More Common—How They Work

"If I could dress up as a woman and canvass women for life insurance, I could make a lot of money in commissions." This remark was made by a prominent life insurance salesman of Toronto the other day. He felt convinced that there were thousands of young women in this country, in office and other positions, earning a fair salary, and who could be convinced of the benefit of life insurance. He thought that a 15-year endowment policy might prove an attractive proposal to them.

The employment of lady canvassers is becoming more common in Canada. Mrs. G. R. Baker, a notable lady organizer of Toronto, is the manager of a women's department of the North American Life Insurance Company of that city, and is making a success of the life insurance business. She was to have read a paper at the Dominion Life Underwriters' Convention at Hamilton, on "The Woman in the Life Assurance Field," but ill-health prevented her from doing so. Mrs. J. Stevely and Mrs. B. C. McCann have recently been appointed managers of the women's department of the Northern Life Assurance Company, London, Ontario. They are specializing in endowment life insurance for women.

Lady Canvasses Men.

At a recent life underwriters' convention in the United States, Miss Anna Kirkwood, an agent of the Mutual Benefit, stated that her canvassing was done largely among the business men. "I think the time will come when the companies writing women risks, will establish women's departments. In writing a prospect, I go prepared with data, but sometimes never use it. Yet I have more confidence when I know I am prepared."

For Women and Children.

Mr. T. R. Fell, New York manager of the Massachusetts New York Life, recently stated that the work of his company's women's department in New York, was based on the belief that life insurance is principally for women and children; it is issued to insure women and children and protect them from loss. It seemed logical that women should be engaged in the business of protecting women and children. "The women in our office," said Mr. Fell, "approach men with a business proposition in the interest of the wife. The wife would naturally submit any business proposition to the husband and ask his advice in connection with it. We therefore take the proposition directly to the husband. Our proposition is to protect the woman from the loss of the income in which she is now participating—an income that may be lost through death. Our women never call upon a man unless they are personally introduced, and before closing the interview they give every man an opportunity to introduce them to someone else. The introduction is not only a 'friendly act' to the agent, but possibly a greater 'friendly act' to some woman of their acquaintance or the children of their friend. The women are very systematic in connecting up these introductions.

"It is interesting to other agents of the company to see how the record of the introductions is kept. For that purpose, I enclose two diagrams—one, a series of links somewhat resembling a bush, and the other a tree, showing the growth of the 'friendly act.' These diagrams are frequently shown to people before they give the 'friendly act,' and men are often interested in looking over the diagram for the names of their friends. These also assist the agent to see that no duplicate introductions are given.

What One Lady Did.

"One of our young ladies wrote \$31,000 during the first two weeks of April on people whose names are shown on her diagram, all of whom were people she had not known when she entered the life insurance business, two months before, and all of the business was written on either the first or second interview."

That the Dominion will have a grain crop this year valued at \$1,000,000,000 is the opinion of Dr. A. Magill, chairman of the Dominion Grain Commission.

TOTAL ABSTAINERS LIVE LONGER

Actuarial Investigation of United States and Canadian Life Insurance Companies' Figures Proves It

According to the records of seven United States companies and of a Canadian company, the mortality among total abstainers is distinctly lower than among non-abstainers, the difference varying in the several companies, remarks Mr. A. Hunter, actuary, New York Life Assurance Company, as a result of an investigation which he conducted. Such variation is partly due to the conditions under which the business was done, and partly to the method of classifying the types of cases. One company, for example, did not consider a person as a total abstainer unless he had abstained from alcoholic beverages throughout his life; while another company put persons in that class who had been abstainers for several years but had taken alcohol moderately prior to that time. Again, one company based its experience on policyholders who were total abstainers at the date of application for insurance, while another company required that the insured abstain from alcohol so long as they remained in the abstainers' class. Whatever the basis of the statistics or the practice of the company, the significant fact remains that the mortality in these eight companies was lower among abstainers than among non-abstainers. There has been no attempt to select the records of companies which had a favorable experience among abstainers. It is confidently believed that the synopsis comprises the entire available statistics compiled from the records of the United States and Canadian companies.

Other Factors Involved.

The relatively low mortality among abstainers is not due solely, in my judgment, to abstinence from alcohol. Other factors, such as abstinence from tobacco, are involved. It requires self-control to be an abstainer, and the strength of mind which has made abstinence a habit may effect other habits, such as eating, in which there should be both moderation and discrimination. The low mortality among abstainers may be said to be due to "temperance in all things and total abstinence from alcohol."

In 1914 there was published the experience of forty-three of the leading American and Canadian companies with regard to persons who used alcohol freely at the date of application for insurance, or had used it to excess in the past. Statistics were given of fourteen of such groups. The results were questioned by certain defenders of the liquor trade on the ground that the data were not homogeneous as the companies had different methods of determining who were entitled to receive policies. I do not consider that such a criticism has much weight, as the experience of the company with which I am connected confirms the combined experience of the forty-three companies.

The Canadian company referred to by Mr. Hunter is the Manufacturers Life Insurance Company of Canada, which during the last twenty-nine years has had an abstainers and a general section. The majority of the policies were issued to persons resident in Canada, the greater part of the remainder being issued in the United States. The following indicates the mortality experience of the company for the last ten years:

Years.	Mortality in Abstainers Section.
1906-1910.....	40% less than in General Section.
1911-1915.....	35% less than in General Section.

It might be well to mention that the mortality experience of the general section of the company is very favorable, and in the opinion of the actuary, there does not appear to be any reason for the remarkably lower mortality among the abstainers, except the difference in the mode of life, which is principally exemplified by the difference in their attitude towards alcoholic beverages.

The opinions of medical directors show that the life insurance companies look with disfavor on applications from persons who drink freely although not to the point of intoxication, and on those who have taken alcoholic beverages to excess in the past but are temperate now. The statistics submitted, and others to which reference has been made, prove conclusively that this attitude of mind is based on facts, and that a higher mortality must be expected on these types of users of alcoholic beverages. On the other hand, it is conclusively proved that total abstainers are longer-lived than non-abstainers, even excluding from the latter those who drank immoderately at the date of application for insurance or prior to that time.

TERMS AND CONDITIONS OF POLICY

Purchasers of Life Insurance Should Read Their Policies and Know Its Features

While an efficient life agent will sell his client the policy he needs, the purchaser should know what he has bought. The following information relating to conditions in the United States is of interest to Canadians who are contemplating buying life insurance. Careful attention should be paid to the terms and conditions of the life insurance policy contract. In recent years there has been a movement toward uniformity, so that now there are fewer points of marked difference between the policies of the leading companies. In New York for some two or three years, there has been a standard policy law. This applies, however, to New York companies, and only to their policies issued and delivered in New York. In some other states, there are what are known as "standard policy provisions" required by law, states M. M. Dawson, consulting actuary, in one of the lectures of the Alexander Hamilton Institute.

These "standard life insurance provisions" apply chiefly to the following matters: (1.) Conditions and restrictions, which are limited to the first two or three years. (2.) Surrender values and privileges, a minimum surrender value being fixed by law and an election between different forms of surrender values being guaranteed. (3.) Loan privileges, under which the right to borrow against the policy, under certain conditions, is guaranteed. (4.) Annual dividends in event the policies are participating. (5.) Incontestability after from two to three years. (6.) The policy to constitute the entire contract, or, if the application is to be made part of the contract the endorsement of a copy of the application upon the policy. (7.) In the "standard policy provisions" of several states, the companies desiring to make use of the preliminary term or modified preliminary term method of valuation are also required to designate in the policy that the same is term insurance, as per the premium reserve plan selected. (8.) Provisions for automatic continuance of the insurance are usually among the standard provisions. These take the form of what is known as "extended insurance"; that is, the application of the reserve or a portion of the reserve to pay for insurance as long as the same is sustained in force.

Features of Misleading Character.

Other companies voluntarily offer "automatic premium loan" provisions, under which, if a premium falls due, it is charged against the policy as a loan; and this is continued so long as the loan value will cover the advances with interest. This differs from the "automatic extended insurance" plan, in that the latter does not treat the premiums as being charged, and does treat the policy as being discontinued on the original plan, permitting it to be reinstated only in event of proof of good health; whereas, under the "premium automatic loan," the policy is treated as being in force on the original plan and the policyholder is free to resume the payment of premiums at any time he may like prior to the complete exhaustion of the value. There are also found:—

Policies that are Proscribed.

(1.) Deferred dividend policies, that is, participating policies, on which no dividend is to be paid for five, ten, fifteen or twenty years. It is usually assumed that, at the end of the period, there will be large earnings; but the purchaser of insurance should remember that these expectations have invariably been disappointed.

(2.) So-called "guaranteed dividend" or "coupon" policies under which there appears to be a guaranty of a certain "dividend," or the reduction of the premium by a certain guaranteed amount, either the same every year after the first, or thereafter progressively increasing. Such policies have been proscribed in certain states as misleading and essentially fraudulent.

(3.) "Dated back" or "equalization" policies, under which it is maintained that there is an advantage to the policyholder to purchase a limited life payment policy dated back several years and to give his note for the reserve, paying interest on the note or permitting it to be charged.

(4.) Policies with "special dividend," "board contract" or "stock option" features, all of which are attempts to make the policyholder believe that he is getting something for nothing.

LIFE INSURANCE IN MANITOBA

MINING EXCHANGE AT WINNIPEG

Business Written by Provincial and Registered Companies
—Total in Force in Province

Mr. A. E. Ham, provincial superintendent of insurance, in his annual tabulation of insurance business transacted in Manitoba, shows the following results of life companies:—

PRICE BROTHERS' NOTE ISSUE

The sale of an issue of Price Brothers' serial notes to the Royal Securities Corporation, Montreal, was noted in a recent issue of *The Monetary Times*. This issue is \$500,000 6 per cent. collateral trust serial notes, dated July 1st, 1916, and maturing serially July 1st, 1917, to July 1st, 1921, inclusive. The notes are secured by collateral deposit with the Montreal Trust Company under an agreement between Price Brothers & Company, the Shipshaw Power Company, and the trust company as trustee, of a mortgage on the waterpower of the Shipshaw Power Company, which is owned by Price Brothers & Company. The notes are in \$1,000 denomination, with interest coupons attached, payable 1st January and July at the Union Bank of Canada, Montreal, Toronto, Quebec, London, Eng., and at the National Park Bank, New York.

A mining stock exchange has been opened in the Lindsay Building, Winnipeg. It will be managed by Mr. J. Harvey Porter, with Mr. W. O. Craig as secretary-treasurer. As yet only two gold mining companies with claims in the Rice Lake district have been granted certificates by the Public Utilities Commissioner, permitting them to make public offering of stock—the Boulder Gold Mines, Limited, and the Gold Seal Mines, Limited.

SECURITY BEHIND CANADIAN NORTHERN NOTES

The \$6,000,000 Canadian Northern Railway 6 per cent. gold notes recently sold are a direct obligation of the company, specifically secured by pledge with the trustee, of \$9,115,140 par value of Canadian Northern Railway System underlying first mortgage securities, guaranteed, principal and interest, as follows:—\$3,569,947 Canadian Northern Alberta Railway Company 3½ per cent. 50-year debenture stock, due April 1st, 1962, guaranteed by the Dominion of Canada; \$1,539,982 Canadian Northern Ontario Railway Company 3½ per cent. 50-year debenture stock, due May 19th, 1961, guaranteed by the Dominion of Canada; \$1,975,839 Canadian Northern Railway Company 4 per cent. debenture stock, due January 23rd, 1939, guaranteed by the province of Saskatchewan; \$2,029,372 Canadian Northern Pacific Railway Company 4½ per cent. debenture stock, due April 2nd, 1950, guaranteed by the province of British Columbia.

The securities pledged as collateral for these notes have liens prior to outstanding issues aggregating \$146,679,000. The Dominion of Canada owns \$40,000,000 of the outstanding \$100,000,000 Canadian Northern Railway capital stock.

BRITISH COLUMBIA'S RECENT BOND SALE

In a letter to the Vancouver press, Messrs. Macneil & Young, bond brokers, Toronto, correct several statements which have been made in that province in regard to their purchase recently of \$2,000,000 British Columbia bonds. The letter says, in part:—"We were the purchasers of the \$3,130,000 of bonds which the province sold in December last, and of \$1,000,000 Agricultural Credit Commission loan, which latter sale was made two or three months ago. On the present occasion, we were able to pay the province a price for its bonds nearly six points higher than that which they received on the December sale.

"The comparison drawn between the sale of the province of Nova Scotia bonds and those of British Columbia, is not a fair one. The Nova Scotia bonds bore interest at 5 per cent., whereas the province of British Columbia's, only bear interest at 4½ per cent. Consequently, the actual difference in the net price received by the two provinces, was about four points and not 9 per cent. less, as has been stated. The fact that Nova Scotia bonds command a higher price than those of British Columbia, is something which is beyond our power to control. The same thing applies to the provinces of Saskatchewan and Alberta. The eastern provinces always sell their bonds at a much higher price than the western.

Let us point out three recent sales of government debentures. The government of Newfoundland just completed the sale of a block of \$5,000,000 of securities in New York on a basis which would cost the government 5½ per cent. interest. The province of Saskatchewan recently sold \$1,000,000 5 per cent. five and ten-year bonds on a basis which cost the province 5½ per cent. for its money. The province of Alberta recently sold by public tender \$2,000,000 5 per cent. ten-year bonds on a basis which cost the province almost 5.60 per cent. In the last mentioned instance, there were competing tenderers from all over the United States. We think, having all these matters in mind, that the province of British Columbia has every reason to congratulate itself very highly upon receiving an excellent price. As a matter of fact, a number of our financial friends and advisers in the United States, in commenting on our purchase, gave it as their opinion that we had paid 1 per cent. higher than conditions at the present time warrant."

A branch of the Northern Crown Bank has been opened at Plato, Sask.

LAURENTIDE POWER STOCK IN MARKET

An issue of Laurentide Power Company's bonds is to be made simultaneously, in Canada and in the United States. The issue will amount to \$3,500,000 of the five per cent. bonds, due 1946. It is understood that the price at which the issue will be made will be 90.

BUSINESS INSURANCE

Life insurance in this age is as essential to the credit of an institution as is fire insurance. The late Mr. P. Morton, one time president of the Equitable Life Assurance Society, in writing of this subject stated: "It is a growing custom for large manufacturing plants and business enterprises of all kinds to protect themselves, by means of life insurance, against the loss of those men who are charged with the direction of their affairs. As an illustration: The F. H. Peavy Company, of Minneapolis, took out a million dollars of insurance—\$500,000 each—on the lives of the president and vice-president of the concern. The insurance is payable to the company, which pays the premiums. These policies were issued on the term plan with the privilege of conversion to limited payment form, as it was the intention of the two officers to take over the policies, at some later date, for their own estates and convert them into a more permanent form of insurance. Mrs. Chas. Netcher, who owns a department store in Chicago, took out a policy for \$300,000, which increased her insurance to a million dollars. In the event of her death her heirs are assured of ample cash with which to carry on the business. In New York nine partners in a large importing concern applied for a \$200,000 policy on the life of each member of the firm. They were disappointed, for not all of them were acceptable risks for life insurance.

"It is a good thing for a life insurance company to have as many business men as possible among its policyholders, and it is a wise precaution for business men to protect themselves against the deaths of their partners and their most trusted employees. Circulars sent to business houses throughout the country has resulted in a great many business insurance policies. In every instance the policies were made payable to the firm, and the premiums were paid by the firm and charged as a business expense."

INSURANCE OF CANADIAN SOLDIERS

Up to last month, the Metropolitan Life and the Aetna Life has written policies on the lives of Canadian soldiers to the amount of about \$14,000,000 since the beginning of the war. All told about 16,000 men in the various Canadian contingents have been insured by the two companies before leaving for the fighting lines.

Payments in death benefits to the families of Canadian volunteers have been about as follows to date: Metropolitan Life, \$552,000; Aetna Life, \$37,500. The Metropolitan took risks ranging from \$500 to \$1,000 on 11,513 men in various regiments to a total amount of \$10,811,000. The Aetna insured about 4,500 soldiers for \$3,000,000.

Subscription lists to pay premiums were opened in a number of towns and districts. An approximate schedule of the Metropolitan's insurances by districts:—

Districts.	Lives.	Insurance.
Barrie	12	\$ 12,500
Berlin	394	312,500
Hamilton	647	403,000
Kingston	62	62,000
Lachine	27	13,500
London	705	561,000
Quebec	282	186,500
Ottawa	23	23,000
Peterboro	70	70,000
St. Catharines	278	193,500
Saginaw	7	3,500
Toronto	8,810	8,807,000
Windsor	196	114,000
Total	11,513	\$10,811,500

About 9,901 of Metropolitan policies were taken at ordinary rates. The remainder carried extra war risks. The Aetna placed all policies under an extra premium plan.

FIRE LOSS IS HEAVY TAX

"In war time, and while many interests are urging thrift and economy, the Canadian people are burning up their created resources at a much greater rate this year than last," states Canada's Commission of Conservation.

"During the first five months of 1916 the fire loss in Canada has exceeded that of January to May, 1915, by approximately \$3,000,000, or \$600,000 per month." At this rate of increase, our fire loss will exceed that of 1915 by \$7,200,000.

"Canada has need of all her financial resources. She is borrowing money to carry on the war, and is paying 5 per cent. interest thereon. The additional fire loss of 1916 would therefore pay the interest charge on the recent war loan of \$100,000,000, and would pay \$2,200,000 of the principal. Canada's average annual fire loss, of over \$23,000,000, would pay 5% interest on approximately half a billion dollars. Our fire loss is, however, something for which we are receiving no value, either financial or patriotic; it is simply a tax, due in great part to carelessness, which Canadians appear willing to pay, and which they, as a whole, are doing little to avert."

The Monetary Times' fire loss record shows the total for the first half of the year to be \$8,286,312.

SUN LIFE AND PRUDENTIAL POLICIES

A decision of importance to former policyholders of the Prudential Life Insurance Company of Canada, recently reassured by the Sun Life, has been made regarding the extra premium chargeable under their policies where the assured engages in military service. At the outbreak of war, the larger Canadian life companies voluntarily waived all restrictions regarding military service contained in policies issued prior to August, 1914. In common, however, with the action taken by the younger life companies, the Prudential Life charged an extra premium for military service where the policy contained a clause permitting of such a charge, a step considered necessary to offset the prospective extra mortality due to war.

Notwithstanding the fact that at the time of its reassurance of the Prudential Life the Sun Life could rightly have taken advantage of the war clause contained in the policies reassured, the management of the Sun Life has decided to treat its new policyholders on exactly the same basis as if they had originally held Sun Life policies. Accordingly, any restrictions regarding military and naval service under Prudential policies issued prior to August, 1914, have been waived, and holders of such policies who are now, or who will be, engaged in military duties will not be required to pay an extra premium.

IMMIGRATION LAST YEAR

Canadian immigration in the last fiscal year dropped by almost two-thirds. The total of newcomers in the year was 48,537, compared with 144,789. By far the largest proportion of immigration is shown in the number of arrivals from the United States. Of these there were 36,937, while there were 8,664 immigrants from Great Britain and 2,936 from other countries. The British immigration included 5,857 English, 102 Welsh, 1,887 Scotch and 818 Irish.

Ontario got the largest share of the new population, a total of 14,743, the rest being distributed as follows:—Maritime Provinces, 5,981; Quebec, 8,274; Manitoba, 3,487; Saskatchewan, 6,001; Alberta, 7,215; British Columbia, 2,836.

The miscellaneous immigration included 27 Germans, 15 Austrians, 65 Hebrews, 179 Russians, 388 Italians, 180 French, 88 Chinese, 401 Japanese and 501 Scandinavians. The Chinese paid \$19,389 in head tax. Immigration officials during the year turned back 163 undesirables out of a total of 325 held for examination. Of the British immigrants 18 per cent. took up homesteads in the West, while 30 per cent. of the American and 28 per cent. of the immigrants from other countries also took up land.

Included in the bond offerings of Messrs. N. W. Halsey & Company, New York, is a block of province of Ontario 5 per cent. bonds due 1926.

"Life insurance increases the stability of the business world, raises its moral tone and puts a premium upon those habits of thrift and saving which are so essential to the welfare of the people as a body."—Theodore Roosevelt.

8% NET FARM MORTGAGES

We want \$1,000 on each of thirty-two quarter sections of first-class land. Principal re-payable in five years; interest payable the First of January and the First of July. All expenses paid by the Mortgagors. Titles examined by MacDonald, Craig, Tarr & Ross.

LEGAL NOTICES

MURRAY-KAY BUILDING COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 6th day of June, 1916, incorporating Gideon Grant, David Inglis Grant, Andrew Dods, Mervil MacDonald, Geoffrey Walters Adams, Bruce Williams and Percy Edwin Frederick Smily, all of the City of Toronto, in the Province of Ontario, barristers-at-law, for the following purposes, viz.:—(a) To purchase, lease, take in exchange or otherwise acquire lands or interests therein, together with any buildings or structures that may be on the said lands or any of them, and to sell, lease, exchange, mortgage or otherwise dispose of the whole or any portion of the lands and all or any of the buildings or structures that are now or may hereafter be erected thereon, and to take such security therefor as may be deemed necessary; (b) To erect buildings and deal in building material; (c) To take or hold mortgages for any unpaid balance of the purchase money on any of the lands, buildings or structures so sold, and to sell, mortgage or otherwise dispose of the said mortgages; (d) To improve, alter and manage the said land and buildings; (e) To guarantee and otherwise assist in the performance of contracts or mortgages of persons, firms or corporations with whom the company may have dealings and to assume and take over such mortgages or contracts on default; provided, however, that except as to taking and holding mortgages as aforesaid nothing herein contained shall be deemed to empower the company to make loans whether for building purposes or not upon lands not the property of the company or upon any lands which though once the property of the company have by any deed, conveyance, transfer or alienation become the property of another, and further provided that it shall not be lawful for the company hereby incorporated; (f) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (g) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (h) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit this company, and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (i) To acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (j) To construct, improve, maintain, work, manage, carry out or control any roads, ways, branches or sidings, bridges, reservoirs, water-courses, wharves, manufactories, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (k) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such person; (l) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (m) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company, if authorized so to do by the vote of a majority in number of the shareholders present or represented by proxy at a general meeting duly called for considering the matter, and holding not less than two-thirds of the issued capital stock of the company; (n) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (o) To do all or any of the above things and all things authorized by the letters patent or supplementary letters patent as principals, agents, contractors or otherwise, and either alone or in conjunction with others; (p) To do all such other things as are incidental or conducive to the attainment of the above objects and of the objects set out in the letters patent and supplementary letters patent. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Murray-Kay Building Company, Limited," with a capital stock of two million dollars, divided into 200,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

MURRAY-KAY COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 6th day of June, 1916, incorporating

Gideon Grant, David Inglis Grant, Andrew Dods, Mervil MacDonald, Geoffrey Walters Adams, Bruce Williams and Percy Edwin Frederick Smily, all of the City of Toronto, in the Province of Ontario, barristers-at-law, for the following purposes, viz.:—(a) To acquire, construct, own and operate departmental stores in all lines of mercantile business and to acquire, own and carry on the businesses of wholesale and retail dealers in and purchasers and manufacturers of all kinds and classes of goods, wares and merchandise incidental thereto or entering into production of such goods, wares and merchandise, and to act as agents for dealers or manufacturers of any such goods, wares and merchandise, and to establish agencies and branch stores; to carry on all or any businesses, both wholesale and retail, as shopkeepers, general merchants, manufacturers, shippers, general agents and warehousemen, and to buy, sell, make, manufacture, import, export, warehouse, store and deal in products of every description, goods, wares, merchandise and manufactured articles; (b) To take, acquire, lease, hold, sell and dispose of real estate and personal property of every nature and kind as security for or in satisfaction wholly or in part of debts, liabilities or obligations incurred or to be incurred in respect of or in connection with the business aforesaid, or any of the purposes or objects of the company; (c) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (d) To acquire or undertake the whole or any part of the business, property, good-will and liabilities of any person, firm or company carrying on any portion of the business which the company is authorized to carry on or possessed of property suitable for the purposes of the company and to pay for the same in cash, bonds or paid-up shares or partly in cash and partly in bonds or paid-up shares of the company as may be agreed upon; (e) To apply for, purchase or otherwise acquire any copyrights, patents, licenses, concessions and the like conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired; (f) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person, firm or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person, firm or company and to take or otherwise acquire shares, bonds and securities of any such company, and to sell, pledge, hold, issue or re-issue with or without guarantee or otherwise deal with or dispose of the same; (g) To consolidate or amalgamate with any other company having objects similar in whole or in part to those of the company; (h) To accept in payment of any debt or debts due or owing to the company the stock, shares, bonds, debentures of any other company or companies and, notwithstanding the provisions of section 44 of The Companies Act, to use any of the shares, bonds, debentures or other securities, or the funds of the company to purchase or otherwise acquire and to take, hold, assign, transfer, or sell the shares, bonds, debentures, or other securities of or in any other company or corporation and to guarantee the payment of the principal and interest of the bonds, debentures or dividends upon the shares of any other company or corporation and while holding such shares, bonds, debentures or other securities of any other company or corporation to exercise all the rights and powers of ownership thereof, including the right to vote thereon through such agent or agents as the directors may appoint and to distribute such shares, bonds, debentures or other securities or any assets of such other company in specie upon a division of profits or distribution of capital among the shareholders; (i) To enter into any arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain and to carry out exercise and comply with any such arrangements, rights, privileges and concessions; (j) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors in business) or the dependents or connections of such persons and to grant pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any public, general or useful object; (k) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of this company, or for any other purpose which may seem directly or indirectly calculated to benefit this company; (l) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business, and in particular any machinery, plant, stock in trade; (m) To construct, improve, maintain, work, manage, carry out or control any roads, ways, branches or sidings, bridges, reservoirs, watercourses, wharves, manufactories, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (n) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable and transferable instruments; (o) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (p) To sell, lease, transfer or dispose of the undertaking of the company or any part thereof to such person, firm or company, and for such consideration as the company may think fit, and in particular either for cash

LEGAL NOTICES

or for shares, bonds, debentures or securities of any other company (whether promoted by this company or not) having objects altogether or in part similar to those of the company; or partly for cash or partly for such shares, bonds, debentures or securities; (q) To raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise any corporation in the capital stock of which the company holds shares or whose bonds or debentures or obligations are held by the company, or with which it may have business relations, and to do any act or thing for the preservation, protection, improvement or enhancement of the value of any such shares, bonds, debentures or other obligations, and to act as employee, agent or manager of any such corporation and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (r) To lease, purchase, construct, own, maintain and alter any buildings or work necessary or convenient for the purposes of the company and to take options on lands and buildings belonging to others and to exercise such options or not as may be deemed expedient; (s) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the real and personal property, rights and franchises of the company and to give options thereon or any part thereof; (t) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars or catalogues, by purchase and exhibition of works of art or interest, by publication of books and periodicals, and by granting prizes, rewards and donations; (u) To procure the company to be registered and recognized in any foreign country and to designate persons resident therein according to the laws of each foreign country to represent the company and to accept service for and on behalf of the company of any process or suit; (v) To invest and deal with the moneys of the company not immediately required in such manner as the directors may from time to time determine; (w) To employ brokers, commission agents and underwriters upon any issue of shares, bonds, debentures or other securities of the company and to provide for the remuneration of such person or any other persons rendering services of any kind to the company; (x) To remunerate any person, firm or company for services rendered or to be rendered in placing or assisting to place or guaranteeing the placing of any of the shares in the company's capital or any debentures or other securities of the company or in or about the formation, promotion, organization or incorporation of the company of the conduct of its business; (y) To pay all or any costs, charges or expenses preliminary or incidental to or incurred in connection with the promotion, organization, formation, establishment, registration and incorporation of the company; (z) The business or purpose of the company is from time to time to do any one or more of the acts and things herein set forth either alone or in conjunction with others or as principals, factors, contractors or agents, and to do all and everything necessary, suitable and convenient or proper for the accomplishment of any of the purposes or the attainment of any one or more of the objects herein enumerated or incidental to the powers herein named, or which shall at any time appear to be conducive or expedient for the protection or benefit of the company. And it is hereby declared that in the interpretation of this clause the meaning of any of the objects of the company shall not be restricted by reference to any other object or by the juxtaposition of two or more objects, and that in the event of any ambiguity this clause shall be construed in such manner as to widen and not to restrict the powers of the company. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Murray-Kay Company, Limited," with a capital stock of seven million five hundred thousand dollars, divided into 75,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 8th day of June, 1916.

THOMAS MULVEY,
Under-Secretary of State.

Johnston, McKay, Dods & Grant, Traders Bank Building, solicitors for said company.

THE DIARSENOL COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 8th day of June, 1916, incorporating Ernest Neil Macallum and Charles Newton Candee, the younger, manufacturing chemists; James Frederick Edgar, barrister-at-law, and Lily Mae Lewis, stenographer, of the City of Toronto, in the Province of Ontario, and George Patrick Mackie, of the Village of Scarborough, in the said Province of Ontario, bookkeeper, for the following purposes, viz.:—(a) To manufacture, buy, sell, deal in, import and export chemicals, medicinal preparations and other products, and generally carry on wholesale business as manufacturers, buyers and vendors of all kinds of medicines and chemicals, patented articles, machinery, scientific apparatus, surgical instruments and supplies, and to carry on the trade of chemists, druggists, apothecaries, and traders, importers and exporters, and manufacturers of medicinal and pharmaceutical preparations; (b) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (d) To apply for, purchase or otherwise acquire, any patents, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any

of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired; (e) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (f) To take, or otherwise acquire and hold, shares in any other company having objects altogether or in part similar to those of the company, or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (g) To enter into any arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (h) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (i) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business, and in particular any machinery, plant, stock in trade; (j) To construct, improve, maintain, work, manage, carry out or control any roads, ways, branches or sidings, bridges, reservoirs, watercourses, wharves, manufacturing, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (k) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (l) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (m) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company; (n) To apply for, secure, acquire by assignment, transfer, purchase, or otherwise, and to exercise, carry out and enjoy any charter, license, power, authority, franchise, concession, rights or privilege, which any government or authority or any corporation or other public body may be empowered to grant and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's shares, bonds and assets to defray the necessary costs, charges and expenses thereof; (o) To procure the company to be registered and recognized in any foreign country and to designate persons therein according to the laws of such foreign country to represent this company and to accept service for and on behalf of the company of any process or suit; (p) To raise and assist in raising money for, and to aid, by way of bonus, loan, promise, endorsement, guarantee of bonds, debentures or other securities or otherwise, any other company or corporation, and to guarantee the performance of contracts by any such company, corporation, or by any other person or persons with whom the company may have business relations; (q) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (r) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (s) To do all or any of the above things as principals, agents, contractors or otherwise, and either alone or in conjunction with others; (t) To do all such other things as are incidental or conducive to the attainment of the above objects; (u) To acquire and take over as a going concern any business or operations now or hereafter carried on by any person, firm or corporation engaged in or empowered to engage in any business within the powers of the company, and to pay for the same either in cash or wholly or partly by shares, debentures or other securities of the company; (v) To purchase, hold, sell and dispose of shares of the capital stock of any other company or corporation having objects in whole or in part similar to those of the company, and to invest its funds in the purchase of any such stock and to pay for the same either in cash or shares of the capital stock or debentures of the company, or partly in cash and partly in capital stock or debentures of the company. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Diarsenol Company, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 13th day of June, 1916.

THOMAS MULVEY,
Under-Secretary of State.

51-2

Mr. W. E. Milner has been elected to the board of directors of the Maple Leaf Milling Company, which now number seven. Sir Douglas Cameron has been re-elected president and Mr. Hedley Shaw was chosen vice-president in place of Mr. Mulock, who resigned from that office.

EASTERN FREIGHT RATES JUDGMENT

Operating Expenses of Railways Are Higher—Each Rate Considered on Service Performed

The eastern freight rates judgment as contained in the official summary is in part as follows:—It was not until May 11th of this year that the increases in grain and grain products rates were withdrawn by the railways, after negotiations resulting from the board being impressed by the effect of the short mileage of the National Transcontinental, and competitive conditions between that line and the Canadian Northern north of the Ottawa. This affects a large item.

Actual Results of Earnings.

It is fair to accept for primary consideration the actual results of the Grand Trunk's earnings as a basis of rates.

The rates cannot be based on the total capital cost of the Grand Trunk as carried on the company's books, which would represent a cost of \$131,000 per mile.

In the Western rate case the government expert computed that six per cent. should be allowed so as to provide 4 per cent. for interest charges and 2 per cent. for surplus. Money is now more expensive. Taking the cost of the Glen Tay-Agincourt line and adding \$10,000 per mile for equipment, the net earnings would have to be \$4,800. If the Toronto-Sudbury line is taken as a basis, net earnings per mile would have to be \$4,001; while if the Intercolonial is taken they would have to be \$4,500.

Aside entirely from the terminal expenses the Grand Trunk net earnings in the best year are far short of these figures.

One Hundred and Fifty Rates.

Besides the class tariffs of general application, meaning the rate scales used everywhere in connection with the freight classification, the application of the railway companies comprises over one hundred and fifty exceptional or special single rates and more or less comparative schedules of exceptional rates, lower than the class rates, applicable to various commodities.

To quote the judgment: "No flat increase of five, ten or other percentage could be applied simply to augment railway revenue. Each rate of necessity has to be considered, having regard to its reasonableness for the service performed." Each of these items has thus been separately dealt with on its merits. The shippers interested in the several lines of trade represented in the application will arrive at their own conclusions from a study of this section of the judgment. The application with respect to some of the commodity items has been declined, and in numerous instances less has been granted than asked for by the railway companies.

Findings in Class Tariffs.

The findings regarding class tariffs may, however, briefly be summarized. In the territory bounded on the west by, but not including Port Arthur, and by the Georgian Bay, Lake Huron and Detroit River, and on the east by Quebec and Megantic, also between Canadian Pacific Railway stations in New Brunswick, the class rates, provided they are now lower than the standard or maximum mileage tariff, may be increased by two cents in the first and one cent in the fifth classes, the rates for the other classes to be properly proportioned in accordance with the standardized scale. An exception is made of the lines of the Canadian Pacific and Canadian Northern between Parry Sound and Sudbury, on which no increases are allowed.

In the Maritime Provinces.

Because of the comparatively lower level of the rates to the Maritime Provinces greater increases are permitted. Between points in the provinces of New Brunswick and Nova Scotia and points west of Quebec, Levis and Megantic as far as Montreal and Valleyfield, and north of the Ottawa River, the first-class will be advanced four cents and the fifth-class two cents; the other classes in proportion.

Between the same Maritime sections and points west of Montreal the carriers are authorized to increase their rates by six cents for the first-class and three cents for the fifth, the remaining rates fitting in from the standardized scale. Here, again, an exception is made of the line of the Canadian Pacific Railway in the St. John River Valley, where the rates, instead of being advanced, will be lowered by the company so

as not to exceed the St. John rates, this relief being due to the opening of the National Transcontinental south of Edmundston, N.B.

As the government railways are not subject to the jurisdiction of the board, the Intercolonial and National Transcontinental management is, of course, free to fix its own rates; nevertheless, the judgment provides that the true rates of the Grand Trunk, Canadian Pacific and other independent companies in Quebec and Ontario to Intercolonial points east of St. John to Halifax and Sydney are to preserve the same differences, if any, over the St. John rates as at present.

BRITISH MUNICIPALS IN NEW YORK

Canadian Brokers Say Anything that Will Broaden Market Will Help All Borrowers

The possibility of British municipalities offering their securities in the New York market continues to interest Canadian bond brokers. Discussing the matter with *The Monetary Times*, Mr. J. H. Gundy, of Messrs. Wood, Gundy and Company, Toronto, took the view that anything which broadens the United States market, is advantageous to all borrowers. He was doubtful as to whether the volume of such issues would be large. Canadian bond houses may lose a few sales as a result of the innovation," he said, "but the more international character the New York market assumes, the better will it be for us all."

Market Is Narrow.

A Canadian bond broker in New York in discussing the subject with *The Monetary Times*, stated that the New York market is extraordinarily narrow as far as international finance is concerned and yet is very broad regarding other matters. "I think," he added, "borrowing by British municipalities here would help to broaden this market, and that would materially help Canadian borrowing here. The New York market seems to be taking London's place as a money centre more every day."

Mr. F. J. Coombs, of Messrs. A. E. Ames & Company, Toronto, thinks the proposed borrowing would be good financing on the part of the British government, and should assist materially in maintaining the balance of exchange rates. "The bonds of these municipalities would," he said, "no doubt be offered on a basis to make them attractive to United States investors who would require to be educated in connection with the new securities."

Canadian Bonds Attractive.

"The effect of the sale of these securities would be measured, to a large extent, by the volume placed upon the market. Every new offering has a certain effect on the market in general in that it absorbs just so much of the available supply of investment funds. There is no doubt that a great many investors would prefer to purchase Canadian bonds rather than British municipals as there have been a number of years of educative work along this line and the securities are much nearer home. While we would not minimize the effect of placing large blocks of British securities on the market, we should think that Canadian government and municipal bonds would still be attractive to United States investors on a basis which might seem out of line with the substantial nature of the security the British securities might offer.

"Though it is not an even comparison, we might draw attention to the high return on Anglo-French bonds in comparison with the lower return obtainable on Dominion or Canada bonds in the United States."

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended July 7th, 1916:—Trethewey, 42,120; La Rose, 96,212; Coniagas, 140,253.

The total shipments since January 1st, 1916, are now 15,598,136 pounds, or 7,799.06 tons.

Is Your Estate Properly Protected?

No matter how little or how much you own, these possessions make up your estate, and should be protected by efficient and economical management.

This can best be done by an Executor or Trustee.

This Company, by acting in this capacity, will give your estate the benefit of experience gained in the management of many estates, of large and of only moderate size, and will scrupulously guard the interests of your heirs.

No charge for drawing up your will when the Sterling Trusts Corporation is appointed your Executor and Trustee.

Our officers will give you further information on request.

LIFE INSURANCE PAYMENTS IN CANADA

Life insurance payments in the leading cities of Canada in 1915, as compiled by the insurance press, were as follows:—

1. Montreal	\$2,516,500
2. Toronto	1,208,500
3. Vancouver	693,000
4. Winnipeg	521,500
5. Quebec	332,000
6. St. John	293,500
7. Hamilton	187,500
8. Ottawa	180,000
9. Victoria	178,500
10. Halifax	144,500

Payments were made in other places in Canada as follows: Westmount, \$128,000; Outremont, \$103,000; St. Johns (N.F.), \$95,500; Edmonton, \$94,500; Calgary, \$89,500; Woodstock, \$66,500; Brantford, \$62,500; London, \$62,500; Tilbury, \$51,500; Charlottetown, \$47,500; St. Jerome, \$47,500; Chilliwack, \$41,500; Sault Ste. Marie, \$41,500; Amherst, \$40,500; Dartmouth, \$40,500; Temagami, \$35,000; Waterville, \$29,000; Brockville, \$27,000; Hull, \$27,000; St. Mary's, \$27,000; Blind River, \$26,000; Magog, \$26,000; Niagara Falls, \$26,000; Rossland, \$26,000; Sandwich, \$26,000; Yarmouth, \$26,000; Armstrong, \$25,000; Aylmer, \$25,000; Dawson, \$25,000; Fraserville, \$25,000; Joliette, \$25,000; Kerrisdale, \$25,000; Louisville, \$25,000; Prince Rupert, \$25,000; St. Alexandre, \$25,000; Windsor, \$25,000; Spencer Wood, \$24,000; Bowmanville, \$22,000; Braseaside, \$18,500; Etang du Nord, \$17,500; Ste. Foye, \$16,500; Summerside, \$16,500; Swift Current, \$16,500; Yarmouth County, \$16,500; Arnprior, \$15,500; Bridgeburg, \$15,500; Eastmann, \$15,500; Kirkfield, \$15,500; Lachute, \$15,500; L'Assomption, \$15,500; Liverpool, \$15,500; Madoc, \$15,500; Moose Jaw, \$15,500; Roxbury, \$15,500; St. Bruno, \$15,500; Sherbrooke, \$15,500; Stettler, \$15,500; Welland, \$15,500; West Hamilton, \$15,500; Guelph, \$15,000; Blackville, \$14,500; Champlain, \$14,500; Huntingdon, \$14,500; West Toronto, \$14,500; Beauce, \$13,500; Bridgewater, \$13,500; Change Island, \$13,500; Dalhousie, \$13,500; Fort Appan, \$13,500; Fort Erie, \$13,500;

Fort William, \$13,500; Fredericton, \$13,500; Lethbridge, \$13,500; Nicolet, \$13,500; Port Arthur, \$13,500; Prince Albert, \$13,500; St. Cuthbert, \$13,500; St. George, \$13,500; St. Stephen, \$13,500; Shediac Cape, \$13,500; Three Rivers, \$13,500; Weston, \$13,500.

BIG CROPS AND HEAVY YIELDS

While it is too early for predictions as to the western crop, Mr. D. A. Downie, of Messrs. D. A. Downie & Company, Winnipeg, informs *The Monetary Times* that present indications point not to only one of the biggest crops that has ever been harvested in Western Canada, but a crop with the biggest yields per acre that has ever been taken off.

"Ten days ago the crop was considered late, but to-day it has made up a considerable portion of that time. Two weeks more of hot sunshine and it will be even with practically any of the early crops. It is impossible to pick out any one place or locality and say the crop is better here than some other place. No such condition exists to-day. There are a few places where the crops were put in too late to give the land and weather justice—this always happens. But every place now there is an abundance of warm rains and hot sunshine.

"There is a great hay and grass crop; clovers, alfalfa and timothy are rank and heavy—just as heavy as they can be on the ground. The wild grasses are long and thick and the cattle are doing fine, although as is usual in seasons with an abundance of moisture, the cattle will not weigh out as heavily for their appearance as on dryer pasture. Predictions are being freely made now that western grain yields will be considerably larger than last year. It is really too early to predict anything like that, but given the heading and filling weather, these predictions will be amply fulfilled.

"In many districts, particularly in the 'foreign settlements' in Manitoba, along the Riding and Duck Mountains, the creamery output is more than double that of last year.

"The farmers are buying more land, and from the point of view of the agriculturalist, and every person dependent upon agriculture, the outlook is promising indeed."

DIVIDENDS AND NOTICES

THE MERCHANTS BANK OF CANADA

QUARTERLY DIVIDEND.

Notice is hereby given that a dividend of Two and one-half per cent. for the current quarter, being at the rate of Ten per cent. per annum, upon the Paid-up Capital Stock of this Institution, has been declared, and will be payable at its Banking House in this city and at its Branches, on and after the 1st day of August next, to Shareholders of record at the close of business on the 15th day of July.

By order of the Board,

E. F. HEBDEN,
General Manager.

Montreal, 27th June, 1916.

DEBENTURES FOR SALE

DEBENTURES FOR SALE.

TENDERS FOR SCHOOL DEBENTURES.

The undersigned will receive sealed tenders for debentures up to noon Friday, July 28th, 1916, for \$14,000 bearing 5 per cent. interest, payable in 30 equal annual instalments, for the purpose of buying a site and building a schoolhouse in Public S.S. No. 11, Fitzroy, and marked tenders.

WM. BOYLE,
Clerk.

Township of Fitzroy, Kinburn, Ont.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Riordan Pulp and Paper Company.—Messrs. Green-shields and Company, Montreal, have purchased from English holders and are offering, prior to completing the necessary steps for listing on the Montreal Stock Exchange, a block of the common shares of the Riordan Pulp and Paper Company, Limited, at \$58 per \$100 share.

Canadian Foundries and Forgings Company.—The directors of Canadian Foundries and Forgings Company have declared the regular dividend of 1½ on the preferred stock and the regular dividend of 3 per cent. and a bonus of 3 per cent. on the common. Both dividends are payable August 15th, to stock of record July 31. The company has built up a big export trade, and Mr. W. M. Weir, the president, stated that orders on the books show an increase of 500 per cent. over the corresponding period of last year.

BANK OF ENGLAND RATE

The Bank of England rate was advanced from 5 to 6 per cent. on Thursday. It has remained at 5 since August 8, 1914.

BOARD TO STUDY RAILROAD SITUATION

Mr. Alfred H. Smith, president of the New York Central Lines, Sir Henry Drayton, chairman of the Board of Railway Commissioners for Canada, and Sir George Paish, the British financial authority, will constitute the board of inquiry to study the Canadian railway situation. Mr. Smith will be chairman of the board.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 3c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

WANTED—A gentleman who has been accustomed to earning \$100 a week or more; whose personality will get him an interview with anyone, and whose ability enables him to turn interviews into sales. We have an opening on a permanent proposition where great opportunity for advancement exists. Apply 614 C.P.R. Building, Toronto, after 4.30 p.m.

A MARRIED man, aged thirty, with fourteen years' Canadian Banking experience desires a change and will accept position with Commercial or Financial firm in Toronto or Montreal. Can furnish references as to ability and integrity. Prospect of advancement the first consideration. Reply to Box 495, *The Monetary Times*, Toronto.

ACCOUNTANT and Bookkeeper; age 30; over 12 years' experience in bookkeeping and financial work, seeks position with Financial or Commercial Firm, having good prospects. Reply Box 497, *The Monetary Times*, Toronto.

RELIABLE FIRM having cargo insurance to offer want General Agency for strong Marine Insurance Company; territory, British Columbia. Apply Box No. 499, *The Monetary Times*.

You Can Improve Your Position

Have you heard of the Sales and Intelligence Departments of the Canada Life?

They give special assistance to the Company's representatives.

They teach a man the insurance business by correspondence and personal assistance free of charge

Then they place him in a position and help him to make good

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this. All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policyholders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

SIMPLICITY FIRST

is about as important in your life assurance as "Safety First," because a contract that is not simple to understand may not be safe for your particular purpose.

The life assurance policy of the future must be an attractive and exactly worded contract, but above all CLEAR and SIMPLE — the new policy standard as set by

*NOTE.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending April, 1916, amounted to \$34,152,875 as against \$132,231,434 for the same period of 1914-15. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

LIFE INSURANCE IN ALBERTA

The following table shows the amount of life insurance business written in Alberta last year, according to the report of Mr. W. V. Newson, provincial superintendent of insurance:—

Company.	Premiums.	Claims.	Total Insurance business written in Alberta, in 1915. Dec. 31, '15.

The premiums for 1914 were \$1,994,278 and the claims \$245,206. Insurance of \$18,596,047 was written in the province in 1914 and the total business in force at the end of that year was \$65,294,488.

"I would like to believe that the decided improvement effected in the last year in the matter of policy loans, is due to a more enlightened attitude on the part of our policyholders," remarked an official of one of the great life insurance companies, "but I am afraid our efforts to that end have had little to do with the improvement. It can be attributed mostly to the prosperous condition of the country. Our policyholders don't need the money. Otherwise, I fear, the demand might be almost as great as ever."

There is no financial institution in the world that is so strong as a properly managed life insurance company. It cannot be wiped out, like a fire insurance company, by a great conflagration; it is immune against the constant danger to which banks and trust companies are exposed, for its obligations, as represented by its maturing policies, are not affected by panics. On the contrary, it is during a financial disturbance that a life insurance company looms most largely as a tower of strength. In the panic of 1907 the life insurance companies enabled many men to save themselves from ruin by making loans (more than half of which were voluntary on the part of the companies, as they were not provided for in the contract) on their policies at 5 per cent., when they could not borrow money elsewhere at any rate of interest. Many other men protected their families from possible loss by taking out policies to cover the shrinkage in the value of their securities. Life insurance eliminates all elements of chance, and is based on principles and statistics which make it an exact science.—Paul Morton.

Bank Returns in Canada

B*BUSINESS Pressure Twice a Year is Met By Frequency of the Turnover of Banking Resources at the Disposal of Individuals—Wheat Marketing and the Banks—Facts and Figures Presented in the Interim Report of the Georgian Bay Canal Commission.*

A SKETCH of certain banking conditions is included in the interim report of the Georgian Bay Canal commission just published. It has been introduced, says the report, so that discussion should recognize that there are elementary facts in finance and that the problem of finance is inseparable from the problems of development and distribution. The report continues:—

In diagram I., fig. 1, the important items of these monthly returns bearing on the financing of general business in Canada are presented for the six years 1909 to 1914. This diagram gives amounts in dollars, while diagram II. gives the relations in percentage of these amounts to the total resources of the banks in each month.

Line No. 1 in fig. 1, diagram I., represents the total assets of the banks at the end of each month; that is, the total resources of the banks. The ability of the banks to give service must bear a direct relation to their total resources, varying as these resources vary. From the beginning of 1909 to the middle of 1913, the total resources of the Canadian chartered banks steadily increased, but in a slightly waving line, indicating small relative expansions in resources about the months of May and June and somewhat more marked expansions in October and November, the latter partly accounted for by the exercise of the power to issue excess currency at that time. Whether or not the increase in the resources of the banks kept pace with the increase in general trade and therefore with the need for banking accommodation will not here be inquired into; but it is clear that the resources actually in hand at any particular time will set the limits within which service can be performed.

Line No. 2 indicates total liabilities other than liabilities to shareholders. Line No. 2, therefore, divides the total resources of the banks into two parts. From the base of the figure to this line is the part of the total resources derived from depositors and other creditors, and created by the exercise of the power to issue bank notes. This is by far the greater part of the banks' resources. Between line No. 2 and line No. 1 is the part supplied by the shareholders in the form of paid-up capital, reserve accounts and profit and loss balances. It is the irregularities in line No. 2 that cause the irregularities in line No. 1; that is, it is the variations particularly in the deposits and bank note circulation that occasion the fluctuations in the line of total resources, the amounts belonging to shareholders remaining fairly constant but showing a steady increase.

Certain particulars are given separately in the remaining lines. Starting at the base of the figure, the red line, line No. 8, gives the greatest amount of bank notes in circulation at any time during each month. The power to issue bank notes is limited to the amount of paid-up capital, plus any amounts deposited in the Central Gold Reserves, but provision is made in the Bank Act for the issue of additional bank notes during the usual season of moving the crop to an amount not exceeding 15 per cent. of the combined unimpaired paid-up capital and rest funds of the banks, and certain further extensions of this power were granted as temporary war measures. Bank notes are issued only as there is a demand for a circulating medium of this kind, and it will be noted that, except in the autumn months, the demand has not led to the continuous full exercise of the powers of the banks in this respect.

Line No. 7, representing paid-up capital, is practically a straight line with a slight steady rise. The paid-up capital forms only a small part of the total resources of the banks. The "rest or reserve" funds of the banks have grown more rapidly than the paid-up capital until they are almost equal to the latter in amount. The rest funds added to the paid-up capital give the total fixed contribution of the shareholders to the resources of the banks, and these combined rest funds and paid-up capital accounts are indicated in line No. 6. It is the amounts represented by line No. 6, plus profit and loss balances, that make up the spread between line No. 1 and line No. 2.

Canadian chartered banks do not confine their business to Canada, but participate in the international operations of Canadian trade and Canadian finance, and through their own branches or through agencies they receive deposits and make loans in other countries. Loans and deposits elsewhere than in Canada are included in the totals of the assets and liabilities, and will later be referred to, but in this diagram only deposits in Canada and current loans in Canada are given.

Deposits by the public are of two kinds, those payable after notice or on a fixed day, commonly called "savings department" deposits, and those payable on demand, which ordinarily earn no interest but form the funds against which bank cheques are issued. Banks must be prepared to meet instantly all demands upon them, and cannot, therefore, loan out or invest for fixed terms all the funds held by them, but must keep in cash and immediately realizable securities such amounts as may be neces-

sary to meet any probable demands. As a basis for making current loans, savings deposits can be counted upon in a different way from demand deposits. For this reason savings deposits in Canada are shown separately in the broken yellow line, line No. 5. It will be noted that deposits of this kind increased throughout the period without any very marked variations. If demand deposits are added to savings deposits, the result is shown in line No. 3, which gives the total deposits by the public in Canada.

Coming now to line No. 4, we have the amounts advanced each month in the form of current loans and discounts in Canada. These amounts, as already pointed out, do not include call loans in Canada or loans to Canadian governments, and, of course, do not include loans made elsewhere than in Canada. It will be noted:

2. That current loans in Canada, which are made for fixed terms, were greater than the deposits in Canada placed in the banks for fixed terms, or subject to notice, and that the current loans increased faster than the savings deposits.

3. That after September, 1913, loans were actually reduced in amount, when the reaction in business had set in, and that the trend of the line became downward.

Business in Canada rapidly expanded from 1909 to midsummer, 1913, but varied in activity and volume at different periods of the year. Bank loans had no important seasonal variations. The service rendered by anything depends, however, upon how often it is used in a given time. If business in Canada were turned over only once a year, and if bank loans were all for twelve-month periods, then only one service in a year would be per-

DIAGRAM I.

1. That line No. 4 moves steadily upward from February, 1909, to September, 1913. The total of current loans increased year by year and almost month by month. Indeed, in the above fifty-five months there were only seven occasions on which the current loans in any month were not greater than those of the preceding month. So even an expansion of business is rather remarkable. It is clear that there is nothing erratic in this part of the banks' business. So far as totals are concerned, there was no withdrawing of resources from loans in one year or in one part of the year, and no sudden expansions at any time. Total loans were not reduced in the summer months to accumulate resources for the autumn, for summer loans were in each year greater than the spring loans had been, and the loans each autumn were greater than the loans in the summer, while the loans the following spring were greater than in the previous autumn. Loans expanded as total resources increased, but obviously at a slightly more rapid rate.

formed by the resources devoted to bank loans; but if business were turned over twice a year and loans averaged six months, then the effectiveness of the loans would be double, and use every three months would quadruple the service. While no facts have been obtained to show the average time of turn-overs in general business in Canada, nor the average term of current loans, there can be found in the records of bank clearings evidence as to seasonal activity in the use of such banking resources as were at the disposal of individuals. Most business payments are made by cheques drawn on demand deposit accounts, which accounts are partly at least the product of bank loans. If a cheque passes from a client of one bank to another client of the same bank the exchange is adjusted within that bank without any public record; but if the exchange takes place between clients of different banks then the adjustment is made through the clearing house and the totals so adjusted at the various clearing house centres are regularly published. Clearing house returns

are, therefore, the records of the amounts that change banks from time to time.

In fig. 2 of diagram I. the monthly totals of bank clearings in Canada are shown, the solid black line giving the total clearings in each month for all Canada, the dotted black line indicating the proportion of the clearings in eastern Canada and the broken line the proportion in western Canada, including Fort William after the organization of the clearing house there in 1911. The lines of total deposits, demand deposits and current loans in Canada are added to this figure so that comparisons of amounts involved can be made. It will be noted that bank

DIAGRAM II.

clearings show a wide range of fluctuations, but that each year has the same characteristics, an increase in May and July and a much greater increase in October and November. There are some differences between eastern and western clearings. In the last quarter of the year, from 1909 to 1913, bank clearings were more than double the amount of the demand deposits. If it could be assumed that only cheques on demand deposit accounts, and bank notes withdrawn from such accounts, were cleared, then in the last three months of the year all the amounts in all demand deposit accounts in Canada changed banks every two weeks. On several occasions an amount equal, or almost equal, to the total of current loans was exchanged between banks in a month. This is great activity; and

it takes no account of the very large aggregate of adjustments made within individual banks which do not appear in the clearings. There is evidently business pressure twice a year which is met by the frequency of the turn-over of the banking resources at the disposal of individuals, but the total of the resources the banks afford to individuals does not greatly vary. Perhaps so rapid a turn-over in the autumn is undesirable and implies undue strain, or perhaps only at that time is the financial machinery working to full efficiency.

Loans Steadily Maintained.

Further interesting light is thrown on current loans in Canada when percentages are examined. In diagram I. the current loan line, line No. 4, is one of the most regular, but in diagram II., where the various accounts are represented in percentages of the total resources, it becomes the most irregular of all the lines. Bank deposits and other funds fluctuated, but the loans were very steadily maintained and therefore the percentage relation showed marked changes. Then it is manifest that between 1909 and September, 1913, the banks put out in current loans an increasing percentage of their resources each year. Current loans in Canada expanded relatively faster than any other items in the accounts. The contraction, after September, 1913, is very striking in the percentage line. But perhaps the most interesting of all the points in con-

DIAGRAM III.

Call loans, current loans and deposits elsewhere than in Canada, as percentages of total resources of Canadian banks, 1909-1915. (100 per cent. represents total assets.)

nection with this line is that it plainly shows that the peak load is encountered by the banks, not in the autumn, but in the spring months. In every year this is true. With the aid of a little greater bank note circulation, then required, with slightly greater deposits and with greater activity in the turn-over, the banks can handle the rush of the autumn business and the moving of the crops with a smaller relative dead load than falls upon them when the activity of settlement declines after the turn of the year and it becomes necessary to carry over for several months what was not liquidated in the autumn. If, according to sound banking practice, there is only a certain percentage of resources which can safely be devoted to current loans, then it is clear that, as business is at present organized in Canada, a strain tends to fall upon the banks between January and May. This is a very important fact.

If it should be decided, for example, that it would be in the interests of the country that a larger proportion of the wheat should be held over so that excessive autumn marketings could be avoided, the question would arise whether with the present banking resources it would be practicable to carry a much heavier load from January to May, and this would lead to such other questions as to how banking resources could be increased, or how the business system could be altered to better distribute the load and to produce more frequent turn-overs and particularly in the spring months. How far does pressure from the necessity of securing liquidation at least once within

the year account for the dumping in the autumn of many products, including wheat?

Do Canadian banks devote a proper proportion of their resources to current loans in Canada? Could still further assistance be rendered in this way, consistently with sound banking and the preservation of the absolute essentials of safety and of cash and liquid reserves against every probable demand?

Could banking resources be increased out of local financial supplies? Banks mobilize the financial resources of a country. Have Canadian chartered banks satisfactorily performed this function; that is, are the banking resources as large as the conditions in Canada make practicable? Individual banks can be judged only according to their efforts to increase their own resources, and according to the use they make of such resources as they have. If more resources are needed, a problem would exist which might not involve special responsibility on the part of any individual bank, nor would responsibility necessarily fall solely on the banks collectively. If present banking resources are not adequate to the needs of Canadian business, would it be wiser to seek temporary additional resources to meet the times of pressure, or to increase the permanent resources which would then become a permanent annual charge upon the country? Or to what extent should both means be adopted?

Or should a complete, or a partial, solution of any difficulty that may exist be sought in changes in business methods and in the speeding up of the financial machinery?

Distribution of Settlements.

If the business system of the country is such that long terms of credit are granted and if, because of so much one-crop farming, many series of outstanding credits can be liquidated only once a year, then the same total of financial resources will accomplish much less than under a system of more frequent settlements. Again, if settlements are evenly distributed throughout the year instead of being crowded on midsummer and the autumn, the same amount of resources will do more work. These questions are merely mentioned here as among the more obvious points suggested for consideration by the facts submitted.

With regard to the other lines in diagram II., a few observations may be made. Line No. 1, total assets, or total resources, is, of course, a straight line at 100 per cent. From the beginning of 1910 to the end of the first quarter of 1915, the total liabilities line adhered closely to the level of 84 per cent. Whether or not the contributions of shareholders are as large as they should be, it is evident that during this period they increased proportionately as fast as the deposits and other resources of the banks. In 1909, during the recovery from the depression of 1907-8, deposits increased faster than capital and rest accounts, and again in 1915 the growing accumulations of public money in the banks, gave to the line showing liabilities to the public an upward turn.

In Open Active Accounts.

Total deposits in Canada, line No. 3, varied only a little in percentage during the whole period, but formed a bigger percentage of the banks' resources in 1911 and 1912 than in other years. Lines Nos. 5 and 6 show separately savings deposits and demand deposits. It will be noticed that these two lines tend to approach each other from 1909 to the end of 1913. Savings deposits did not hold the same rate of increase as other bank funds, while demand deposits improved their percentage. Relatively more funds were kept in the open active accounts during 1911, 1912, and 1913. With the contraction of business in the second half of 1913, savings deposits began to show

a relative increase until the revival of business in the second half of 1915. It will be observed that the fluctuations in these lines occur at different times of the year, increases in demand deposits occurring at those periods which, as indicated by the bank clearings, are the periods of greatest activity in making settlements. Savings deposits stand relatively highest at the beginning of each year. Has this any connection with the fact that the banks are able, or are willing, at that time to place a somewhat larger proportion of their funds in current loans?

Line No. 7 gives the maximum bank note circulation in percentage of the total resources. Apparently from 6½ per cent. to 8 per cent. of the resources of the banks is required to be in the form of a circulating medium.

Banking Business Abroad.

Diagram III. is added to show in its relative proportions the ordinary banking business done abroad by Canadian chartered banks. Call loans and current loans are placed and deposits are accepted by Canadian banks "elsewhere than in Canada." In diagram III. these accounts are represented in their percentage relation to the total resources of the banks. Obviously the business done abroad is comparatively small. Canadian banks derived about 6 per cent. of their total resources from deposits, and placed about 3 per cent. of their resources in current loans, elsewhere than in Canada. But the banks also placed call loans abroad varying from almost 12 per cent. to less than 5 per cent. of their total resources. The net amount of resources employed abroad, subtracting the deposits from the call and current loans, therefore varied from almost 9 per cent. to less than 2 per cent. Different banks engage in this business in widely differing degrees, but only totals can here be considered. Call loans abroad show the highest percentages in 1909 and 1910, when business in Canada had not fully recovered from a general depression. The percentage increased again in the early part of 1914 during another general depression. Larger percentages were carried abroad in the middle of the year than in either the spring or the autumn. Funds were evidently withdrawn from abroad in preparation for the moving of the crop, but it is interesting to note that the extreme withdrawals are in most years in the month of January, in preparation, apparently, for the peak load of current loans in Canada. After the outbreak of the war in 1914 these loans were sharply reduced. Banks explain call loans abroad as a desirable investment for funds that must be kept as immediately realizable reserves.

Mr. Alexander Stewart, mayor of Victoria, has been sworn in as British Columbia's finance minister.

Mr. F. B. McCurdy, M.P., head of the well-known Halirax brokerage house, has been appointed as parliamentary secretary for the militia department.

Mr. A. H. Smith, president of the New York Central Lines, and newly appointed chairman of the commissioners appointed by the Canadian government to inquire into Canada's railway problems, has been engaged in railway spheres for the past thirty years and in his present position he has been called upon to largely reorganize one of the greatest railroads in the United States, and his great success is admitted by railway authorities. Sir Henry Drayton, chairman of the board of railway commissioners since 1912, who has a varied knowledge of Canada's railway problems, is another commissioner, as is Sir George Paish, the well-known financial authority, who, as editor of the *London Statist*, has been in close touch with Canadian financial methods. Sir George was chosen by the British government, after the outbreak of war, to assist in the financial planning of the British treasury.

BRITISH TRADE HERE

In previous reports to the Imperial government of the British trade commissioner in Canada, many interesting phases of Anglo-Canadian trade relations have been treated. These have included the competition which the United Kingdom has to meet from the United States; the features affecting trade with Canada in regard to which British firms are criticized and the British position and the share of business secured here by British exporters. When Mr. Wickes, the commissioner, officially toured the United Kingdom in 1915, he visited 27 industrial centres interviewing many hundreds of manufacturers. The difficulties in the path of the British trader in Canada which arise out of the conditions within the Dominion itself were repeatedly brought to his notice and in his report on Canadian trade for the year 1915, just published in London, he deals in particular with some of the more important of them. This phase of our trade relations necessarily is of unusual importance to Canadian business generally.

Discussing the Canadian tariff, and particularly the preferential duties accorded to United Kingdom goods, the trade commissioner says: "In practice, it has been found that the preference extended to United Kingdom goods has not operated in favor of the United Kingdom manufacturer to an extent nearly as much as was anticipated at the time of its introduction. Certain amendments of the Custom Tariff Acts within recent years and the interpretations placed on certain clauses by regulation and otherwise which have been gradually enforced since 1907 have operated to diminish the direct advantages of preference which originally accorded to United Kingdom goods." Some interesting figures are given in support of this contention. It is also stated that the special duty under the dumping clause "does not protect United Kingdom goods entering Canada in competition with dumped goods from other countries, such as Germany or the

United States, and the foreign manufacturers have for years dumped goods into Canada. The operation of the dumping clause as outlined above is not, therefore, in sympathy with the preferential duties generously granted by the Canadian government to United Kingdom goods."

Other matters discussed are the valuation of goods for duties, bonding and warehousing; articles and materials for use in Canadian manufactures; agencies; and general business conditions. It is pointed out in the report that Canada has no federal insolvency act and the commissioner very properly suggests that until such time that the Dominion government is ready to undertake serious insolvency legislation, "care should be taken by United Kingdom firms to insure that their Canadian consignees are likely to be able to meet their liabilities."

"The commissioner, for example, gives a list of six courses which a debtor in Canada may adopt. It is not a very creditable list so far as Canadian business is concerned. The questions of insolvency and of uniform business laws have been discussed by our leading legal authorities for many years and reform urged, but neither the federal nor the provincial governments have as yet taken the drastic action that is necessary. That this laxity is a serious factor in our trade relations is proved by the pointed references to it in the trade report just to hand.

LIFE INSURANCE PAYMENTS

Last year, life insurance companies in Canada and the United States paid claims amounting to \$451,300,000. There were also payments of \$282,400,000 representing premium savings and surrender values and payments to annuitants and in foreign countries. This gave a total distribution by these companies of \$733,700,000 to family and business dependants, to widows and orphans and to corporations which carry business insurance. According to The Insurance Press, the amounts of the ordinary and industrial policies written and revived by the regular companies of the United States aggregated in 1915 more than \$3,604,000,000, an increase of more than \$245,000,000 in comparison with the amount tabulated for 1914. The year closed with nearly \$22,726,000,000 of insurance in force, an increase of more than \$1,269,000,000. The number of policies in force increased to more than 42,426,000. The new and revived issues of the Canadian companies increased more than \$20,000,000, while the payments for death claims and matured endowments increased about \$2,000,000, and distributions of premium savings exceeded those for 1914 by nearly \$2,575,000.

The faith of big business men in life insurance points an obvious moral to smaller business men who are carrying little if any insurance. Mr. Thomas L. Shevlin, of Minneapolis, who died as the past year closed, had policies totalling \$1,525,000. Representatives of Dohrman J. Sinclair, of Stubenville, Ohio, in 1915, were paid \$837,000, on account of his life insurance investments, and those of John A. Holmes, of St. Louis, Mo., collected \$567,000. In all, sixteen payments of \$200,000 or over were reported, while in seventy-five cases the payments exceeded \$100,000. In Montreal there were two cases, and in Toronto one, where the payments on account of one life exceeded \$100,000. The heaviest payment recorded in Canada was one of \$350,000 in connection with the estate of the late Mr. W. R. Arnold, of Vancouver. But the smaller policies of from \$1,000 to \$5,000 reflect more accurately the good which comes from life insurance. Many thousands of such policies have yet to be written in Canada.

THE NEXT WAR LOAN

Sir Thomas White, finance minister, has announced that the next Dominion war loan will be issued in September. The fact that such an announcement has been made will prevent certain funds being invested in other securities in the meantime, such as, for instance, Anglo-French bonds. It will allow the citizen of Canada to arrange his finances so as to enable participation in the second war loan which will prove as great a success as the first. While the small investor purchased war bonds last November to a gratifying extent, still there were many hundreds who were deterred from investing in the war loan because it was being so rapidly subscribed. A war bond is an excellent investment and its purchase is helping to finance Canada's share of the war. The government anticipates an excellent response to its war loan in September which will be issued at attractive terms consistent with the money market conditions then prevailing.

The first war loan of \$50,000,000 was one of 5 per cent. ten-year bonds issued at 97½. This gave a yield to the investor, according to the terms of issue, of about 5.48 per cent. The issue was exempt from taxes, including any income tax which may be imposed by the federal government. The coming issue is also likely to be exempt from taxes. Bonds of the November issue will be accepted at 97½ plus accrued interest as the equivalent of cash for the purpose of subscription to the issue which will be made in September next. No official announcement has been made as to the size of the September loan but *The Monetary Times* thinks that it will be at least \$75,000,000, and probably more in view of the fact that the old war bonds will be accepted as cash equivalent.

EVERYBODY IS HELPING

There has been no lack of choice of war securities for the British investor. The latest innovation of the British treasury takes the form of war expenditure certificates at a fixed rate of discount which will be subject to variation from time to time. The certificates will be in amounts of £1,000, £5,000 or £10,000 and will be drawn for two years from date of issue. The present rate of discount is 5 per cent. per annum. Investors may now place their funds in seven varieties of short-term securities, the maturities ranging from three months to a little over five years. There are three, six, nine, and twelve months' treasury bills, two-year war expenditure certificates, and three and five-year exchequer bonds. Large sums of money are being supplied to the treasury for the conduct of the war by the purchase of these various securities, which appeal particularly to persons who desire to receive their money again soon after the war is over. The 5 per cent. twelve-months' treasury bills give a net yield of 5¼ per cent., and the two-year war expenditure certificates at the price of 90 give a net yield of about 5¾ per cent.

The British government is adopting all kinds of novel methods in order that big and little investors will help to finance the war. Another recent departure in British war finance is the willingness of the treasury to sell war savings certificates through the post office to any individual without reference to the amount of his income. Hitherto persons with an income of over £300 a year have not been allowed to purchase these £1 certificates payable in December, 1920, at the price 15s. 6d. This restriction is now

removed. Moreover, the interest on these war savings certificates will in future be paid free of income tax. The only remaining restriction on the certificates is that no individual may hold more than 500 certificates, but anyone can buy a single certificate of £500 at the price of £387 10s.

As the war is costing Great Britain \$25,000,000 a day, continual efforts are made to obtain small savings for investment in war securities. A large amount of five-year treasury bonds, for instance, has been sold to the working classes. The lowest denomination of these bonds is £1, which is sold for 15s. 6d. for which amount the investor obtains the face value of the bond at maturity; or, in other words, he makes a profit of 4s. 6d., or a little over 29 per cent. in the five years, which represents nearly 6 per cent. annually. Cards are used at every post office in the country, which cards contain 31 spaces within which to place a 6d. stamp, so that even the children saving 12 cents a day, or a week, become subscribers to, and investors in these five-year treasury bonds. When the 31 spaces are filled with 6d. stamps the card is receivable for a £1 bond. Everybody in Britain is helping to finance the war.

HARMFUL LEGISLATION

Many references have been made in these columns to certain short-sighted legislation in the western provinces. It has tended to impress foreign capital that it is becoming unsafe to place funds in Western Canada. Our Western legislatures have, as one loan company official puts it, frequently "tried to secure by short cuts what can come only by conformity to economic law." This phase of the Canadian situation is being closely watched in the United States which, since the war, has become our chief banker. A citizen of the United States, who has placed considerable funds in Alberta, discusses the matter in a recent issue of the *New York Annalist*. He says: "It seems unfortunate that the popular law-making bodies of Canada do not have to secure the sanction of definite written constitutions to their acts. There is obvious danger if the impulsive, short-sighted acts of a popular body which infringe on the fundamental rights of the minority or the individual—the sacredness of contracts, the rights of private property, etc.—are not at once questioned in the courts. Recent legislative acts in some of the provinces illustrate this danger. The thoughtful men of the Dominion, however, although they deplore these particular acts, do not fear for the general situation. They point to the veto power of the Crown, exercised by the lieutenant-governors of the provinces and the governor-general of the Dominion, and to the great body of court decisions, without exception granting protection to the rights of individual. It is to be hoped that such acts as have violated these traditions will be speedily repealed and repudiated."

There is no defence for the institution in Western Canada of some of the legislation which has been enacted in recent years. The use of the veto power of the Crown is unlikely, but if the present tendency continues, it may be necessary. The Dominion government should be setting a good example to the provinces instead of placing seed grain liens in politics. The provinces should review their high-handed legislation with a view to its repeal, otherwise their experiments will prove costly to the provinces, the municipalities and the people when funds are sought.

AFTER THE WAR

The prospects for the period after the war are a fruitful cause of divided opinions. The prospects depend largely upon the duration of the war. Sir George Paish, whose optimism is occasionally questioned, in addressing recently the Royal Statistical Society in London, on war finance, paid special attention to the question of taxation, something which is becoming a heavy burden in Great Britain. He estimated that the total taxation for 1916-17 will amount to £358,500,000, and draws the conclusion that including the new taxes and allowing for the increase in the income of the working classes during the present period of war expenditure, the burden of taxation is still a very light one. Having regard to the incomes of the income tax paying classes, the burden of direct taxation, he thinks, cannot be considered unduly heavy. To justify this view Sir George Paish states that after the close of the Napoleonic wars in 1816-17, when the income of the United Kingdom was about £300,000,000, the sum raised in taxation was £62,000,000, or over 20 per cent. At the present time he figures the national income at £3,000,000,000, including the remuneration paid to the army and navy; and a governmental revenue of £400,000,000 (including post-office and minor receipts in addition to taxation) would represent only 13 per cent. of the nation's income, while a revenue of £450,000,000 would represent only 15 per cent. The nation's debt before the war was £707,000,000, it is now not far short of £2,400,000,000, and after another twelve months of war it will not be far short of £4,000,000,000. For the purpose of raising the

money to carry on the war, Sir George Paish considers it essential for every citizen to be as efficient and hard-working as possible, in order to maintain the country's production and its income, and at the same time to be as economical as is compatible with efficiency.

That this is too bright a view, was the position taken by Lord George Hamilton, who participated in the discussion following the address of Sir George Paish. He thought that the estimate of national income (£3,000,000,000) was not a reliable figure, seeing that it has been entirely caused by the vast expenditure of the government, met by wholesale borrowing. The position was put in this way by Lord George Hamilton:—

They all knew that the enormous expenditure of the government was forced upon them by the exigencies of the war—they must have certain things. They had commandeered the whole of the manhood of the country; they were paying very high wages; they were compelled to buy wholesale certain articles which were necessary for them to convert into munitions of war, and they had paid an enormous price for those articles—and the moment peace was declared, or in sight, the vast majority of that productive work would cease to have any value at all.

The Monetary Times is inclined to share the views of Lord George Hamilton. Whatever good things may be in store for the time when nations are again on a peace basis, still there must be an acute period of transition between war and peace. International conditions, in such a great war, cannot adjust themselves to an entirely new basis without considerable inconvenience and consequent depression. It is to prepare for that period that effort should now be turned.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Belleville, Ont.—July 13—Mr. W. Lingham's barns. Loss not stated. Cause, lightning; Mr. A. Savage's residence. Partially insured.

Hull, Que.—Mrs. T. P. Sabourin's block, 95-101 Wellington Street. Loss, \$2,000. Cause, overheated stove pipe.

Lunenburg, N.S.—July 12—Queen Hotel. Loss, \$2,000. Cause unknown.

Munson, Alta.—July 16—Mr. G. M. Turnbull's residence. Loss and cause not stated. Four deaths.

Ottawa, Ont.—July 12—Dr. H. M. Ami's residence. Loss, \$5,000. Cause not stated.

Renfrew, Ont.—July 16—O'Brien plant. Loss, \$100,000. Cause, friction.

Rideau Junction, Ont.—July 11—Canadian Northern Railway's coal chutes. Loss, \$15,000.

Vancouver, B.C.—July 12—Japanese Garage, Powell Street. Loss, \$1,200; residence, Windsor Street and Broadway. Loss, \$2,500.

Montreal, Que.—July 15—Warehouse of Messrs. Ayer and Company, 41 William Street. Loss, heavy. Cause unknown.

Mr. N. W. Harris, the founder of the firm N. W. Harris and Company, bond brokers, died at Chicago. The late Mr. Harris built up the nucleus of the large bond business at Boston, where the original firm was established. Mr. Harris was one of the pioneers in the bond business in the United States and was well known throughout Canada, having varied interests in the Dominion. He was a prominent factor in popularizing Canadian issues in the United States, and wrote an instructive article in *The Monetary Times Annual* which offered several important suggestions to Canadian borrowers. The late Mr. Harris was also head of the Harris Trust Company, Chicago, and of the firm of Harris, Forbes and Company, New York, the Canadian branch of which is at Montreal.

FRANCE BORROWS \$100,000,000

The American Foreign Securities Company has been organized with a capital of \$10,000,000 presently to be paid in at par in cash. It has arranged to lend \$100,000,000 to the French government, for which it is to hold the obligation of the French government to repay the principal in three years, together with interest at a rate more than sufficient to cover the interest on the company's note issue.

This is the second largest foreign loan, being \$94,500,000 5 per cent. 3-year notes, offered in the United States market, being next in size to the \$500,000,000 Anglo-French issue, and is the first foreign loan offered publicly that has had collateral security back of it, and is offered at 98 and interest.

In connection with this loan the company is to receive from the French government securities having a value, calculated at prevailing markets and existing exchange rates, of \$120,000,000; and the French government agrees from time to time to pledge additional securities, so that the calculated value of the collateral shall be always 20 per cent. in excess of the principal of the loan. Of these securities the company is to pledge with the Bankers Trust Company, under a collateral indenture, as security for its notes, obligations of foreign governments, and other securities as follows, totalling \$113,449,000: Argentina, \$20,500,000; Sweden, \$8,725,000; Norway, \$3,290,000; Denmark, \$6,380,000; Switzerland, \$12,080,000; Holland, \$1,475,000; Uruguay, \$3,443,000; Egypt, \$20,200,000; Brazil (funding loan), \$1,181,000; Spain, \$12,600,000; Spanish guaranteed railroad bonds, \$8,000,000; Province of Quebec, \$275,000; Suez Canal Company, \$11,600,000; United States corporate issues, \$3,700,000.

The company agrees also to pledge under the collateral indenture all additional securities received from the French government under its agreement to maintain the 20 per cent. margin above referred to.

WESTERN FARMERS AND TARIFF

Instead of Concessions, They Got Tariff Additions and Arbitrary Customs Valuation

Editor, *The Monetary Times*.

Sir,—In your issue of July 7 you publish an article from the Regina Leader regarding the tariff situation in the West, which, I think, scarcely represents the actual feeling among the farmers of the prairie provinces. The article makes it appear that the farmers would be satisfied with a moderate measure of tariff reform. As a member of the Farmers' Association, I have had opportunity of attending some of the conventions and listening to the discussions upon the tariff. I am also fairly familiar with the feeling throughout the provinces, and I can say that while steady progress in the direction of tariff reform would be very satisfactory to most of us, mere tariff revision is not the ultimate aim of the farmers. I believe the very large majority of the farmers stand firmly on the principle of trade freedom. In the same issue of *The Monetary Times* which contained this article, a very full statement of the case appeared from the pen of Mr. R. G. McKenzie, secretary of the Manitoba Grain Growers' Association, which in itself was a sufficient answer to the Regina paper. Mr. McKenzie certainly presented the view that the tariff, from the farmer's point of view, is wrong in principle and therefore not a thing to be modified, but rather abolished. At the same time, as I have said, it would satisfy many to see it go gradually, as long as the going was continuous, and the quicker the better.

Policy, Not Principle.

It is true the farmers did not ask for free trade in their onslaught upon Ottawa some years ago, but I presume this was policy rather than principle. It is not, as a rule, wise to ask for more than there is any reasonable hope of obtaining. The farmers asked for 'a great deal. Instead of concessions we have got 7½ per cent. added to the tariff and besides this, an organized system of arbitrary valuation appears to have been adopted by the customs department, whereby the duty has been enormously increased upon implements, lumber and other commodities largely used by western farmers. These arbitrary rulings are producing a very hostile feeling throughout the West. This thing has got to come to an end. This is the attitude of the western farmers. What the West demands is at least reasonable progress toward free trade, and if there is not a change soon in the trend of tariff legislation in this country, there is likely to be something doing in the West, which will make the indifferent ones take notice.

Resolutions of Farmers.

The following resolutions passed by the organized farmers, given verbatim, need no comment:—

"Whereas, the protective tariff was designed to encourage infant industries for a few years until they became established, but has in reality proved to be an instrument of extortion, taken advantage of by a few manufacturers to levy tribute from the people of Canada, and has produced trusts, combines and mergers by which the cost of living has been greatly enhanced, with no corresponding advantage to the public;

"And whereas, the tariff is a most inequitable, unfair and unjust method of raising public revenues, as it bears more heavily upon the poor than upon the rich;

"And whereas, we believe the best interests of the public would be served by absolute free trade;

"Therefore, be it resolved, that this convention, representing 14,000 farmers of Alberta, places itself on record in favour of the complete abolition of the customs tariff of Canada as soon as possible and the collection of all public revenues by a direct tax on land values;

"And further, we condemn utterly the attempt being made to tax the British workmen for the benefit of the Canadian farmer."

The above, passed practically unanimously at the annual convention of the United Farmers of Alberta, scarcely bears out the contention of the Regina Leader.

Following is a paragraph from a resolution passed at the annual convention of the Grain Growers' Association of Saskatchewan:—

"And further, that we consider the most equitable method of raising all public revenues is by a tax upon land values."

Part of a resolution passed by the Canadian Council of Agriculture, representing the organized farmers of the various provinces, at a meeting held at Regina, February 14:—

"And we further recommend, that in order to meet the deficit in the present revenues, and eventually to raise the bulk of the national revenue, the system of direct taxation of land values should be introduced, supplemented by a graduated tax upon incomes."

I have quoted only a part of these resolutions, as they are lengthy. Many others resolutions could be given, but enough said.

Yours, etc.,

D. W. BUCHANAN.

Winnipeg, July 15th, 1916.

CANADA'S TRANSPORTATION PROBLEMS

The scope of the proposed enquiry into Canadian railway problems is indicated in the following sections of the order-in-council: "The prime minister submits that the enquiry should have reference to the following matters: 1—The general problem of transportation in Canada. 2—The status of each of the three transcontinental railway systems, that is to say, the Canadian Pacific Railway System, the Grand Trunk Railway System (including the Grand Trunk Pacific Railway and the Grand Trunk Railway and their several branches), and the Canadian Northern Railway System, having special reference to the following considerations: (a) The territories served by each system and the service which it is capable of performing in the general scheme of transportation. (b) Physical conditions, equipment and capacity for handling business. (c) Methods of operation. (d) Branch lines, feeders and connections in Canada. (e) Connections in the United States. (f) Steamship connections on both oceans. (g) Capitalization, fixed charges and net earnings having regard to (1) present conditions, and (2) probable future development with increase of population.

"3—The re-organization of any of the said railway systems, or the acquisition thereof by the state, and in the latter case the most effective system of operation whether in connection with the Intercolonial Railway or otherwise.

"4—Generally speaking all matters which the members of the board may consider pertinent or relevant to the general scope of the enquiry."

BEHIND THE WESTERN FINANCING PLAN

Hon. Edward Brown, Manitoba's provincial treasurer, is the man responsible for the Manitoba, Saskatchewan and Winnipeg refinancing scheme, a plan which is likely to involve a considerable sum, and which is described in detail on another page of *The Monetary Times* this week. Mr. Brown, who is on his way back to Winnipeg direct from New York, has been in conference with J. P. Morgan & Company, who are attending to the details of the scheme. Manitoba's provincial treasurer is being congratulated on the early signs of the success of the plan, the British treasury now giving it their cordial support.

Mr. Brown is an Ontario man, but his long residence in the west has qualified him as a true westerner. He is well known throughout the prairie provinces. Born of Scotch descent, at Gresham, Bruce County, Ontario, in 1865, he went to Manitoba in 1888. Mr. Brown is a director of many financial institutions, including several land companies, the British Northwestern Fire Insurance Company and others. He has been a success as provincial treasurer of Manitoba, and has proved a suitable man in other ways for the political situation of that province. The present financing scheme, for which much credit must properly go to him, is attracting a great deal of attention in financial circles here.

After an automobile trip beyond Dundurn, and also about the same distance west, to Kinley, Mr. G. H. Clare, of Messrs. G. H. Clare and Company, Saskatoon, writes *The Monetary Times*, that everywhere the crops are looking fine. Wheat is practically all out in head now and indications are that the crops will be as good as last year and little, if any, later. The farmers all seem optimistic and are showing their faith by erecting good homes, barns and implement sheds. The majority of them, are also buying automobiles.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Hamilton, Ont.—The school board will apply to the city council for the issuance of \$135,000 bonds.

Sault Ste. Marie, Ont.—\$20,000 5½ per cent. 20-years, to Dominion Securities Corporation, Toronto.

Weston, Ont.—\$2,617 6 per cent. 10 and 15-instalments, to Messrs. Brent, Noxon and Company, Toronto.

Sydney, N.S.—An offer of 92½, made by the Eastern Securities Company, for \$40,000, has been accepted.

Neebing Municipality, Ont.—A by-law to raise \$10,000 for drainage purposes has been passed by the council.

Windsor, Ont.—\$196,850 5 and 5½ per cent. 10, 20 and 30-years, to Messrs. A. E. Ames and Company, Toronto.

Portage La Prairie, Man.—Bids are desired for an issue of \$35,000 6 per cent. school bonds. A. E. Ireland, secretary-treasurer.

Trail, B.C.—The fire law by-law involving the issuance of \$15,000 has been defeated. Messrs. Wolverton and Company, Vancouver, on behalf of Messrs. R. C. Matthews and Company, Toronto, made a tentative offer of 92 for the proposed issue.

Ridgetown, Ont.—Six bids were made for the recent issue, that of the first-named firm being the successful bidder:—

Brent, Noxon and Company	104.31
A. E. Ames and Company	103.53
Mulholland, Bird and Graham	103.53
Wood, Gundy and Company	103.39
McKinnon and Company	103.029
Imperial Bank	102.04

Port Credit, Ont.—For the recent issue the bids received were as below, the first named receiving the award:—

Brent, Noxon and Company	104.94
Wood, Gundy and Company	104.29
Canada Bond	104.15
A. E. Ames and Company	104.13
C. H. Burgess and Company	103.67
R. C. Matthews and Company	103.50
W. L. McKinnon and Company	102.94

Red Deer, Alta.—The tenders received for \$30,000 6 per cent. treasury bills, by Mr. A. T. Stephenson, commissioner, were as follows: Burgess and Company, 97.50; McKinnon and Company, 96.482; Terry, Briggs and Company, 96; W. L. Slayton and Company, 96; A. F. Carrothers and Company, Edmonton, 96. The issue was awarded to Burgess and Company, who agreed to take \$55,000 treasury bills at the above price. The tenders for \$3,000 ten-years 6 per cent. debentures were as follows: Nay and James, 96.9; W. L. Slayton and Company, 96; A. F. Carrothers and Company, Edmonton, 96; McKinnon and Company, 95.473; Burgess and Company, 95.4; Kerr, Fleming and Company, 95.29. The issue was awarded to Nay and James.

Norfolk County, Ont.—For an issue of \$75,000 5 per cent. 10-year bonds which was awarded to R. C. Matthews and Company, Toronto, at 99.22. The bids from Toronto houses were as follow:—

R. C. Matthews and Company	99.22
W. A. Mackenzie and Company	99.09
G. A. Stimson and Company	99.07
Wood, Gundy and Company	98.93
C. H. Burgess and Company	98.82
Mulholland, Bird and Graham	98.81
Imperial Bank	98.58
Emilius Jarvis and Company	98.56
Brent, Noxon and Company	98.55
Dominion Securities Corporation	98.38
A. E. Ames and Company	98.27
Canada Bond Corporation	98.04

Saskatchewan.—The following is a list of bonds reported sold by the local government board:—

School Districts.—Co-Operation, No. 3482, \$1,200; Neuve Chapelle, No. 3563, \$1,665; Smithfield, No. 2685, \$1,200; Parkers Bluff, No. 3686, \$1,600; Govan, No. 1838, \$14,000; Sunshine Valley, No. 3715, \$1,600; Last Chance, No. 3450, \$1,300; Adler, No. 3708, \$1,400; Middleburg, No. 3720, \$1,-

500; Ridley, No. 3651, \$1,750; Carrollton, No. 3677, \$1,800; Crichton, No. 3716, \$1,600.

Rural Telephone Companies.—Green Prairie, \$29,500; Glen Morris, \$10,500; Garnock, \$1,000; Ormiston, \$700; Zealandia, \$13,000; Horse Lake, \$9,500; Weyburn Plains, \$9,000; Hohenlohe, \$5,800; Druid, \$6,000; Montmartre, \$3,000; Jesmond, \$9,500.

Kent County, Ont.—The following tenders were received for Kent County issue of \$35,000 5¼ per cent. bonds:—

Brent, Noxon and Company	\$35,116
Imperial Bank	35,105
G. A. Stimson and Company	35,042
Wood, Gundy and Company	35,021

Royal Securities Corporation	34,951
Canada Bond Corporation	34,923
Mulholland, Bird and Graham	34,903
Kerr, Fleming and Company	34,870
Dominion Securities Corporation	34,835

RAILWAY EARNINGS

The following are the transcontinental railway earnings for the first two weeks of July:—

Canadian Pacific Railway.

	1916.	1915.	
July 7	\$2,616,000	\$1,666,000	+ \$950,000
July 14	2,738,000	1,635,000	+ 110,300

Grand Trunk Railway.

July 7	\$1,155,029	\$ 990,278	+ \$164,751
July 14	1,211,393	989,629	+ 221,764

Canadian Northern Railway.

July 7	\$ 885,100	\$ 429,400	+ \$455,700
July 14	874,900	449,700	+ 425,200

ADDITIONAL INFORMATION CONCERNING FIRES
ALREADY REPORTED

Quebec, Que.—During June there were 33 alarms rung in from boxes, 6 false alarms, 16 calls by telephone, 19 commencements of fire, 24 chimney fires and 331 chimneys were swept. The insurance on burned property was \$64,700, and burned stock \$19,450. The loss on burned property amounted to \$1,705, while that on stock was \$1,794. On uninsured property the loss was \$10 in two instances.

Saskatoon, Sask.—Fire Chief Heath's return for June shows following losses:—

June 7—Brick, wholesale hardware, J. H. Ashdown, 407-1st Avenue N. Cause unknown. Loss, stock, \$200. Loss, building, \$200. Insurance on stock, \$185,000; insurance on building, \$35,000.

June 25—Frame dwelling, 1121 13th Street, occupied by Michael Reid, owned by L. Miller, 3rd Avenue. Cause unknown. Loss, contents, \$200; building, \$70. No insurance.

June 29—Frame dwelling of Mrs. Richardson and Mrs. Hughs, 319 Avenue D. South, owned by Mrs. Reeder, Rosethorn, Sask. Cause, coal oil stove exploded.

June 30—Frame dwelling of Mrs. Stewart, 608 28th Street W., owned by Toronto General Trust. Cause, chimney fire.

Stratford, Ont.—The following is a list of the alarms and losses for June, reported by Fire Chief Kappel:—

June 8—Residence of R. Butt. Cause, lightning. Insurance on building, \$900; on contents, \$800. Loss, \$15.

June 13—B. Leckie's wool stock mill. Cause, overheated carbonizer. No insurance. Loss, \$40, building and contents; Stratford Davenport Company. Cause unknown. Insurance on building, \$12,500; on contents, \$13,800. Loss on building, \$2,078; on contents, \$4,884.

June 17—Residence of D. M. Bellwood. Cause, clothing in contact with oil stove. Insurance unknown. Loss on contents small.

June 26—W. J. McCully's stable. Cause, boys and matches. Insurance, building, \$500; on contents, \$300. Loss, building and contents, \$30.

Victoria, B.C.—The June losses as reported by Fire Chief Davis were as below: Loss, buildings, \$3,020; loss, contents, \$1,215; total loss on buildings and contents, \$4,235; insurance on buildings, \$21,000; insurance on contents, \$4,600; total insurance, \$25,600; property at risk, \$89,750. Box alarms, 1; telephone alarms, 19; messenger alarms, 2.

Collections made in all parts of the Dominion and returns promptly remitted at lowest rates of exchange. Letters of Credit and Travellers' Cheques issued available in all parts of the world.

TRADE CHANNELS IN YEAR OF WAR

Figures of Latest Fiscal Year Show Favorable Trade Balance and Larger Aggregate Business

The total trade of Canada during the fiscal year ended March, 1916, was valued at \$1,424,916,065 compared with \$1,078,173,240 in 1915 and \$862,699,832 in 1912. The summary of the trade of Canada, issued in the weekly bulletin of the department of trade and commerce, Ottawa, is an unusually interesting document. The figures respecting total trade are somewhat misleading as the coin and bullion shipments between New York and Ottawa have affected the statistics considerably. For instance, the imports of coin and bullion for the latest fiscal year were \$34,000,000 as compared with \$132,000,000 in 1915, and less than \$6,000,000 in 1913. The exports of coin and bullion last year were \$103,000,000 as compared with \$29,000,000 in 1915. The coin and bullion exports in the previous year were \$23,000,000, and in 1913, \$16,000,000. This unusual movement of coin is due almost entirely to the establishment at Ottawa in 1914 of a gold depository on behalf of the Bank of England. The Bank was thereby enabled to ship gold to and from the United States without exposing it to ocean dangers in war times.

Merchandise Only.

Aside from this bullion movement, Canada's total trade, that is imports and exports of merchandise, last year was valued at \$1,287,083,431, of which imports accounted for \$507,783,361 and exports for \$779,300,070. The exports were therefore \$271,516,709 in excess of the imports. Canada has thus largely increased its favorable trade balance which in 1915 was \$16,000,000, this being the first for some years, the imports being \$455,371,000 and exports \$461,442,000. During the fiscal year ended March, 1914, the merchandise imports were \$618,000,000 and exports \$455,000,000, an excess of the former over the latter, or an unfavorable balance of \$163,000,000. The balance was even more unfavorable in 1913 when the imports of merchandise were \$670,000,000 and the exports only \$337,000,000, the excess of imports thus being \$333,000,000. In 1912, the excess was \$214,000,000.

In discussing Canada's unfavorable balance in 1913, Sir Edmund Walker, as readers of *The Monetary Times* will remember, drew attention to the large proportion of our imports which consists of iron and steel in various form, not only as raw materials, but as manufactured goods. The total value is about \$140,000,000. In the main, these are articles used, in building, or in equipping the country for its future, and such purchases differ in effect from the import of foodstuffs and other rapidly perishing objects. He regretted that the greater part of these iron and steel goods are not made in Canada now, as certainly will be the case in time. To the extent to which, by making these goods in Canada, we could have lessened the debt represented by the securities we have sold to pay the difference between imports and exports, we have burdened ourselves for a long time to come. "While workmen are busily engaged in other things, as they have been in Canada," said Sir Edmund, "it may be said that they are not available for more work in iron and steel, but as soon as railroad and other building lessens in volume, not in the aggregate but in proportion to other industries, we may hope that we shall be able to make in Canada the larger part of the iron and steel goods now imported. The increased output of our coal and iron mines, of our blast furnaces and of our manufactories, which would result, would be of inestimable value to the country as a whole."

Four Years' Total Trade.

The total trade of Canada, excluding coin and bullion exports and imports, may be summarized for the past four years as follows:—

Year ended March.	Imports of merchandise.	Exports of merchandise.	Total trade.
1912	\$521,348,701	\$307,716,151	\$ 829,064,852
1913	670,000,180	377,068,355	1,047,068,544
1914	618,328,874	455,437,224	1,073,766,098
1915	445,371,371	461,442,500	906,813,880
1916	507,783,361	779,300,070	1,287,083,431

The decline in imports in 1915 was due to a variety of reasons originating in the after effects of the real estate boom and the shock of the European War. The duty collected during the last fiscal year was nearly \$104,000,000, as compared

with \$79,000,000 in 1915, \$107,000,000 in 1914 and \$115,000,000 in 1913. The new tariff went into effect on February 11th, 1915, the revenues from this source are reflected in the duty statistics of the past fiscal year.

Total exports last year were more than \$390,000,000 greater than in the previous year which showed an increase of \$12,000,000. Excluding coin and bullion, exports last year showed an increase of \$318,000,000 over the figures of the previous year. Practically the whole of our exports are of Canadian produce. Last year, for instance, of \$779,000,000 of exports from Canada, \$741,000,000 were of Canadian produce, the remaining \$37,000,000 being exports of foreign produce from Canada.

Farmer and Manufacturer were Busy.

In each of the past four fiscal years, agricultural products have been the heaviest export item. Last year, these exports were valued at \$249,661,194 as compared with \$134,746,050 in 1915 and \$198,220,029 in 1914. The second largest item last year in the export list was manufactures, \$242,000,000, or nearly treble the 1915 exports of \$85,000,000. In 1914, the second largest item was minerals, \$59,000,000. The same was the case in 1913 when mineral exports were \$57,000,000. In 1912, animal products came second with \$48,000,000, last year these were third and had grown to \$102,882,276, an increase of approximately 25 per cent. over the 1915 export total.

The effect of heavy war orders was seen in the export figures of the fiscal year ended March, 1915, as exports of manufactures increased from \$57,000,000 in 1914 to \$85,000,000 in 1915, and animal products from \$53,000,000 to \$74,000,000, but these were more evident last year when manufactured exports were \$242,000,000 and animal produce \$102,000,000. In 1915, mineral exports showed the heaviest decline in the list, dropping from \$59,000,000 to \$51,000,000, but an increase of \$15,000,000 was shown. As the export movement, more especially in relation to war supplies, will bulk heavily during the current fiscal year, the trade balance is likely to continue favorable. If this year's crops are near expectations, exports of agricultural products will again be an important factor. Exports of forest products were increased \$9,000,000 and totalled \$51,000,000. The exports of living animals last year were over \$18,000,000 as compared with about \$15,000,000 in 1911. Of this total \$11,000,000 worth of cattle were sold in the United States, while horses valued at nearly \$4,000,000 were sold to Great Britain for war purposes.

Worth of Wheat.

Wheat exports in 1914 were worth \$117,000,000, and 1915 \$74,000,000, owing to Canada's greater production and splendid harvest bounded to \$172,896,445, Great Britain purchasing \$153,708,244 and United States \$8,842,441. Exports of flour increased around 50 per cent., and were \$35,767,044 and \$6,000,000 more oats were sold abroad, the total being \$14,000,000. Hay exports more than doubled and were valued at \$5,849,428. An increase of nearly \$4,000,000 is shown in leather and the manufactures thereof which were \$14,575,322.

Sixty million dollars increase is shown in metals, minerals, etc., as a result of war orders. Britain purchased \$51,000,000 worth of this class of export as against \$19,000,000 in the previous year, and there was exported to the United States \$57,000,000 as against \$37,000,000 in 1915, the increase being largely accounted for in the returns for copper, silver, nickel, and iron, steel and manufactures thereof.

The exports of bacon and hams increased considerably from \$4,033,000 in 1914 to \$14,464,742 in 1915, and \$27,000,113 in 1916, Great Britain taking over \$12,000,000 in 1915 and \$26,000,000 in 1916. This is another indication of war's effects upon trade. An increased demand for Canadian lumber brought about an addition of \$10,000,000 to the exports of wood and its manufactures, which amounted to \$62,000,000, though there were decreases in the exports of logs, square timber and wood pulp. Butter, cheese, whisky, cordage, fish, furs, skins, etc., all show increases. Declines were shown in the exports of cereal foods, canned lobsters, fruits, principally apples, hides and skins, potatoes, seeds.

Imports Showed Increase.

While the trade balance was in favor of Canada, imports of merchandise also showed an increase of \$52,000,000. Canada purchased over \$2,000,000 worth more carriages, carts, wagons, cars, etc., than in the previous year, the total being \$10,860,297; \$5,000,000 more cottons, the total purchased being \$32,460,008; \$4,000,000 more drugs, etc., the amount being \$17,004,025; \$1,000,000 more flax, hemp, etc.; \$2,000,000 more india rubber, gutta percha, etc., the extent being \$9,544,395; \$20,000,000 more metals, minerals, etc., totalling \$103,413,740; \$6,000,000 more provisions, amount-

ing to \$11,962,675; \$3,000,000 more sugar, etc., and \$1,000,000 more tea, the imports of the former being \$22,735,036, and of the latter, \$8,271,900; wool purchased amounted to \$30,370,881, an increase of over \$5,000,000. The principal import decreases are in the following articles, breadstuffs, cement, coal, coke, etc., electric apparatus, fancy goods, fish, glass, gloves and mitts, hats, caps and bonnets, hides and skins, leather, paintings, drawings, etc., paper and manufactures of, precious stones, ribbons, spirits and wines, and vegetables.

No Trading with Enemy.

Canadian imports from Germany reached their high point, \$15,379,764, in 1913. The following year they declined to \$14,276,000. In 1915, with only six months' trading prior to the war, our German imports dropped to \$8,449,186, and \$86,304 is 1916 return. Canadian exports to Germany have usually been about three times less than our imports from that country. Our exports in 1912 were \$3,814,000 and in 1915, the trading practically ending in July, the exports were \$2,162,000, and of course last year they were nil.

Our exports to United States, Australia, New Zealand, and some other colonies of the British empire, increased in 1915 and continued to grow during the past year. Exports to France increased very heavily, from \$3,810,000 in 1914 to \$14,595,000 in 1915, and \$36,085,813 in 1916. The Argentine bought goods amounting to \$2,398,655 as compared with \$639,469 in the previous year. Other foreign countries purchases grew from \$10,892,474 to \$25,712,129.

Imports from Australia increased from \$412,205 in 1915 to \$3,423,025 in 1916. British East Indies, British Guiana, British West Indies, Newfoundland, New Zealand, Argentine and Japan, all sold Canada more goods.

Two Best Customers.

For a great many years past, the United Kingdom has been the best market for Canadian exports while Canada has been the second best market of the United States for its total trade and one of the best for its exports. During the latest fiscal year the United States took \$320,225,080 of our exports, and Great Britain \$463,081,241. Our trade with the Motherland and with our friendly neighbor is shown in the following comparative tables, which include gold shipments:

Fiscal year. ended March.	Canadian exports to the United Kingdom.	United States.
1912	\$151,853,054	\$120,534,993
1913	177,982,002	167,110,382
1914	222,322,766	200,459,373
1915	211,758,863	215,409,326
1916	463,081,241	320,225,080

Fiscal year. ended March.	Canadian imports from United Kingdom.	United States.
1912	\$116,807,414	\$356,358,179
1913	138,659,429	441,155,855
1914	131,942,763	410,786,091
1915	90,085,840	428,616,927
1916	80,075,116	398,005,013

Since the outbreak of war, as stated above, gold movements have affected the trade figures considerably, there being included in the 1915 exports to the United States \$29,066,470 of coin and bullion and \$103,555,818 in the 1916 return. While gold imports from the United States in 1915 were \$131,984,421, and in 1916 \$28,197,146.

LIFE INSURANCE CONVENTION OFFICE OF THE MONETARY TIMES

The *Monetary Times* has been represented at the nine annual gatherings of the Dominion Life Underwriters' Association, and will have an office in connection with the Hamilton, (the tenth), convention, July 19th to 22nd, at Room 224, Royal Connaught Hotel, the convention headquarters.

Toronto's municipal handbook, 1916, as issued by Mr. W. A. Littlejohn, city clerk, is a directory of the various departments of Toronto's civic government, its finances, records, history, and development. The book is of much practical utility and of convenient size.

AID TO SHIPPING INTERESTS

Encouragement to Private Capital is Chief Form of Assistance

Now that the Dominion government is considering assistance towards the establishment of the shipbuilding industry in Canada, it is interesting to know what the various nations are doing for the shipping interests. This information is contained in a special report on government aid to merchant shipping by special agent Grovesnor M. Jones and issued by the United States bureau of foreign and domestic commerce. A study of what the other nations are doing to develop their export trade shows that those countries which have advanced most sought to encourage shipbuilding and operation, not by government ownership or control, but through encouragement to private capital to invest in such enterprise. The sole exception is Japan. Among the interesting facts pointed out by Mr. Jones are:—

Nearly all the nations of world prominence reserved the coastwise shipping to national ships.

Ships of Domestic Construction.

For many years no country, except the United States, required ships flying the national flag to be of domestic construction, but it was required by practically all nations that gave postal subvention that the ships enjoying it be home-built. England has had a free ship policy since 1850. This was done to allow Englishmen to purchase United States vessels. At that time the United States was equipped to build the best and cheapest vessels, which were of wood and sailers. This allowed England to get 750,000 tons from the United States during the Civil War, when United States shipping sought English registry to avoid capture.

Germany gives lower rail rates on goods shipped over specified lines. This differential allowed German manufacturers to undersell many competitors.

Loans to Shipowners.

Government loans to shipowners, with either a very low interest rate, or no interest charge, is practised by several countries. The Cunard Line, under England's mail and admiralty subvention act of 1903, borrowed in this way \$12,652,900, and brought out the "Lusitania" and "Mauretania."

Denmark and Belgium grant exemptions from port duties, and the countries that make reimbursements of all or part of canal tolls while carrying domestic merchandise are Russia, Austria-Hungary, Sweden, Italy and France.

Several nations exempt shipping interests from taxation. New York State now exempts from all state taxation all United States owned ships engaged in the foreign trade. Corporations owning such ships are exempt until December 31, 1922, from all taxation upon their stock, franchises and earnings. Alabama exempts all ships in foreign commerce, and Washington goes further and includes ships in the coastwise trade.

Postal Subvention.

The form of assistance more widely used than any other is postal subvention, and in such countries as England this has been of such amount as to meet the requirements of that nation to keep the lead in ownership of merchant ships. The system of paying direct general bounties or subsidies to shipping lines was instituted and has been more largely practised by France than any other nation, but on the whole the results have not been so satisfactory as the other forms of assistance. Italy, Austria-Hungary, Japan and Spain have followed France in granting direct subsidies.

Mr. Jones in this report gives a complete history of government relations with the merchant marine, with statistics to show the results of the various policies.

GOVERNMENT WILL COLLECT LOAN

Preparations are being made by the Department of the Interior to collect the larger part of the advances for seed grain made to western farmers for the crop of last year. A head office has been opened in Moose Jaw with Mr. Harry Cutler, chief inspector of homestead agencies, in charge. Arrangements have been made to have payments made to postmasters while no collections will be made through elevators as in the past.

WESTERN FINANCING SCHEME

Manitoba, Saskatchewan and Winnipeg are Concerned in It—First Authoritative Details

Financial circles have been considerably interested in the announcement made in these columns last week as to the financing plan of Manitoba province and Winnipeg city. This involves the transfer of a large part of the debts of these borrowers from London to New York. Messrs. J. P. Morgan & Company, New York, who are concerned with the arrangements of the scheme, informed us last week that they were not then in a position to make an announcement, as the details had not been completed.

In the meantime, *The Monetary Times* is in a position to give the following authoritative information as to the plan. Since last week, preliminary arrangements have been made for the inclusion of the securities of Saskatchewan province in the plan. The total debt of Manitoba, Saskatchewan and Winnipeg in the United Kingdom is \$58,000,000, of which it is hoped to purchase at least \$33,000,000 in Great Britain, re-financing that amount in New York. The position may be tabulated as follows:—

Borrower.	Debt in London.	Minimum likely to be refinanced in New York.
Manitoba	\$16,000,000	\$10,000,000
Saskatchewan	9,000,000	6,000,000
Winnipeg	33,000,000	20,000,000
	\$58,000,000	\$36,000,000

While those primarily interested in the scheme hope to buy at least \$36,000,000 of these securities in London, the total purchased may be greater.

Treasury Officials Helping.

The British Treasury officials have been consulted during the two months the negotiations have been proceeding, the matter having been taken up with the Treasury by Morgan's London house. The result is that the Manitoba, Saskatchewan and Winnipeg securities are now on the Treasury's list for mobilization. The holders have not yet been subjected to the penalty clause. This clause, it will be recalled, operates when holders persist in refusing to sell after the British Treasury's intimation that the surrender of certain securities is desired. The penalty or tax so far as American securities is concerned is approximately 20 per cent. on every £1 worth of such securities held. The question of imposing the penalty in the case of Manitoba, Saskatchewan and Winnipeg securities has, however, been considered. Action will not likely be taken in that regard until it is seen whether the securities are coming in rapidly enough. The process is simplified by the fact that the provincial securities are practically all registered stock and the provincial government can therefore furnish the Treasury officials with the names and addresses of the holders.

The new bonds are being made payable both in London and New York at the 4.86. This will give a wider market, more especially after the war, as it is thought by some that within ten years the bulk of these securities may be back in London again.

Terms are Satisfactory.

While there will be a reduction of approximately 15 per cent. in the gross debt by the mobilization, yet this is not the primary consideration. The big objective is to furnish funds in New York for the British Treasury for the purpose of helping to maintain at high levels the price on that market of the pound Sterling.

The terms negotiated by the Canadian borrowers are satisfactory.

Other provinces possibly may enter this scheme, Ontario having been mentioned as a likely province, and also Quebec province. Alberta has already a large debt in New York, and its securities are not likely to take part in the present scheme. This applies also to British Columbia.

Mr. F. C. Armstrong, of the Canadian Export Association, is on his way to Canada to place information before the commercial interests on the prospects for the development of export trade with Europe, provided private interests co-operate with the Dominion government in a systematic development of the same.

CANADIAN INDUSTRIES AFTER THE WAR

Policy of Strengthening Financial Position Now is Pretty General

Most of the large industrial companies of Canada are strengthening their financial position with a view to preparation for the period to follow the war. The banks are doing their part in seeing that industries, although running at high speed, are not over-building or over-expanding. Some companies, with a wrong perspective of the situation, may be gambling on the future, but for them a serious reckoning day must come. The industrial management in Canada generally has been such as to conserve as far as practicable the benefits arising from this abnormal period for the good of the industries in the future. Indebtedness has been paid, reserves have been created, capacity has been enlarged, equipment and methods have been improved with a view to all possible economies in the future. All this fortifies the industries and strengthens the whole situation for the trials that are to come. The policy is better in the long run for both shareholders and wage-earners than would be the payment of dividends or wages which cannot be maintained.

Conditions are Temporary.

The recent analysis of Mr. George E. Roberts, of the National City Bank of New York, of the situation in the United States applies largely to Canada. He said:—

"Commodity prices are high, due to world conditions, but property values are not generally inflated. The country is plainly doing business in the consciousness that present conditions are temporary, and it has been now under this restraint so long that there is a strong likelihood that it will follow the policy of caution until the transition to peace conditions is made. Certainly this is the policy for bankers to advise.

"If this course is pursued there will be no danger of anything like a financial panic, and the change from war conditions to peace conditions will be made with the minimum of disturbance. There are good reasons for believing that a large amount of domestic work is being held back now on account of high construction costs, and that this will come along when prices are lower. The country has been going a slow pace in construction work in recent years and much needs to be done. We are bound to remember, however, that a change from a rising market, when everybody is eager to buy ahead of his wants, to a falling market, when everybody refrains from buying as long as he can, is always a breeder of apprehensions.

Question of Costs.

"The question of costs will then be the serious one in the United States, for if our exports are cut off and our production must all be marketed at home, prices are bound to be unremunerative. None of us want to say anything about reducing wages. The high wage scale of this country, and the great distribution of goods which accompanies it, is one of the conditions of our prosperity. Nobody wants to disturb it, but there is only one way to avoid disturbing it, and that is by increasing the efficiency of our industries."

Do Not Agree on Future.

Canadian industrial captains are not generally discussing this matter and it is difficult to obtain their views. Manufacturers and business men here do not agree as to the future of business in this country after the war. Mr. C. S. Wilcox, of the Steel Company of Canada, Hamilton, discussing the subject with *The Monetary Times*, said: "This company is pursuing the policy of strengthening its financial position. We are creating special reserves to meet any situation likely to arise after the war. We think a large part of the machinery we are installing for the manufacture of munitions will have to be scrapped at the close of the war. I think there will be a good domestic and export business immediately after the close of the war, and that there will be a good demand for labor at high wages. As soon as the countries at war get their industries re-established I expect there will be a much smaller demand, that wages will be reduced and business generally bad. We hope there will be preferential tariffs between the different allied countries which will lead to a permanent export trade being done from Canada."

WESTERN CANADA AS LOANING FIELD

Companies' Activities are Cramped by Legislative Enactments

When asked by what probably is the largest mortgage house in the north-west states to express an opinion as to the advisability of their entering the mortgage field of the western Canadian provinces, the executive officer of the National Farm Association of America, who is also manager of a farm mortgage company, and whose reply is appended to the annual report of the Mortgage Loan Association of Alberta, wrote as follows:—

"If the politicians would leave the country alone there would be no finer farm loan field on the continent, and the only reason the best parts of western Canada to-day are not commanding credit equal to the better parts of Minnesota, for example, are combined under the following heads:—

"1st. Rural population inadequate to the scope of the country, making land values unsteady and making imperative very conservative appraisals.

"2nd. Lack of education on the part of borrowers with regard to meeting their obligations promptly. The feeling on the part of the farmers in western Canada that he can meet his obligation out of next year's crop if more convenient, rather than to take every possible means to take care of his obligation out of the present year's returns, is somewhat fostered by the attitude of some of the large creditors of the farming population, who, in endeavoring to be reasonable with the farmer, rather encourage his laxity and thus add greatly to the expense of doing business.

At Expense of Creditors.

"3rd. The great distances to be covered, with small offerings of loans in proportion to the territory canvassed, as well as the small loans per borrower, make the overhead cost of doing a loan business in western Canada a heavy one.

"4th. The mistaken attitude of many who would assist the farmer that he can be given special favors at the expense of his creditors without so damaging his credit as to make these favors of largely doubtful value to him. Manitoba has passed moratorium measures which are absolutely indefensible and are barring most thinking investors from the province so far as reliance on the physical security itself is concerned. Of course, if one is perfectly sure that the man he is lending to will act in good faith there is no need to apply to the law for protection. Alberta has just passed a moratorium applying to reservists and volunteers which is a blanket provision, with no provision for the alleviation of cases where borrowers make unfair use of the provisions of the bill.

"This bill undoubtedly will have the effect of paralyzing the credit facilities of those eligible to enlistment, and will thus react most unfavorably on the most loyal and substantial class of the population. Saskatchewan, as I understand it, has laws which provide for the removal of weeds from lands which are vacated by the owner, and also for other expenditures undertaken at the instance of government, the expense of this work being charged against the land as a lien prior to the first mortgage on the land.

Interferes with Contract Law.

"The Dominion government has, on more than one instance, prevailed on the province to pass legislation permitting the placing of liens for seed and other relief given to settlers in districts where there had been drought or frost damage, ahead of the existing first mortgages. We have a case on our books where the sum total of these liens aggregated more than the first mortgage. It is true that this is only one case and that we have had no real difficulty with the working out of this law, but this is due to our great care and watchfulness and not to the law itself.

"The objection to this character of legislation is that it interferes with the law of contract, deprives the creditor of his security (that is his property) without due process of law, and is ex post facto in effect. Under these three counts such legislation would violate the Constitution of the United States, or its constituent States. In Canada, unfortunately, there seems to be no constitutional barrier to the passage of laws by the popular assembly that violate the rights of the minority, and this last situation I consider the most serious of all Canada's fundamental problems.

"When students of Canadian affairs fully understand the situation they will not consider Canada entitled to credit in keeping with her economic strength, until her popular assemblies are brought under some restriction similar to that imposed by our own state and federal constitution.

Good Field but for Politics.

"In the above outline are the chief factors at present interfering with the farm mortgage business in western Canada. They are potentially of much greater effect than actually in our experience. They have in reality given little trouble, but this is true because we have rigidly cut down our loaning and restricted our loaning to such classes of business as would not be interfered with by such laws. We could loan in a much wider territory and to a much broader class of citizens if these laws were not in effect, and undoubtedly could loan at lower rates of interest. By dealing as carefully as we are at the present time we are able to show a clean sheet and we do not think that the loans we are making are surpassed in physical security by any loans in this country.

"If Canada's political situation was as favorable as her economic situation there could be no better farm mortgage field than the best parts of the western Canadian provinces.

"As the matter stands, for a new company to enter the field, without established connections is of doubtful advisability until the situation has worked itself out. You might make occasional loans to men in whom you had every confidence and where the physical security was ample without any difficulty, but there are many difficulties in the way of establishing a safe general business at the present time. The voting public of western Canada will find out just how shortsighted the legislatures have been in putting all this legislation on the books, and that like our friends in Kansas they will find that populism invites its own worst penalty."

WILL DEBENTURE STOCK OFFERINGS BE POSTPONED?

When the finance minister announced in his last budget speech that the government propose to issue debenture stock in small denominations from time to time, the bond houses and loan companies did not welcome the prospect of such competition. Sir Thomas White stated at the time that the government had determined to authorize the sale of such stock from time to time in principal sums of \$100 and multiples thereof. The stock will be repayable in 5 years from date of issue, and will bear interest payable half-yearly by cheque negotiable without discount at any branch of any chartered bank in Canada. Full information as to the nature and terms of the issue would, he said, be published later. The government will reserve to itself the right to limit the amount of individual sales, and generally to deal with the issue as may be deemed advisable, having regard to the national credit and requirements. The object of this innovation is "to promote saving among the public and afford a ready means of remunerative investment in Dominion securities for funds seeking investment during the intervals between public offerings."

More than seven months have elapsed since the last public offering of Dominion securities, namely, the war loan in November. If the next war loan is issued in September or October, only three or four months remain this year for the suggested debenture stock issue. It may be, however, that after canvassing the situation the finance minister has decided to withhold the suggested debenture stock offerings from the market for the present. Much of the money invested in such issues would be withdrawn from the banks, and the banks a few months ago advanced \$75,000,000 for the purchase of munitions here and a further advance of a similar kind is likely to be made shortly, the first advance having been exhausted. The greater part of the funds subscribed to the next war loan also will come from the banks.

Messrs. L. N. Rosenbaum & Company, 80 Wall Street, New York City, have sold for a client \$125,000 of second mortgage 6 per cent. bonds of the Guardian Realty Company, (Royal Bank Building), of Toronto. The total issue is \$400,000. This building is principally occupied by the Royal Bank of Canada, at Toronto, and is one of the largest and finest structures in Canada.

Take a Cruise

on the GREAT LAKES

Get away from the monotony of the office, factory or farm.

Take a Real Vacation—full of pleasant surprises—of unique features,—of wondrous sights.

Make your business trip a pleasure voyage. The big fleet of Northern Navigation Liners are making tri-weekly trips on the lake Huron-Superior Cruise, making possible fast, comfortable, safe travel.

Between Detroit, Mich., Sarnia, Ont., Sault Ste. Marie, Ont., Port Arthur, Ont., Fort William, Ont. and Duluth, Minn.

Features of These Cruises

Included in the Tickets are the Finest Meals and Most Comfortable Berths. Special Train Visits to Kakabeka Falls—Basket Picnic—Special Shore Dinner at Big Hotel, Boulevard Drive in Terminal City—Inspection of Largest Locks on Fresh Water—Afternoon Tea on Shipboard—Dancing in Big Ballroom Every Evening—Music by Ship's Orchestra—Refreshments After Dancing, etc., etc.

Complete Cruise \$40

Everything Included, (6 day trip)

Also Georgian Bay one way 4 day trips—Between Collingwood and Sault Ste. Marie.

Also 30,000 Island one way trip between Parry Sound and Penetang.

Good connections with through rail lines east and west at Detroit, Mich., Sarnia, Ont., Fort William, Ont., Port Arthur, Ont., and Duluth, Minn.

CAPITAL AFTER THE WAR

Reduction of Britain's Investment Surplus—Money for New Enterprises

In his final article on the destruction of capital by the war and the supply of capital after the war, Mr. Francis W. Hirst, editor of the *London Economist*, refers to the effect of the war upon the supplies of capital. He gives the following analysis from the standpoint of geographical distribution of new capital raised in the United Kingdom for export abroad in 1913:—

Destination of New Capital.

1. Home—	1913.
United Kingdom—Total	£ 35,951,200
2. Colonial—British Possessions—	
Australasia	£ 18,628,900
Canadian Dominion	44,119,000
India and Ceylon	3,824,000
South Africa	6,294,700
Other British Possessions	3,270,600
Total British Possessions	£ 76,137,200
3. Foreign Europe—	
Austria-Hungary	107,700
Belgium	Nil.
France	Nil.
Greece	Nil.
Norway	2,402,200
Russia	8,955,900
Sweden	485,000
Turkey	Nil.
Other European countries	Nil.
4. Foreign America—	
United States	18,746,100
Argentina	11,989,600
Brazil	15,093,400
Central America	414,900
Chili	2,699,400
Mexico	10,641,500
Other South American Republics	525,000
5. Foreign Far East—	
China	6,883,000
Cuba	801,700
Dutch East Indies	1,497,700
Philippine Islands	712,500
Other foreign countries	2,403,000
Total foreign countries	£ 84,448,600
Total for whole year	£ 196,537,000

"These capital accumulations," he says, "the profits and savings of the community, were a principal support to our foreign trade; for our merchants and manufacturers naturally followed in the wake of our financial investments. The great merchant houses of the city are, of course, partly financial, partly commercial.

Luxuries and Disablement.

"Now, as to the effect of the war on the annual surplus which we can spare for our foreign and colonial trade. If the war ends before the autumn, the new war debt charge may be not more than 80 or 90 millions sterling. In that case, supposing other things to remain the same, our annual surplus for investment in new securities would be reduced to about 100 millions sterling. The optimists say that a large additional sum will be found by a reduction of expenditure on luxuries and by harder work. On the other hand, we must add to the dead weight charge at least 30 millions in pensions to disabled soldiers and to widows and orphans. We may also have to add enormous additions for the upkeep of army and navy. And, further, we must allow for the fact that (perhaps) half a million of our best workers will be out of action. Lastly, we must anticipate a heavy reduction in our exports to all the countries which have been impoverished by this war (there may be a temporary spurt during the first few months of peace)—Germany, France, Russia, Austria, Italy, Turkey, and the Balkans. We must remember that floating as well as fixed capital has been mortgaged on a colossal and quite unparalleled scale. Look at the mass of treasury bills and short-term liabilities of all kinds which can only be funded by degrees as savings ac-

cumulate. Look also at the depreciated paper currencies of all the Continental belligerents, and the vast exertions which will be necessary to restore them.

"The total cost of the first year of the war has been estimated at about 3,750 millions sterling, and of the second year at double, so that even if the war ends in August the huge and incomprehensible figure of £11,250,000,000 will have been reached. Deduct 20 per cent. for contractors' profits, and you still have £9,000,000,000 without allowing for the appalling loss of life, and the only less appalling devastation of property in Belgium, Poland, Galicia, Servia, Turkish Armenia, the Trentino, on the sea, etc. In view of these facts and figures, and their inevitable effect upon credit, I cannot see that there will be much money forthcoming for new enterprises, unless old and established businesses are to be neglected. Moreover, one of our chief concerns will be to support the credit of our colonies and allies, who are, of course, heavily indebted to the treasury.

Fighting to the End.

"Our statesmen and financiers should never forget the extent to which the property and development of the Empire depend upon the savings of the United Kingdom. For that reason alone no genuine and intelligent Imperialist will talk lightly of spending the last farthing upon a war to the bitter end, if a reasonably satisfactory peace can be brought about by prudent and skilful diplomacy.

"As to the future, where can India and the colonies get their supplies of capital from if not from London? After the war, Holland, in proportion to its population, will probably be the richest country in Europe. But the Dutch have their own large East Indian possession to feed with new capital for development, and, besides, like the Scotch, they are not only savers, but speculators. Scandinavia also will be much richer than ever before. It has already begun to lend on a small scale.

"But I know of no important external aid among capital markets except the United States. New York has already begun to help in Canada and Argentina. But the capital of the United States is not likely to go much out of America. It does not take easily to salt water. It has, however, made considerable flights since the war began, as the following extract from the *New York Evening Post* of March 18th last may serve to show:—

Including the \$75,000,000 loan practically concluded this week ending March 18th, to Canada, our loans to foreign cities and countries since the European war began on August 1, 1914, have reached \$1,003,500,000. The loans were made to fifteen different nations. The largest foreign loan was the \$500,000,000 five-year 5 per cent. bond issue arranged jointly with England and France. A list of the foreign loans follows: Anglo-French credit, \$500,000,000; French one-year notes, \$30,000,000; French special credit, \$50,000,000; Canada government, \$120,000,000; Canada municipality, \$120,000,000; Italy one-year notes, \$25,000,000; Germany notes, \$25,000,000; Switzerland notes, \$15,000,000; Sweden notes, \$5,000,000; Norway notes, \$8,000,000; Argentine notes and bonds, \$74,000,000; Panama, Bolivia, and Costa Rica, \$4,500,000; Yucatan, \$10,000,000; Russian credit, \$7,000,000; Chili Bank loan, \$10,000,000; total, \$1,003,500,000.

"Since then additional loans and credits have been arranged, of which the particulars are not available. But no one who considers these figures and realizes what vast quantities of United States securities Great Britain, France and Germany have sold back since the war can suppose that much further assistance will be forthcoming from New York after the peace, especially if Washington embarks on a costly war with Mexico."

Mr. Hirst, author of the above article, resigned as editor of the *London Economist* recently, largely, it is said, because of his differences with the paper's proprietors as to his pacific views.

The *Monetary Times* has received, with Sir Robert Borden's compliments, a copy of Sir Max Aitken's "Canada in Flanders," with a preface by the Right Hon. A. Bonar Law, M.P., LL.D., secretary of state for the colonies, and an introduction by the premier.

CREDIT MEN AND RETAILERS' RECORDS

Causes of Business Failures—Suggestions for Their Control and Elimination

By Henry Lye.

The recent meeting of the Credit Men's Association is a reminder of the fact that the members of it have the capacity, the power, and the duty of making it one of the most beneficial institutions in Canada.

The desire for special legislation is evidence of internal disorder and personal unfairness by some traders, so is a legitimate desire and should be gratified, as should that for uniformity; it may be, however, that the presently discordant statutes exist because of acts of injustice which should not be countenanced or continued. One of the speakers deprecated very properly the practice of soliciting for assignments, giving his reason that it is the desire of the wholesaler to keep men in business, not to drive them out of it; this should be the keynote of all their operations.

The causes of failures amongst retail traders include personal or family extravagance in living beyond their net income; giving of credit without security, inattention to business, bad buying, neglect of stocktaking, improper or altogether useless bookkeeping (if any), inadequate insurances. To lessen most of these causes of failures it is necessary that the creditors of the retail dealer retain some control over the actions of their debtors, and that whosoever obtains goods on credit should properly acknowledge a duty of right conduct and obligation.

Good Bookkeeping is a Necessity.

The unskilled, or what we may designate as the incomplete, commercial traveller in many cases considers his whole duty accomplished by the selling of goods without thought or care as to the suitability in description or amount to the business of the retailer, whilst the equally unskilled or incomplete retailer is induced to purchase goods which in description and amounts are unsuited to the wants of his customers. Perhaps the credit man knows the purchaser and the locality of his business and controls not only the amount of the goods furnished on credit but the ordinary wants of the settlers in his neighborhood; if so, there may be proper control over the forwarding of all or only part of the purchase. The greatest of all causes of insolvency is the neglect of good bookkeeping; this is largely the fault of this same credit man, who has it in his power to require periodical stocktaking clearance sales of out of season goods and proper balance sheets, and can exercise some control and oversight over these operations. In respect to stocktaking very few retail merchants know how to conduct it properly.

Methods of Recording Business.

As to bookkeeping, a majority of the retailers just keep record of goods sold on credit, and do not even retain this record after the goods are paid for or the collection of the amounts are found to be hopeless. Some stick to the old-style merchandise account, instead of keeping one record of purchases and another of sales. Such an account becomes so involved as to be useless. Some keep cash books which are intended to show in one column cash immediately received for goods sold and in another the cash received for goods previously sold on credit with the name of the person whose account should be duly credited. If these records are correctly kept they are of great value, but a very small proportion of the retail traders know any of the first principles of bookkeeping, and they are easily discouraged in their attempts.

The balance sheet is the supreme test of any business if it shows truly the particulars of the debts and of the assets. A comparison of the balance sheets of various periods would disclose any weakness in over-stocking, in giving of credit, or in personal or undue expenditures, whilst the study of any one might be without result.

How Much Insurance.

It is seldom that insurances are based upon any system or that the insured has kept such records as enable him to know what amount of insurance he should carry or the amount of his loss if a fire occurs.

In some of the United States the merchant is not only required to keep proper sets of books, but to keep them with his invoices and stock sheets in a fire-proof safe, whereas, in Canada, invoices are stuck on files or on nails; books of account, if kept, are stuck on shelves, and stock sheets thrown

into drawers, if at all preserved, and then loud complaint is made if there is any difficulty in an adjustment.

Unless proper records are made, preserved and studied, the merchant cannot know whether he is drifting into insolvency by bad management or rushing into difficulties by unjustifiable expenditures, or would be justified in extending his business in any special direction.

Oversight extended tactfully in a friendly spirit might save many an honest man from disaster and his creditors from losses, so the credit man should be the most valuable member of the mercantile community.

TO OBTAIN FARMERS' CREDITS

First Mortgage Must Be Made Secure—Legislation and Loans

"Farmers' Credits," or easier and cheaper money for the farmer. This is a very large subject, thread-worn by politics in all its disguises, and it seems a pity to suggest removing it from that arena, but no other organization is better able to assist the government in bringing about the state of affairs the people want, or to force the move than the Alberta Mortgage Loans Association. This is the opinion of Mr. W. Toole, manager of Canada Life Assurance Company's investment department, South Alberta branch, who in a recent address said:—

We have no politics, we want no concessions from any government or individual, and we should take the initiative in telling the farmer and the citizen of Alberta how he can get easy and cheap money. We all know that money is higher to-day in Western Canada than it should be if different methods had been adopted. We all know what it costs to make, care and watch mortgage investments in Alberta. We know the price of money in other parts of the world, and we know, further, that there is possibly no place where the investment of capital is so precarious, or requiring more attention, than in parts of Western Canada, and the question is, Why do these conditions prevail?

Advanced Legislation Responsible.

We know that they have been brought about by the so-called advanced legislation influenced by members of parliament, who like to do and say only pleasant things to their constituents. Only a few short years ago the farmers of Alberta, and the borrowing public generally, were patting each other on the back and congratulating their members that a tax of half of one per cent. was placed on the interest income of loan companies. Since then numerous additional taxes have been imposed. In Eastern Canada it is freely being discussed that there are twenty-one taxes in Saskatchewan that would take priority over a first mortgage, and Alberta is little better. Alberta has improved matters by repealing the iniquitous hospital tax section of the act, and when other suggested amendments are made it will keep matters from getting any worse than they are, but to interest capital to such an extent that it will immediately reduce the average rate to 7 per cent., and lower and further benefit specially attractive securities, the governments will have to remove obstacles instead of placing them in the way of capital investment.

Increased Capital of Available Security.

It is estimated that \$70,000,000 is about the amount in mortgage investments in Alberta at the present time. The province has natural resources to offer security for many times that amount, and the influx of capital and the distribution in the country would be amazingly increased if absolute security is made available. The only way that this can be done is for the Dominion government to repeal its legislation regarding seed grain liens and the like and make such charges take their place on the title, and for the provincial government to pass such legislation as will make a first mortgage in this country as secure as in any other part of the world, suggested Mr. Toole. Mortgagees will have to assume all responsibility with regard to the fluctuation in values and be dependent upon the judgment and experience of their managers and agents to see that their capital is protected in that respect, but it is utterly impossible for any loan manager or agent to foresee what legislation may be enacted next year with the same disastrous effects on vested mortgage interests as that which has come into force during the last few years.

BRITISH CREDIT UNSHAKEN

That is the Case After Two Years of War—Relations with American Bankers

Lord Revelstoke, active head of the great merchant banking firm of Baring Bros., with its world-wide financial connections, and one of the directors of the Bank of England, has granted an interview to the London representative of the United Press of America concerning the financial and commercial position of Great Britain as it appeared to a banker and merchant who had no official status. Lord Revelstoke said that after nearly two years of a war the edifice of credit in London stands firm and the delicate banking machinery works smoothly. For this the world has chiefly to thank the courageous policy adopted by the cabinet and the treasury department during the first months of war.

Volume of Foreign Trade.

London has attained its present position owing largely to the volume of foreign trade to and from the shores of England. The key to the position has been the maintenance of an export trade. Exports have been possible to an extent beyond expectation, partly owing to the sound financial policy of the government and partly to the use of the great reservoir of labor previously untouched here. But, chiefly, the successful maintenance of exports is due to the British navy. No small part of the navy's effort has consisted in the protection of the world's sea-borne commerce, which has enabled the city of London to do its share in the great struggle. Notably it is the navy which has made it possible for the allies to obtain from America free shipments of food and munitions, and, although the orders placed in America have had the effect of creating a trade balance adverse to the allied countries, measures have been taken to arrest and control the fall in the American exchange. "I refer, of course," said Lord Revelstoke, "to the mobilization of securities and to the restrictions on certain imports. In these matters the chancellor of the exchequer has found the business community a ready coadjutor, and if the necessity for more energetic measures for the protection of our trade balance arises as time goes on there is little doubt that a substantial and hitherto untouched reserve could be made available by a stricter regulation of imports and a greater economy in their distribution.

Has Met All Claims.

"London has been able to meet all claims on herself, has been able to borrow abroad when necessary on reasonable terms, and in other cases to meet in gold all obligations abroad to those who prefer that form of payment. Nor has the city any doubt but that the freedom of London's gold market can be maintained in the future."

It was suggested to Lord Revelstoke that there are folk in every country who regard finance as a secret agency possessing the power to instigate and stop wars at will. For such ideas Lord Revelstoke had nothing but a smile. "War and trade," he said, "are impossible bedfellows. Trade depends on credit, which is a reasonable expectation that goods and services will come to market and be sold in due course. War makes that expectation doubtful. The profits of a few specialized businesses can never compensate the community from the destruction wrought by war, and finance depends for its earnings on general, not on special, prosperity."

Power of the United States.

Finally, Lord Revelstoke was asked how London views the growing financial power of the United States. He said that never had the friendship between bankers in America and England been more cordial. "The United States have gained greatly in financial strength since 1914. The association of American capital with the British experience and technical knowledge of European and Eastern conditions is one from which both parties will derive benefit. It is to the co-operation of these two factors—to the joint endeavors of the United States and of Great Britain—that the financial world will look when the reign of force is over and the hour for reconstruction arrives."

The Bank of Montreal has opened a branch at Camp Borden, Ont. The branch will be in charge of Mr. E. Pitt, acting manager.

ALBERTA'S CORPORATIONS TAXATION ACT

Legal Authority is of Opinion that Portion of Act is Invalid

Upon the Alberta corporation taxation act and the amendments which impose an annual tax of 20 cents per \$1,000 on the authorized capital of every company, not otherwise taxed under the act, whose authorized capital exceeds \$20,000, and which transacts business in Alberta, the total annual tax not to exceed \$500, and provides that the fact that a company is in default in the payment of its tax may be pleaded as a defence to any action brought by the company, as well as that no registrar of land titles shall register any instrument made by or in favor of any company in default, the Canadian Manufacturers Association has obtained the legal opinion of Mr. F. W. Wegenast, Toronto, who states that the validity of the amendments may be considered in relation to (a) companies locally incorporated; (b) companies incorporated by other provinces; (c) companies incorporated by the Dominion.

Three Classes of Incorporation.

"(a) As regards companies locally incorporated, the amendments are probably valid.

"(b) As regards companies incorporated by other provinces, it is arguable that the legislation is an attempt to tax property outside the province. But as companies of other provinces are entitled to recognition only upon such terms as the Alberta legislation may impose, it may be that the legislation is valid as embodying one of the conditions of the recognition of the right of a company incorporated by another province to transact business in Alberta.

"(c) As regards companies incorporated by the Dominion and authorized to carry on business in all the provinces, there are features of the amendments which are, in my opinion, *ultra vires* of the provincial legislature and which seem to me to have the effect of rendering the tax invalid. As in other constitutional cases, something will depend upon the facts of the concrete case upon which the issue is raised. For this reason it would be easier to advise upon a set of concrete facts with respect to a particular company.

Property Outside Province.

"The following features appear to support the view that the amendments are *ultra vires*—

"1. The basis of taxation is the authorized capital of the company regardless of the amount paid-up or the amount employed in the province. In *Bank of Toronto vs. Lambe*, 12 A. C. 575, the privy council upheld a provincial tax upon banks based upon their paid-up capital and the number of branches in the province. But the legislation in question goes a good deal farther; and it would be invalid as an attempt to tax property outside the province and as a clog upon the capitalization authority conferred by the Dominion.

"2. From the standpoint of property and business in the province, it would be altogether inequitable in its application to different companies. A company with a relatively small authorized capital might have all of it paid up and employed in the province, while a company with a large authorized capital might have a relatively small portion paid up and a still smaller portion employed in the province. This inequity might not be bad in itself,—that is to say, it may not be *ultra vires* of a provincial legislature to tax inequitably, but the inequality may be regarded as indicating an ulterior object—in this case to challenge corporate rights conferred by the Dominion and make their exercise conditional on compliance with provincial requirements.

Penalty of Outlawry.

"3. For non-payment of the "tax," the act purports to incapacitate companies from maintaining actions in the courts. The power to sue and be sued is expressly conferred on all Dominion companies by the Interpretation Act of Canada, and cannot be withheld as a penalty for non-payment of a tax. It is not any proper incident of taxation to impose the penalty of outlawry upon those who do not pay the tax. In other words, that part of the act dealing with the defence of actions is not taxation, and is therefore invalid as an accompaniment of the exercise of the taxing power.

"4. The act purports to interfere with the registration of title to land by companies who have not paid their "tax." This feature is also invalid as an accompaniment of a taxation measure. The power to acquire and hold real estate is

expressly given to Dominion companies by section 29 of the companies act, whatever may be the jurisdiction of the provinces with respect to the control of corporations in the matter of holding lands, and the legislation in question is not a *bona fide* exercise of such jurisdiction.

To Circumvent Privy Council.

"5. The concurrence of all the features above mentioned in a single act seem to me to stamp the measure as a palpable attempt to circumvent the decision of the privy council in the *John Deere Plow Company vs. Wharton*. If no single feature were invalid in itself, it appears to me that the courts would regard the collective effect of the legislation as constituting an attempt at interference with the corporate status and capacity of Dominion companies and as such invalid under the decision mentioned."

For these reasons Mr. Wegenast is strongly inclined to regard the whole act,—that is to say, that portion applicable to commercial corporations,—as invalid in relation to Dominion companies, and he states that if the act as a whole is not invalid, at least those portions purporting to take away companies' defences and withholding the right to register documents of title are invalid.

CANADIAN INDUSTRIAL CONDITIONS

Discussing industrial conditions in the monthly commercial letter issued by the Canadian Bank of Commerce, it is noted that very great difficulty is still being experienced in obtaining raw material for the manufacture of articles in general demand. "In many cases the failure of normal sources of supply is a very serious drawback, especially in view of the large orders now being placed by domestic buyers, and in some lines manufacturers have been forced to ask all their customers to reduce their orders or to specify the articles most urgently needed. In volume orders are very much in excess of last year, but in view of the lesser rate of consumption, this is ascribed to speculative buying in anticipation of higher prices.

"The activity in the manufacture of ammunition, which has been reported for some months, is fully maintained in volume by orders now being placed. The result is shown in the increase of exports under the head of iron and steel manufactures. In the fiscal year ending 31st March last these exports aggregated \$49,713,309, as compared with \$11,374,081 in 1914. Of last year's product the United Kingdom took 67 per cent., the United States 10 per cent., and all other countries 23 per cent.

"In the textile industries generally, wherever there is reasonable hope of obtaining a supply of labor, expansion is taking place in the form of additional buildings and plant and on the part of manufacturers unable to obtain labor for existing factories there is a disposition to erect mills in districts where operators can be obtained. The immediate future promises to afford the textile and related industries, all the business that can be handled at a satisfactory margin of profit.

"The additions and improvements now being made to the plants of many manufacturers in the steel and textile industries are designed to serve not only immediate demands but also those of the future, when competition under normal conditions will have to be met. Out of present profits there is a marked disposition to install devices of every description that will increase production on the most economical basis. While the domestic demand in British Columbia for lumber is improving, buyers from the United States are not bidding as freely as they were a few weeks ago. The mills on the eastern slopes of the mountains report an improved demand from the prairie provinces."

ANOTHER UNITED STATES FACTORY HERE

The firm of H. S. Hall, Jersey City, N.J., have rented a factory building in London, Ont., as a Canadian branch establishment. The company, which manufactures silk and chamoyette gloves, and lisle thread, will next year build a factory at London, at an estimated cost of \$25,000. The Canadian representative of the company is Mr. Charles Phillips, 52 Bay Street, Toronto.

8% NET FARM MORTGAGES

We want \$1,000 on each of thirty-two quarter sections of first-class land. Principal re-payable in five years; interest payable the First of January and the First of July. All expenses paid by the Mortgagors. Titles examined by MacDonald, Craig, Tarr & Ross.

LEGAL NOTICE

THE DIARSENOL COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 8th day of June, 1916, incorporating Ernest Neil Macallum and Charles Newton Candee, the younger, manufacturing chemists; James Frederick Edgar, barrister-at-law, and Lily Mae Lewis, stenographer, of the City of Toronto, in the Province of Ontario, and George Patrick Mackie, of the Village of Scarboro, in the said Province of Ontario, bookkeeper, for the following purposes, viz.:—(a) To manufacture, buy, sell, deal in, import and export chemicals, medicinal preparations and other products, and generally carry on wholesale business as manufacturers, buyers and vendors of all kinds of medicines and chemicals, patented articles, machinery, scientific apparatus, surgical instruments and supplies, and to carry on the trade of chemists, druggists, apothecaries, and traders, importers and exporters, and manufacturers of medicinal and pharmaceutical preparations; (b) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (d) To apply for, purchase or otherwise acquire, any patents, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired; (e) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (f) To take, or otherwise acquire and hold, shares in any other company having objects altogether or in part similar to those of the company, or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (g) To enter into any arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (h) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (i) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business, and in particular any machinery, plant, stock in trade; (j) To construct, improve, maintain, work, manage, carry out or control any roads, ways,

branches or sidings, bridges, reservoirs, watercourses, wharves, manufacturing, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (k) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (l) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (m) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company; (n) To apply for, secure, acquire by assignment, transfer, purchase, or otherwise, and to exercise, carry out and enjoy any charter, license, power, authority, franchise, concession, rights or privilege, which any government or authority or any corporation or other public body may be empowered to grant and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's shares, bonds and assets to defray the necessary costs, charges and expenses thereof; (o) To procure the company to be registered and recognized in any foreign country and to designate persons therein according to the laws of such foreign country to represent this company and to accept service for and on behalf of the company of any process or suit; (p) To raise and assist in raising money for, and to aid, by way of bonus, loan, promise, endorsement, guarantee of bonds, debentures or other securities or otherwise, any other company or corporation, and to guarantee the performance of contracts by any such company, corporation, or by any other person or persons with whom the company may have business relations; (q) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (r) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (s) To do all or any of the above things as principals, agents, contractors or otherwise, and either alone or in conjunction with others; (t) To do all such other things as are incidental or conducive to the attainment of the above objects; (u) To acquire and take over as a going concern any business or operations now or hereafter carried on by any person, firm or corporation engaged in or empowered to engage in any business within the powers of the company, and to pay for the same either in cash or wholly or partly by shares, debentures or other securities of the company; (v) To purchase, hold, sell and dispose of shares of the capital stock of any other company or corporation having objects in whole or in part similar to those of the company, and to invest its funds in the purchase of any such stock and to pay for the same either in cash or shares of the capital stock or debentures of the company, or partly in cash and partly in capital stock or debentures of the company. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Diarsenol Company, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 13th day of June, 1916.

THOMAS MULVEY,

Under Secretary of State.

51-2

RUBBER SHARES MAY BE QUOTED HERE

According to statistics issued by Clayton Ridge & Company, rubber share brokers, Royal Bank Building, Toronto, whereas in 1905 British plantation rubber supplied only 510 tons, i.e., less than half of one per cent. of the world's requirements, these plantations in 1915 furnished no less than 108,000 tons, i.e., 68 per cent. of the world's production, which in this short ten-year period had increased nearly three-fold, owing chiefly to the advent of the automobile and its coming into general popular usage.

"The bulk of this large quantity of plantation rubber, which can be approximately valued at about \$1,000 per ton, comes from these new rubber estates which are similar to the Niagara orchards, and are planted about 100 trees to the acre, each tree yielding at maturity about 3 or 4 pounds per annum of latex or sap," says Mr. Ridge, in a statement just issued.

"This new staple rubber cultivating industry was pioneered mostly by British tea merchants and planters, and is practically all financed through London, England. The fact that the United States took over 60 per cent. of the world's output in 1915, with cash purchases through London, amounting to no less than \$100,000,000, has been and still is one of the chief factors of British exports preventing the falling of the sterling rate of exchange to a considerably lower point than was touched in 1915, and was the principal item counterbalancing the huge British imports of war material from the United States.

"These rubber pioneers promoted 400 to 500 new plantation rubber companies in 1910-11, and now, after the usual six-year interval of growth of the plants before they reach the yielding stage, the shareholders are in most cases in receipt of substantial dividends. Low capitalization and sound management have all contributed to these results. Little new planting has been done since 1912, and it is possible, for various reasons, that we shall see a world's rubber shortage during next two or three years, corresponding with the development of the motor and motor truck industries.

"Many shares in British plantation rubber companies can to-day be acquired on a dividend yielding basis of 8 to 10 per cent., or even 12 per cent. per annum, and there is a possibility of some of these shares being quoted in the near future on one of the Canadian exchanges."

HOUSTON'S ANNUAL FINANCIAL REVIEW

The Annual Financial Review has just been issued by Houston's Standard Publications, Stock Exchange Building, Bay Street, Toronto. This volume is as complete as usual, containing a record of a large number of Canadian companies and those abroad in which Canadians are interested. The book is well known in all financial offices and is indispensable to those interested in stocks, stock exchanges and Canadian corporation finance.

LEGAL NOTICE

THE LOWNDES COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the seal of the Secretary of State of Canada, bearing date the 20th day of June, 1916, incorporating Elroy Barrie Schroeder, manager; Charles Arnold Stone, accountant; Harry Booker Sweetapple Hammond, student-at-law, and Jessie Harold Whitcomb and Annie Hunter, spinsters, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—

(a) To manufacture, buy, sell and deal in goods, wares and merchandise of all kinds;

(b) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights;

(c) To apply for purchase or otherwise acquire, any patents, brevets d'invention, grants, leases, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to pay for the same in cash, shares or other securities of the company or otherwise, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired;

(d) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same;

(e) To enter into any arrangements with any Government or authorities, supreme, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges, franchises and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with or surrender any such arrangements, rights, privileges, franchises and concessions;

(f) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors or associates in business) or the dependents or connections, of such persons, and to grant annuities, pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object;

(g) To promote any company or companies for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company;

(h) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business, or capable of being profitably dealt with in connection with any of the company's property or rights for the time being;

(i) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable and transferable instruments;

(j) To purchase, lease or otherwise acquire and to hold, exercise and enjoy in its own name, all or any of the property, franchise, good-will, rights, powers and privileges held or enjoyed by any person or firm or any company or companies, and to pay for such property, franchise, good-will, rights, powers and privileges wholly or partly in shares of the company wholly or partly paid up, and to undertake the liabilities of any such person, firm or company;

(k) To aid in any manner any corporation any of whose shares of capital stock, bonds, debentures or other obligations are held or are in any manner guaranteed by this company, and to do any act or things for the preservation and protection, improvement and enhancement of the value of any such shares of capital stock, bonds, debentures, or other obligations, and to do any and all acts tending to increase the value of any of the property at any time held or controlled by this company;

(l) To purchase, take or acquire by original subscription or otherwise, and to hold and, with or without guarantee, to sell or otherwise dispose of shares, stock, whether common or preferred, debentures, bonds and other obligations in and of any other company carrying on a business in whole or in part similar to that of the company, and to pay for such shares, stocks, debentures, bonds, and other obligations either in cash or partly in cash, or to issue shares of this company fully paid up or partly paid up in payment, and notwithstanding the provisions of section 44 of the said Act, to use the funds of the company in the purchase of shares, stock, debentures, bonds and obligations in and of any such other company, and to vote on all shares so held through such agent or agents as the directors may appoint.

(m) To sell, let or hire, or otherwise deal with the assets of the company, or any part thereof, for such consideration as the company may think fit, and in particular for shares, debentures, debenture stock or other securities of any other company;

(n) With the approval of the shareholders, to remunerate any persons for services rendered to the company, in such manner as the company may deem expedient, and more particularly by the issue and allotment of shares, bonds and other securities of the company, wholly or partially paid up, but nothing in this clause contained shall be deemed to limit the power of the directors to fix and pay the salary of any and all officers, servants, agents and employees of the company;

(o) To lend money to customers and others having dealings with the company and to take security for the loan of such money; to guarantee the performance of the contractual and other obligations of any such persons and to give any guarantee or indemnity as may seem expedient;

(p) To pay out of the funds of the company all expenses of or incidental to the formation, registration and advertising of the company, or in or about the promotion of this company or the conduct of its business;

(q) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations;

(r) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company;

(s) To do all or any of the above things as principals, agents, contractors or otherwise, and either alone or in conjunction with other, and either by or through agents, sub-contractors, trustees or otherwise;

(t) To do all such other things as are incidental or conducive to the attainment of any one or more of the above objects, and so that the objects specified in each paragraph of the clause shall, except when otherwise expressed in such paragraph, be in no wise limited or restricted by reference to or inference from the terms of any other paragraph or to or from the name of the company;

(u) To acquire and take over as a going concern the several businesses now carried on at the City of Toronto, in the County of York, under the Ontario Corporation, The Lowndes Company, Limited, with all the assets, stock-in-trade, and real and personal property owned or used in connection therewith and the goodwill thereof, and all the rights and contracts now held by said corporation, subject to the obligations, if any, affecting the same, and to pay for the same in paid-up shares of this company.

The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Lowndes Company, Limited," with a capital stock of five hundred thousand dollars, divided into 5,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 22nd day of June, 1916.

THOMAS MULVEY,

Under-Secretary of State.

52-2

Mr. J. B. Kilgour, Toronto, is inspector of taxation under the business profits war tax act, with offices at 59 Victoria Street. Mr. F. P. Hopkins is assistant inspector. The Toronto district consists of the counties of Ontario, York, Peel, Halton, Dufferin, Simcoe, Grey, Muskoka and Parry Sound. Mr. Hugh D. Paterson, whose offices are at the same address, is inspector for the Kingston district, consisting of the counties of Leeds, Frontenac, Lennox and Addington, Hastings, Prince Edward, Northumberland, Peterborough, Victoria, Haliburton and Durham.

Mr. Ernest W. Owen, manager of the Detroit division of the Sun Life, who read an instructive paper at the life insurance convention at Hamilton this week, was one of the 25 selected salesmen and sales managers tested at the salesmanship clinic held at the World's Salesmanship Congress, Detroit. This clinic was conducted under the direction of Dr. Walter Dill Scott, professor of psychology at the Northwestern University, the idea being to test out the managers' efficiency in selecting salesmen. Dr. G. M. Whipple,

who is an eminent psychologist of the University of Illinois, was first. He secured a percentage of 85, and Mr. Owen secured a percentage of 83, obtaining the second position, but actually the first among the sales managers tested in the clinic. The salesmen were selected from every line of business.

Mr. A. E. Boyle has been appointed secretary of the Winnipeg board of trade. He is well known in both Ontario and western Canada, being a graduate of the University of Toronto, serving as a newspaper man at Niagara Falls, and being successively reporter on the Toronto Globe and commercial editor of the Toronto News before going west in 1905. For a time he was editor of the Regina Standard, and later publicity commissioner for that city. For four years he was western representative of the Toronto Globe, and has been a frequent contributor to *The Monetary Times*. More recently he has been engaged in the Dominion government's case in the matter of telegraph rates. He succeeds Dr. C. N. Bell, who has been secretary of the Winnipeg board of trade for 28 years.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Ames-Holden-McGready Company.—A by-law authorizing the issuance of an issue of \$1,000,000 second mortgage five-year 6 per cent. debentures, to be issued at par, is to be voted upon by the shareholders on July 28th. This move, according to the circular, is to provide the company with more working capital.

Tooke Bros., Limited.—Total profits shown for the past year are \$97,270, an increase of \$71,000 over those for 1915.

The report of President D. A. Tooke stated that while sales for the first three months of the company's year had been below normal, those for the last nine months had shown a considerable increase, and that orders for fall also were in excess of those of the previous year. Assets stand at \$621,461.

Porto Rico Railways Company, Limited.—The comparative statement of earnings for June is as follows:—

For June:	1915.	1916.	Increase.	Per cent.
Gross . . .	\$ 59,784.53	\$ 71,447.53	\$11,663.00	19.51
Net . . .	27,681.77	36,497.49	8,815.72	31.85
For six months:				
Gross . . .	\$382,704.65	\$431,971.67	\$49,267.02	12.87
Net . . .	181,420.39	223,426.70	42,006.31	23.15

Smart-Woods, Limited.—The shareholders of this company meet to-day to authorize the issue of \$500,000 serial first mortgage 6 per cent. gold bonds of the company, to mature on such dates as the directors may determine. It is proposed that the bonds mature in blocks of \$30,000 yearly for five years and in blocks of \$35,000 yearly for the following ten years.

An issue of \$2,500,000 first mortgage sinking fund 6 per cent. bonds, due 1934, of which \$1,000,000 are pledged as security for loans, was authorized in December.

The capital stock of the company consists of \$2,500,000 7 per cent cumulative preferred stock, of which \$1,546,500 is outstanding and \$2,500,000 common, of which \$1,718,600 is outstanding.

Dominion Telegraph Company.—The company's balance sheet shows assets as follows: Capital expenditure, \$1,281,819; Toronto, Grey and Bruce Railway Company bonds and interest thereon, \$1,595; Dominion of Canada war loan bonds, \$25,000; cash in bank and on hand, \$1,660, totalling \$1,310,076; and liabilities of capital stock, paid up, \$1,000,000; dividends unclaimed, \$2,385; dividend No. 160, payable July 15th, 1916, \$14,000; suspense, \$1,388, a total of \$1,017,773, leaving a balance at credit of profit and loss account of \$292,302, totalling \$1,310,076.

The directors reported the payment, quarterly, in advance, for the past thirty-seven years of the guaranteed interest at 6 per cent. per annum on the capital stock of the company by their lessees, the Western Union Telegraph Company. The lease is for 99 years, from July 1st, 1879, to June 30th, 1978, inclusive.

Colonel Sir Henry Mill Pellatt is president of the company; Mr. Emilius Jarvis, vice-president, and Mr. Frederic Roper, secretary and treasurer.

Hollinger Consolidated Gold Mines, Limited.—The consolidation of Hollinger Gold Mines, Limited, Acme Gold Mines, Limited, and Millerton Gold Mines, Limited, has been completed, as well as the purchase of Claim 13147 and plant from Canadian Mining and Finance Company, Limited. A balance sheet has been prepared, showing the position of the consolidated company upon June 16th, 1916.

Under the terms of the consolidation Hollinger Gold Mines, Limited, became bodily a part of the new company, contributing its properties, plant, cash and all other assets, and receiving therefor its share of stock in the new company. This transaction automatically wiped out the "surplus" of the old company, the liability of the consolidated

company for its issue of capital stock having absorbed the old surplus.

Other terms of the consolidation provided that the shareholders of Acme, Millerton, and Canadian Mining and Finance Company should collectively receive in cash an amount equal to all dividends paid to the shareholders of Hollinger Gold Mines, Limited, during 1916, until the consolidation should be completed. This liability amounts to \$720,000, and will be reduced from time to time as circumstances permit.

Certain reservations have been made in accounts payable to meet the Dominion war tax, but, until the amount of the tax is known, the exact liability cannot be shown.

Considerable delays have occurred in obtaining apparatus for the mill extension, and the capacity is not up to the tonnage anticipated (1,000 tons per day), but, Manager P. A. Robbins states, it will not be long before everything is in working order and the necessary output will be possible.

The present balance sheet shows a deficit of \$178,000, which will be taken care of by the milling of increased tonnages.

The actual operation of the properties as a consolidated unit is gradually being brought about, but shareholders will appreciate that some little time must be allowed before the full benefit of the consolidation is obtained.

Under "current assets" cash amounts to \$274,421.93; this will be immediately augmented by a payment from Canadian Mining and Finance Company to us of approximately \$164,000 in final adjustment of our accounts with that company.

"Materials and stores" stand at \$190,490.38, which amount includes large stocks of cement, timber and other materials purchased for the construction of the 1,600-ton extension to the mill, which construction is just being started.

The total assets are shown as \$24,891,381, and the liabilities are: Capital stock issued, \$24,000,000; current liabilities, \$166,380; due shareholders, \$720,000; unpaid patriotic contribution, \$5,000.

For the period, January 1st, 1916, to June 16th, the mill ran 92.5 per cent. of the possible running time, treating 263,356 tons. The average value of ore treated was \$8.80 per ton. Milling costs were \$0.893 per ton.

CROPS ARE MAKING PROGRESS

The Saskatchewan department of agriculture in its crop report states that all crops are making great progress. Wheat ranges from eight inches in height in the east-central district to thirty-six inches at Prince Albert and Battleford. A small percentage of the wheat is now in the shot-blade, and all other grains are making rapid growth under improved weather conditions prevailing generally during the past week.

Damage by hail is reported from Humboldt, Cadillac, Batrum and along the Saskatchewan River for several miles, south of Swift Current and west to Gull Lake, but in no place has the damage been serious. Heavy rainfalls and high winds have been general and have delayed plowing of summerfallows and breaking. Weeds are showing up badly on unplowed lands. Continued hot weather with little or no rain is now required for all crops, to accelerate maturity and bring the crops through early.

All hay crops have every appearance of a heavy yield; alfalfa is especially good. A large acreage of fodder corn has been sown in the Tilney district, and at present promises well.

It is a matter for congratulation that live-stock with the exception of swine shows an average increase especially in the sheep industry, indicating that farmers appreciate the value of these animals not only for the production of wool and mutton, but also as a means of keeping down the weeds. The reports from the correspondents show a slight decrease in swine, owing no doubt to the scarcity of feed during the summer of 1915.

Is Your Estate Properly Protected?

No matter how little or how much you own, these possessions make up your estate, and should be protected by efficient and economical management.

This can best be done by an Executor or Trustee.

This Company, by acting in this capacity, will give your estate the benefit of experience gained in the management of many estates, of large and of only moderate size, and will scrupulously guard the interests of your heirs.

No charge for drawing up your will when the Sterling Trusts Corporation is appointed your Executor and Trustee.

Our officers will give you further information on request.

DIVIDENDS AND NOTICES**CANADA CEMENT COMPANY, LIMITED****PREFERENCE SHAREHOLDERS****DIVIDEND No. 26**

Notice is hereby given that a dividend of 1¼% for the three months ending June 30th, 1916, being at the rate of seven per cent. per annum, on the paid-up Preference Stock of this Company, has been declared, and that the same will be paid on the 16th day of August next to Preference Shareholders of record 1st day of August, 1916.

The Transfer Books of the Company will be closed from August 1st to 10th, both days inclusive.

By Order of the Board of Directors,
H. L. DOBLE,
Secretary.

Montreal, P.Q., July 18th, 1916.

BRAZILIAN TRACTION LIGHT AND POWER COMPANY, LIMITED

(Incorporated under the Laws of Canada.)

Notice is hereby given that the Board of Directors of the Company has declared a dividend of one per cent. on the issued Ordinary Capital Stock of the Company, payable 1st of September, 1916, to all Shareholders of record on the registers at the close of business on the 31st July, 1916.

J. M. SMITH,
Secretary.

Dated at Toronto, Canada, 15th July, 1916.

**NOTICE OF
Judicial Sale of Property**

Pursuant to the Order Nisi and the Final Order for Sale in S.C. 10623, Judicial District of Calgary, there will be offered for sale, with the approbation of a Judge of the Supreme Court of Alberta, by Henry M. McCallum, Auctioneer, at the Court House, in the City of Calgary, in the Province of Alberta, at Two o'clock in the afternoon, on Wednesday, the 6th day of September, A.D. 1916, standard time, the following lands and premises, being and comprising:—

1. The whole of the Railways and branches constructed or acquired by the Defendant between a point on the Canadian Pacific Railway, one mile west of Pincher Station, in the Province of Alberta, and Beaver Collieries, the property of North American Collieries, Limited, a distance of about 14 miles, with all lands or right-of-way owned or used by the Defendant, as appurtenant thereto, stations, freight houses, side tracks, shops, yards, engine-houses and other buildings and structures used in connection with the said Railway and Branches, or any part thereof, together with the franchises of the Defendant in respect to the same.

Terms: Ten per cent. cash; 15% in ninety days; 25% in six months; 25% in 9 months and 25% in 12 months. The last three payments bear interest at 5%.

Dated at the City of Calgary, in the Province of Alberta, this 3rd day of July, A.D. 1916.

LAURENCE J. CLARKE,
Clerk of the Court.

Approved: "L. F. Clarry."

DEBENTURES FOR SALE**DEBENTURES FOR SALE.****TENDERS FOR SCHOOL DEBENTURES.**

The undersigned will receive sealed tenders for debentures up to noon Friday, July 28th, 1916, for \$14,000 bearing 5 per cent. interest, payable in 30 equal annual instalments, for the purpose of buying a site and building a schoolhouse in Public S.S. No. 11, Fitzroy, and marked tenders.

WM. BOYLE,
Clerk.

Township of Fitzroy, Kinburn, Ont.

RELIABLE FIRM having cargo insurance to offer want General Agency for strong Marine Insurance Company; territory, British Columbia. Apply Box No. 499, *The Monetary Times*.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

EXPERIENCED ACCOUNTANT, with six years' experience as Auditor and eight years' experience as Accountant and Office Manager, wishes to secure similar position, or would accept any special work along above lines. Address: H. D. Hall, 131 Annette Street, City.

Mr. W. A. Peace, of the Imperial Life Assurance Company, is attending the convention of the International Association of Rotary Clubs at Cincinnati, together with Toronto Rotarians. They will also be entertained at Detroit and Cleveland.

Vancouver's total losses by fire inside the city limits during May was \$264,700, according to Fire Chief Carlisle's reports. The insurance loss was \$231,230, leaving the property loss above insurance \$33,470. The total value of property involved was \$651,225. The principal fire, also the most serious that has visited the city in a number of years, occurred at the foot of Gore Avenue on May 28th, in which the New England Fish Company's plant and the grain elevator and warehouse of the Alberta Pacific Grain Company were badly damaged. The loss at this fire alone amounted to \$262,000. The department responded to 48 alarms during the month, as follows: Chimney fires 9, fires where damage occurred, 15; tar pot, 1; outside city limits, 3; fires where no damage occurred, 10; bush fires, 4; smoke scares, 3; rubbish fires, 2; and exhibition run, 1. The following list shows the causes of fires: Chimney fires, 9; carelessness with cigarette, 1; unknown origin, 4; rubbish, 2; blow torch, 1; children with matches, 1; flying sparks, 5; outside city, 3; back fire in carburettor, 2; defective fire place, 1; bush fires, 4; gasoline leak, 1; lighting fire with coal oil, 1; smoke scare, 3; defective chimney, 1; overheated stove, 1; exhibition run, 1; tar pot, 1; hot ashes, 1; coal oil lamp exploded, 1; incendiary, 1; drying clothes, 1; fires breaking out again, 1. The insurance paid was \$231,230; property loss above insurance, \$33,470.

You Can Improve Your Position

Have you heard of the Sales and Intelligence Departments of the Canada Life?

They give special assistance to the Company's representatives.

They teach a man the insurance business by correspondence and personal assistance free of charge

Then they place him in a position and help him to make good

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this. All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policyholders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

*NOTE.—It will be noted that the figures relating to the imports of coin and bullion for the twelve months ending May, 1916, amounted to \$34,129,108, as against \$132,349,976 for the same period of 1913-14. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

CANADA'S PURCHASING POWER

Development of Natural Resources is Making Position
One of Greater Strength

That Canada is now a potential buyer of greater strength than for many years past, is a statement contained in the yearly analysis of Canadian trade made by Mr. C. Hamilton Wickes, his Majesty's trade commissioner in Canada. This results from the greatly increased returns from agriculture, mining, fisheries and industries in the year under review. It is all the more regrettable, says Mr. Wickes, therefore, that British manufacturers, who have experienced poor trade during recent years, are less able than ever, owing to their inability to make deliveries, to secure an increased share of the increased demand for goods in the Dominion.

Few British manufacturers have been able to supply the demands made upon them for the ordinary requirements of their Canadian customers, and fewer still have been in a position to take advantage of the "enemy trade" excluded from the Canadian market. Manufacturers should make their Canadian customers fully aware of their difficulties in accepting and fulfilling orders at the present time, and in this way endeavor to remove the dissatisfaction which may exist in the minds of customers who, not fully appreciating these difficulties, feel that orders might have been executed or shipped earlier.

Difficult for Salesmen.

While in the dry goods lines many Canadian buyers visit the United Kingdom markets, yet the bulk of the United Kingdom trade is handled in Canada through agents or representatives, or travellers visiting the country periodically. Some United Kingdom firms, however, have resident salaried representatives, and others have branch establishments, the practice being to incorporate the branch as a Canadian company. The system of travelling representation is adopted in practically all cases where the Canadian purchases are sufficiently heavy to justify the expense. Many firms, however, who have sent over representatives in the past have not found the results at all encouraging. This may be easily understood, for the Canadian market is in many ways very difficult for a British traveller to learn or understand during a stay of three to five months, spent mainly in going over new ground under conditions which are strange to him.

The possibilities of expansion of United Kingdom trade in the Dominion in any one year are governed to a great extent by the sum of the benefits derived from Canada's resources and industries during the year or so preceding. The value to the country of the great number of immigrants who had for some years previous to the war provided a stimulus for the increase of imports into the Dominion was dealt with by Mr. Wickes in previous reports.

Investigate Competitive Lines.

To what extent then does Canada, with an increasing population, and growing year by year a richer and larger market, present a field for the expansion of United Kingdom trade?

As has already been stated, United Kingdom trade with the Dominion is, in the main, composed of specialties, and a richer and greater Canada will necessarily require increased quantities of such goods as she has been in the habit of importing for years past; but in respect of those articles in which the United Kingdom has seriously to meet the competition of the United States and Germany, the outlook, if present conditions continue, is far from encouraging. Commercial investigation will, therefore, need to be specially directed to these competitive lines in which United Kingdom trade has hitherto been small or negligible.

His Majesty's trade commissioner also discusses the numerous matters in connection with which difficulties have, for many years, stood in the path of United Kingdom firms wishing to do business in Canada, for example, the difficulties arising in connection with customs tariff, valuation for duty, bonding and warehousing, articles and material for use in Canadian manufactures, patents, designs and copyrights, transportation, payments, agencies, general business conditions, and the establishment of branch works in the Dominion.

The growth and value of German trade, its character, and the advantages which German firms enjoyed in regard to freight rates and commercial advice, are among other topics dealt with by Mr. Wickes.

COBALT ORE SHIPMENTS

The following are the shipments of ore in pounds from Cobalt Station for the week ended July 14th: Trethewey, 767; Mining Corporation of Canada, 65,580; Dominion Reduction Company, 254,000. The total shipments since January 1st, 1916, now amount to 15,959,483 pounds, or 797,168 tons.

The following are the shipments for month ended 30th:—

Aladdin Cobalt Mine	53,551
O'Brien Mine	62,000
Penn Canadian Mine	171,511
Peterson Lake Silver Mine	158,211
La Rose Mines, Limited	261,561
Mining Corporation of Canada	107,511
Mining Corporation of Canada (Cobalt Lake Mine)	151,111
Mining Corporation of Canada (Townsite City Mines)	338,511
McKinley-Darragh	391,111
Coniagas Mines	136,111
Dominion Reduction Company	656,111
From Kerr Lake—	
Beaver Consolidated Mine	9,111
Temiskaming Mining Company	1,111
Kerr Lake Mining Company	1,111
From New Liskeard—	
Casey Cobalt Mine	1,111
From Temagami—Copper Ore	
Rand Syndicate	1,111
From Halleybury—Silver Ore	
Wettlaufer Lorraine Mine	18,340,948
From Schumacher—Gold Slag	
Vipond Mines	19,350,951
From Porquus Junction—Nickel Ore	
Alexo Nickel Mine	8,526,071

Business Men Cannot Always Buy

WHEN They Need Life Insurance Most and the Bank is Pressing for More Collateral. Physical Conditions Often Bar the Taking of More Life Insurance—Value of Life Insurance to Big Corporations and Small Ones.

THE value of life insurance to business corporations, the high place it has in the consideration of Canadian banks, and how to sell it, were the leading themes of the address of Mr. William J. Graham, superintendent, group monthly premium and home purchase departments of Equitable Life Assurance Society of the United States, an expert in the writing of business insurance.

"Business insurance as we will consider it here will be confined within the three sub-heads of co-partnership insurance, corporation insurance and credit insurance," said Mr. Graham. "Co-partnership insurance is the designation usually given to insurance that indemnifies the surviving partner or partners against the financial hazard of a partner's death. It is effected more usually by the different partners taking insurance policies directly for the benefit of the firm with firm as beneficiary or indirectly by making the beneficiary one another.

"Corporation insurance is in essence the same as co-partnership insurance for its purpose is to indemnify a corporation or a business for the loss of a life or lives whose energy, brains, credit are factors in the prosperity of the company.

"Credit insurance is the branch of business life insurance which means the protection of loans and collaterals against the untoward contingency of death, by providing in such event life insurance to wipe out the debt.

"So far as a man's estate is involved in the success of the business after his death it is plain that an insurance to indemnify the business against the loss of his life directly enhances the value of his estate. If the estate holds interest in the business anything that improves the business directly improves the estate. In many cases a policy payable to the business might prove more valuable to the estate than the same policy payable directly to the estate. This is particularly true of small businesses. It is true in degree of many credit insurances where the loans conserve the private estate and where it may prove far more valuable to have the loan liquidated by the insurance and the collateral released than to have the collateral sacrificed to pay the loan or taken over by the loaner.

"Business life insurance in its every phase is indemnity and protection against money loss that may follow decease of lives financially valuable. The test of business insurance utility in a particular situation is this query: To what extent may financial loss follow to the business and its credit without it? Consideration of this question uncovers the enormous field that exists for the exploitation of business life insurance.

"That certain communities have adopted business insurance to a much larger extent than other communities evidences that business life insurance will only be bought and sold as it is intelligently canvassed. In a recent instructive editorial on business insurance in The Bellman, William C. Edgar, its erudite editor, pointed out that Minneapolis has perhaps gone further to date with business insurance than any other city. This is no indication that Minneapolis has more need for business insurance or has in general the soundest business ideas existent in our whole country. It does indicate that Minneapolis is a progressive community containing progressive life insurance men who have perhaps devoted more attention to business insurance and its intelligent canvass than has been done by agents in other cities.

"To focus our big subject down to where we can take a hurried glance at a few individual cases we will turn over a few leaves of the business insurance book of Minneapolis. Naturally The Bellman omits reference to the fact that the life of Mr. Edgar had been insured for the protection of the companies to which his knowledge, personality and standing are big assets. He knows from practical application what business insurance means.

"The first large case in Minneapolis was the insurance on the life of Frank H. Peavey to the amount of a million dollars. This policy in a way antedated the business insurance era—so recent is it—and was not directly business insurance policy. At the unexpected death of Mr. Peavey within two years from the time this policy was taken out the million dollars paid to the estate of this man whose personal credit and prestige were not overestimated by this sum proved of great benefit to the company and its credit. The two chief officials of the Peavey Company are carrying between them a million dollars insurance on modern business plans. Scores of policies written in relatively small amounts up to \$100,000 running seven figures are outstanding in that city.

"The business insurance of one and a half million dollars recently paid upon the death of Thomas Shevlin was the natural sequence to the intelligent work that had been done in Minneapolis on the subject of business insurance. Shevlin was a young man of large parts, a man who believed in himself tremendously and imparted his self-confidence to others—a man whose ambitious plans entailed necessarily large credit. Shevlin's lifetime the huge business insurance he carried did much to support not only the credit of his company but the estimates of value which his corporation placed on him. In his untimely death the insurance money

the basis for making good all credits and indemnifying the business to the extent of the policy in dollars and cents the money loss of the life. In this Mr. Shevlin's associates, big men, were intimately concerned and Mr. Shevlin's estate further conserved by the importance of this insurance to the Shevlin Company.

"Some of the big figures in the Minneapolis banking world are directors in a local life company and have learned first hand that life insurance can protect a business or a bank against money losses following the insured to death effectively as it can protect the family. Life insurance has come into vogue because certain lives are financially valuable to others. It is, therefore, no far cry to insist upon insurance for the interested business associate just as you do for the interested family.

"There is not time to point out other cities that may dispute with Mr. Edgar the claims that he puts forth for Minneapolis in the way of business insurance outstanding and it would be unprofitable to do so because there is not a city in the United States or the Dominion of Canada to-day carrying an appreciable fraction of the business insurance that should be carried."

Mr. Graham read letters from many leading bankers of the United States and Canada emphasizing the importance they placed on their clients carrying life insurance.

Wants, But Cannot Have.

"When a man's banker says, 'Yes, we will let you have the loan but you must give us additional collateral, a life insurance policy,' that man cannot always go out and buy life insurance at that time. He must buy it ahead of time. The business man cannot always buy life insurance when he needs it most. He may be rejected by the doctor; that often happens. They can get fire insurance and accident insurance at any time, but not life insurance. When the pressure comes from the banker and the business man is under a great strain his blood pressure is high and his general vitality is low. That is the time he cannot get insurance protection.

"The business which fails because of the death of one of its executives fails because of the failure of that executive to take out business life insurance. The greatest field for that insurance is among the small businesses, where capital is scarce, is sorely needed; where the business is operated by a few, by perhaps one man, by a man and wife—the corner grocery, the drug store."

Mr. Graham noted that the Federal Reserve Bank of New York, in its individual statement form which it is using to get its member banks to use, inquires as to amount of insurance carried and as to who is beneficiary.

Plan of Policy.

In discussing the form of the business insurance policy, Mr. Graham said:

It is most important that a business insurance contract be written in a way that will make the business the owner of the policy. There are two legal points in writing of corporation insurance that are of the utmost importance. One is the fixing of the insurable interest and the other is in the right of assignment—both having to do with ownership of the policy. To absolutely insure a business is the owner of the policy it is advisable to make the corporation the direct applicant-beneficiary. It is also necessary that the relationship under which the life becomes insurable to the corporation be clearly set forth. It is necessary that the insured consent to the insurance, and that the insured act in his individual capacity and that the corporation applicant-beneficiary acts in its capacity as its rights are wholly statutory. By so

doing, all assignable rights and, in fact, the entire ownership of the policy legally vests which it is desired to vest, in the applicant-beneficiary.

"Any other plan is likely to bring a contest as to the insurable interest in the policy taken out by the man's individual act for the benefit of a corporation or raise issue as to rights under an assignment of such policy to a corporation both as to the matter of the rights themselves and as to the extent of these rights as provable under the assignment.

Limitations—Joint-Life Insurance.

"It is desirable in practically all cases to issue separate policies where more than one life is concerned. A common fallacy in co-partnership insurance has been the thought that the insurance should be on the joint life plan. A joint life insurance is merely a promise to pay one claim on the first death, which cancels the whole contract, whereas each life should be protected to the extent of the value of the company in such a way that the contract cannot be cancelled upon the payment of the first claim. A joint life insurance on two lives leaves the surviving partner without insurance on his own life and perhaps without insurability. It also means that in event of discontinuance of the partnership the necessity to surrender the whole insurance to avoid carrying insurance on a man no longer valuable to the concern. Where there are three partners or three lives involved in one policy the case becomes much worse, and four lives or more are practically prohibitory from an underwriting standpoint. Moreover, there are difficulties in the way of placing business insurance upon two lives or more upon the joint plan because the probabilities are greatly increased that the lives will not all be found uniformly acceptable by the medical department.

"On a joint insurance this means a loss of the business. On single life policies often a different form of rated or higher premium insurance or substandard insurance can be placed on the weaker life and the protection consummated that way. By carrying separate policies, in event of discontinuance of partnership or retirement from partnership for various reasons, the terminating individual may either have his particular policy surrendered for its cash value to the firm or else continue this insurance as an individual policy by paying individually the cash value back to the firm.

Plan of Policy.

"The form of insurance is usually the whole life plan, although there are many business insurances written on endowment plans. Endowment plans are most applicable where it is desired to use the same both as indemnity and as a sinking fund against the future impairment of the life or against some other contingency calculated to arise at the end of the endowment period. Term insurance is occasionally used, but in business insurance just as in individual insurance the use of the term plan usually means a weak agent. In the term plan some arbitrary number of years must be fixed for the continuance of the insurance and it is obviously difficult to prophesy in advance just what this period should be. Where there is no right to renew, to understate the period would be serious, and where there is a right to renew the insurance at attained age the increased cost of doing so may prove awkward and disappointing. The ordinary life policy fits admirably here for pure protection because it is a contract with unlimited right to renew from year to year for the same level premium for the term of life. The surrender values of this policy are such as to make the net cost of the insurance during the period for which it is carried compare favorably with the limited term plan."

WESTERN CANADA'S REFUNDING PLAN

London Advices Regarding the Scheme—Manitoba and Saskatchewan Offering This Week

Mail advices are to hand from London this week confirming the statement of *The Monetary Times* two weeks ago that the American Dollar Securities committee has notified that the imperial treasury is desirous, in connection with the arrangements for regulating the American exchange, to purchase Manitoba 4 per cent. debentures of 1949, and 4 per cent. registered stock of 1930, and Saskatchewan 4 per cent. bonds of 1949, and 4 per cent. registered stock of 1951. The price offered in each case is 80, plus accrued interest to the date of transfer to the treasury. It is worth noting that "this offer has not the effect of rendering the dividends on the securities in question liable to additional income tax."

In other words, while the treasury are anxious to obtain both issues, they are not at present prepared to go to the length of penalizing holders who are not disposed to part with their holdings upon the terms offered. With regard to the latter, Manitoba 4 per cent. debentures of 1949 stood at 91 at the end of July, 1914, and marked in the early part of June at 77xd., whilst the registered stock was a point higher on the eve of hostilities, and changed hands last week at 81 1/16. Saskatchewan 4 per cent. bonds of 1949 stood at 89 at the end of July two years ago and marked at 80xd. a few days ago, whilst the registered stock, which was 88 in July, 1914, last, marked at 78%. Seeing that the treasury prices are plus accrued interest—the latter being, of course, included in the stock exchange prices, and that the transaction is carried out free of cost to the seller—the terms offered are attractive.

Welcomed in United States.

Our London contemporary, "Canada," discussing this matter, says: "It will be of interest to note if this new departure on the part of the treasury is followed up by similar offers with regard to other Canadian provinces, and whether efforts will be made to purchase Canadian municipal bonds. We have been surprised that the American Dollar Securities committee have not earlier turned their attention to this class of investment, especially in view of the way in which American investors have been absorbing them recently. Whether by way of collateral or for purposes of direct conversion, there can be doubt that Canadian provincial and first-class municipal issues would be welcomed in the United States upon terms which in comparison with those now offered should not be to the serious disadvantage of the treasury."

Offering in New York.

The Monetary Times understands that an issue of \$1,000,000 of Manitoba bonds and \$1,000,000 Saskatchewan bonds are being made in the United States this week on a 5.38 per cent. basis. This offering is presumably in connection with the Western refunding scheme, authoritative details of which were printed in *The Monetary Times* last week on page 22.

Bond houses are interested in the rates at which our Western borrowers are likely to raise large amounts in New York to-day. The Dominion of Canada paid a 5.90 rate for its \$75,000,000 loan there. The Anglo-French bonds are selling on the exchange to yield the investor a little better than a 6 per cent. rate on his money, and the new American Foreign Securities Company's bonds, guaranteed by the French government with bonds of neutral countries as collateral, can be purchased to yield 5 3/4 per cent. What is the width of the market for such bonds as the city of Winnipeg and the provinces of Manitoba and Saskatchewan as compared with the Dominion of Canada?

The subject is discussed in the editorial columns of this issue.

A resolution was unanimously carried by the Life Underwriters' Association expressing strong disapproval of the practice of misrepresentation of policies, companies' ratios, or other agents, of twisting or switching of policies or agents, and urging on the incoming executive the desirability of getting either under the Dominion act, or in every province a clause included in the insurance act whereby such practices should be penalized, and in the meantime that all companies be asked to circularize their agents and managers deprecating the practice.

SAVE FOR THE WAR LOAN

Finance Minister Asks Canadians to Steer Clear of Foreign Offerings

The minister of finance has issued a statement calling attention to the fact that Canadians are being circularized from the United States to purchase foreign government securities issued in the United States for munitions credits. He urges investors in Canada to reserve their funds instead for the forthcoming Canadian war loan. Sir Thomas White points out that on account of our rapidly increasing war expenditure and the heavier demands which the future will make in this respect it is of supreme national importance that the financial resources of Canada should be conserved for our own purposes, and that as much as possible of the national debt should be held in Canada.

Plenty of Capital.

The minister states that there is an abundance of capital in the United States to absorb all issues made in that country, and the allied interest will not, therefore, suffer through Canadians refraining from participation and husbanding their resources to meet their own national needs. Under the war measures act the government has power to prohibit the offering of foreign securities in Canada, as has been done in Great Britain, but has preferred to rely upon the patriotism of the Canadian investing public rather than to adopt repressive measures.

Offering Which Brought Statement.

The bond offering which caused the issue of the Canadian finance ministers statement was that of \$94,500,000 three-year 5 per cent. gold notes of the American Foreign Securities Company, which was organized for the purpose of advancing \$100,000,000 to France. A syndicate composed of twenty banking houses, located in New York, Chicago, Pittsburg and Philadelphia, and headed by J. P. Morgan and Company and Brown Brothers and Company, is making the offering for subscription at 98 and interest, yielding about 5.73 per cent. The notes have been offered in Canada.

LIFE INSURANCE COMPANIES TO HELP WAR LOAN

Mr. J. F. Weston, managing director of the Imperial Life, Toronto, announced during the course of his address at the insurance agents' banquet at Hamilton last week, that the life insurance companies of Canada were preparing to subscribe a larger amount to the second war loan of September next, than they did to the first loan in November last. The amount subscribed last time by the life insurance companies was about \$13,000,000.

COBALT ORE SHIPMENTS

The following are the shipments of ore in pounds from Cobalt Station for the week ended July 21st:—

La Rose Mine, 86,946; Mining Corporation of Canada, 64,980; McKinley-Darragh-Savage Mines, 85,388; Dominion Reduction Company, 88,000; Buffalo Mines, 68,780. Total 394,094 pounds, or 197 tons.

From Temagami—Pyrites Ore—

Rand Syndicate, 159,300 pounds, or 79.6 tons.

The total shipments since January 1st, 1916, now amount to 16,353,577 pounds, or 8,176.7 tons.

JUNE BANK STATEMENT

The Canadian chartered banks' statement for June shows the following changes from the previous return. *The Monetary Times'* complete analysis of the statement will appear in the next issue. The figures are:—

	June.	Change during month.
Demand deposits	\$ 428,117,340	+ \$15,815,850
Notice deposits	767,598,130	+ 2,534,080
Total deposits in Canada	1,195,715,470	+ 18,349,930
Call loans in Canada	86,776,474	+ 1,949,831
Call loans elsewhere	182,757,015	+ 19,350,950
Current loans in Canada	747,470,545	— 15,666,371
Current loans elsewhere	60,081,564	+ 481,222
Circulation	123,373,395	+ 8,526,070

NATIONAL FINANCE COMPANY'S LIQUIDATION

Shareholders' Outlook is Not Bright—Some Sales of Properties and Securities Effected

In connection with the liquidation of the National Finance Company's affairs, the following particulars are included in a report of Mr. R. Kerr Houlgate, manager of the Yorkshire and Canadian Trust Company to April 30th, 1916:—

"The statement of affairs shows that, according to book figures, the assets amount to the sum of \$3,072,611.85, and the liabilities, including the amount due to shareholders on account of capital, viz., \$1,667,397.75, to the sum of \$2,649,278.12; making an excess of assets over liabilities of \$423,333.73 (exclusive of contingent liabilities in respect of guarantees of payment, aggregating \$159,847.67, as also in respect of guarantees under trust investments, aggregating \$373,981.85). These figures are arrived at by showing the assets at the figures they were carried at in the company's books at the date of liquidation, and not at their present value. It is practically impossible to estimate the true value of the assets at the present time, but it might be pointed out that unless conditions in the next year or two materially change, particularly as to realty values, it is very doubtful just what will be realized for the benefit of the ordinary creditors; while the shareholders' position would appear to be hopeless.

Contributories Payments.

"During the period of the above report, lists of creditors were settled before the court, as also those of the contributories. The list of contributories shows an amount as being due from them of \$342,655 in respect of their shares, and the sum of \$132,499 was called by order of the court, being \$20 on each share held, or such smaller amount as might be owing on any share. There has been received the sum of \$20,875 on account of the above ordered call. All of the contributories, with the exception of ninety-five, met in full or arranged for the payment of the call. Judgment for the amount called has been given by the court against those who failed to pay or arrange for the payment of the call against them.

"During the year four sales were effected of properties owned by the company at satisfactory figures considering the conditions of the realty market, and the moneys realized have been used to protect other assets. Since liquidation four properties have been dropped through foreclosure or mutual arrangement, and the liabilities were thereby reduced by \$408,652 in respect of mortgages and agreements payable. The properties in every case had depreciated in value to such a great extent, and as they were not producing sufficient revenue to meet accruing interest on the principal liability against them, to say nothing of taxes, water rates and general expenses, it was deemed advisable not to carry them any longer, the court concurring with the liquidator in this. A payment of approximately \$58,000 was received on account of the lands adjoining the Welton Block, and applied mainly against the balance owing to the Canadian Pacific Railway under the agreement of purchase covering the land.

Selling Municipal Bonds.

"Municipal bonds to the extent of \$74,005 were disposed of, and call loans for a similar amount were fully satisfied from the proceeds. Call loans payable at the present time only amount to \$4,878, and arrangements for their settlement are pending through the sale of the bonds still on hand.

"At the date of liquidation the liabilities (exclusive of the liability to shareholders) amounted to \$1,538,868, and at the 30th of April, 1916, they amounted to \$981,880, showing a reduction therein of \$556,988. Guaranteed liabilities in regard to trust investments at the above respective dates were \$1,121,235, and \$373,981, a reduction of \$747,253; while contingent liabilities have been reduced from \$214,750 to \$159,847.

Liquidator Reduces Expenses.

"Early last year it was quite evident that it would be a considerable period of time before any assets could be disposed of or realized on, and so the liquidator has endeavored to reduce to a minimum the general expenses in connection with the liquidation from time to time, and to secure extensions of the various liabilities in order that no equities or assets of the company would be lost. The reduc-

tion of the operating expenses is shown by the comparative statements of earnings and disbursements for the three periods ending the 30th of April, 1915, the 31st of October, 1915, and the 30th of April, 1916, in which the amounts of \$7,387, \$3,777 and \$2,564 respectively appear as charges, representing salaries, printing, stationery, postage and miscellaneous expenses. The coming period will show a further large reduction under the above charges. Other reductions have been effected, in one case a reduction of 2 per cent. per annum of interest under a mortgage payable, which means a saving to the liquidation of \$700 per annum."

CANADIAN BANK CLEARINGS

The following are the returns of the bank clearing houses for weeks ended July 13th, 1916, and July 15th, 1915, with changes:—

	Week ended July 13, '16.	Week ended July 15, '15.	Changes.

BRANTFORD LIFE UNDERWRITERS

In Brantford, Ontario, a life insurance agent was accused of deliberate misrepresentation of life insurance policies. The allegation was that he had misrepresented several policies and had sold twenty pay life contracts for twenty-year endowment policies. The Brantford Life Underwriters' Association took up the matter, obtained a number of affidavits supporting the charges and reported the case to the grievance committee of the Dominion Life Underwriters' Association, the parent body. The chairman of that committee was, to use his words, "so convinced in his own mind" that the complainant's charges were not sustained "that he did not submit the case to the other members of the grievance committee."

The members of the Brantford association at the annual convention of the Dominion association last week, raised this question and it was apparent that they felt considerable dissatisfaction, and properly so, at the way in which this case had been handled. Unfortunately there were no strong advocates of the Brantford case at the convention such as there were when the Hamilton rebate incident was raised at the Toronto convention last year. Sufficient was said, however, to have the Brantford case referred back to the grievance committee for consideration of the full committee.

The Monetary Times thinks that the Brantford Life Underwriters' Association has just cause for complaint, if only because of the action of the grievance committee's chairman, action which he must have known in this particular case especially, would have led to adverse criticism. Again, the Brantford association believed they had thoroughly proven misrepresentation. They took great care in marshalling their facts and in obtaining the necessary affidavits. The fact that an equal number of affidavits was obtained by the defence, documents which, we understand, were more of a general nature than relating to the specific case, does not change the position.

The Dominion Life Underwriters' Association should be more fully alive to the opinions of their rank and file in these matters. The members of the Association who have been lectured without end as to the ethics, morals and righteousness of the life insurance business, expect their officers to exhibit a little backbone when dealing with such matters as rebates, switching and misrepresentation. Unless the Dominion association drops its policy of pussy-footing in these matters, resignations will take the place of sarcastic criticism. The Dominion Life Underwriters' Association must practise what it preaches if it desires to live.

WESTERN CANADA'S REFUNDING PLAN

The offering in New York this week of \$1,000,000 of Manitoba's and \$1,000,000 of Saskatchewan's ten-year bonds, is apparently made in connection with the scheme for retiring certain Canadian debts in London and refunding them in New York. Part of the present issues in New York are 4½s and part are 5s. The price of the 4½s is, we understand, 93½ less ¼ of 1 per cent. This financing, therefore, is done on approximately a 5¾ per cent. basis.

Much has been heard as to the large saving to be effected by purchasing the securities in London and reselling in New York, but unless there are some factors of which the general bond market is not cognizant, it is difficult to see that the saving will be substantial, even if there is any at all. The Western borrowers are paying 80 and interest for the securities which are being mobilized in London. Taking into consideration the profit in exchange, less the shipping and insurance charges, the purchase price would be reduced to about 78½, which is approximately a 5¾ per cent. basis. Without considering the suggestion heard in some quarters that a higher price than 80 has recently had to be paid in London for the bonds, these figures indicate that the securities are being sold to the investor on exactly the same basis at which they are being bought in London, namely 5¾ per cent., only in the case of the sale in the United States, that figure makes no allowance for expenses, which we understand are in the neighborhood of 2½ per cent. The question of saving, therefore, seems to come down to the possibility of again refunding, in London, at a lower basis, say, at the end of ten years. It is difficult to understand why the new bonds should have been offered so cheaply, as the basis is substantially lower than the current New York quotations. This is emphasized by the new offering of Greater Winnipeg Water District bonds in New York on a 5¼ per cent. basis, as compared with 5¾ per cent. for the Manitoba and Saskatchewan issues.

Advices from London seem to indicate that it is unlikely that the large holders of these Western securities in the United Kingdom will sell at the price mentioned, 80 and interest, because such a sale necessitates the burden of a very heavy capital loss and it is difficult, if not impossible, to reinvest the proceeds to any better advantage. While there are available government securities yielding 6 per cent., these are short-term issues and cannot therefore be considered in this connection. The talk of many millions of Canadian securities, now in London, coming on the New York market during the next few months should be accepted with reserve, in fact present indications are that the total amount will be relatively small. Unfortunately these rumors have already disturbed conditions in the New York market so far as Canadian securities are concerned, the inference being that "bargains" will soon be on the counter,—in the opinion of The Monetary Times an unwarranted conclusion.

Life Insurance and the Business Man

Economic Value of Life Insurance to the Individual, to the Family and to the State—That Business Men, when they most need it, cannot obtain Insurance because the Medical Examiner Objects, is a Hint to get Insurance Ahead of Time—Report of the Hamilton Convention of the Dominion Life Underwriters' Association

REPRESENTING life insurance of \$1,289,000,000 in force in this country, the life underwriters of Canada met in convention at Hamilton, Ontario, last week. Several hundreds of the men who helped to place nearly half a million life insurance policies in the Dominion last year, bringing premiums to their companies of over \$45,000,000, gathered to discuss the problems of the business, its economic value to the individual, to the family, and to the state, and to discuss the improvement of conditions both for the salesman and for the insured. The significant phase of the convention, from the general public's standpoint (and *The Monetary Times'* report of the convention is written on the following pages from that viewpoint), is that it was made clear that the men who sell life insurance policies, stand out as a general rule as clean-cut, alert business men with the greatest faith in what they are selling and with a strong desire to give the public the best sort of life insurance policy and most suited to individual needs. These characteristics are becoming stronger in life insurance salesmen as a group and as the companies take greater care in training them for the business, such desirable conditions will improve still further.

One of the most striking statements at the convention, and which may surprise many active but complacent business men, was that life insurance could not always be purchased. Often does that apply when life insurance is needed most. Here is an illustration: A banker desires more collateral, a life insurance policy, from one of his clients. That client cannot always purchase life insurance at that time. He may be rejected by the medical examiner; it frequently happens. When the pressure comes from the banker and the business man is under a great strain, his blood pressure is high and his general vitality is low. That is the time he cannot get insurance protection. It is clear, therefore, that he must buy it ahead of time.

That the best patrons of the life insurance companies are the most successful business men, was a statement of Mr. Kenneth Bethune, a prominent Hamilton manufacturer, in addressing the convention. It is a hint which may be taken by prospective insurers, large and small. This manufacturer described life insurance as "the safest system of finance ever devised, founded on a scientific basis, its investments restricted by law to the best securities and always meeting every obligation in full." Happy is he, added the manufacturer, who is wise enough to purchase such an amount of life insurance as his means will afford.

One of the most interesting addresses (printed practically in full as the leading article in this issue) was that of Mr. William J. Graham, superintendent of the group monthly premium and home purchase departments of the Equitable Life Insurance Society of the United States. It dealt with business life insurance which he described as "indemnity and protection against money loss that may

follow decease of lives financially valuable." The test of business insurance utility in a particular situation is this query: To what extent may financial loss follow to the business and its credit without it? Consideration of the question gives an idea of the large field that exists for the writing of business life insurance. Mr. Graham considered his subject under the three sub-heads of co-partnership insurance, corporation insurance and credit insurance. Co-partnership insurance, he explained, is the designation usually given to insurance that indemnifies the surviving partner or partners against the financial hazard of a partner's death. It is effected more usually by the different partners taking insurance policies directly for the benefit of the firm with firm as beneficiary or indirectly by making the beneficiary one another.

Corporation insurance is in essence the same co-partnership insurance, for its purpose is to indemnify a corporation or a business for the loss of a life or lives whose energy, brains, credit are factors in the prosperity of the company.

Credit insurance is the branch of business life insurance which means the protection of loans and collaterals against the untoward contingency of death, by providing in such event life insurance to wipe out the debt.

"Some of the big figures in the Minneapolis banking world," said Mr. Graham, "are directors in a local life company and have learned first hand that life insurance can protect a business or a bank against money losses following the insured to death as effectively as it can protect the family. Life insurance has come into vogue because certain lives are financially valuable to others. It is, therefore, no far cry to insist upon insurance for the interested business associate just as you do for the interested family."

Attending the convention were also a number of officials from the head offices of life insurance companies. Mr. J. F. Weston, one of them, and the managing director of the Imperial Life, raised the important question of the taxation of life insurance premiums by our governments. These taxes are a penalty upon thrift. The legislatures do not yet realize the great value of life insurance to the state, and policyholders do not fully understand that they pay the unjust taxes placed by the governments upon thrift as practised by the purchase of life insurance.

In the following pages the principal features of the life underwriters' convention are summarized. Life insurance funds of \$400,000,000 are already invested in this country of 8,000,000 population. When every person in Canada who should be insured, carries even only a small policy, there will be \$3,000,000,000 of life insurance on the books of the companies doing business in Canada instead of about half that amount as at present. Life insurance is a business, therefore, of which we may with advantage learn more. Its benefits are best recognized by seeing to it that adequate life insurance is carried on one's life.

At the Life Underwriters' Convention, Hamilton

(Drawn for *The Monetary Times* by E. D. Gates.)

THE accompanying "one minute" sketches were made for *The Monetary Times* at the Hamilton life insurance convention by Mr. E. D. Gates, a newcomer in the ranks of the Imperial Life's insurance salesmen. Mr. Gates used the bottom of a *Monetary Times* circular on which to sketch four of his subjects. The delegates are as follow:—

(1) **H. C. Cox**, Toronto; president of the Canada Life.

(2) **J. W. W. Stewart**, managing director of the Monarch Life, Winnipeg.

(3) **George T. Wilson**, vice-president of the Equitable

Life, New York. He addressed the convention on "Efficiency."

(4) **J. F. Weston**, Toronto; managing director of the Imperial Life, of Canada, who delivered an address on the patriotism of life insurance.

(5) **Mr. Jackson**, Brantford; with the Sun Life Assurance Company there.

(6) **J. Burtt Morgan**, Victoria; Great-West Life; elected president of the Life Underwriters' Association of Canada, 1916-17.

(7) **W. Lyle Reid**, Ottawa; Sun Life; immediate past-president of the Life Underwriters' Association of Canada; member of executive board.

SELLING LIFE INSURANCE

A Man is Better Insured in Any Company Than None At All

Salesmanship was a theme of Mr. Edward A. Woods, of Pittsburgh, at the final session of the life underwriters' convention. Mr. Woods is president of the National Association of Life Underwriters in the United States, and general agent at Pittsburgh, of the Equitable Life of New York. He is reputed to have the largest life insurance agency business in the world and to give this reputation some practical backing in Hamilton, he brought with him many of his agents to that city (reported as numbering 140) in a special train from Pittsburgh. He is a short, slight man with a nervous temperament under pretty good control. Probably, he prefers writing a man for a big insurance policy than addressing large audiences, chiefly because to him the former task is much the easier.

The main part of his address dealt with the selling of life insurance and the lack of training which the life insurance salesman usually gets. "Most of you," said Mr. Woods, "were given a rate book, an hour's talk and told to go out and get business. How many agents here started in the life insurance business that way?" asked Mr. Woods. A number of hands shot up. "Do you want your sons to start in the business the same way?" he continued, a question which brought a volley of "Noes." Mr. Woods gave a number of valuable hints on salesmanship, which were somewhat spoiled by a lengthy period of poetical and philosophical oratory, which followed, punctuated with statistics in the millions and set in an atmosphere of go in the shade. Mr. Woods has a curious intonation, too, the last word of sentence after sentence being sustained and a change coming only just in time to save actual monotony of voice.

Growth of Life Insurance.

Illustrating the growth of life insurance, Mr. Woods said that when he went into the business, there were 600,000 life insurance policies in force. Now there are 42,000,000. The convalescent period after war had always taken a long time. Life insurance men would play a very important part in the reconstruction of the economic position after the conclusion of the present great war. He predicted that unfair competition in life insurance would be eliminated within a comparatively short time. Companies and agents would be working first for the general good of the life insurance business. The agent would recognize the fact that it was far better that a man be insured in any company than in none at all.

He gave some practical hints as to how to sell life insurance. He advised against the sudden production of the policy for the prospect's signature. "Men are like horses," said Mr. Woods. "They often shy at a piece of paper. Put the wife's name and the amount of insurance in large letters. Show the husband the paper. Let him associate the ideas."

"In any ideal transaction, both parties are in a good humour. Never try to do business by arguing. The tone of voice has a great deal to do with a sale. The tone should be conciliatory, not argumentative."

Mr. Woods contrasted the salesmanship of a few years ago with that of to-day. The old style was illustrated by a horse sale. It was a case of getting the horse sold, obtaining the cheque and getting away before the purchaser had time to find out what was wrong with the horse! Salesmanship to-day was the parting of something of value to the man who wanted it, to the satisfaction of both parties.

Selection of Salesmen.

The selection of life insurance salesmen in the past had been poor. Every two years an entirely new set of men represented the life insurance business of the United States. If companies found it necessary to select their risks, surely it was equally as necessary to select their salesmen.

"Sixty thousand persons annually pass out of the life insurance business in the United States, as failures. This is excessive, particularly for a grade of work that is so high as that of the life insurance salesman should be. Many of the figures showing the excessive turnover in other industries is because of the fluctuation of cheap or transient labor, adding materially to the high percentage of turnover. This should not be true of life insurance, where the proper selection and training of an agent are or should be of a high order and where, consequently, there should not be the tran-

sient employment to account for the excessive turnover figures in most occupations.

"The cost to the companies of training these failures is estimated at \$6,000,000."

NEW OFFICERS OF LIFE UNDERWRITERS' ASSOCIATION

Mr. J. Burt Morgan, Great-West, Victoria, was elected president of the Dominion Life Underwriters' Association last week. Mr. W. Lyle Reid, Sun Life, Ottawa, is hon-president. The following vice-presidents were elected: Maritime province, J. T. Wilson, Canada Life, Halifax; Ontario and Quebec, E. Morwick, Mutual Life, Hamilton; Manitoba and Saskatchewan, D. J. Johnston, Aetna Life, Winnipeg; Alberta and British Columbia, P. A. Wintemate, Manufacturers' Life, Calgary; and the president of the National Life Underwriters' Association of the United States. The

MR. J. BURTT MORGAN

Elected President of the Canadian Life Underwriters' Association, 1916-17; Manager at Victoria of the Great-West Life Assurance Company, of Winnipeg.

other officers elected were Geo. H. Hunt, Imperial Life, Toronto, secretary; F. T. Stanford, Canada Life, Toronto, treasurer. The executive committee is as follows:—

J. E. Parks, Belleville	A. E. Dawson, Peterboro
J. A. Wilson, Brandon	R. E. Williams, Prince Albert
F. J. Reid, Brantford	A. Lesage, Quebec
H. B. White, Brockville	J. T. Lachance, Quebec

PERSONAL NOTES

Mr. A. S. Wickware, Imperial Life, Ottawa, is chairman of the legislation committee.

Mr. William McBride, familiarly known as Uncle Billy, is chairman of the transportation committee.

Mr. H. C. Cox, president of the Canada Life, received an ovation upon his appearance at the second day's sessions.

Mr. Sydney C. Tweed, assistant superintendent of agencies, Mutual Life of Canada, gave an excellent paper on the training of new life insurance agents.

Mr. Fred. Halstead, superintendent of agencies, Dominion Life, presided at a meeting of 40 agents of that company, at Hamilton last week. The concluding sessions of their conference were held at the company's head office, Waterloo, Ont.

Mr. E. E. Reid, assistant actuary of the London Life, was one of two actuaries who gave interesting addresses at the convention, Mr. M. P. Langstaff of the Dominion Life, Waterloo, being the other.

Messrs. F. T. Stanford, Canada Life, Toronto; George H. Allen, North American Life, Toronto; and W. A. Peace, Imperial Life, Toronto, were appointed board of directors in connection with the publication of *The Life Underwriters' News*.

Mr. J. B. McKechnie, general manager and actuary of the Manufacturers' Life, was one of the prominent head office officials at the convention. Mr. Harvey, of the actuarial department of the North American Life, was also at the convention.

Mr. J. A. Tory, Sun Life, Toronto, together with Messrs. F. T. Stanford, Canada Life, Toronto; J. B. Hall, Dominion Life, Toronto; George Junkin, Manufacturers' Life, Toronto; and George Hunt, Imperial Life, Toronto, were appointed finance committee of the association.

Mr. F. T. Stanford, Canada Life, Toronto, is chairman of the publicity committee. The other members are Messrs. John A. Tory, Sun Life, Toronto; A. J. Meiklejohn, Confederation Life, Ottawa; C. A. Emerson, Manufacturers' Life, Toronto; D. J. Johnston, Aetna Life, Winnipeg; and A. Homer Vipond, New York Life, Montreal.

Mr. J. W. W. Stewart, managing director of the Monarch Life Insurance Company, Winnipeg, attended all the sessions of the insurance convention and acted also as a judge of the competition as to novel ways of selling life insurance. Mr. Stewart spoke optimistically of Western conditions, in discussing them with *The Monetary Times*.

Mr. Wood, of the Wood Milling Company, Hamilton, was one of the generous local business men who placed his car at the disposal of the delegates, in order that they might see Hamilton. He and Mr. W. McKay, a Hamilton representative of the Mutual Life of Canada, piloted several newspapermen around the city. Gasoline ran short but good stories did not.

Mr. Alex. Bissett, Canadian manager of the London & Lancashire Life Assurance Company, Montreal, presided at a gathering of the company's branch managers at Hamilton last week. Mr. Tom Mills, of Kingston, was the veteran at the gathering. Mr. Morris, the Toronto district manager, was among the company's managers participating in an interesting conference.

Mr. W. Lyle Reid, Sun Life, Ottawa, was appointed a member of the executive board of the association, which will meet every two months, the other members of the board being: the officers of the association, together with Messrs. George Williams, North American Life, Montreal; George Goodrow, Dominion Life, Hamilton; and George H. Allen, North American Life, Toronto.

Mr. W. J. Graham, manager of the group insurance department of the Equitable Life, New York, and Mr. Warren M. Horner, of Minneapolis, responded to the toast of "Our American Co-workers," at the insurance banquet. Mr. Graham conveyed fraternal greetings from the neighboring republic, while Mr. Horner urged a measure of reform in the employment of "part-time" insurance agents.

Hon. James V. Barry, assistant secretary of the Metropolitan Life of New York, and formerly insurance commissioner of Michigan State, addressed the underwriters at the banquet on Thursday, in a speech of oratory and anecdote. An interesting reference to policy loans was his opinion that policyholders should not be encouraged to borrow on their policies and loans should be only the last resource.

Mr. J. L. Purdy, Canada Life, Toronto, was the winner of the essay competition, the subject being "Present-day problems of the life insurance field man." Mr. D. L. Kennedy, Sun Life, Toronto, was second, and Mr. A. E. Dawson, Imperial Life, Peterborough, was third. The association cup and ten dollars in gold for the best essay was presented by Mr. W. Lyle Reid, Sun Life, Ottawa, Mr. Reid donating the cash prizes.

Mr. J. A. Johnson, Great-West Life, Vancouver, in his usual humorous style, made a caustic reference to the insurance column of a paper published in Toronto. "The man who runs that column," said Mr. Johnson, "has a fad for non-participating insurance. We should send him a delegation from this convention to teach him a few things, because if ever there was an ass in this world who pretended to teach people insurance, this particular one deserves the leather medal."

Mr. M. P. Langstaff's paper on facts, fallacies and figures of life insurance, printed at some length on other pages of this issue, was voted one of the treats of the convention. Mr. Langstaff is one of the actuaries of the Dominion Life. He is thoroughly at home in the subject of life insurance, and has the knack of happily expressing his ideas in type. Mr. Langstaff distributed at the convention an interesting pamphlet, being a reprint of an article from *The Monetary Times Annual*, 1916.

Mr. Warren M. Horner, of Minneapolis, gave an instructive address on institutional advertising, the immediate result of which was the passing of a resolution that the executive confer with the Life Officers' Association to plan and put into force an educative advertising campaign. In answer to the objection that some of the insurance companies might not agree to the scheme, Mr. Horner replied:—"There was never any good done in this world without a few paying the price and doing the work." The proposal had the hearty support of the convention.

Mr. C. C. Ferguson, general manager and actuary of the Great-West Life, Winnipeg, thanked the association on behalf of his company for the honour conferred, by the election of Mr. Morgan as president of the association. The Great-West Life, he said, would do all it could as a company to make Mr. Morgan's tenure of office successful. Discussing Western conditions with *The Monetary Times*, Mr. Ferguson stated that the outlook was good. Mr. Ferguson attended also the sessions of the Great-West Life's \$100,000 club, the members of which to the number of about 40, held their gatherings at Hamilton.

Mr. George H. Allen, North American Life, Toronto, a past president of the Dominion Association, who has always taken an active part in association work, suggested that something should be done by the organization to help win the war. He proposed a generous monetary contribution by the members. Each member had been doing his bit, just as had the life insurance business generally, but he thought it would be a happy celebration of the tenth convention. He suggested a committee composed of Messrs. T. J. Parkes, A. J. Meiklejohn, E. R. Machum and A. Homer Vipond be appointed to consider the matter.

Mr. J. Castle Graham, the general secretary of the Dominion Life Underwriters' Association, an active and capable young officer, presented a report indicating the extent of the work of the past year. The advertising of the Life Underwriters' News had increased 300 per cent., he said, and a card system of 8,000 cards giving a complete list of the agency force of Canada, had been installed. A bulletin service had been inaugurated in order to keep the members posted as to what is going on from time to time within the association. A clipping bureau is also being established as nearly forty insurance papers, all insurance company publications, and *The Monetary Times*, are received regularly. Mr. Graham was appointed general secretary of the association, and managing editor of *The Life Underwriters' News*.

LIFE INSURANCE AND THE STATE

Economic Relations of the Two—How Saving is Encouraged

The economic value of life insurance to the State was the subject of an interesting analysis by Mr. J. B. Hall, Toronto manager of the Dominion Life Assurance Company, Waterloo. After giving some figures as to the volume of life insurance carried in Canada, Mr. Hall stated that the essential constituent elements which enter into a state are: (1) people, (2) land, (3) government. Of what economic value is life insurance to the people composing the state? In what way does life insurance improve and enhance the value of the land upon which these people live? How does life insurance become of value to the government or the organized machinery of the state? asked Mr. Hall.

"The present-day tendency among the insurance companies, as evidenced by the action taken by one of the largest of American companies, and as indicated by the active interest taken by the leading officials of our large life companies in all that tends to promote longevity shows how earnestly they are endeavoring to fulfil their mission in this particular direction," said Mr. Hall. "The physical examinations which are required in all cases of life insurance have a very marked effect upon the public; for until the true meaning of life insurance is brought home to an applicant he seldom comes to an understanding of what the actual value of his life is, and how much this value is increased if the length of his life can be prolonged. Weaknesses and ailments not before known are often discovered, and remedies are applied which lengthen life, and thus add to the aggregate value of the state.

Habit of Saving.

"Through life insurance the families of the workers are protected so that should the bread-winner die the children are enabled to continue their education and become valuable producing assets to the community instead of being left a burden to the state. The freedom from worry which a life policy brings induces better health, greater efficiency, and leads at the end to an independent old age, all of which are of economic value to the state. The habit of systematic saving introduced by the taking of his first life insurance policy promotes thrift and thought for the future in the youth entering upon his life-work, and, as this gospel of life insurance is preached from day to day by the missionaries in this great cause, the gospel of thrift and conservation finds its way to the hearts and minds of the people.

"By thus improving the status of the individual as an economic unit in the community, and by protecting those who are unable to care for themselves, life insurance is able to lessen certain burdens which would otherwise fall upon the state. There can be no doubt that life insurance curtails the expense to the public treasury of poorhouses and police, of criminal courts and prisons, and of the various other necessary branches of the public service which have to do with the prevention and punishment of crime and the relief of the suffering and unfortunate.

"Some years ago a census was taken of the paupers in the Philadelphia almshouse, with the result that of the number observed—1,110—only three were found who had been beneficiaries of life insurance. In a census of the Montgomery county (Pa.) almshouse 133 were examined, and it was found that none of these people or their families ever had been beneficiaries of life insurance.

Upbuilding of Industries.

"Coming to the second heading—the land—I take this to include all the material assets of the state, such as land, forests, mines, buildings, railways and other means of transport and communication, power facilities and their developments, and commercial undertakings of all kinds. Anything which tends to facilitate the cultivation of land and increase its productivity, anything which helps to improve transportation facilities or assists in the manufacture or distribution of the raw products of the country, anything which makes commercial development possible is undoubtedly of vital interest to the people of the country and of untold economic value to the state. When one tries to measure the extent to which life insurance figures in the upbuilding of the national industries he becomes lost in a maze of statistics, how many farmers in this Dominion are enabled to develop their farms by using moneys borrowed from life insurance

companies? How many homes have been built with the aid of life insurance funds? How many miles of railway, how many miles of electric roads have been laid, how many miles of telephone or telegraph wires have been strung, how many boats built, how many factories and warehouses constructed, all with the aid of moneys supplied by life insurance companies? The extent to which life insurance companies have contributed to the upbuilding of this country runs into many millions. Loans are made—their purpose is accomplished, the loans are repaid, the money is loaned again, and again repaid, and so on for years and decades. Can anyone measure the value of life insurance to the state when this phase alone is under consideration? And where does all the money come from? From the people, from the policyholders, collected in small amounts and large amounts, from rich and poor, from the Atlantic to the Pacific. All this involves effort and organization, and yet if some such agency were not at work gathering together the wealth of the nation in this way, so that this wealth might be used for the upbuilding of the industries of the country, how far would we progress? The life insurance companies in this country and in the world constitute, perhaps, the greatest force in existence for the collection and distribution of wealth, a force which first educates the individual to save, collects his savings, and uses these savings for the welfare of the state, and at the last stands ready at the side of the individual himself to care for him and his loved ones in the time of stress and trouble."

Investments in Government Securities.

Mr. Hall then referred to the investments of life companies in governments' securities of various kinds, federal, provincial and municipal, pointing out how the companies helped the governments in that way. He recalled that at the end of 1914 the government report showed a distribution of life insurance investments as follows: First mortgages on real estate, \$122,358,800; bonds and debentures, \$143,486,064; stocks, \$17,445,626; loans and collaterals, \$2,271,222; and real estate, \$13,763,970; total, \$299,325,682.

LIFE INSURANCE STUDIES IN THE UNIVERSITY

In presenting the report of the education committee, Mr. A. J. Meiklejohn, its chairman, told of the life insurance work being done in Canadian educative institutions. A course of insurance was carried on in Toronto University under Professor Mackenzie, but purely of a technical nature preparatory to actuarial work and is of no direct interest to the field men, although students in this course are much in demand in head offices of the United States insurance companies. The insurance institutes of Montreal and Toronto have a course of insurance covering life, fire and accident branches. No degrees are granted by these institutes, although their certificates are accepted and endorsed by the insurance institutes of Great Britain and Ireland, a body incorporated by act of parliament with right to grant degrees. The educational work with the institute is entirely for the better training for men for various office duties. It does not attempt to cover the work from the standpoint of the field men.

The representatives of Queen's University, Kingston, have expressed themselves as being quite prepared to go on with extension work in connection with life insurance similar to that undertaken for the Canadian Bankers' Association, provided they are guaranteed that all expenditure would be met. They are anxious to co-operate in every way possible. Their idea seems to be that in the course of time when funds were available and the demand sufficiently evident, they will appoint a professor of insurance, who will undertake to give lectures at the University, supervise the extension work for the field men and during the summer visit and hold conference at different local centres. They are quite prepared also to do something on the actuarial side if there be a need for this.

Mr. J. A. Wilson, Canada Life, Brandon, is president of the Brandon Life Underwriters' Association, which won the cup presented by Mr. John R. Reid, Sun Life, of Ottawa, for the greatest percentage increase in membership during the past year.

BEST SELLING LIFE INSURANCE POLICIES

Business Insurance Affords Salesman Good Opportunity— Monthly Income is Popular Policy

That the present period presents excellent opportunities for writing life insurance was the keynote of a splendid paper by Mr. Ernest W. Owen, Detroit district manager of the Sun Life. Particularly he mentioned the possibilities for the insurance salesmen for the development in this new day of—(1) Corporation and business insurance; (2) The income policy; (3) Insurance for special contingencies; (4) Insurance education for the masses; (5) Insurance advertising; and (6) Insurance for charitable bequests.

Value of Business Insurance.

Illustrating the value of business insurance, Mr. Owen stated that a little more than a year ago a motor car company was organized in Detroit. One of his agents placed \$250,000 on the life of the president. Most of the money secured by that company was by notes given to the bank and endorsed by the president, and the company realized that properly to safeguard their interests it was highly important that they should be protected by adequate life insurance on this man's life.

Another illustration was in regard to the death of the president of a manufacturing concern. The company had placed \$50,000 on his life. It transpired that Mr. A. had organized the company more than ten years ago, and by his genius and ability had built the business up to a point where not only the stockholders, who were receiving regular dividends, but also the citizens of the town, were proud of it and of him. He was more familiar with the operating details than anyone else. He kept in close touch with the market, enabling him to save in the purchasing and maintain prices in the selling. He treated the employees with such consideration and respect that labor troubles were unknown.

Banks and Life Insurance.

His loss was irreparable. No one connected with the company was qualified to take his place. Hasty action was not to be thought of. A mistake might ruin the concern. Above all, their credit must be maintained. Banks and trust companies carrying their paper were, most certainly, greatly interested. The hard-headed business men on the board were keenly alive to the situation. A complete inventory of the company's possessions was ordered. The books were audited and a trial balance made.

With a statement, full and detailed, and a draft for \$50,000 received from the life insurance company, a committee waited upon the directors of the bank where most of their business was done. When the meeting was over they advised that, not only had their old credit been maintained, but, in addition, an extended credit had been cheerfully granted.

Monthly Income Policy.

Dealing with the monthly income policy, a comparatively new thing in Canada, Mr. Owen thought that there was necessary an educative campaign showing the great advantage of this form of policy contract—first, to the insurer, and second, to the salesman who sells it.

"To the man who buys this form of contract," he continued, "there comes the satisfaction that his wishes are going to be carried out when he has gone—that the funds which he has left behind for the protection of his wife and little ones are going to be conserved, and that his beneficiary is not going to become the prey of some get-rich-quick schemer who has a gold brick proposition to present."

"The life insurance salesmen who are the greatest producers sell principally monthly income contracts, and one can sell income insurance where one has failed to sell the common forms of policy contract."

To Perpetuate Income.

"To illustrate, a friend of mine in Detroit (a life insurance salesman), was driving along a certain street with a friend and as they were passing a large factory, the friend said to the insurance salesman, 'The president of that company has the reputation of being insurance-proof. No salesman has yet succeeded in getting his name on the "dotted line." Do you want to try him?' He replied quickly, 'I do.' He succeeded in getting in to the president and without further delay, put this one question, 'Are you interested in a proposition

that will perpetuate your income?' The man thought for a minute and then replied, 'I am.' And immediately an appointment was made for my friend to submit his proposition in detail, with the result that he wrote the insurance-proof man for a good-sized monthly income contract. This is not an isolated case. You will find that when you try to sell incomes your production will be increased; your lapses will be reduced for the lapse ratio among men who buy income insurance policies is much less than among those who buy insurance in lump sums."

INSURING PUBLIC IS CONFUSED

Are There Too Many Policy Plans in the Life Insurance Agent's Manual?

Taking the affirmative in a discussion as to whether or not the rate book contains too many plans, Mr. G. J. Alexander, district manager at Richmond, Que., of the Manufacturers' Life, stated that had the life insurance companies adopted a simpler manual on life, endowment and term plans, cutting out the special plans, the companies would have retained more business on their books and misrepresentation and twisting among agents would have been less.

"What is the present day rate book to a new agent?" asked Mr. Alexander. "It is a jumbled mass of figures and remains so for some time, until he has mastered it." In the meantime, the way is opened to unconscious misrepresentation on his part as he goes forth to meet the public. Then again, if these figures are a maze to the new agent, who has tried to study his manual, what are they to the insurance prospect who perhaps only sees the covers of the book?

Special Insurance Plan.

"The new agent canvasses a prospect on some special plan, which he may not fully understand, explains it in a manner which may be wrongly understood by the prospect, and the result is trouble. Special plans are rarely fully understood by the insured and through misunderstanding he becomes disappointed, dissatisfied and allows his policy to lapse. In my 20 years' experience in the business canvassing, I have seen scores of cases of misunderstood policies of various companies, and the agents who sold them acted in good faith, as far as they knew. The general agent, or district manager, says, perhaps: 'I always instruct my new agents to confine themselves to two or three life and endowment plans at the start.' But the temptation is there to sell specials and they try it. Then, again think of what a simplified or reduced manual would mean to you in building up your staff. The ease with which a new man could grasp and learn the manual would mean greater permanency of the agency staff of the various companies."

Why Not a Few Plans Only?

"The well-thumbed pages of the manuals are those on the rates, ordinary life, limited payment life and endowment. I feel safe in saying that 80 per cent., and possibly more, of all insurance written, are upon these plans. Then, why not confine the business strictly to these, with the addition of term plans? We all know that these are the old, well-tried and fundamental plans and any special contract is simply a combination or combinations of these plans."

"The modern insurance policy on any of the previously mentioned plans (whole life, limited life or endowment) embodies many of the dividend and instalment features which are sometimes dressed up under catchy names and sold as special contracts."

"The present day manual, from the agents' standpoint, is to the new agent confusing and discouraging, many otherwise good men weary in learning it, give up and are lost to the business. It creates a tendency in many agents to spend too much time figuring and working on special plans, which time, if spent in trying to sell standard plans, would produce more and better results."

Plans of Simpler Manual.

"From the prospect or assured's standpoint, we have the great advantage which would be gained in educating the public to the plans of a simpler manual. If we are to confer the greatest good to the greatest number, let us get this manual business to a simple basis, so that even the schoolboy, when he listens to an address by any of our able

agents or managers, or reads a text book on insurance, can understand what life insurance means and the benefits of the simple, well-tryed plans and will be ready to buy insurance when he becomes a man. The prospect buys when he thinks he understands the contract, but should he discover he did not really grasp the meaning of the attractively titled proposition, he very often blames the agent, throws up the insurance, the business lapses from the company's books, and that is bad business."

Mr. E. Morwick, general agent at Hamilton of the Mutual Life, differed altogether from Mr. Alexander. "It is idle to suppose that any plan is thoughtlessly placed in our rate books," he said. "Rather should we conclude that each plan has received careful consideration by our actuaries and are placed in our rate books because of its adaptability to certain conditions or public need."

Fit Insurance to Prospect.

"I would not consider it advisable to suggest that our actuaries have been too prolific, or that they should discontinue the search for still more seductive or attractive plans. There is little doubt that the multiplicity of plans and their suitability to individual needs and circumstances, has contributed very largely to the universality of life insurance."

"Mother Nature never duplicates men, each man being a distinct individuality, with widely different viewpoints and ideas regarding life insurance. This being so, the wisdom—yes, the necessity of different plans is quite apparent, which are but an attempt to provide some attractive plan to each individual. It is no part of this discussion to determine which is the better plan of insurance, if that was even possible. Each plan has its distinctive feature, and the persistency of business written depends very largely on the intelligent selection of a plan suitable to each client. The number of plans need not confuse our prospects because a wise underwriter will not display or attempt to explain all plans to any possible client. Any life underwriter, failing thoroughly to understand or analyse all plans—need not feel discouraged for their names are legion who do not—and yet are most successful underwriters. At the same time a determined attempt to understand all plans, will be well repaid by increased confidence born of knowledge, and is mighty good mental calisthenics."

Actuarial Camaliels.

"Let us occasionally 'sit at the feet' of our actuarial Camaliels and learn of them. Strive to know absolutely everything about your own company and their plans, then know, if possible, more about the other companies and plans than their representatives do, use your knowledge tactfully and honestly, and the number of plans will be a source of strength rather than a handicap in the securing of business."

Mr. T. J. Parkes, Sun Life, Sherbrooke, supported the views of Mr. Morwick. He thought there were not too many plans in the book. He had once "rattled" his own actuary by fixing a special line of cover for a man and this was done from the manual. When submitted to the actuary he had said such a policy was impossible, but it was shown the plan was evolved from the rate book. Mr. Parkes' reference to "rattling" the actuary and to the little suburban man who could not be expected to understand the manual, brought a jocular remark from Mr. G. I. Alexander, Richmond, who dubbed Mr. Parkes as "one of the assistant actuaries of the Sun Life."

Mr. George E. Archibald, Sydney, read a paper at the convention on the economic value of life insurance to the individual.

Mr. George H. Hunt, Imperial Life, Toronto, secretary of the association, presented a very business-like report. He noted that a letter from Mr. J. Lawrence Priddy, president of the New York Life Underwriters' Association, suggesting a plan to cure the rebate evil, was brought up by President Reid. Considerable discussion followed as to ways and means of overcoming this evil, and it was finally moved by Mr. Parkinson and seconded by Mr. Hendry, that the association send a memorial to all companies to the effect that Clauses 87 and 88 of the Dominion Act, affecting provinces where business is being transacted, be put on all application forms and that the legislative committee draft this and confer with the Life Officers' Association.

CUT RATE INSURANCE IS NOT CHEAP

It is Not in the Best Interests of the Public—Some Remedies Suggested

The discussion as to cut rates for life insurance policies brought forth the general opinion that so-called cheap insurance is not in the best interests of the public and chiefly because insurance is based on cold, scientific calculations.

Mr. E. R. Machum, Manufacturers Life, St. John, in opening the discussion, recalled that six or seven years ago certain United States companies began to issue a special whole life policy at a very low rate—only about 1 per cent. above the net premium. This reduction in loading necessitated a corresponding decrease in the commissions to agents on this special plan. As these United States companies do business in Canada, the Canadian companies were placed in a somewhat unpleasant position when in competition with these "cut rates," with the result that several of them adopted competition rates.

"Numerous objections to these 'cut rates' have been urged," said Mr. Machum. "This cut-rate policy was only offered to the wealthier class—those who could carry \$5,000 or upwards. Hence there was discrimination and in favor of the class that needed it least. If any discrimination is justifiable it ought to be in favor of the poorer and not the wealthier class. One of the fine things about insurance is that there have been no wholesale rates, but that the man who can only buy \$1,000 pays the same price, pro rata, as the man who can purchase \$100,000. Distinctions, based on wealth, have always wrought injustice and it will be an evil day for insurance when such distinctions are permitted. It is true that in Canada the law required that this policy be issued in \$1,000 policies, but my understanding is that if issued for less than \$5,000 the agent, in most companies, received no commission and, therefore, it was not offered to the small insurer."

Will not Provide Expenses.

"Again, it follows as a matter of course, that if any part of a business is transacted at a rate which will not provide for the expenses, the loss on that particular part of the business must be made good by the remainder. It must be manifest that no company could successfully carry on its work if the loading for expenses on all plans was reduced to the percentage of loading used on these special cut-rate plans, and consequently, the policyholders insured under other plans must contribute to the expenses which should be equitably borne by those holding cut rate policies."

"Where agents are selling under commission contracts, the loss principally falls upon them, but in all companies, a large proportion of the agents are on salary and expenses. In those cases it is almost impossible to apportion the salary and expenses in such a manner that an equitable percentage shall be applied to one plan or another."

"The commissions paid on these special plans vary from 10 per cent. to 20 per cent. An agent writing \$100,000 at age 30 with a 20 per cent. commission would receive about \$350; half a million would be required to give an income of \$875 and the million dollar man would have for salary and expenses the princely sum of \$1,750 and we have not many million or half-million producers."

Remedies Suggested.

Mr. Machum suggested the following remedies: (1) Induce the offending companies to voluntarily withdraw the offending plans. This ought not to be a difficult matter at this time. An act passed by the New York legislature on February 28th, 1916, and which became operative on June 30th, has already cured the evil so far as the United States companies operating in Canada are concerned. As already mentioned the competition of the United States companies was the primal cause of the adoption of cut rates by the Canadian companies. That the Canadian companies have not been favorable to these plans is amply shown by the fact that not a single one of them has published openly and above board in their manuals, the premiums for the cut-rate policy, but have sent them out on separate slips marked Confidential, with the evident desire that this plan should be kept from public knowledge as much as possible; in effect saying: "Sell the poor fellow who is not in the know the adequately loaded policy, but for your wise friend we have a special delicacy to offer, but for goodness sake keep it

quiet. We cannot afford to give cake to everybody." Surely, the companies will be glad to get away from such a humiliating position, but if not, if any company still thinks it can secure an advantage by continuing these rates, then we will have to pursue another course, as an alternative remedy.

(2) Legislative measures. Take the necessary steps to obtain an amendment to the insurance act whereby it is provided that no plan of insurance can be issued in Canada under which the loading is appreciably lower than on other plans in the same section non-participating or participating. The determination of the limitation herewith referred to is one that would not be difficult to ascertain (practically).

"I do not believe," said Mr. Machum, in conclusion, "in seeking legislation until it is necessary to do so, but if the forms of insurance which we have been considering are not voluntarily withdrawn by the companies issuing them, then I hold it is the duty of the Life Underwriters' Association to take the steps necessary to promote legislation along the lines which are being followed by the National Association of Underwriters of the United States."

"Nice Way of Rebating."

Mr. F. J. Reid, North-American Life, Brantford, thought that the cheap policy which had been introduced by some companies, "is a nice way of rebating and always was."

Mr. G. E. Williams, North American Life, Montreal, suggested that the executive committee of the association should see the heads of the companies issuing cut rates, asking them to discontinue the practice. If that did not effect the remedy, he suggested that legislation should be secured to stop the evil.

Mr. T. J. Parkes, Sun Life, Sherbrooke, took a similar view. "Anything which puts out of business men who are trying to insure the public by clean methods, is not in the interests of the public," he said. "A policy which does not support itself, should be prohibited by law."

Mr. Morwick, Mutual Life, Hamilton, thought the evil was curing itself. He had never failed to write the business in competition with cheap rates. Mr. E. R. Machum, Manufacturers Life, St. John, was opposed to any legislation until absolutely necessary.

The matter was left to the executive committee to deal with.

WHY A MAN MUST INSURE

Economic Value of Life Insurance to the Family— Two Examples

The economic value of life insurance to the family was a topic ably treated by Mr. C. D. Devlin, district manager at North Bay of the Confederation Life. "The business of life insurance, being founded on well ascertained natural laws, and on principles of finance which, in their broad aspect are of the simplest description, there exists no necessity for discussion as to the safety of life insurance for the family. The economic significance of life insurance lies in its distinct recognition of the principle of association for the distribution of losses.

"The man who has insured his life pays a comparatively small sum over a term of years at a time when he can do so without encroaching on the comforts of his family, thereby assuring to the family in the event of his death, a payment of money at a time when the loss of the earning power of the head might otherwise mean want and destitution, thus averting damage of a serious kind, affecting the comfort, conveniences, or even the necessities in the standard of life of his family.

"If a wife holds insurance on her husband's life, the consequence is that, although what her husband gives her during his life is somewhat diminished, her income will not suddenly cease at his death. The tendency of insurance is therefore to make regularity out of irregularity, relative certainty out of relative uncertainty.

Life Insurance and Family.

"Each family requires for its subsistence, a certain sum of money, which varies, both as to its amount and the length of time during which it will be needed, according to the circumstances which surround each individual case. This income is, in some cases, derived from the invested funds inherited or accumulated, but, in general, it represents the earn-

ings of that one upon whom rests the responsibility of supporting the various individuals who have the right to look to him for maintenance. The relations between life insurance and the family spring from this state of affairs, and depend upon the value which one human life has to another.

Law of Mortality.

"But what of life itself? Has it a value beyond what it provides in a day, a month, or in a year, which can be measured with any degree of accuracy? Supposing its possessor to be of good constitution and free from hereditary taint, it is well known that he, or others of his class, will be governed as to the length of their lives, by a law of mortality so certain that their average lifetime may be measured with as much precision as that which governs any series of future events. For example; a man is 30 years old, in good health, married, and has a small family, and his surplus earnings are \$1,500 a year, and money is worth 4 per cent. per annum.

"By a standard mortality table, the present value of the future surplus earnings of this life is \$25,560. It is true that this is based on averages, and the assumption that he will, through his life, receive and spend just the amounts as here estimated, yet this value will not probably be realized. It is well nigh certain that his death will occur either before or after the date expected. Disease or accident may rob him permanently of his productive power. Circumstances which no skill, guided by research, can calculate, and no judgment foretell, may change the current of his life, and enhance or diminish the value of his efforts. And yet this value rests upon a foundation composed of elements no more uncertain than those which determine the worth.

An Economic Loss.

A hardware merchant in a prosperous community was apparently making a financial success of his business, and no doubt was well able to provide life insurance for the protection of his wife and two children but, unfortunately for them, he preferred to postpone the time of providing the protection, and the best answer he would give was a promise that he would apply for a policy of insurance in two months' time. Before the two months had passed by, that young hardware merchant was suddenly taken ill, and in a very few days death occurred. His two children are now living with their grandmother, his wife, formerly used to the comforts of a home with family surroundings, is now a waitress in a hotel. All of which is an economic loss, especially so as the children will not have the advantages of the education they should receive or would have received, if their father had lived and was able to provide as he had at one time anticipated.

Insurance Gave The Start.

"Here is the experience of a machinist with a wife and family, who, under ordinary circumstances, lived well, and saved a small amount each year, part of the savings being used to pay the premium on a one thousand dollar, twenty-year endowment policy. The husband, however, was taken ill, the usual pay cheques were no longer available, and it was necessary to draw on the savings in the bank, with the result that the account was soon depleted. The husband and wife as a last resort took advantage of the loan value on the policy, borrowed from the company, and opened up a very small store which was attended to by the wife, until her husband was able to assist her. The business prospered, further insurance on the life of the husband was in later years added, and when the endowment policy matured, the proceeds were applied to help pay off the mortgage on a business block purchased a short time before. The husband is now dead, the widow carries on the business as usual, has \$10,000 on her own life, is able to have her daughters educated in the best colleges in the United States and Canada, while her only son is doing his "bit" with the Canadian boys in France, and has recently received high military honors. Insurance gave this family a start in life, when all other funds were gone, when they had no friends to lend financial assistance, it assisted in paying off a mortgage, it protected a business when the husband died, and best of all, it is helping the children to receive the education which will fit them for higher and better duties in the future.

"Life insurance in its final analysis is simply a business method to make the world a better and happier place for families to live in, than which no purpose could be higher or more worthy."

Mr. John R. Reid, Sun Life, Ottawa, continues as chairman of the grievance committee.

FACTS, FIGURES AND FALLACIES

They are Found in Life Insurance Canvassing—Participating and Non-participating Insurance

In an instructive and logical address at the life underwriters' convention, Mr. M. P. Langstaff, A.I.A., F.A.S., of the Dominion Life Assurance Company, Waterloo, said it had been his observation that insurance salesmen are divided into three main types:—

1. The purely practical man, with a disdain for theory, the "plain, blunt man who speaks his mind," and one who, by the sheer force of his personality and dominating will, often wins pronounced success.

2. The purely theoretical man, who has an intimate knowledge of all the practices, involved or otherwise, of his own and all other companies (a knowledge of things, too often acquired at the expense of his knowledge of men) and who too frequently crams his prospect with such a multiplicity of figures and statements as to make his confusion worse confounded.

Ideal Type of Agent.

3. The ideal type—the man who combines in correct proportions his study of the theory of his business with his study of the personality of his fellow-men. He is one who by the proper study of the true theory of his subject has imparted to his mind that firm knowledge which is essential to confidence in its practical application. He has, then, the advantages of the two aforesaid types without their defects. He is at home when canvassing the man who demands facts, wishes to see figures, and rejects fallacies. He is equally at fault when approaching the prospect with a temperament which must be played upon as delicately as the musician plays upon his instrument.

One of the snags, the bugbear of insurance men, continued Mr. Langstaff, is ratios, and of the making of these there is no end. There are some ratios which peculiarly favor the young company and make an unfavorable appearance in the report of the old company; others in which only an old company can make a reputable showing. Then, again, some ratios appear outwardly to be all-sufficing proof of superiority, but inwardly and on close inspection there is little or nothing to them. "They are full of sound and fury, signifying nothing." Others are directly and reprehensibly deceptive—on the surface fair to the eye, but when examined closely found to be merely "whited sepulchres."

Mr. Langstaff continued: It is remarkable how distinctly we can divide our ratios into the two broad classes—(A) those favoring young companies; (B) those favoring old companies. Let us consider first (A) "Young Companies' " ratios.

Old and Young Companies.

(1) (a) Death losses per M. assured; (b) actual to expected death losses; (c) actual to expected death strain. Ratio (a) combines three gross fallacies—viz.: (1) It takes no account of the effect of medical selection which, in a young company with its large proportion of new business to old, would figure very markedly. (2) It ignores the fact that a young company has a greater proportion of young lives on its books than has an old company, and that these young lives are not contributing, or have not contributed, as much to the mortality costs as the old lives. (3) No allowance whatever is made for the reserves accumulated under those policies that fall in as death claims. Thus, if a \$1,000 policy has in the 15th year an accumulated reserve out of the policyholder's payments of \$700, we can see that the real loss is only \$300. In an old company while, naturally, more losses per M. assured occur, yet their virulence is considerably mitigated by the fact that a large proportion of these claims is on policies many years in force and upon which substantial reserves—particularly substantial in the case of endowments—have been accumulated.

Death Losses per M.

To take account of the effect of medical selection, strong-est, of course, at the outset, and gradually wearing off, we should, in comparing two companies, have before us the death ratios of each for insurances one year old, two years old, three years old . . . ten years old, etc. To estimate the importance of young lives and reserves, we should know also the proportions of the different plans, the ages, etc.—data not furnished to rival agents, we may be sure.

This ratio, death losses per M. assured, is, then, impossible as a basis of fair comparison. So for the same reasons is the ratio of actual to expected losses, where only the amounts of assurances are considered and the reserves ignored. It would easily be possible for one company, by having a larger proportion of young or recently-examined lives, to show a smaller ratio herein, and yet in reality not have nearly as favorable a mortality experience as an older company.

The only passably fair basis of comparison of the death rates of two companies is the ratio of actual to expected death strain. This is ascertained by summing the total death strain (amounts minus reserves) actually incurred and taking the ratio of the total to the sum of the total death strain expected for all policies according to some standard mortality table—a "Select" table of course—i.e., one giving effect to the lower mortality experienced in the early policy years due to medical selection. Occasionally, companies in publishing this ratio, disguise the fact that they have used an "Aggregate" or the "Ultimate" table where "selection" is ignored, in computing their expected mortality. Their expected mortality is, accordingly, abnormally high, thus making their ratio of actual to expected death strain abnormally low. Some perhaps make this mistake through ignorance. However, the alert agent in competition will do well to suspect any abnormally low death rate for an old company till he has ascertained their basis of computation.

New Business and Gains.

(2) (a) Business written to business in force; (b) gain in business in force to old business; (c) gain in business to new business. No fallacy lurks in the use of these ratios as a basis of comparison between companies. Rather, it protrudes. It is patent that no well-established company with a goodly volume of old business on its books can hope to show the ratio of, say, some "mushroom" company whose total business in force is perhaps one-tenth of the yearly business written by the older company. With companies of approximately equal ages and sizes, however, it may give an indication of the rates of progressiveness and stability of business, but should be used with caution. Thus a high ratio for a company in any particular year may indicate large increase in stable new business, and light lapse and termination rates; but then again, it may only be the resultant of undue weakness in preceding years, where, e.g., terminations may have been unduly high.

(3) Interest earned on investible assets. This is, in the main, a "Young Companies' " ratio, for they, with their small assets and small income, can generally invest with greater ease in high-yielding and yet safe securities than can the large companies with their deluge-like receipts. A comparison of the gross rates of interest, however, is not always a safe guide. The policy of one company in investing mainly in, say, bonds, subject to little investment charge, will cause their gross rates to verge closely on their net rates, whereas a company investing largely in mortgages will, while showing a larger gross rate on that account, have heavier proportionate investment expenses to deduct in ascertaining their net rate.

Security and Interest Rates.

The adage, "High Interest Rate—Low Security," is worthy of the utmost respect, but then so, too, is the well-tried management of any of our well-established companies, and an extraordinarily high interest rate in such cases may well be the resultant of caution, intelligent selection, and fortunate opportunities.

It is a well-known fact that high interest earnings are the most potent source of profit to policyholders, and while I should not say to prospects, "Choose your company, in all cases, by its high interest rate," I shall certainly say, "Reject in all cases a company afflicted with a very low rate of interest."

One Basis of Assets.

(4) (a) Assets to reserves or liabilities; (b) security to policyholders per \$100 of liability to policyholders. A comparison of companies on the basis of assets to reserves takes no account of the ages of the companies or the bases of reserves used, and certainly favors the young company when it has a large paid-up capital and also values its new business on the low basis allowed by the government. Then, again, the young company may have recently issued its capital stock at a high premium. (In case where the security to policyholders is used instead of the assets in finding the ratio,

the subscribed and unpaid capital also enters into the proposition.) Where the two companies under consideration have different reserve bases, one valuing on, say, the 3½ per cent. basis, and the other on the 3 per cent., the worth of the ratio is altogether vitiated—but as a matter of fact the ratio has little or no value for comparative purposes under the best of conditions. Take, e.g., any one company. At the outset it may sell its capital stock at a high premium and value its business in force on the lowest basis allowed by the government. Its showing in either of the above ratios will temporarily be very good. Of course, if it pays out all the premium on the sale of capital stock in excessive commissions on its sale, has other huge organization expenses, and writes a costly new business, the reverse will be the case. When this company gets a little older, it may decide to carry the full reserve, dispensing with the modification allowed by the government on new business. It may also begin paying dividends on its quinquennial and annual dividend business, or writing a greater proportion of non-participating or low-priced insurance. The ratios as above will then be considerably lowered. If it retains a large margin of surplus, however, or writes a large proportion of deferred dividend business, and decides not to push too energetically for new business, it may, of course, show higher ratios herein than a more progressive company, especially if the latter company is paying liberal profits to policyholders as they are earned.

Some Other Considerations.

(5) (a) Surplus to assets; (b) surplus to liabilities. Both these ratios generally indicate a sound position, but have much the same defects for comparative purposes as the two mentioned under (4) above. One feature which might affect the ratio considerably is the amount of contingent reserve which a company has transferred from the surplus. The practice of companies differ very greatly sometimes in this respect.

It is perhaps needless to say that the net assets should be taken. The ratio of a company might be considerably altered were no consideration given to a heavy bank overdraft, due and unpaid claims, etc., appearing in the liabilities.

Old Companies' Ratio.

(B) "Old Companies'" Ratios.

(1) (a) Expenses to premium income; (b) expenses to total income; (c) expenses to insurance in force. Expense ratios are favorites of the old companies, and they present them in peculiar lights and weird colors. "When other helpers fail and comforts flee," the old company falls back on some tricky expense rate, and it would be difficult to find one not too poor to do them reverence. They are indeed ticklish items that require careful and delicate handling. No other ratios lend themselves so readily to unfair deductions; no other ratios contain so many lurking fallacies. It is well-nigh impossible to obtain an absolutely fair comparison of the expense ratios of companies, as they are affected so readily and in such a pronounced way by the various peculiarities of the business of each company. The three mentioned above are the ones most generally used. It is obvious at once from a consideration of the great proportionate cost of new business that the company doing the largest proportion of new business to old business will, in all probability, show the highest ratio of expenses to premium income. The ratio then is a tax on the young company, or in the comparison of companies of equal age and size upon the more progressive one. Where the total income is used, the ratio is even more unfair, for we now introduce the large interest income of the old companies upon which the expense is negligible as compared with that upon the collection of premiums.

What Figures Show.

It is easy to show by figures how a young company, getting its business actually cheaper than an old company, can yet be made to appear to be obtaining it at a greater proportionate cost.

Assume Company A has business in force December, 1913, \$150,000,000.

Income in year 1914.	
Premium income on old business	\$ 7,500,000
Interest income	2,500,000
Premium income on new business	500,000
Total income	\$10,500,000

Its expenses are 15 per cent. of premiums on old business, and 100 per cent. of premiums on new business.

15 per cent. of \$7,500,000 is	\$1,125,000
100 per cent. of \$ 500,000 is	500,000

Total expenses \$1,625,000

Ratio of expense to income $\frac{\$1,625,000}{\$10,500,000} = 15.5$ per cent.

Now take a smaller Company B, which has business in force, December 31, 1914, \$10,000,000.

Income in year 1914.

Premium income on old business	\$400,000
Interest income	125,000
Premium income on new business	100,000

Total income \$625,000

Its expenses are 10 per cent. of premiums on old business, and 90 per cent. of premiums on new business.

10 per cent. of \$400,000 is	\$ 40,000
90 per cent. of \$100,000 is	90,000

Total expenses \$130,000

Ratio of expense to income $\frac{\$130,000}{\$625,000} = 20.8$ per cent.

Thus, on the surface it appears that company B is run more expensively than company A, because its expense ratio is 20.8 per cent., while A's expense ratio is only 15.5 per cent. As a matter of fact, however, company B would be by long odds the better company in which the policyholder could invest, for while he would be charged 100 per cent. for expenses on his first premium in company A, he would be charged only 90 per cent. in company B while he would be charged 15 per cent. for expenses on each subsequent premium paid in company A, he would be charged only 10 per cent. for expenses on subsequent premiums in company B.

Percentages Vary.

It is sometimes argued that the old company with much paid-up business on its books will suffer in these expense comparisons owing to the income being smaller on that account. But its expenses on such business are also practically nil, so that little effect on the expense-income ratio is caused thereby. Indeed, where the ratio expense to business in force is used, the more paid-up business there is with its negligible expense, the lower will be the ratio. In this latter ratio, the kind of business written would also be important, for a company writing chiefly endowment insurance might make a very poor showing in comparison with a company whose business consisted largely of term or ordinary life insurance.

The only logical ratio for expenses is to find the total cost of new business to new premiums and of renewal business to renewal premiums. But no statistician or expert can say just what the total cost of new or renewal business has been even in his own company, much less for another company. He has to apportion arbitrarily such items as advertising, printing, administration expense, telegraph, postage, etc. The proportion of such expense applicable to new business necessarily varies in different cases and accordingly cannot be honestly expressed by any fixed percentage of total expenditure, and therefore no attempt to do so should be made.

(2) (a) Assets per M. assured; (b) surplus per M. assured; (c) surplus earned per M. assured; (d) reserves to insurance in force. It is so obvious at a glance that any one of these ratios favors the older and larger company that no comment on the fallacy, or rather rank injustice, of using them in a comparison of a young with an old company, need be made. For companies of approximately equal ages and sizes, the ratios can perhaps be used, but subject to many qualifications. For example, the rate of progression of the company is to be considered. The proportion of the plans of insurance would be important, the endowment plans with their large accumulations contributing greatly to assets, surplus and reserves. A large proportion of deferred dividend business would help (a), (b) and (c), meaning as it does larger accumulations, while a great proportion of annual dividend or non-participating business would lower these ratios. In the case of (b) and (d) the reserve basis is, of course, all important. If different bases are used, it is futile to make a comparison.

(3) Percentage of income saved. Most of the remarks made in reference to expense ratios hold here. It is clear that the larger the proportion of new business to old, the smaller will be the percentage of income saved, whether new business is or is not being obtained at a reasonable price. The ratio discriminates, therefore, against the young company. The amounts of surpluses being paid out and the proportion of endowment and high-priced plans should be considered. Again, some companies have a regular period for surplus distribution for all plans and years of issue. Should the ratio be considered for any such company in one of these years of distribution, it will show considerable distortion from the usual trend. As a matter of fact for this ratio or any ratio, it is generally wise to consider the trend of the same ratios for some years past to notice any discrepancy in regularity. For example a company might through some peculiar circumstances have a very heavy mortality one year which in all probability would be followed by a light mortality the following year. This would distort many of its ratios and, perhaps, especially in the case of a young company, render them useless for comparison.

Surplus on Ledger Assets.

(4) Surplus earned on ledger assets. This is a very important ratio and a good comparative one for companies of approximately equal ages, sizes and rates of progression, as it focalizes all significant ratios on the supreme point of earning power. The ratio is, however, well nigh impossible to ascertain accurately for the other company, and hence its chief importance—but as a matter of fact this statement holds true of every other known ratio—is to enable the management of any company to test their own progress year by year in order to eradicate defects, introduce improvements, and still further nourish strong points. Quite often, however, the ratio can be approximately found from a company's published statement as follows: From surplus to policyholders, deduct the paid-up capital, thus obtaining the divisible surplus; from this latter amount deduct the divisible surplus as shown by the accounts at the end of the previous year and add the profits paid to policyholders during the year. The increase or decrease in the amount of dividends due and unpaid over that of the previous year should then be added or subtracted and to this result should be added the amount of dividends which the shareholders receive in excess of the interest earned on their paid-up capital.

A change in the reserve basis during the year will make it impossible to find from the statement alone the year's gain in surplus. It should also be noted whether any contingency reserve funds have been increased during the year by amounts drawn from the surplus. The dividends paid to policyholders shown in a company's statement will very probably include premium reductions earned in preceding years and now simply falling due. The "outsider," however, has no means of obtaining this proportion, which, of course, should be deducted in ascertaining the true surplus earned.

Lapse Ratios Important.

(5) (a) Terminations to new business; (b) lapses to insurance in force. The "lapse" problem has been to the fore very much during the last few years, and it has received particular consideration from many sides, while, at the same time, the companies have endured much condemnation by one or two "weakly" journals, whose knowledge of life insurance is hardly on a par with their propensities for criticism. One of the most able papers on this "lapse" problem, that I have had the pleasure of reading, is that of Mr. B. W. N. Grigg, in the last number of the Toronto Insurance Institute Proceedings. But he is at fault in succumbing to the fallacy which lies in the first of these ratios. For instance, he gives the new business for Canadian companies in the year 1914, and with it compares the terminations (consisting of surrenders, lapses and not takens), and draws this conclusion: "We are confronted with the fact that in the year 1914, of every \$100 of insurance written, \$63 vanished on account of surrenders, lapses or refusal to accept." Now these figures are not facts. Of the \$63, "surrenders" comprise \$9 and have no relation whatever to the new business of the year since they occur on policies three or more years in force; "lapses" comprise \$44 of the remaining \$54, but they, too, are largely due to the preceding two years' business, since they occur on policies upon which some payment has been made and which have therefore been in force on the average, we shall say, of a year and a half; "not takens" make up the remaining \$10, and fully one-third of these would be on the preceding year's business. It is clear, then, that in constructing ratios of this kind, the history of

each year's business would have to be known. Take, again, Mr. Grigg's use of the year 1914. This year, as you all know, was very hard on insurance companies. Business written was light. Lapses were heavy, and particularly so due to the fact that the preceding year 1913 had been one of the best in insurance history for the writing of new business. And yet Mr. Grigg takes the lapses due mainly to this large 1913 business and compares them with the unusually light, 1914, new business. Understand me, I do not state that Mr. Grigg's stricture that "lapse" rates are too high, is incorrect. I quite agree with what he says in that respect, and the conclusions he deduces from these high rates are perfectly sound and well-timed. I point out merely that the figures by which he arrives at his conclusion are incorrectly taken, and if used as a comparison between companies would, not improbably, lead to the most unfair deductions.

Necessary to Onward Movement.

A low lapse rate is not necessarily a matter for congratulation. It may be quite the reverse, indicating unprogressiveness and stagnation. Quite often the most energetic and reliable companies have high lapse ratios which they regard not as a reproach, but as a necessary accompaniment to vigorous headway. Generally speaking, however, when the necessary allowances have been made for new business, a heavy lapse rate is a bad sign, indicating "forced" business, slackness in looking after existing policyholders, and perhaps a growing lack of confidence in the company on the part of the public. Lapse ratios as a rule decidedly favor the old company, both apparently owing to its larger proportion of old to new business, and actually due to the fact that its greater reputation for stability and security attracts a larger proportion of the careful investors. In figuring on this ratio, the amount of revivals should, of course, be considered, and also the company's practice in respect to the entry of lapses, whether immediately on lapse or after the expiry of a considerable time when all hope of continuance is gone. Some companies leave a considerable "buffer" between the lapses recorded, and those actually realized, until a year of depression comes, when they "write off" every bit of business they can possibly dispose of this way. As in a year of depression, or "war" year, conditions distort many of the ratios of all companies, their heavy lapse rate for such years passes unnoticed, whereas their light rate in "good" years comes in for hearty commendation on the part of themselves and financial journals. The lapse trend for several years should, therefore, be considered. It is pleasant to be able to state that the attitude of the Underwriters' Association to the "twister" has practically banished lapses due to his malign agency.

Participating v. Non-Participating.

There is one fallacy that I must not ignore—it is the fallacy that non-participating insurance is better than participating. I think the argument here can be put in a nutshell as follows: The main elements of the premium are interest, mortality and loading factors. Both the non-participating premium and the participating premium must be calculated on the assumption of future experience in these three elements, and a considerable margin allowed therein for the sake of safety. In a good, reliable company—and that, I believe, every company we represent is—that margin of safety or some part of it is certain to be returned to the participating policyholder, and at least refund of any excess premium he has paid for the participating feature; with the non-participating policy the whole of the safety-margin is forfeited by the assured. In other words, the participating policyholder gets his insurance carried at absolutely net rates, the non-participating policyholder does not.

An interesting discussion followed Mr. Langstaff's paper, centring largely around the manner in which the premium rates for participating and non-participating policies were made. Mr. E. R. Machum, St. John, J. A. Johnson, Great-West Life, Vancouver, G. E. Williams, North American Life, Montreal, Archer Wickware, Imperial Life, Ottawa, W. J. Phillips, Ottawa, took part in the discussion.

Mr. J. A. Johnson, Great-West Life, Vancouver, told of a well-known United States company, which for a few years had written both participating and non-participating insurance, and, he added, "the man who holds the two kinds of policies, both of the same date, in that company, finds that the participating policy is costing him a great deal less than the non-participating policy." This discussion was developing to an interesting stage, when, unfortunately, the pressure of programme procedure stopped it abruptly.

HOW INSURANCE PREMIUM RATE IS MADE

"Mysteries" of the Mortality Table Explained—Rate is Conservative

How the premium paid on an insurance policy is made up; was the theme of an instructive address by Mr. E. E. Reid, assistant manager of the London Life. He explained, in a way interesting both to those who buy and sell life insurance, what are often erroneously considered the mysteries of the mortality table. He presented a hypothetical mortality table, in which the deaths occur at only four periods, thus necessitating a minimum of calculation, and yet giving such results as approximated sufficiently near, for illustration purposes, to the exact figures.

"Consider a mortality table, starting with the usual assumption that at age 20 there are 100,000 lives under observation," said Mr. Reid. "Suppose that these all live to age 35, when 15,000 die upon attaining that age; that the remaining 85,000 lives live to age 50, when 25,000 die. The remaining 60,000 lives may be supposed to live to age 65, when 30,000 die, and these 30,000 we may suppose all to die at age 75. Such a table is all that would be necessary for our purpose were it not for the interest factor, which enters into all financial considerations extending over a period of years. While the tool represented by the mortality table is an absolute essential to the calculation of a premium, no tool is absolutely essential in reference to the interest factor. Nevertheless, tools in the shape of interest tables greatly facilitate the work, just as in any other piece of construction, the more efficient the tools the more rapid and perfect the execution.

"Put in tabular form, this mortality table will appear as follows:—

Ages.	No. living.	No. dying.
20	100,000	
35	85,000	15,000
50	60,000	25,000
65	30,000	30,000
75		30,000

When Individual Will Die

"Now, suppose we are asked to calculate the premium that a person age 20 should pay throughout life to insure \$1,000 payable at death, assuming the deaths to occur according to this hypothetical table. We cannot take any individual, for we do not know when the individual will die. If, however, we take 100,000 individuals our table tells us how many live the periods indicated, so we will first deal with the whole group. To obtain the value of the payments to be made by the insuring company, i.e., the present value of the claims, we have four calculations to make: 15,000 claims of \$1,000 each are due at the end of 15 years, 25,000 claims are due at the end of 30 years, 30,000 at the end of 45 years, and 30,000 at the end of 55 years.

"According to government requirements we must adopt a rate of interest of 3½ per cent. From the interest tables in the manuals of almost every company are found the figures which will make this calculation an exceedingly easy one. Set out in full it is as follows:—

Discount term.	Amount of claims.	Discounted value of \$1.	Value of benefits.
15 years	\$15,000,000	× .596891	= \$ 8,953,365
30 years	25,000,000	× .356278	= 8,906,950
45 years	30,000,000	× .212659	= 6,379,770
55 years	30,000,000	× .150758	= 4,522,740
			\$28,762,825

"It is thus seen that on the above abbreviated mortality table the value at age 20 of \$1,000, payable at the death of each of the 100,000 lives, is \$28,762,825, or an average value for each life—usually designated single premium—of \$287.63.

Finding the Value.

"We can in a like manner find the value of one dollar a year paid during the life of each of the 100,000 persons. Thus we have 15,000 pay a dollar a year for 15 years only, 5,000 pay each year for 30 years, 30,000 for 45 years, and the remaining 30,000 for 55 years. Taking from our interest tables the value of an annuity of one dollar a year for the

various terms above indicated, this calculation set out in full is as follows:—

Term of premium payments.	Number living.	Value of \$1 per an.	Value of payments.
15 years	15,000	× \$11.9205	= \$ 178,808
30 years	25,000	× 19.0358	= 475,895
45 years	30,000	× 23.2828	= 698,484
55 years	30,000	× 25.1133	= 753,399
			\$2,106,586

"If \$2,106,586 is the present value of \$1 per annum paid at the beginning of each year during the lifetime of the 100,000 individuals living at age 20, then \$21.07 is, on the average, the value of \$1 per annum payable during the lifetime of an individual age 20. Now, at the outset, the value of the benefit guaranteed under an insurance contract must be exactly balanced by the value of the premiums to be received. In our illustration we found the value of the benefit, or the single premium, to be \$287.63 and the value of each \$1 of premium to be \$21.06. How many dollars of premium will be necessary to give a value equal to \$287.63? Manifestly \$287.63 divided by \$21.06, or \$13.65.

Whole Life or Endowment.

"There is in the minds of many a very considerable difference between whole life and endowment insurance in so far as the calculation of premiums is concerned. As a matter of fact there is little difference, and an endowment policy can be calculated in the way indicated above quite as easily as a life policy. All that we need to do is to suppose that all those living at the end of the endowment term die at that point. Thus, taking the same mortality table as above, we can readily calculate the annual premium for a 30-year endowment insurance by supposing that of the 85,000 living at age 50 the whole 85,000 die at that time instead of the 25,000 provided for in the table. We then have only two calculations to make, both for the single premium and for the annual premium. The work may be set out as follows:—

Endowment term.	Amount of claim.	Discounted value of \$1.	Value of benefits.	Single premium.
15 years	\$15,000,000	× .596891	= \$ 8,953,365	
30 years	85,000,000	× .356278	= 30,283,630	\$392.37
			\$39,236,995	

Term of premium payments.	Number living.	Value of \$1 per annum.	Value of payments.	Value of 30-year annuity of \$1.
15 years	15,000	× \$11.9205	= \$ 178,808	
30 years	85,000	× 19.0358	= 1,618,043	\$17.97
			\$1,796,851	

Dividing the one result by the other, we have \$21.83 as the annual premium for a 30-year endowment at age 20.

Calculating the Results.

"It must be remembered that these figures are not intended to be in any way accurate. Deaths from so large a number as 100,000 occur year by year, and exact results are obtained by carrying out a calculation for every year from the age for which the premium is required until the last death occurs. The principle underlying the calculation, however, is fully illustrated in the examples taken, and if this method were extended to include each year of age from 20 to the limit of the mortality table, exact net premiums on the basis of whatever table is adopted would result.

"It must not be supposed that the actual calculation of premiums at all ages is carried out in the way here illustrated. Another very efficient tool that is used in the calculation of premium rates is one by which the single calculation of the present value of the claims and the present value of the payments year by year of those living is made in such a manner as to serve for the calculation of premiums at all ages, but it is not at all necessary to explain the construction and the use of this tool to appreciate the basis upon which the whole business of life insurance rests.

"It will be seen that the sufficiency of the premiums charged as calculated on the basis of any given mortality table depends on how closely that table expresses the actual mortality experienced, and how nearly the rate of interest

assumed approximates that realized. The mortality tables usually adopted for these calculations either embrace, at the various ages, both new and old business, or deliberately ignore the favorable experience of the first five or more years after medical selection. This is, of course, a measure of safety which is reasonable, and which at the same time helps to offset the initial cost of placing the business. Then, again, so far as business in Canada is concerned, it is generally acknowledged that the conditions are such that a favorable mortality experience may always be expected by all companies doing business with proper care. There has been but one table published showing the mortality experience under assured lives in Canada—that of the Canada Life Assurance Company. The result of this investigation indicated a mortality of less than three-fourths, on the whole, of that provided under the usual standard tables. That experience is now more than twenty years old, and it is a satisfaction to feel that a new table is now in course of preparation which will give accurate and up-to-date information in regard to this interesting feature of our work.

Rate is Conservative.

"As to the rate of interest of $3\frac{1}{2}$ per cent. authorized by the insurance act, no one would be likely to suggest that it is not sufficiently conservative even for the longest term contracts. In the meantime the actual rate earned in excess of $3\frac{1}{2}$ per cent. has left a much wider profit margin than was anticipated.

"I have, so far, dealt entirely with what is usually called the net premium. That is to say, the purely mathematical premium which, according to the table and the rate of interest used, will just meet the benefits conferred without making any provision for expenses. On non-participating business it is becoming the practice to make the loading, that is, the addition to the net premium added ostensibly for expenses, very light. This addition is, indeed, in the majority of cases, now too small to cover the expenses without drawing upon the gains from favorable mortality or from extra interest earnings. Where 10 per cent. formerly was, perhaps, a common loading for non-participating business, about 5 per cent. seems to be the rate favored at the present time. Sometimes the loading takes the nature of a percentage plus a certain constant addition to the premium, and this latter method is the usual one adopted in loading net premiums for the purpose of obtaining gross participating premiums. Such a combination more nearly meets the actual requirements, for every policy, irrespective of plan, entails a degree of clerical work in the office for which, irrespective of the size of the premium, a constant charge ought to be made. On the other hand, commission expenses usually form a percentage of the premium, and for this element of expense a percentage loading is, of course, proper.

"The loading on participating policies is ordinarily much heavier than the non-participating plan, and various reasons may be assigned for this. Under a participating policy the policyholder enters into partnership with the company, and, theoretically, must share the profits and the losses as well. For this reason such ample premium has been, in the past, charged as would likely enable the company to meet any unforeseen emergency by simply reducing dividends, or, in other words, increasing the premium actually paid up to the rate originally quoted. The difference between the standard non-participating and participating rates seems, however, to be larger than conditions now warrant. On the other hand, the inducement to save by putting aside safely from year to year that much more is a benefit to a large portion of policyholders that should not be ignored."

LICENSING OF LIFE INSURANCE AGENTS

A special committee, composed of Messrs. W. Lyle Reid, Sun Life, Ottawa; A. Homer Vipond, New York Life, Montreal; A. J. Meiklejohn, Confederation Life, Montreal; and A. S. Wickware, Imperial Life, Ottawa, was appointed to wait upon Premier Hearst, of Ontario, to urge the amendment of the insurance law to make it possible for any citizen of Canada recommended by his company, should be able to obtain a license to write insurance business in Ontario. The committee will also endeavor to arrange for a conference of the insurance superintendents of the various provinces with a view to obtaining uniformity of practice in the licensing of agents.

OUR NICKEL NOT REACHING GERMANY

Solicitor-General Meighen Makes a Positive Statement and Defends Government's Policy

That not a pound of nickel refined from the ore of Canada has reached Germany since the war began was the positive assurance made by Hon. Arthur Meighen, solicitor-general in the Canadian cabinet, at the banquet of the life insurance men at Hamilton last week. This statement, he said, was made to the people of Canada on the assurance of Major Bell, the government's supervisor of our nickel supply and its destination, an officer described by Mr. Meighen as capable, true and trusted. "All the Canadian nickel that gets over to Germany will not save the face of the Kaiser in this war," said the speaker.

Government's Three Alternatives.

Mr. Meighen outlined the three alternatives which confronted the government on the nickel question when war broke out. First, they could have prevented entirely the export of nickel, but the refinery was already established in the United States. To prevent the export would have stopped the flow of nickel to Great Britain and the allies. It would have slackened the speed of the munitions industries in Canada, the United States, Great Britain and the allied countries.

The second course, which seemed to have more friends now than a little while ago, was to have expropriated by an act of government the natural resources and establish a refinery of our own in Canada. To have done this the nation would have had to purchase the properties at a price based upon the nickel company's earning power. Otherwise, it would have meant confiscation, and confiscation was not the practice of British countries. This course would have involved a colossal expenditure at a time when we were confronted with a financial responsibility as great as we desired. It would have entailed a delay of a year in order to establish here a refining plant, a delay at a time when it would mean the loss of thousands of lives. We would still have had to permit certain exports to feed certain industries in the United States.

Strictest Possible Supervision.

"The third alternative was to allow the flow of nickel to proceed, but to see to it by the strictest possible system of supervision that the policy of feeding our friends and starving our adversaries was continued. The government had chosen this, the third course, and that had the government's approval to-day."

Mr. Meighen then read a cablegram just received from the secretary of state for the colonies, Hon. Bonar Law, to the effect that the British government was satisfied with the precautions taken to prevent nickel from reaching the enemy. Mr. Meighen then gave a graphic description of our far-flung battle line, a dramatic touch being given to his conclusion by darkness coming over the banquet hall as the lights gradually faded and went out.

BUSINESS MEN HEAR PROMINENT LIFE INSURANCE SPEAKERS

The suggestion of *The Monetary Times*, in a recent issue, that the public should be permitted to attend at least one session of the life insurance convention at Hamilton, was adopted, the subject being introduced to the gathering by Mr. T. J. Parkes, Sun Life, Sherbrooke. The business men of Hamilton were invited to attend the Saturday morning session, when Mr. Edward A. Woods, Pittsburg, president of the National Association of Life Underwriters of the United States of America, and Mr. George T. Wilson, vice-president of the Equitable Life of New York, addressed the convention.

The suggestion of *The Monetary Times* was made in the following words: There are too many who still have an insufficiently intimate acquaintance with the life insurance agent and his policies. It might prove an interesting and instructive innovation were the life insurance men to arrange their programme so as to give an afternoon session for the benefit of the general public. Special talks and topics could be chosen for that session and free discussion allowed.

LIFE INSURANCE PREMIUMS TAXES UNJUST

Legislatures Placing Penalty Upon Thrift—Do Not Recognize Value to State

The relation between the love of country and the economic value of life insurance, or the patriotism of life insurance, was the theme of the address of Mr. J. F. Weston, managing director of the Imperial Life, at the underwriters' banquet. He took occasion also to complain of the continued tendency of the federal and provincial governments to tax far too heavily the premium income of the insurance companies, a tax which was paid by the policyholder—a penalty upon their thrift.

"The value of life insurance to the state is great," said Mr. Weston, "but I cannot find that our legislatures take that view. They vie with each other in placing taxes on the premium income, finding it an easy source of income. The people who pay the premiums make no protest, although it is a tax upon the thrift they practise. Our legislatures do not see in life insurance an institution which serves a patriotic end.

Ten Per Cent. Tax.

"A few weeks ago a member of the legislature in one of the United States introduced a bill to tax the premium income of companies with head offices outside the state 10 per cent. and that of home companies 5 per cent. This may possibly indicate patriotism to the state 50 per cent. greater than patriotism to the union, but the 5 per cent., as well as the taxes levied by all other states and provinces, is conclusive evidence that life insurance has not yet come to be regarded as a patriotic institution by our legislators, and that it has not taken hold of the imagination or esteem of the people to the point where they resent a tax upon it."

Continuing his unusually thoughtful address, Mr. Weston said: "Aggregations of capital for the carrying on of modern industries and commerce have been rendered possible by the relative immunity from loss which the individual investor or concern may secure by pooling its risks with a great number of similar risks through the medium of insurance. Fire insurance to protect against loss by fire, marine insurance to protect against damage or destruction of goods in transit, guarantee insurance to protect against breach of contract or dishonesty of employees. Capital guarantees itself against liability for injury to its workmen through employers' liability insurance and by any and every means made obligatory by law, or which hold the element of protection against any form of risk. More and more it is coming to recognize the inestimable value of good management by insuring the lives of the men who display such qualities in its service. It protects itself by as many varieties of insurance as it has risks to run which can in any way be made subject to insurance. This is the great underlying principle of security employed by capital for its protection.

Insuring of Lives.

"Is it less important to the body politic that the comfort and happiness of its individual members should be protected by the insuring of the lives upon which the means of such comfort and happiness depend? A nation's happiness and security is simply the aggregate of the happiness and security of its individuals. The vast bulk of our people depend entirely upon what they can earn by employing their strength, technical skill and whatever ability they have in the service of organizations, or under systems in which they have no vested interest, and which lack the power to support them when their usefulness is gone. It is appalling, if you pause to think of it, in what a preponderating number of cases the modern family depends solely on the earnings of a single life.

"The functions of, and need for, life insurance were recognized as soon as the risks associated with modern industrialism began to be felt. Its growth has been the most remarkable incident in the financial history of the last century. Within three-quarters of that time a number of companies on this continent have grown to be the largest single financial institutions in the world. The whole institution of life insurance, comprising all companies, has steadily developed in times of depression, as well as in times of prosperity, which demonstrates the increasing appreciation felt by the people for the protection which insurance gives. The number and amount of risks carried by the companies is

stupendous, but is still pitifully inadequate to cover the value of the lives upon which depend the maintenance of the homes of the country, the welfare of the next generation and the comfort of the worker of to-day when his period of usefulness is over. In a great majority of cases his insurance is all the average man has to show for his life's work, or to establish the claim of his family on the advantages of the community.

To Stimulate Business.

"Here on this continent we have been too busy exploiting the riches of a new country to have our governments do much towards stimulating the business of covering the risks underlying the lives of the people. In fact, the tendency has been opposite, by making insurance organizations tax collectors, and thereby reducing the amount carried through making it more expensive. The employers of labor, however, are coming very rapidly to encourage it in a very practical way through group insurance and by other plans.

"Wide as the recognition of the value and need of life insurance has become, it still requires, and will always require, a great educational propaganda to be carried on amongst the people. It requires all the initiative and combined force of the great organizations of all our companies to make its advantages apply to the great and growing need of the people. We have a field of limitless scope to develop in which the possibilities are constantly increasing. Our business will grow more rapidly in the future than it has done in the past because of the wider recognition on the part of the public of its paramount importance under present-day conditions. We can accelerate or retard its growth according to the methods we employ. No slipshod, drifting policy of mere expediency from the past has any chance of success in the brighter, keener period of the present. We need to employ practice which applies to all classes of insurers with absolute fairness if we are to avoid reactions and escape bringing the business into disrepute and ultimately involving it in legislative interference. Surely this should not be difficult in a business which rests on such a sound, scientific basis.

As to Salesmanship.

"Then as to salesmanship. I do not know why this greatest business of all businesses, in that it is sold to men in every class of business, should have the largest percentage of failures amongst its salesmen unless it is that it is too big for us to gain a clear enough perception of its real character and the breadth of its application. The agent of average ability who gets a comprehensive grasp of the business of life insurance, of the absolute need which exists for it amongst all classes of people, and of how its benefits can be made to apply to every department of human necessity, can make, and does make, a greater success than salesmen engaged in any other work. To such men every field holds a bountiful harvest for them to gather, but to the man who cannot secure this vision every field is a sterile waste.

Investments of Companies.

"In addition to the great personal advantages to be gained in the occupation, there is always the consciousness that in this business you are benefiting the community and the state. Look at your business from any angle in its relation to the state and you will discover that it is always rendering a patriotic service. As a concrete example of this, there is already invested over \$400,000,000 of life insurance funds in this country of eight millions population. The securities embrace government, municipal and high-class debentures of many varieties, mortgages on farm lands and other classes of property, all furnishing the means to develop and carry on the business of the country, and when an emergency arose, as it did on account of the war, and the minister of finance required to issue a domestic Canadian loan, the companies were able to subscribe a very substantial amount, and I have reason to know that they are now preparing to make a larger subscription to the next loan when it issues. This enormous amount of money is made up of the many small savings which the people have been educated to make by the persistent campaign of education which has been carried on by the life insurance agents everywhere. It is the result of thrift practised by the people, and the effect of that practice is not only shown by the millions of dollars which are yearly being paid to the dependants of those who have carried insurance, but is also shown in these vast investments which are contributing to the support of the community and the state."

WHY IS LIFE INSURANCE DROPPED?

Causes of Surrendered, Lapsed and Not Taken Policies —Position of Policyholder

Taking as his text the fact that last year in Canada, \$29,000,000 of life insurance was surrendered; nearly \$106,000,000 lapsed because of non-payment of premiums; and nearly \$20,000,000 was never placed after being issued, Mr. W. May, junior, Sun Life, Toronto, discussed ways and means of keeping insurance business of the books of the life companies. "Seven times as much business was terminated last year by surrenders, lapses, and not-taken, as was terminated by death, maturity or expiry. For every policyholder who died during 1915, 10 lapsed their policies. How then," asked Mr. May, "can the fieldman who sold this \$155,000,000 of lapsed business pretend to think that either they hold the confidence of their public or have impressed sufficiently upon that public the realization of the necessity for life assurance?"

Satisfied Policyholder.

"There is still another aspect of this question. Most will say it is true that the best advertisement a life man can have is a satisfied policyholder. What kind of an advertisement do you think these hundreds of men who lapsed their policies make? Is the influence, conscious or unconscious, which these men undoubtedly exert, in your favor or against you? Have you not heard it before in your canvass—'My father, my uncle, or my brother took insurance and dropped it, what is the good of me taking it out.' And you have to labor and explain, for obviously you cannot say that perhaps the father or the uncle or the brother was a fool. If it be true, and it is true, that policyholders are the best customers to the modern field man, then it is also true that these men who have lapsed or surrendered their policies are not only bad customers, but they exercise an influence which handicaps you in your canvass and is detrimental to your success.

"The largest number of lapses or surrenders is the result of some mistake at the time of the sale. Either the agent did not know sufficient to explain properly, or he was too careless or too lazy to fit his proposition to his client, or he did or said something through ignorance which bore fruit in later years and resulted in one policyholder the less. We have nearly all met the policyholder who thought he had a 20-year endowment policy with profits, which only cost him \$27.95 a year. The agent did not deliberately misrepresent the policy. Nevertheless, the policyholder did not understand what he had bought, and a moral obligation rests on the shoulders of the agent to make the policyholder understand. That was what the agent was being paid his commission for, and through the agent's neglect the policyholder did not understand, and on account of the misunderstanding lapsed his policy.

When a Man Loves.

"Take another case, an agent meets a young man of 21 years of age who takes a policy and makes it payable to his girl, naming her in the policy. Very nice thing to do on the part of the young man, and the agent aids and abets him in his laudable enterprise. But young men of 21 do not always marry the first girl they walk out with, and this special young man had changed his fancy and got another girl. Imagine the fix he was in when he was told that the original girl would have to sign a loan agreement with him when he wanted to borrow on his policy. Would she do it? Not she. Another lapse due to an agent not explaining or not knowing the possibilities of the situation.

"A young grocer doing real well in business is persuaded to take out a policy. It is held out as an inducement that the policy can be used as collateral security for business purposes, yet the agent allows him to make it payable in case of death to his mother who lives in Ireland. The result is that the collateral security is wanted in a hurry some day, the loan papers have to be sent to Ireland. The delay upsets the loan, upsets the grocer, and finally upsets the policy all through an agent only using his head to carry a hat on.

"A young engineer for instance makes his policy payable to a maiden aunt, applies for a loan, aunt refuses to sign loan papers, engineer refuses to pay further premiums. A young woman makes policy payable to her elder sister and then gets married. Husband has to pay the premiums, wants policy payable to himself. Sister jealous, does not approve of either the marriage or the brother-in-law, and refuses to sign off.

Husband mad, wife in tears, sister obstinate as a mule—another lapse. All through ignorance on the part of someone. You cannot expect the public to know. The agent ought to know, and ought to explain at the beginning. The man or the woman who is taking out the policy is his client, and is entitled to the benefit of expert advice.

Company Cannot Do.

"Take another cause of frequent lapses, namely, the promising on the part of the agent of something that he knows the company will not do.

"Then there is the agent with the strong personality. He is honest; he knows insurance, and he generally does a big business, but he has a heavy lapse ratio. He generally over-insures his clients. He persuades them against their will. He helps them over the first year, and sometimes the second by taking their notes, and waiting for his commission, but he cannot do that every year, and the minute he stops helping them the policy becomes burdened with debt, and finally lapses.

"Then there is the agent whose only thought is his commission. His client appears to him only as a source of revenue. He does not give a thought for his clients' interest and sells whatever he can most easily make commission out of.

"The companies themselves are to blame also. They spend too much time on the obtaining of new business, and too little on the care of what they have. Company officials lose in some cases their touch with the humanities. Lastly, in this list of lapse causes, there is want of money.

"What about the remedies? The first lies in the hands of the companies and the agency managers. They must set a high standard for the men they are going to let loose in the insurance world. No company or agency manager has the right to give a contract to a man who has failed in a dozen walks of life, to let him loose upon the public to repeat the mistakes which have already caused his failure.

Company Managers Can Help.

"The second remedy lies also in the hands of the managers, although they can be helped considerably by ourselves. It is the education of the field man.

"The third remedy is to bring home to the field man himself the importance of the lapse question. Instead of being valued solely on the basis of his new business production he should be made to realize that business which does not renew, instead of being a credit is a black mark against his name. Every policy which lapses should be brought to his attention, and a post mortem held on the case.

Position of Policyholder.

"Then lastly, there is the handling of the policyholder himself. Make the policyholder feel that he has joined some great co-operative concern, not that he has bought something. When his application has been obtained and his examination made, have the office write him a letter, a real letter, thanking him for it, congratulating him on joining, telling him the application has gone forward to head office, and that when it returns it will be handed to the agent concerned to deliver. See that the policy is delivered, wherever possible, in person, and thoroughly explained. Leave nothing indefinite, especially the terms of settlement. Complete the transaction in cash if you can. If you cannot get the whole premium, get as much as you can.

"Premiums should be collected direct from central offices. The man in the field should be relieved of everything which takes him away from his new business production."

Mr. May concluded his valuable paper by outlining an effective and direct system for the collection of premiums.

Reasons for Lapses.

Discussing Mr. May's paper, Mr. T. E. Bourke, North American Life, Toronto, advised that one way to reduce lapses was for the agent to think not only of his commission when writing a policy. He should also keep in touch with all his policyholders.

Mr. L'Esperance, Imperial Life, Montreal, thought that the agent should take greater cognizance of the process which goes through a man's mind when he is induced to buy a policy. The agent should always remember just why his prospect purchased a policy and should keep him posted as to why he should continue to pay for it. The head office could help in this matter by sending literature periodically to the insured to remind him that his life insurance was still a good

thing. Mr. L'Esperance also suggested that a code of ethics and a few pointers as to the pitfalls of the business should be drawn up, printed and circulated among the agents.

Mr. Morris, branch manager at Toronto, London & Lancashire Life, speaking of the lapses, thought they could be reduced materially by agents giving far greater attention to selection of risks. Personally, he never went after, for example, farm help. He took the farmer, and the farmer's note, but those who wrote farm help usually had trouble in regard to the policies within thirteen months. Mr. Morris deprecated the emphasis which so many companies placed upon the getting of new business. Retaining the old was more important.

Policyholder to Blame?

In a discussion on the lapsing of insurance policies, Mr. G. E. Williams, North American Life, Montreal, stated that the blame for lapses had been thrown almost entirely on the field man. That was unfair. "It is not only difficult to get a man to pay the first premium on his policy," he added, "but it is often more difficult to get him to pay the second and the third. Nine-tenths of the lapse evil rests with the policyholders themselves, not with the field man."

Mr. Archibald Sydney took a different view. "If we salesmen sell the policy properly," he said, "and explain it properly and sell the right kind of policy, the lapse ratio should be very much less. We should constantly keep our clients mindful of the privileges contained in the policies they hold."

Mr. W. J. Phillips, Ottawa, thought one important phase of the lapse evil was that agents frequently sold policies for amounts greater than the prospects could properly afford.

PUBLIC SHOULD INSURE ONLY WITH ASSOCIATION AGENTS

The work and character of the meetings of the various local associations was described by Messrs. Parkes, Belleville; F. J. Reid, Brantford; J. Walter Keith, Calgary; McBeth, Edmonton; W. J. Bell, Guelph; Goodrow, Hamilton; Rogers, Amherst; Johnson, Kingston; Vivian Reeve, London; G. E. Williams, Montreal; Devlin, North Bay; Wickware, Ottawa; Lachance, Quebec; G. J. Alexander, Richmond; Gordon, St. Catharines; Bonnell, St. John; Wm. Welch, Saskatoon; Archibald, Sydney; Morgan, Victoria; Young, Toronto; J. A. Johnson, Vancouver; and J. W. W. Stewart, Winnipeg.

Mr. Johnson, Kingston, stated that his association proposed to make the public aware of the good work of life underwriters' associations, and to advertise so that the public would deal only with life underwriters' association.

Mr. Wm. Welch, Saskatoon, stated that several insurance "sharps" had canvassed in Saskatoon and that the local underwriters had advertised in the local press, asking the support of the citizens for the life insurance agents, who lived and worked in Saskatoon, and members of the life underwriters' association.

LIFE AGENTS AND THEIR CONTRACTS

Better working conditions for the life insurance agents was the subject of an earnest discussion at one of the largest sessions of the convention. A resolution was passed urging that agency contracts should in future embody a clause whereby an agent who had served his company would have his renewal commissions guaranteed to him or his heirs upon an equitable basis.

Mr. J. A. Johnson, Great-West Life, Vancouver, thought the companies should consider not only the new, but also the old agents in this connection. "The companies which are successful to-day are the companies which treat their agents the best," said Mr. Johnson. "Old policyholders also should always get justice. The best exponent in North America of fair treatment to policyholders is the Mutual Benefits Life (a company, by the way, with which Mr. Poppa, a Canadian actuary, is associated). When the company changed its reserve to a 3½ per cent. basis, old policyholders were allowed cash surrender value, for example, on that basis. Several changes have been made in recent years in the reserve basis until it reached a 3 per cent. basis. But the Canadian companies are not as generous as they might be in regard to old policyholders, who might want to surrender their policies."

INSURING A COMPANY'S PRESIDENT

Loan Feature of the Policy was the Clinching Argument— J. L. Purdy's Essay

The following essay on the present-day problems of the life insurance field man, brought to its author, Mr. J. L. Purdy, Canada Life, Toronto, a presentation cup and ten dollars in gold:—

Assuming the title refers to the problems of the solicitor or producer in contradistinction to the organizer. It is obvious that in the last analysis there is but one problem, namely: "How to write business," or "How to write more business," or "How to write all the business the territory can be expected to yield." One or other of these aspects of the same statement will represent the problem of every solicitor, according to his experience or disposition, and the solution of course determines the important question of success or failure, and a bold man indeed is he who claims to have entirely solved it.

Not a New Problem.

The problem, it will be observed, is no new one; it is, in fact, hoary with age, having accompanied, with dogged persistency, the tremulous footsteps of the first insurance man, and will doubtless attend the obsequies of the last. The problem is the permanent and omnipresent factor, and any one of a dozen different solutions may be right according to results, assuming of course the processes to have been honest and honorable.

Be it specially noted that the problem is the 'permanent factor, and this is precisely as it should be, contentions to the contrary notwithstanding. Every sane, healthy and expansive person has his problems, it matters not his age or station; the bigger the man, the bigger and more complex they are, and the man without at least one is like a spent volcano burnt out!

It is always the field man's attitude towards his particular problem that counts. If the problem is regarded merely as a spectre, a ghostly apparition, all sorts of doubts, fears, anxieties and uncertainties overwhelm him, producing sure disintegration and collapse of purpose; whereas the calm and frank recognition of its necessary presence, and the assurance that inside of each man is the solution of every problem he will ever have to face—otherwise it wouldn't be his problem—this attitude, I say, releases the inexhaustible and inherent powers of his being, enabling him to take Difficulty Hill with ever increasing acceleration, placing him in the condition and position of never being called upon for too much or asked for anything he cannot deliver.

From the nature of the question, the observations which follow must inevitably go beyond the simple statement of the problem into the realm of the solution, and the few suggestions now offered are stated with the utmost diffidence, more especially as an effort will be made to hit a new trail, preserving at the same time a due respect and regard for the valuable contributions already made to the subject, and to which as field men we owe so much, and let us frankly admit that with patience and diligence we might have profited so much more.

Thinking of a Field Man.

"It is the field man's attitude towards his particular problem that counts." Let us examine this postulate at close range, for in spite of what is already known concerning it, there is still a wealth of meaning unrevealed. Evidently the thought or mental attitude is the one referred to, in other words, it is what a man, and especially a field man, thinks, that counts. Yes, what he thinks! Not what he fancies, or ruminates, but what he really thinks, an exercise involving a deliberate and positive arrangement of mind stuff—that's what counts. It will be recalled that on one occasion the Alps, the highest mountains in Europe, threatened to obstruct and thwart the designs of the great Napoleon, whereupon he is said to have exclaimed, "There are no Alps!" And hey, presto, for the purposes of that campaign at least, there were none, the potent power of thought having levelled them to the plain. By the same token, the successful field man's attitude is "that there are no problems," only opportunities, ceaseless opportunities, in a world of eternal unfoldment.

"Mind is the master power that moulds and makes, And man is mind, and evermore he takes Brings forth a thousand joys, a thousand ills. The tool of thought, and shaping what

he wills, He thinks in secret and it comes to pass; Environment is but his looking-glass."

Are you ready for a revelation, Mr. Fieldman, the greatest probably of our time or any other? If so, read, mark, learn and inwardly digest the following: Given the right thought, the corresponding action follows, as the night the day. Thoughts of fear, doubt and indecision crystallize into weak, unmanly and irresolute habits, followed by failure, indigence and slavish dependence on others, and no amount of practice of the conventional precept, "a shave, a shine and clean linen," will of itself soften the circumstances or mitigate the fate. Whereas thoughts of courage, self-reliance, decision, perseverance, success, etc., crystallize into manly habits and circumstances of plenty, freedom and success. A particular train of thought persisted in, be it good or bad, cannot fail to produce its corresponding results in character and circumstances. Let a field man think and encourage strong, intelligently expansive and noble thoughts. Opportunities will then spring up on every hand to aid his fair resolves, and his particular problem is non est.

The mind it appears is the great transformer, its function being to transform thought into actions, conditions, environment. It is extremely important therefore that all thoughts incompatible with the consummation of one's purpose should be rigidly excluded from the transforming mind. That is the inner meaning of the terse, but little understood, slogan, "He can who thinks he can," the full import of which is still hidden from many who are in every other respect well informed.

As to Right Action.

As previously stated, the Life Underwriters' problem is the same yesterday, to-day and forever, namely, to get right action from himself, and corresponding right action from others, because it means business; more business, and still more business, and it is this dual activity which differentiates his work from the purely mechanical occupation requiring only the monotonous performance of certain physical operations in his own person. The sudden realization of this by an ill-trained and discouraged novice, frequently places him hors de combat. The difficulty experienced in getting right action from himself alone, by the process of assimilating the various sciences of salesmanship seems insuperable; how, therefore, can he expect to get right action from others, he argues, and forthwith becomes submerged by doubt, fear and indecision, and collapse of purpose ensues. Nearly all candidates for life underwriting honors meet with this experience in some stage of their careers; it is the great problem, and for want of a definite lead and clear guidance a great many excellent men drift back to routine occupations, and the full and proper development of many who stay is for the same reason retarded or never accomplished.

Get a clear conception and firm grasp, Mr. Fieldman, of the simple truth that right thought begets right action with the certainty of fate! The limitations of one's desires and ambitions are not, as is generally and erroneously imagined, imposed by persons or circumstances, but by thought alone. No person or thing can keep a man from reaching the height of his legitimate and cherished aspirations except the thoughts operating his own mind. Base thoughts bind and imprison a man to a hard environment. They are just the gaolers of fate. Noble and courageous thoughts liberate; they are the messengers of independence, freedom and exuberant expansion. "As a man thinks, so he is; as he continues to think, so he remains." So much for that part of the problem consisting of getting right action from oneself.

Soliciting a President.

Getting right action from others is of course a different proposition, but governed by precisely similar laws. Outside of physical compulsion, the only way to constrain a person to act in any particular way is by the operation of compelling thought. The moment any thought dominates a person's mind, action follows in exact ratio to the intensity of the thought, and consequently a field man needs, above all things else, to be a battery and distributor of positive thought. He has, for instance, to deposit in the man's mind the thought of his need for insurance, or of its appropriateness for a certain contingency in order to obtain the required action. That his prospect does not want his proposition is of little consequence; he knows of a certainty that he will desire it if the thoughts he wishes to impregnate his mind with are allowed to operate. Proofs of this could be furnished by every insurance man ad infinitum. I remember soliciting the presi-

dent of a company located in Toronto, who carried \$50,000 of insurance taken with an English company. He was at some pains to assure me that he required no more insurance, with which I assumed a ready acquiescence and went ahead.

"There is a serious flaw in your policy," I said. "The English companies do not tabulate their loan and surrender values in their contracts, consequently they are not readily negotiable. Now, through circumstances over which you have no control, you may find yourself in desperate need of quick and ready cash. A \$300,000 concern in this city had to assign quite recently for the want of a temporary loan of \$25,000." Finally, the thought regarding the need for a cash reserve took complete possession of his mind, and the desired action followed quite naturally, netting me a handsome commission. One other illustration must suffice. I was competing against a premium which was considerably lower than that of my company, and to the uninitiated it appeared that I would surely lose the business. "It is a very easy thing to exaggerate the importance of that difference in premiums," I said. "Remember, you are not buying a premium, you are buying a contract. Not because it is cheap, but for what it is and contains. How often do you buy a thing merely because it is cheap, tell me that? Can't see a single thing around the office which looks cheap. Your own particular line of goods are not sold altogether on the price, there being many others costing less. Look at this umbrella," I said; "it cost me \$11. I could easily get eleven umbrellas for the money, but it would be a great indignity for me to have to carry one. My policy costs more than that of the other fellows, but it is worth it, and you will remember its merits and associations with pleasure long after the price is forgotten." I succeeded in getting those thoughts operating in his mind, and the same happy result followed.

Disinclination to Listen.

It has long since been discovered not only by life underwriters, but nearly all salesmen, that attempts to set up and establish certain action-compelling thoughts in the minds of prospects are frequently resisted. Sometimes the resistance takes the form of a disinclination to listen or be concerned with a proposition for fear of being impelled to a course of action which circumstances do not warrant—which in itself is a tacit admission of the power of thought. At other times the prospect is openly hostile to the person soliciting for any one of a number of reasons, such as a disagreeable personality, over-aggressiveness, freakish dress or deportment, etc., and where there is no goodwill there can be little or no prospect of securing an application for insurance. It would be difficult to exaggerate the importance of goodwill in a canvass, for whilst it is possible, in spite of opposition, to establish action-compelling thought in a prospect's mind, he may out of what is sometimes called "sheer cussedness," place the business with the next man. The cultivation of "good-will," therefore, is of supreme importance, and as every eligible man must be regarded as an ultimate prospect, "good-will toward all men" is the eventual requirement. This is not in any shape or way a preachment—it is a cold analysis of the essential requirements for getting results, continuous and permanent results.

Magnetism and Salesmanship.

Just one other point remains to be considered. The word "Magnetism" is attracting attention, and is now quite commonly found by students in the vocabulary of salesmanship. Magnetism, like the power we call electricity, eludes definition. We only know that a subtle and indefinable charm exudes from the personality of a so-called magnetic person, and whilst under the spell one's will, the seat of resistance, is temporarily deposed. So that magnetism is a power worthy of cultivation. As far as can be discovered, the condition necessary to make a proper basis for magnetism to manifest is a physical one. Health, robust, exuberant health, is said to be the proper physiological basis, and having that, a person consciously or unconsciously attracts to himself magnetism which is suspected of being nothing more nor less than an accentuation of the all pervading cosmic force.

This essay was undertaken in exactly the spirit suggested by the invitation, namely, as a recreation as well as a competition. The beaten track has been deliberately avoided, and the opportunity seized to ventilate ideas gathered together in the course of study and investigation. Needless to say, the acceptance or rejection of the statements made will neither alter the facts or in any way affect the writer.

ETHICS OF LIFE INSURANCE

At What Point Should Competition Between Agents Cease?

A paper on the ethics of competition in life insurance was read in French, by Mr. J. T. Lachance, manager at Quebec, of the Manufacturers' Life. The following is a summarized translation:—

The competition between life insurance agents is on a more loyal, more honest basis. To-day, agents of the different companies can meet as friends. The growth of life insurance in this country of late years, is due to the influence of the good relations which have existed between agents. We think too much of the present remuneration without giving thought to the legacy that we shall leave to those who shall come after us. If I look back to the former years of our profession, I cannot avoid seeing what a future, what legacy, men like late Honorable Geo. A. Cox, Honorable Geo. P. Graham, Sir Thomas White, the minister of finance, who now rules the insurance department at Ottawa, Honorable Senator P. A. Choquette, of Quebec, and so many others who have in the past, gone through the streets of our cities, and of our towns and country roads, with their rate-book, soliciting life insurance, and laying the foundation of this noble profession of ours. They have prepared the public opinion, and we, to-day, reap the benefit. Life insurance is an admitted profession. They are the men who nearly three-quarters of a century ago, commenced in our country, the education of our people in life insurance. To-day, life insurance is admitted by every one. The question is how best can we serve the insuring public.

Satisfy the Public.

Life solicitors should care more to the service they can render to the cause, to the insuring public, by making them best satisfied with the insurance they carry. This can be done by bestowing congratulations upon those who are already insured, no matter where, whether it is on the level premium plan, or on the assessment, as the man insured in any company, in fraternal society and on any plan, is far better off than the man who carries no insurance at all. Never say: "You should have taken some other plan of insurance," or: "This company cannot pay you the profits which we are paying." It is not the company who makes the agent, but the agent who makes the company. It is always the agent who sells the policy and not the assured, who selects the plan.

One cannot sell the same plan to every one, to the young man of 20 years and to the man of 60. A man whose business is well established, does not look upon life insurance as an investment. If he is young, he will require a long-term limited payment life; if old, he will not listen to anything but an ordinary life, or possibly to a short-term endowment. If an employee, he requires the greatest amount of insurance for the least possible premium, consistent with safety and on the limited payment plans if he is relatively young.

As to Twisting.

What is "Twisting?" In our vocabulary, it means: "The action of the unscrupulous villain who goes to a man who has a policy in a good, sound company and tries to sell him his plan on the representations that he, the assured, will gain in lapsing the policy he now carries, by surrendering it for cash or paid-up insurance." This is the worst action of which a dishonest agent can be guilty. Unfortunately, these men are still too numerous in our profession. This agent robs the public, robs the general agent, and is the cause of the ruins of the fundamental principle of our profession.

When should loyal agents cease competition? The great qualities of the life insurance agent, his ability, his courage make a great fighter of him, and one who will never admit defeat, a proof of his ability and of self-confidence. But there should be a point when competition should cease. I do not know when, but I do know with the honest, loyal man of the profession, that this point exists. In the early days, some of the local underwriters' associations had a clause in their by-laws, determining that when the application had been signed, all other competitors should withdraw. But progress has been made since that time and we must try to arrive at a practical and not a theoretical decision.

I heard a few years ago one of the delegates of the National Association of Life Underwriters of the United States say at one of our conventions: "That the company he represents had a general agency association." Every company should have an organization of this kind. He stated that in New York City, where they have several large general agencies, if one of the soliciting agents comes in contact with a prospect who says: "Yes, I have been approached by John Jones, of the same company, and have promised him my application," the agent will not try and write him by stating that he represents the same company and would serve him as well as John Jones would, and that he would grant the latter his commission. But he would simply, after a few words of encouragement, write to the agency with which John Jones is connected, and advise them." This gentleman was telling us that it often happens that this agent would, a little while later, write the same prospect for an additional amount of insurance. Why could not this be done by the members of the association? When an agent has spent time with a prospect, whose confidence he has succeeded in gaining in the great institution of life insurance, he has created a demand. The prospect has signed his application or has arranged to be examined, why should not the other competitors retire?

TOO MUCH BOTHER TO PROVE DEATH

How the Companies May Help Their Agents—Relations of Head Office and Field Force

The head office viewpoint and head office relations with the field force were discussed by Mr. L. G. Lugsdin, of the Toronto office of the Mutual Life of Canada. During the early years of the insurance business, he said, lack of experience created the necessity for caution if safety and security were to be conserved. The popularity of assessment societies, carrying the germ of early decay, drove the old-line companies to the opposite extreme of carefulness. "Privileges" in the policy contract were limited largely to the payment of premiums and the guarantee that death claims would be paid. "Conditions" were many and onerous. Such caution was also reflected in the agent's contract.

"The company, from head office viewpoint," said Mr. Lugsdin, "must be protected from gamblers and adventurers, whether in the guise of applicant or agent. Experience, however, assisted by competition, broadened the conception of privileges and restricted the meaning and application of conditions. A comparison between policy contracts of fifty years ago and to-day is interesting, the former having one page largely consisting of conditions, which in the latter have changed to privileges.

"Head office company officials are, and have been, willing to give all advantages warranted by due regard for safety and satisfactory financial returns. But here let me say that the action of individual companies in granting privileges in the contract of either the assured or the agent must be guided entirely by that company's ability to do so.

"Apart from the relationship between company and policyholders, directly through the policy contract, there are, arising out of this, other relationships which affect the company and the agent materially. The agent is directly affected by the opinion the public forms of the company, and this largely arises from the treatment accorded policyholders by head office officials.

Three Relationships.

"To achieve the best success we must consider three distinct and yet interwoven relationships. First, that between head office and the public; second, that between head office and agency staff; and third, between agency staff and public. Let us be certain that none of these three elements, head office, agency staff and public, is 'sufficient unto itself.' In the life business each needs the other, and is vitally dependent on the other. Therefore, the relationships co-existing must be amiable, each having for its end the highest service to the other.

"The company must be as a trustee for the public, and the public's attitude towards the company and agent must be one of absolute confidence. This attitude must be nurtured, first, by promptness in dealing with applications and

replying to correspondence, not three or four days after the receipt of a letter, but immediately, if at all possible; second, by courtesy and tact.

"Too often the purpose of the agent's work is made impossible or difficult of completion by a brusque letter from head office setting forth the company's rights, not intentionally unkind, but with lack of thought as to the effect on the recipient; third, by talking or writing in plain, untechnical terms, avoiding misconstruction; fourth, by referring everything possible to a dependable agent. Personal contact is more desirable than correspondence, otherwise we as agents would be rendered unnecessary. This, however, throws a great responsibility on us that we may intelligently discharge the double function of salesmen and interpreters. That the relationship between head office and agency staff be favorable and satisfactory is, perhaps, as vital, if not more so, to the well-being and success of the business as that of any other of the factors. In the past, the contracts of agents with head office showed little uniformity. A chronic condition of suspicion and jealousy existed among the men and a general distrust of head office prevailed. The agent's contract was far from being secure, which insecurity tended to short service and lack of loyalty. Present conditions find more nearly uniform contracts, greater approach to permanency through continuous or guaranteed renewals and recognition of length of service. There has been a marked advance of late in the recognition of the importance of the agency staff."

Discussing Mr. Lugsdin's address, Mr. J. A. Johnson, Vancouver, suggested that one of the matters which the head office should note is the "unnecessary rigmarole" which a widow had to go through in regard to the claim for insurance. "A proof of death should be attached to every policy," said Mr. Johnson. "When a policyholder dies the widow has to swear he is dead; a doctor has to swear he is dead; an undertaker has to swear he is dead; a parson has to swear he is dead; and a friend has to swear he is dead."

"The second largest company in the United States is the New England Mutual, and they take the viewpoint that this process is largely unnecessary. 'We are not going to harrow the widow' is that company's motto," said Mr. Johnson. "The claim form contains only a few questions. Surely an obituary notice, telling all the deceased's good points and omitting his bad is a pretty fair indication that a man is dead. Notwithstanding the obituary notice, however, six or seven people have to swear to the death. There should be legislation in this matter. The company which first modifies its policy in regard to claim forms is going to give a good canvassing point to its agents." Mr. Tweed, Waterloo, supported this view.

Mr. T. J. Parkes related an experience, showing how head office officials were usually willing to consider fairly the grievances and claims of agents.

Mr. Morwick, Mutual Life, Hamilton, asked whether the agents are getting quite the proper consideration from the companies. "Corporations have no souls," said Mr. Morwick, "but they have quite a lot of commonsense behind their mahogany," was the terse way he expressed the company's position. "The head office is interested in better conditions for the agency staff and the improvement of the type of canvasser. It is difficult to get real men interested in the life insurance business. When a fire or accident insurance agent dies he has a business of some value to his estate. Up to the present this has not been the case with the life insurance agent. The head office should help to remedy that condition. Any effort in that direction will repay them."

Mr. W. Lyle Reid, Sun Life, Ottawa, was presented with a diamond pin by the Dominion Life Underwriters' Association, the presentation being made by Mr. A. Homer Vipond, New York Life, Montreal, in a very pleasing speech.

Mr. Cust, Hamilton, of the Northern Life, was a delegate to the convention, this being his first experience at these gatherings. Mr. Cust is writing the bulk of his business in the country districts, chiefly among farmers. "It is hard work," he said. "One has first thoroughly to convince them that life insurance is a good thing. But once we get the farmer he stays with us. The rural districts are a good field now. The farmers are prosperous and a number of young men are left on the farms, far more comparatively than have been left in the city in view of army enlistment," concluded Mr. Cust.

AGENTS AND GOVERNMENT DEPARTMENTS

Licensing of Life Agents Taken Up With Provincial Authorities

The relations of life insurance agents and the government insurance departments were dealt with in the presidential address of Mr. W. Lyle Reid. "One of my first official duties," said Mr. Reid, "was to interview the deputy superintendent of insurance for Ontario, Mr. Vale, with the view of having a clause inserted in the provincial insurance act making it possible for the department to cancel an agent's license for such improper practices as that of rebating, misrepresentation, switching, etc. The other members of the delegation were Messrs. Goodrow, Tory and Stanford. Mr. Vale intimated that he would lay our request before the attorney-general in the hope that the suggested legislation would meet with his approval. We have reason for believing that effect will be given to our wishes in due course."

Reciprocal Law Suggested.

"It was anticipated that the legislature of Quebec would exact a reciprocal law as regards agents' licenses, thus opening the way for an interchange of these licenses as between the two provinces. Assembly Bill No. 182, however, for which Mr. Robert, of Rouville, stood sponsor, and which is now law, is in reality a retaliatory measure. The practical outcome is the creation of a "deadlock" and, for the purpose of obtaining some measure of relief, your president, in conjunction with Mr. Tory, went into the matter first with Mr. Vale, of the Ontario Department, and later on, assisted by Mr. A. S. Wickware, the president of the Ottawa Association, with Sir Lomer Gouin and the Hon. Mr. Mitchell, the provincial treasurer of Quebec. The crux of the whole situation is the phrase in sub-section three of section five of the Ontario Act of 1914, which says that a man must be "a resident of Ontario" in order to obtain a license. The point of view of the Quebec authorities is that any "citizen of Canada" should be entitled to a provincial license. My purely personal opinion is that there is considerable force to this contention, because, after all, your legal status and mine isn't that of a resident of the province so much as the fact that each of us is a citizen of Canada, and, as such, a British subject. I sincerely trust that success will attend the efforts of the incoming executive to remove this deadlock."

Consulted by Attorney General.

"Upon several occasions I have made the statement that the Life Underwriters' Association has earned the recognition of the executive heads of the insurance departments of our federal and provincial governments. I don't think we are immodest when we say that this recognition is the direct outcome of the extent to which we have impressed them with the idea that we are sincere in our desire to keep the business of life underwriting on a high plane. As illustrating the force of this remark, I might point out that our good friend, past-president Machum, of St. John, was consulted by the attorney-general of that province during the past year and asked to make certain suggestions relative to the improvement of the New Brunswick Insurance Act. It has also come under my notice that Messrs. H. B. Andrews and R. S. Howland, of Winnipeg, were instrumental in convincing the Manitoba legislature that a bill introduced there, and which was designed to give local municipalities authority to tax outside agents \$15.00 for the privilege of doing business, would be a decidedly unfair piece of legislation."

Mr. T. B. Parkinson, Aetna Life, London, was presented with a club bag, in appreciation of his valuable services as chairman of the transportation committee for many years. The presentation was made by Mr. T. J. Parkes, Sherbrooke, on behalf of the association. "I hope you will fill it with applications for insurance," said Mr. Parkes. "The man who sold us the bag carries \$300,000 life insurance," he added. In submitting the crisp report of his committee, Mr. Parkinson expressed the appreciation of the association to the press, *The Monetary Times* being among the journals specially mentioned in that connection.

WANT INSURANCE LAW AMENDED

Agents Desire the Practice of “Switching” to be Penalized

The life insurance agent who “switches” the holder of a policy from one company to another may be brought within the scope of the law in the near future. This was intimated in the report of the grievance committee, presented by Mr. John R. Reid, Sun Life, Ottawa, its chairman. The committee on March 10th last investigated and reported upon a case where an agent of one company had just about completed the operation of “switching” the holder of a \$3,000 twenty payment life policy upon which five payments had been made, by inducing him to take the cash surrender value and apply for a whole life policy in the agent’s company. The deal slipped a cog, however, because the head office of the company affected, when the cash surrender value was applied for, very properly notified its Quebec agent who got busy, interviewed the policyholder and succeeded in persuading him to continue his policy. The Quebec Association wrote the Dominion Superintendent of Insurance for his opinion which was received in the following terms:—

“From the facts contained in your letter, it appears to me that this is a case of what is commonly known as ‘twisting,’ in which the agent of one company endeavored to persuade a policyholder in another company to surrender his existing policy and take a policy in the company represented by the agent.

“There has been more or less discussion in recent years regarding this evil, and I understand that, in some of the States of the United States, legislation has been enacted with the object of preventing its continuance. The Dominion Insurance Act, however, does not contain any provisions regarding this practice and I am therefore of the opinion that the agent in question cannot be proceeded against under the act.”

The Quebec Association was thus replied to on behalf of the grievance committee.

“This case has been very carefully considered and the writer concurs in the opinion expressed by the superintendent

of insurance, namely, that no proceedings can be taken under the act because it does not cover such practices. Allow me to assure you that I, personally, deprecate the unfair and dishonest practice of ‘switching’ or ‘twisting’ in the strongest possible manner, and that, I am satisfied, is the view of all right thinking life underwriters and all such will join with you in believing it to be the duty of our organization to endeavor to have the law so amended as to enable agents who practise this nefarious business to be penalized.”

Public Did Not Understand.

Another interesting case was that reported by the Brantford Association. On this, the grievance committee’s report said:—

“The complainant alleged deliberate misrepresentation of policy contract—a most reprehensible and serious charge, if true. The complaint was gone into very fully as the accompanying evidence will show. Notwithstanding the report of the local association committee which decided that the complainant’s charges were sustained, the chairman of your grievance committee arrived at a different conclusion and was so convinced in his own mind that he did not submit the case to the other members of the grievance committee. As evidence, a certain number of declarations were submitted in substantiation of the charge while, on the other hand, an equal number of affidavits, regularly made, were submitted, testifying directly opposite, and giving the highest possible character to the agent complained against, who makes an affidavit in his own behalf backed up by a certificate of character from his district manager who occupies the position of vice-president of this association. To explain your chairman’s point of view the following quotation is made from a communication addressed to the secretary of the local association: ‘The writer has known of repeated cases where, to his certain knowledge, insurance, under 20-payment life contracts, had been written up honestly and intelligently and the parties, owing to the very lack of knowledge of insurance matters, to which reference is made by your committee, have entirely misunderstood the terms of their contracts.’ I have no doubt that each member of your association has had a similar experience in this regard.”

MANUFACTURERS MUST HAVE INSURANCE

Best Patrons of the Life Insurance Companies Are the Most Successful Business Men

"The best patrons of the life insurance companies are the most successful business men." That was one of the telling remarks of Mr. Kenneth Bethune, general manager of the American Car Company, Hamilton, in addressing the convention on the subject of life insurance from a manufacturer's viewpoint. He discussed the many benefits of life insurance in such an attractive way as to elicit the delegates' opinion that the insurance profession had lost a good man when Mr. Bethune went into the manufacturing business.

"To the business man who knows the fickleness of fortune, life insurance reveals itself as a sure investment," said Mr. Bethune, "though to many of the unthinking it is erroneously regarded as an expense. Fire insurance and all other forms of insurance except life insurance insure against contingencies which may never occur, but there are two things which we cannot escape, namely, death and the taxes, and a life insurance policy carried to maturity is sure to be paid in full. Except in a few cases, where the insured lives to an extreme old age, he or those who survive to bear his name are sure to get back all that has been so invested at a fair rate of interest, and in cases of early maturity of the policy a tremendous return. A life insurance policy is not taxable and its value does not fluctuate. Real estate, stocks and bonds frequently depreciate in value in times of financial disturbance—its value is almost always increasing, for, unfortunately, I have known of one or two now discarded systems which failed under fire, but these are hardly worth mentioning, as it is only by avoiding our own mistakes and the mistakes of others that we may hope eventually to attain to perfection.

Safest System of Finance.

"Life insurance is the safest system of finance ever devised. Banks break, stocks depreciate, but life insurance, founded on a scientific basis, its investments restricted by law to the best securities, always meets every obligation in full. It protects business and investment. By means of its loan feature it helps to tide over illness, accident, expensive operation of family, loss of employment, or loss of fortune. It fosters good habits, it increases credit, it even lengthens life by lessening worry, by giving peace of mind, and by its medical examinations often discovering disease in time to remedy it. It makes an ideal investment for any size sum, and can be made to provide a sinking fund to educate children to carry out big business or philanthropic projects, to grasp business opportunities and to insure comfort in old age.

Savings Bank Accounts.

"It is easier to make money than to keep it. Every rich man finds this to be true. We hear it frequently said by those who should know better that they can handle their surplus cash better than any life insurance company, and yet few savings bank accounts are even ten years old, and are there any of us who have not lost thousands of hard-earned dollars by unwise investments which looked very alluring at the time.

"One of the greatest endorsements of life insurance is the character of the people who patronize it. Inquiry in any community will develop the fact that the best patrons of the life insurance companies are the most successful business men—the shrewdest financiers—men who have the best opportunities to purchase the choicest securities at the most attractive prices, and yet these men patronize life insurance heavily because of the service it renders. They know the fickleness of fortune and desire to have a good sum beyond the danger zone which will help them when they or their business or their dependants need it most. The improvident man lives from day to day and makes little or no provision for the morrow. When adversity overtakes him he has nothing to fall back upon except the charity of friends or strangers. The prudent man provides for the future, and when the needful day comes he has resources of his own upon which to draw. Man goes through this life but once. Happy is he who is wise enough to purchase such an amount of life insurance as his means will afford. He will find it his best investment—a sure, faithful and trustworthy friend. Life insurance, in a word, is one of man's most valuable possessions."

LEGAL NOTICE

THE LOWNDES COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the seal of the Secretary of State of Canada, bearing date the 20th day of June, 1916, incorporating Elroy Barrie Schroeder, manager; Charles Arnold Stone, accountant; Harry Booker Sweetapple Hammond, student-at-law, and Jessie Harold Whitcomb and Annie Hunter, spinsters, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz:—

(a) To manufacture, buy, sell and deal in goods, wares and merchandise of all kinds;

(b) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights;

(c) To apply for purchase or otherwise acquire, any patents, brevets d'invention, grants, leases, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to pay for the same in cash, shares or other securities of the company or otherwise, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired;

(d) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same;

(e) To enter into any arrangements with any Government or authorities, supreme, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges, franchises and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with or surrender any such arrangements, rights, privileges, franchises and concessions;

(f) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors or associates in business) or the dependents or connections, of such persons, and to grant annuities, pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object;

(g) To promote any company or companies for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company;

(h) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business, or capable of being profitably dealt with in connection with any of the company's property or rights for the time being;

(i) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable and transferable instruments;

(j) To purchase, lease or otherwise acquire and to hold, exercise and enjoy in its own name, all or any of the property, franchise, goodwill, rights, powers and privileges held or enjoyed by any person or firm or any company or companies, and to pay for such property, franchise, goodwill, rights, powers and privileges wholly or partly in shares of the company wholly or partly paid up, and to undertake the liabilities of any such person, firm or company;

(k) To aid in any manner any corporation any of whose shares of capital stock, bonds, debentures or other obligations are held or are in any manner guaranteed by this company, and to do any act or things for the preservation and protection, improvement and enhancement of the value of any such shares of capital stock, bonds, debentures, or other obligations, and to do any and all acts tending to increase the value of any of the property at any time held or controlled by this company;

(l) To purchase, take or acquire by original subscription or otherwise, and to hold and, with or without guarantee, to sell or otherwise dispose of shares, stock, whether common or preferred, debentures, bonds and other obligations in and of any other company carrying on a business in whole or in part similar to that of the company, and to pay for such shares, stocks, debentures, bonds, and other obligations either in cash or partly in cash, or to issue shares of this company, fully paid up or partly paid up in payment, and notwithstanding the provisions of section 44 of the said Act, to use the funds of the company in the purchase of shares, stock, debentures, bonds, and obligations in and of any such other company, and to vote on all shares so held through such agent or agents as the directors may appoint.

(m) To sell, let or hire, or otherwise deal with the assets of the company, or any part thereof, for such consideration as the company may think fit, and in particular for shares, debentures, debenture stock or other securities of any other company;

(n) With the approval of the shareholders, to remunerate any persons for services rendered to the company, in such manner as the company may deem expedient, and more particularly by the issue and allotment of shares, bonds and other securities of the company, wholly or partially paid up, but nothing in this clause contained shall be deemed to limit the power of the directors to fix and pay the salary of any and all officers, servants, agents and employees of the company;

(o) To lend money to customers and others having dealings with the company and to take security for the loan of such money; to guarantee the performance of the contractual and other obligations of any such persons and to give any guarantee or indemnity as may seem expedient;

(p) To pay out of the funds of the company all expenses of or incidental to the formation, registration and advertising of the company, or in or about the promotion of this company or the conduct of its business;

(q) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations;

(r) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company;

(s) To do all or any of the above things as principals, agents, contractors or otherwise, and either alone or in conjunction with other, and either by or through agents, sub-contractors, trustees or otherwise;

(t) To do all such other things as are incidental or conducive to the attainment of any one or more of the above objects, and so that the objects specified in each paragraph of the clause shall, except when otherwise expressed in such paragraph, be in no wise limited or restricted by reference to or inference from the terms of any other paragraph or to or from the name of the company;

(u) To acquire and take over as a going concern the several businesses now carried on at the City of Toronto, in the County of York, under the Ontario Corporation, The Lowndes Company, Limited, with all the assets, stock-in-trade, and real and personal property owned or used in connection therewith and the goodwill thereof, and all the rights and contracts now held by said corporation, subject to the obligations, if any, affecting the same, and to pay for the same in paid-up shares of this company.

The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Lowndes Company, Limited," with a capital stock of five hundred thousand dollars, divided into 5,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 22nd day of June, 1916.

THOMAS MULVEY,

Under-Secretary of State.

52-2

EFFICIENCY IN INSURANCE WORK

Combining a mixture of funny stories and epigrams, and an assurance of his pro-British neutrality, with a few references to the benefits of life insurance and some valuable hints as to how to get results, Mr. George T. Wilson, vice-president of the Equitable Life, of New York, addressed the life underwriters at Hamilton last week. Mr. Wilson has a genial personality and an easy way of speaking. He calls Pittsburgh, Pittsboig and pronounces such words as work, hurdles and heard, wolk, hoidles and hoid. This yielded a musical effect and may have been a New Jersey demonstration of efficiency in pronunciation.

Efficiency, Mr. Wilson described as system plus horse-sense. Efficiency, he added, was meant to take the frenzy out of business, to make the blows fewer and more effective, and to obtain results with less waste.

"Promise without fulfilment," continued Mr. Wilson, "has no cash surrender value. A man who thinks he can do anything and get anywhere by giving 99 cents worth of

time for a dollar's worth of results, is making a big mistake. Success depends on fight, not flight. Life is an uphill climb, and the further we go up, the further we have to go. The easy down grade is largely the poet's fancy.

"Efficiency could often be obtained by not doing something which heats us up so that we have to take something to cool us down. There are only two kinds of people, those who lift and those who lean. There are 20 leaners to every lifter."

Mr. Wilson painted a glowing picture of the benefits of life insurance, for which, he said, there is no substitute. "No thinking man in these days gainsays the fact that life insurance is a necessity and that every man should carry life insurance."

"British Columbia produces more insurance per capita than any other province in Canada."—Mr. J. A. Johnson, Vancouver.

Winnipeg, Man.—July 11—Automobile of Mr. J. Couture, 466 St. Jean Baptiste Street, St. Boniface.

DOMINION BANK'S HALF-YEAR.

The Dominion Bank's return for the first half of 1916 shows profits of \$491,934, after deducting management charges, etc., and a balance brought forward of \$344,439. The sum of \$46,715 is allotted for government taxes, \$360,000 for dividends, and \$25,000 for patriotic fund contribution, and the balance carried forward is \$404,658.

The balance sheet shows assets approximating \$88,892,683, of which a large proportion were liquid assets, the total being \$37,204,989. Current loans in Canada are shown as reaching nearly \$45,000,000. In the liabilities deposits total \$67,107,784.

DOLLAR BONDS IN ENGLAND

Commenting on Western Canada's refunding scheme, the Wall Street Journal says:—"In carrying out their scheme of refunding Winnipeg and Manitoba will naturally require the co-operation of the British Government in gathering in the sterling securities and settling upon a price with the holders. This assistance will no doubt be forthcoming if it is not already assured, since the government stands to gain by reason of the fact that the transaction will tend to stabilize further sterling exchange. It can be taken for granted that if the supply of dollar bonds in England is exhausted and the present scheme is brought to a successful consummation, other Canadian cities and provinces will be urged to follow suit, if they do not do so on their own initiative. Thus a new source of New York credits is opened to the British government, and the process can be repeated so long as the absorptive powers of the New York security market are unimpaired. In fact it is conceivable that neutral countries might be induced to adopt similar measures for refunding their sterling debts into dollar issues, though here there would have to be sufficient incentive in the shape of a profit in exchange, which in the case of the British colonies might be ignored out of loyalty for the Empire."

A prize list of sixty-three thousand dollars, the largest share of which goes to Canada's producers, is planned by the Canadian National Exhibition, Toronto.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Hudson's Bay Company.—The acreage of farm lands disposed of has risen from 8,600 to 45,100 acres, and the value from £31,100 to £147,000. Town lots shared in the improvement, the value of sales rising from £2,060 to £5,500. The total receipts of the land department for the quarter stand at £76,500, or an increase of £33,100 as compared with last year.

Smart-Woods, Limited.—The shareholders of the company ratified the bond issue to which reference was made in the last issue of *The Monetary Times*. The company has sold this issue of half-million dollars first mortgage serial bonds at a satisfactory price, the proceeds of same to be used to pay off loans. The previous issue of one million dollars of first mortgage bonds is being retired, the company finding that \$500,000 was sufficient to take care of its requirements.

Kaministiquia Light and Power Company.—Directors of the Kaministiquia Light and Power Company have declared a quarterly dividend of 1½ per cent., payable August 15th, to holders of record July 31st; this is an advance of quarter per cent. on the last declaration. In 1910 Kaministiquia Power started paying 2¼ per cent. per annum, in 1911 this was raised to 3 per cent., in 1912 to 4 per cent., in 1913 to 5 per cent., in 1914-15 to 6 per cent., and it is now on a 7 per cent. basis.

Consolidated Mining & Smelting Company.—This company is controlled by the Canadian Pacific Railway Company, according to a statement of the railway company. The annual statement of the Canadian Pacific Railway indicated that the company held 26,190 shares of Smelters stock. At that time 58,052 shares of Smelters stock had been issued. The road, however, also owned control of the West Kootenay Power & Light Company, which was taken over by Smelters early this year, the basis of the deal being \$75 par value of Smelters for \$100 of West Kootenay.

Canadian Car and Foundry Company.—President Curry stated at the company's annual meeting, that the profits of the parent company and its subsidiaries for the first nine months of the present year amounted to \$1,178,353. After taking off \$298,000 for depreciation and renewals and \$480,717 for bond interest, the net earnings were \$398,742, which more than takes care of the preferred dividend. In addition to the \$298,000 written off for depreciation, \$600,000, the purchase price of new machinery, was written off. This was on home business, irrespective of Russian business.

On July 22, unfilled orders on the books of the company amounted to \$12,664,000. Of this total \$4,281,000 is held by the Canadian Steel Foundries and the balance by the Car Company. Of the total orders, \$6,949,545 is regular car business. The Canadian Steel Foundries has an order of \$3,202,000 for munitions. Regarding home business Senator Curry said that the \$398,000 profits were shown on business of about \$7,000,000. Domestic business was better than for two years past. Many of the railroads were already buying cars and would soon be in the market for more. Some of the export car business had to be completed at a loss. It was new business that had to be learned, but was going along nicely now. Orders placed by Canadian railways during 1914 and 1915 were only about 10 per cent of normal, but they have shown rapid improvement of late.

Though the company had earned its preferred dividend this year, it would be impossible to resume payments until the company had got back the \$3,500,000 expended on Russian business. There might be some hope of a dividend in January.

The financial report of Lethbridge, Alta., contains an interesting catechism prepared by Mayor W. L. Hardie to furnish the taxpayers with full information regarding the municipality's development. The auditor's report and other statistics are included.

For an issue of Raleigh Township, Ont., bonds, the following bids were received from Toronto, that of Messrs. G. A. Stimson & Company, Toronto, 99.03 being successful. The other offers were Brent, Noxon & Company, 98.39; Imperial Bank, 98.27; C. H. Burgess & Company, 97.74.

DEBENTURES FOR SALE

DEBENTURES FOR SALE

Sealed Tenders addressed to the undersigned and marked on outside "Tender for Debentures" will be received up to noon of Tuesday, the 8th day of August, 1916, for the purchase of \$25,000 General Debentures of the Town of Walkerville and accrued interest payable in 10 instalments, with interest at the rate of Five per cent. per annum.

The debentures will be delivered and must be settled for at the Town Treasurer's Office, Walkerville.

All debentures bear interest from July 14th, 1916, and have interest coupons attached. The principal and interest payable at the Canadian Bank of Commerce, Walkerville, on the 14th December in each year.

The highest or any tender not necessarily accepted.

For any further particulars required address

ALFRED MIERS,

Town Clerk.

Walkerville, Ontario, July 14th, 1916.

CONDENSED ADVERTISEMENTS

The Canadian Northern Railway's statement of earnings and operating expenses for June is as follows:—

	1916.	1915.	Increase.
Gross earnings	\$3,377,200	\$1,779,600	+ \$1,597,600
Expenses	2,392,200	1,386,300	+ 1,005,900
Net earnings	985,000	393,300	+ 591,700
Mileage in operation ...	9,296	7,761	+ 1,535

NOVEL SUGGESTIONS FOR SELLING LIFE INSURANCE

Mr. Russell T. Collins, Canada Life, Hamilton, was the winner of the \$25 prize offered by Mr. W. McBride, Winnipeg, for the most novel suggestion for selling life insurance. He related his experience:—

"Some months ago I called on a young farmer to solicit him for life insurance and found him very indifferent to the usual arguments used by me to interest him in my proposition. During the course of the conversation the fact developed that he was the possessor of a particularly fine trotting horse with which he had won a number of races. I had, as we often do in canvassing, an inspiration and put the following proposition to him:—

"Supposing, as a bookmaker, I came to you with a \$5,000 bond guaranteed by the Dominion government and were willing to deposit same subject to your order and the following conditions: That I would bet you 20 to 1 that your horse did not win his next race and would guarantee to renew the bet for the next 20 races. If at the end of the 20 races your horse did not win, we would give you the \$5,000 anyway, and if you got cold feet any time after the third race and did not desire to bet further we would return to you all your money less the amount necessary for running our business. After outlining this proposition I asked him if he would consider such, and he said, 'Try me.' I then proceeded to show him where he was the race horse; we, backed by the Dominion government guaranteed, that we would bet him at 20 to 1 that he did not live another year, we would be willing to renew the bet every year during the 20 years, and if he were alive at the end of that time we would give him the \$5,000 anyway. He immediately saw the point and to-day is the happy possessor of a 20-year endowment policy."

Mr. E. J. L'Esperance, Imperial Life, Montreal, advocated ten calls by the life insurance agent every day, with five heart to heart talks, with a sincere conviction of the value of what the agent had to offer the prospect.

Mr. McKay, Hamilton, Mutual Life of Canada, told of canvassing a prospect, who already had insurance in several other companies. The interview took place at 1.30 a.m. The prospect asked why, when he was satisfied with his present companies, he should place his new insurance with Mr. McKay. "The reason you should give it to me is simply because I am here right now to write it," said Mr. McKay, who advised life insurance agents when they came to the psychological selling moment to "psychologize that moment."

Mr. Newton H. Brown, Great-West Life, Toronto, gave the following illustration of the value of life insurance:—

Assume a prospect with property bearing \$5,000 mortgage at 5% per cent. A \$5,000 policy maturing in, say, 20 years at a surrender value equal to its face at a cost of \$200 per year. It is evident that the cash return shows about 3% per cent. compound interest. Therefore the actual cost of the protection is the loss of interest or 2 per cent. on the premiums paid. This cost the first year will be 2 per cent. on \$200 or \$4 and it will increase \$4 per year during the period. Thus the second year cost for carrying the \$5,000 risk will be \$8, the third \$12, fourth \$16, fifth \$20, or for the five years \$60. The total cost for 10 years will be \$220, or an average of \$22 per year. For the full period the difference in interest will be \$840 covering the cost of protection for \$5,000 for 20 years, or an average rate on a term basis of \$8.40 per \$1,000 per year with this remarkable difference that while the average for the 20 years is only \$8.40 per \$1,000 per year, the average for the first 10 years is only \$2.20 per \$1,000 per year and for the first five years only 60 cents per \$1,000 per year."

(Note.—Compound interest makes the apparent difference much larger than \$840 for the 20 years; but discounting this at compound discount to obtain the average cost shows a slightly lower average cost than \$8.40 per \$1,000—viz., \$8.16.)

Other competitors in this competition were Mr. T. Bourke, North American Life, Toronto; Manning, Mutual Life of Canada, Toronto; Vivian, London Life, London; T. Mills, London and Lancashire Life, Kingston; Turtle; Vivian Reeve, London; Reid, Brantford; Mann, National Life, Hamilton; and Ballantyne.

The judging committee was composed of J. W. W. Stewart, Monarch Life, Winnipeg; A. J. Meiklejohn, Confederation Life, Montreal; E. R. Machum, Manufacturers' Life, St. John.

Is Your Estate Properly Protected?

No matter how little or how much you own, these possessions make up your estate, and should be protected by efficient and economical management.

This can best be done by an Executor or Trustee.

This Company, by acting in this capacity, will give your estate the benefit of experience gained in the management of many estates, of large and of only moderate size, and will scrupulously guard the interests of your heirs.

No charge for drawing up your will when the Sterling Trusts Corporation is appointed your Executor and Trustee.

Our officers will give you further information on request.

INVEST IN RUBBER Plantation Companies' Shares

A Montreal Investor writes:—

"I was planting in Ceylon for several years, and have an intimate knowledge of Plantation Rubbers, and am a considerable shareholder in several properties. . . . I have the greatest faith in rubber shares as an investment. . . . My shares brought me in over 13% net all over last year on the original sum invested."

Another client writes:—

"I am a large holder of shares . . . and have had an Eastern experience, and now is certainly a great opportunity. . . . I am willing to purchase another 350 to 500 shares."

(Originals may be seen at our office.)

By Order of the Board.

GEO. M. MATTIS,
Treasurer.

Champaign, Ill.

NOTICE OF Judicial Sale of Property

Pursuant to the Order Nisi and the Final Order for Sale in S.C. 10623, Judicial District of Calgary, there will be offered for sale, with the approbation of a Judge of the Supreme Court of Alberta, by Henry M. McCallum, Auctioneer, at the Court House, in the City of Calgary, in the Province of Alberta, at Two o'clock in the afternoon, on Wednesday, the 6th day of September, A.D. 1916, standard time, the following lands and premises, being and comprising:—

1. The whole of the Railways and branches constructed or acquired by the Defendant between a point on the Canadian Pacific Railway, one mile west of Pincher Station, in the Province of Alberta, and Beaver Collieries, the property of North American Collieries, Limited, a distance of about 14 miles, with all lands or right-of-way owned or used by the Defendant as appurtenant thereto, stations, freight houses, side tracks, shops, yards, engine-houses and other buildings and structures used in connection with the said Railway and Branches, or any part thereof, together with the franchises of the Defendant in respect to the same.

Terms: Ten per cent. cash; 15% in ninety days; 25% in six months; 25% in 9 months and 25% in 12 months. The last three payments bear interest at 5%.

Dated at the City of Calgary, in the Province of Alberta, this 3rd day of July, A.D. 1916.

LAURENCE J. CLARKE,
Clerk of the Court.

Approved: "L. F. Clarry."

The Canadian National Exhibition, Toronto, has been visited by fire at different times. The last occasion was in 1906, when \$350,000 worth of buildings were destroyed, including the Grand Stand.

Mr. W. J. Black has been appointed as Dominion commissioner of agriculture, succeeding the late Mr. C. C. James. Mr. Black was born at Mansfield, Ont., and is a graduate of Guelph Agricultural College and Toronto University. After editing the western edition of the Farmer's Advocate he was appointed, in 1905, president of the Manitoba Agricultural College, previous to coming to Ottawa.

Mr. J. Hendry, president of the British Columbia Mills Timber and Trading Company, died at Vancouver some few days ago. The late Mr. Hendry was a prominent factor in the lumber business of the Pacific Coast. He was also promoter of the Stave Lake Power Company, which was absorbed by the Western Canada Power Company; chairman of the Burrard, Westminster and Boundary Railway and Navigation Company; director of the British Columbia Sugar Refining Company; member of the Canadian Conservation Commission; honorary president of the British Columbia Lumber and Shingle Manufacturers, Limited; past president of the Canadian Manufacturers' Association; and past president of the Canadian Forestry Association; and was also president of the Vancouver board of trade for two years.

You Can Improve Your Position

Have you heard of the Sales and Intelligence Departments of the Canada Life?

They give special assistance to the Company's representatives.

They teach a man the insurance business by correspondence and personal assistance free of charge.

Then they place him in a position and help him to make good.

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this. All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policyholders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

Losses paid since organization over \$39,000,000.00

SIMPLICITY FIRST

is about as important in your life assurance as "Safety First," because a contract that is not simple to understand may not be safe for your particular purpose.

The life assurance policy of the future must be an attractive and exactly worded contract, but above all CLEAR and SIMPLE — the new policy standard as set by

*NOTE.—It will be noted that the figures relating to the imports of coin and bullion for the twelve months ending May, 1916, amounted to \$34,129,108, as against \$132,349,976 for the same period of 1915-16. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Montreal, Que.—A temporary loan of \$2,000,000 has been authorized by the board of control.

New Glasgow, N.S.—Tenders close on July 28th for \$12,500 5 per cent. 10-year bonds. J. Roy, town clerk.

Walkerville, Ont.—For an issue of \$25,000 5 per cent. 10 instalment bonds, tenders close on August 8th. A. Miers, town clerk. (Official announcement appears on another page).

Winnipeg, Man.—An offering is being made of the Greater Winnipeg water district \$1,500,000 five per cent. bonds, due at the end of five years, purchased by Messrs. Wood, Gundy & Company, and the Dominion Securities Corporation of Toronto, and Messrs. C. Meredith & Company, Limited, of Montreal.

British Columbia.—The following certificates of approval have been issued by the municipal department:—
New Westminster, bonds, \$12,390.11, for local improvement paving, 5 per cent., 20 years, payable half-yearly; Nelson, hospital by-law, \$30,000, 5 per cent. bonds, 20 years, payable half-yearly; Point Grey, local improvement paving, \$10,756, 5 per cent., 10 years, payable half-yearly; Richmond, bonds, \$24,500, issued under waterworks by-law, 5 per cent., 40 years, payable half-yearly; Trail, school, \$7,500, 6 per cent., 20 years, payable half-yearly.

Carleton County, Ont.—The tender of \$41,433 by the Imperial Bank for the issue of \$40,000 5½ per cent. bonds was successful. Other bids were:—

G. A. Stimson & Company	\$41,404
Wood, Gundy & Company	41,332
Royal Securities Company	41,280
C. H. Burgess & Company	41,250
A. H. Martens & Company	41,107
Brent, Noxon & Company	41,061
Mulholland, Bird & Graham	40,908
W. L. McKinnon & Company	40,864
Macneill & Young	40,850
R. C. Matthews & Company	40,540
McDonald, Bullock & Company	40,506
Kerr, Bell & Fleming	40,316

Saskatchewan.—The following is a list of bond applications granted by the local government board:—

School Districts.—Griffin, \$6,000. W. Worten, Griffin; Elmwood, \$6,200. W. F. Chedister, Cadillac; Patriotic, \$1,600. H. Hovind, Summer Cove; Palmerston, \$1,200. S. A. Warne, Stony Lake; Clifton Bank, \$1,500. R. C. Tuff, Alsask; Farville, \$1,600. H. H. DeCamp, Radville; Bulth, \$1,500. A. J. Price, Whitebush.

BANK BRANCHES OPENED AND CLOSED

During June, 1916, there were 9 branches of chartered banks opened and 8 closed, according to Houston's Bank Directory:—

Branches Opened—9.

+Camp Hughes, Man.	Bank of Hamilton.
+Camp Hughes, Man.	Bank of Montreal.
+Glen Sutton, Que.	Canadian Bank of Commerce.
+Notre Dame du Rosaire, Que.	La Banque Nationale.
+Petawawa, Ont.	Bank of Montreal.
+St. Janvier, Que.	La Banque Nationale.
Ste. Marie Beauce, Que.	Banque d'Hochelaga.
Turtleford, Sask.	Canadian Bank of Commerce.
Valcartier Camp	Bank of Montreal.

Branches Closed—8.

Calgary, Alta., East End (closed July 6th)	Bank of Montreal.
Clive, Alta.	Quebec Bank.
McGregor, Ont.	Banque Provinciale du Canada.
Medicine Hat, Alta.	Imperial Bank of Canada.
New Westminster, B.C.	Dominion Bank.
St. Joseph du Lac, Que.	Bank d'Hochelaga.
Ste. Marie Beauce, Que.	The Molsons Bank.
South Porcupine, Ont.	Canadian Bank of Commerce.
Vancouver, B.C., Fairview Branch	Dominion Bank.
+Sub branches.	

Mr. William Wallace, for some years general manager of the Crown Life Insurance Company, has resigned his position. Mr. Wallace has been closely identified with the company since it commenced business. In the earlier years of its history he occupied many positions, and upon the reorganization of the company a few years ago, he was appointed general manager.

Bank Statement Reflects Good Business

CURRENT Loans in Canada are Less, Indicating that Industrial Corporations are Financing More Easily—Increased Note Circulation Points to Business Activity—Deposits Make a New High Record—Municipal Loans are Larger.

	June, 1915.	May, 1916.	June, 1916.	Year's Inc or dec.	Month's Inc. or dec.
Deposits on demand	\$349,057,351	\$412,301,481	\$428,117,340	+22.6	+ 3.8
Deposits after notice	683,761,432	765,064,041	767,598,130	+12.2	+ 0.32
Current loans in Canada	759,934,154	763,136,817	747,470,541	- 1.5	- 2.09
Current loans elsewhere	39,273,120	59,600,342	60,081,584	+53.06	+ 0.80
Loans to municipalities	46,889,816	43,924,000	46,773,032	- 0.23	+ 6.3
Call loans in Canada	73,628,187	84,826,636	86,776,474	+17.8	+ 2.2
Call loans elsewhere	124,604,875	163,406,659	182,757,015	+46.7	+11.6
Circulation	99,625,426	114,847,323	123,373,395	+24.2	+ 7.4

THE above are the principal changes during June, in the latest statement of the chartered banks to the government. Deposits again make a new high record. Municipal loans have increased as have also call loans at home and abroad. Current loans in Canada are smaller and note circulation larger. Current loans abroad are greater.

The following table shows the trend of the Canadian loans account for the past thirteen months:—

Loans.	Current in Canada.	Call in Canada.
1915—June	\$759,934,154	\$73,628,187
July	758,349,517	71,168,233
August	758,342,735	71,855,565
September	771,686,757	71,578,886
October	780,785,754	74,574,270
November	777,162,563	83,203,787
December	775,517,947	84,228,155
1916—January	758,500,492	82,584,659
February	760,873,181	81,949,125
March	770,139,526	81,747,512
April	777,764,682	82,527,448
May	763,136,917	84,826,636
June	747,470,541	86,776,474

Despite the general business activity, as reflected in increasing railroad earnings, bank clearings and export trade, current loans in Canada in June were \$16,000,000 or nearly 3 per cent. less than in the previous month. In June, they were lower than at any time during the past thirteen months. The increase in note circulation, however, by about \$8,000,000 or 7.4 per cent. during June, indicates increasing business activity. Circulation is \$24,000,000 or 24 per cent. greater than a year ago, thus affording a better barometer of business conditions than current loans, which are \$13,000,000 or 1.5 per cent. less than a year ago. The position in regard to current loans confirms the impression that Canadian industrial corporations are reducing their bank loans largely as a result of profits on war orders. The payments on these orders are prompt and have helped corporations to finance more

easily than hitherto and without the assistance of bank loans. These facts in turn have contributed to the rising aggregate of call loans abroad, which in June totalled \$182,000,000, an increase of \$19,000,000 or 11.6 per cent. as compared with the previous month, and a gain of \$58,000,000 or 46.7 per cent. as compared with a year ago.

The course of call loans abroad for the period beginning two months before the declaration of war, is of interest and is shown in the following table:—

1914—June ...	\$137,120,167	July	\$117,821,174
July	125,545,287	August	120,607,677
August	96,495,473	September ...	135,108,412
September	89,521,589	October	120,681,624
October	81,201,671	November	135,530,562
November	74,459,643	December	137,157,869
December	85,012,964	1916—January ..	134,248,552
1915—January ..	85,796,641	February	139,138,651
February	89,890,982	March	141,889,989
March	101,938,685	April	147,146,443
April	121,522,971	May	163,406,659
May	136,098,835	June	182,757,015
June	124,604,875		

Call loans abroad are at their highest level in recent years. The following table shows the course of the loan accounts for the past five years:—

	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1912	\$848,940,089	\$34,254,568	\$68,701,855	\$120,569,812
1913	899,260,009	36,894,681	68,642,377	89,363,520
1914	838,276,428	46,186,854	67,401,484	137,120,167
1915	759,934,154	39,273,120	73,628,187	124,604,875
1916	747,470,541	60,081,584	86,776,474	182,757,015

Current loans in Canada are approximately \$100,000,000 less than in 1912, the decrease being largely accounted for by the reasons given above. Current loans abroad are double the total of June, 1912. Call loans in Canada in June at \$86,000,000 were higher than in any June of the past five. They show an increase of 2.2 per cent. during the month and 7.8 per cent. during the year.

Of the deposit in Central Gold Reserves \$6,710,000 is in gold coin; the balance is in Dominion Notes.

The following table shows the course of domestic deposit accounts for the past thirteen months:—

	On demand.	After notice.
1915—June	\$349,057,351	\$683,701,432
July	340,950,215	691,731,719
August	334,022,174	692,580,626
September	359,315,280	693,339,851
October	392,042,193	701,330,850
November	406,735,171	714,219,286
December	423,600,384	720,090,267
1916—January	387,002,026	714,264,486
February	389,825,667	728,242,609
March	389,165,388	738,169,212
April	402,060,955	748,359,957
May	412,301,481	765,064,041
June	428,117,340	767,508,130

The deposits record for the past five years for the month of June is given in the following table, compiled by *The Monetary Times*:—

	On demand.	After notice.	Total.
June.	\$373,500,180	\$631,317,687	\$1,004,817,876
1912	362,769,928	622,928,969	985,698,897
1913	355,006,220	663,650,230	1,018,656,459
1914	349,057,351	683,761,432	1,032,818,783
1915	428,117,340	767,508,130	1,195,715,470

Both demand and notice deposits made important gains in June, the former increasing \$16,000,000 or 3.8 per cent. and the latter \$2,500,000 or 0.32 per cent. Compared with a year ago, demand deposits are \$79,000,000 or 22 per cent. greater, while deposits after notice are

Dominion Government--June, 1916

T. C. BOVILLE, Deputy Minister of Finance.

\$84,000,000 or 12.3 per cent. larger than a year ago. Total demand and notice deposits are \$1,195,000,000, the highest sum on record. This total compares with current and call loans at home and abroad of \$1,123,000,000. The Canadian banks' deposits at home and abroad at the end of June totalled \$1,372,000,000.

The bank statement for June is a very strong looking midsummer document.

Like some other successful institutions, the Canadian National Exhibition has been in financial straits at various times. On one occasion one of the directors gave his personal note for \$10,000 before the gates could be opened. Now it pays an annual surplus to the city of Toronto.

COBALT ORE SHIPMENTS

The following are the shipments of ore in pounds from Cobalt Station for the week ended July 28th:—

O'Brien Mine, 63,530; Dominion Reduction Company, 85,260; Timiskaming Mine, 58,867; Mining Corporation of Canada, 84,048; Beaver Consolidated Mines, 46,655; McKinley-Darragh-Savage Mines, 317,400; Nipissing Mining Company, 263,900. Total, 919,660 pounds, or 459.8 tons.

From New Liskeard—

Casey Cobalt Mine 61,080 pounds

From Temagami—Pyrites Ore—

Rand Syndicate 66,000 pounds

The total shipments since January 1st, 1916, now amount to 17,273,237 pounds, or 8,636.6 tons.

BONDS OF FIRE-SWEPT NORTH

Provincial Treasurer McGarry Makes a Statement to The Monetary Times on the Matter

That the Ontario government will come to the assistance of the fire-swept towns in the northern section of the province is generally thought to be probable.

In response to an inquiry by *The Monetary Times*, Hon. T. W. McGarry, provincial treasurer, made the following statement: "We cannot at present make any declaration in regard to the question of the bonds of these towns, for we do not know yet the position in this respect. The government have already stated that they will render every assistance possible in the stricken district. I imagine that the people in the towns which have been destroyed will most likely build up their communities again and that the bondholders will have just as much security, if not more, as they had before. Better towns of more permanent construction are likely to be built in place of those destroyed. The government are in a very receptive mood and will certainly do all they can. No doubt the town authorities will bring the matter of their various requirements to the attention of Hon. G. H. Ferguson, the minister of lands and mines, who is now in the North country, examining the position."

Asked by *The Monetary Times* as to the interests of the holders of bonds of these towns, Mr. McGarry said: "There will probably be some scheme worked out. The government will certainly do all they can to relieve the situation as far as possible."

Despite the fact that investors in Canadian municipal bonds have never lost a dollar as a result of a municipality being wiped out by fire, bond brokers are inclined to think that investors will be very chary in future in regard to the purchase of bonds of the small towns of Northern Ontario, at least until conditions have somewhat changed. The previous disastrous fires in 1912 seriously affected the standing of bonds in that region and the present fires obviously do not improve the position. The government, however, may reasonably be expected to stand at the back of the credit of this section of the country.

Previously Assisted Municipalities.

The government has previously assisted northern municipalities. It recently advanced \$40,000 to the township of Tisdale for the building of roads in order to open the country for settlement. This loan was made to the township out of municipal sinking funds deposited with the government by other municipalities. The township is entirely a mining area and the government handed back to the township authorities about one-third of the mining royalties received from the companies operating in that district. The township was then able to pay the interest of 4 per cent. per annum and the annual instalment in connection with the \$40,000 loan, still having a sufficient balance to operate the municipality. The annual cost to the township of the loan, interest and instalment, is probably between \$3,000 and \$4,000 a year, the township's share of the mining royalties being between \$9,000 and \$10,000 this year. This township was recently in the market for a loan of \$30,000 for the erection of a school, but the average investor is not interested in the bonds of mining and pioneer districts.

Bond houses always place such issues judiciously, selling, as a rule, only to institutions who know the exact conditions in the borrowing districts, and not to individual investors, who are not so well informed in these matters. It is generally thought that the Ontario government will have to make advances from time to time to municipalities in the northern part of the province, and that part of the revenue received in the shape of royalties will have to be returned to the municipal bodies in this connection.

In the case of the fire which destroyed Cochrane in 1912, the provincial government purchased enough of the town's bonds to liquidate its indebtedness, thus placing the municipality in a good financial position. The government became creditors of the municipality instead of the bondholders.

Recent Bond Sales.

The debenture debts at the end of 1914 of the principal towns destroyed partly or entirely, were as follow: Cochrane, \$187,084; Englehart, \$33,510; Matheson, \$3,021. These debts have been increased in some cases by sales of bonds this year. Matheson, for instance, sold to the Canada Bond

Company, last month, \$20,000 5 per cent. bonds due in 1941. Cochrane sold in March \$5,000 6 per cent. bonds due in 1926, to Brent, Noxon and Company. Timmins, the town created by the Hollinger Gold Mining Company, suffered little as a result of the fire. In November last, this town sold \$4,744 6 per cent. 10-year bonds, the purchasers being the Hollinger Mining Company. In February a bank advance of \$18,000 from the Imperial Bank to Timmins was authorized.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

The following table compiled by *The Monetary Times*, gives the bank loans to municipalities since August, 1913, to the latest month this year for which figures are available:—

Added to the usual holiday quietness in the bond market is the interest in the forthcoming war loan. The result of these two factors is that there is practically no demand for bonds here. Ontario prices are generally thought to be a little higher than is justified by market conditions.

Interest is shown in the finance minister's request that Canadians should not purchase foreign securities offered to investors here. A number of purchases of such securities have been made in Canada, the Anglo-French bonds being particularly popular. One broker reported an order for \$250,000 of these bonds. Several of the bond houses have refused to handle these securities. The fact is, however, that funds have been accumulating, attractive investment has been sought, announcement of the war loan had not been made, and official request to refrain from the purchase of such securities had not been issued. The only criticism of the finance minister's request last week, that Canadians should not purchase foreign securities issued here, therefore, is that the request came several months too late.

Ottawa, Ont.—The city has accepted an offer to renew \$300,000 of the \$675,000 notes maturing in New York on August 1st, from Messrs. Bond and Goodwin, New York, at a rate of 4.45 per cent. for discount for a term of six months. The city is paying off \$375,000 in cash.

St. Lambert, Que.—The issue of \$108,000 5½ per cent. 40-year bonds has been sold to Mr. René T. Leclerc, Montreal.

Brampton, Ont.—For the issue of \$24,000 6 per cent. 20-year bonds, the following bids were received, and the first named received the award:—

Imperial Bank	\$24,883
R. C. Matthews and Company	24,840
Geo. A. Stimson and Company	24,784
Mulholland, Bird and Graham	24,777
Macdonald, Bullock and Company	24,682
Brent, Noxon and Company	24,663
Wood, Gundy and Company	24,650
Canada Bond Corporation	24,388
W. A. Mackenzie and Company	24,031
A. E. Ames and Company	24,014
C. H. Burgess and Company	102.62
Kerr, Fleming and Company	102.22
B. F. Justin	24,000
Macneill and Young	24,000

North Bay, Ont.—Tenders close on September 1st for \$15,000 6 per cent. 20-year bonds. M. W. Flannery, treasurer. (Official announcement appears on another page.)

Fitzroy Township, Ont.—The following bids were received for the \$14,000 5 per cent. 30-instalment Fitzroy Township school bonds:—

Royal Securities Corporation, Montreal	95.36
Mulholland, Bird and Graham, Toronto	94.80
Imperial Bank	94.67
G. A. Stimson and Company	94.61
Brent, Noxon and Company	93.65
A. E. Ames and Company	93.44
C. H. Burgess and Company	93.37
Wood, Gundy and Company	93.36
R. C. Matthews and Company	93.30
Kerr, Fleming and Company	90.00

Brampton, Ont.—\$24,000 6 per cent. 20-instalment bonds, to Imperial Bank, Toronto.

Sarnia, Ont.—\$60,000 5½ per cent. 1935, to Æmilus Jarvis and Company, Toronto.

THE SPIRIT UNBROKEN

(Reprinted from *The Monetary Times* of two years ago.)

Once again British diplomacy has played fairly, satisfying the most delicate conscience. Once again it has maintained the British standard of honor, this time at the expense of valuable points in warfare, now gained by the enemy. Germany having pushed war, it has challenged a nation which has strained every diplomatic nerve and sinew to preserve peace. Flouting Britain's heroic determination to strangle war, now it must face that determination in a grim shape. It is not war upon Great Britain alone. It is a challenge to the Empire, one which has done for civilization more than other Empires have even tried to dream. That challenge the Empire has answered. Canada, Australia, South Africa, every dominion overseas join with the Motherland in this international struggle, one into which that Motherland has done everything possible to prevent the Empire having to plunge. Victory on one side may mean a new map of Europe, the flowering of autocracy and the predominance of belligerence. Victory where the British Empire may place it, will mean the preservation of individual nationalities, the progress of democracy, always arbitration and perhaps lasting peace.

Seldom has England girded its loins in such a good cause, especially as the struggle has been forced upon it. Heaven knows of the prayers which have been offered and the statesmanlike efforts made for peace. War has come to bring it. Having entered the fight, the British Empire will proceed to the end. In this struggle it has the help of some and the sympathy of all, except perhaps two, of the civilized nations of the world. May Right ride as conqueror!

Saving is accomplished only by an effort. Strict economy is necessary in order to win the war and pay our share.

THEN AND NOW

A little town in the West has a total liability of \$127,000. Its population is less than 350 people, representing about 50 residential ratepayers. When agricultural communities of the West unwisely wished to become big commercial centres, that little town, like many others, acquired nothing of a city's appearance except its debt. Now it is in financial difficulties, humbled, and content to call itself a village. It has placed its affairs in the hands of the provincial authorities and the local paper says: "To expect this handful of people (50 residential ratepayers) to assume these burdens (liabilities of \$127,000) is as ridiculous as it is impossible." Also, the creation of the debt was as ridiculous as it was possible.

LESSONS OF WAR FINANCE

"Let us assume," said Sir Thomas White, finance minister, in his budget speech last February, "that our indebtedness on account of this war will reach \$500,000,000." At the end of two years of war, General Sir Douglas Haig, commander-in-chief of the British armies in France, says that "the third year of the war will be the Allies' year," and that "Britain will not achieve her full strength on land until next summer," and that "until this victory is won it ill becomes a British soldier in France to think of peace." Unless, therefore, there comes a sudden collapse in the enemy's position, naval, military, financial, economic, some or all, the Great War will proceed for some time yet. The Dominion government's war expenditures are now \$20,000,000 monthly. The finance minister and members of the Federal government generally will probably revise upward the assumption that our war indebtedness will reach \$500,000,000. It is not unreasonable to assume, in view of the rapid increase in war expenditures and the continuance of the struggle, that ultimately our war debt will be \$1,000,000,000. At 5 per cent. the annual interest would amount to \$50,000,000.

The financial aspects of our participation in this war should appeal to every citizen as making individual economy imperative, and as making attractive subscription to our second war loan next month. The financial phases of the war should prove the strongest incentive to our governments to practise the economy which they preach. It is useless for cabinet ministers to talk economy to the nation while patronage plus pilfering waste more than the individual could ever dream of saving.

The finance minister has previously stated that the general policy of Canada, so far as war finances are concerned, is the "placing upon posterity the greater portion of the financial burden of the war, waged as it is in the interests of human freedom and for their benefit in equal if not in greater degree than for our own." This policy is backed by the fact that our country is, as the finance minister said in his budget speech, "rich in potential resources, certain of future development and great expansion of production and population but without at present, large accumulations of wealth."

It is suggested in France that the merchant submarine did not cross the Atlantic, except in parts and on neutral ships, that these parts were assembled and the boat loaded on this side. This would be in keeping with Germany's sly advertising methods. The "Deutschland" may bob up again in Baltimore in a new garb of paint with the name "Bremen" on her bows.

JULY MUNICIPAL BOND SALES

Domestic Market Absorbed Average Amount of These Securities—Two Loans Sold in United States

The municipal bond sales in Canada for July, as compiled by *The Monetary Times*, amounted to \$1,485,225, compared with \$4,428,100 for June and \$2,180,758 for the corresponding period of last year.

Comparing the record of July, 1915, with that of the month just ended, the bond sales are as follow:—

	1915.	1916.
Canada	\$1,618,422	\$1,485,225
United States	890,000	3,540,000
	\$2,508,422	\$5,025,225

The municipal bond sales in Canada during the first seven months of the past five years, according to *The Monetary Times'* bond record, were as follow:—

	1912.	1913.	1914.	1915.	1916.
Jan.	\$2,133,531	\$1,337,500	\$1,953,137	\$1,784,947	\$1,909,441
Feb.	2,596,378	1,038,806	5,995,336	3,047,011	1,419,909
Mar.	1,926,716	335,492	5,123,176	2,572,357	2,027,741
April	927,160	3,693,857	2,847,953	8,603,094	1,979,852
May	1,928,748	880,630	6,400,755	3,464,281	2,649,000
June	1,690,344	2,435,726	4,617,857	2,395,744	4,428,100
July	1,967,476	1,591,924	2,180,758	1,618,422	1,485,225

Canadian municipal bonds sold in the United States during the first seven months of 1916, compared with sales of 1914 and 1915, were as follow:—

	1914.	1915.	1916.
January	\$ 340,000	\$3,183,215	
February	50,000	6,471,000	99,500
March	18,000	6,543,947	595,000
April	25,000	7,100,825	2,158,000
May	1,750,000	600,000	7,219,000
June	2,100,000		2,136,226
July	1,130,000	890,000	3,540,000

The following are the particulars of the sales in Canada by provinces:—

Ontario	\$ 738,710
Quebec	246,000
British Columbia	232,500
Saskatchewan	62,165
Nova Scotia	55,000
New Brunswick	30,000
Alberta	6,650
Manitoba	6,200
	\$1,485,225

The following are the details:—

Ontario.			
Kent County	\$ 35,000	5%	
Welland County	100,000	6	1936
Frontenac County	30,000	5	1926
Sault Ste. Marie	20,000	5%	1936
Weston	2,617	6	1926-31

TO DEVELOP NORTHERN ONTARIO

Mr. Fred. Dane, of Toronto, at present a member of the Ontario Board of License Commissioners, has been selected by the Ontario government to be the commissioner in charge of the administration of the fund to be created, under the Act passed at the last session of the provincial legislature, for the purpose of making loans and advances to settlers in the northern and north-western districts of Ontario. He will be the head of the staff which will put into effect this latest feature of the government's policy of developing the newer portions of the province.

By the Northern and North-Western Development Act of 1912, an appropriation of \$5,000,000 was voted to be used to construct roads to open up new sections of the unorganized districts and to help settlers to provide themselves with seed grain. An amendment enacted in 1916, extended the scope of those measures and authorized the government to utilize a portion of the appropriation to make loans in amounts not exceeding \$500 to persons taking up land in New Ontario. Of the \$5,000,000 voted under the Northern and North-Western Ontario Development Act, \$2,766,744 was expended for road-making and the like in the four years ending October 31st, 1915. The programme for the present fiscal year calls for a further expenditure of about \$600,000. The government will make regulations prescribing the form and manner of making application for a loan and the manner in which applications shall be dealt with, the rate of interest to be paid and the time, place and manner of repayment of the loan. It will define the information to be obtained regarding applicants for advances and provide for the inspection and valuation of land upon which loans are sought. It will also appoint officials to act in various localities.

Mr. Dane, as commissioner, will subject to the regulations, fix the terms and conditions upon which he will make loans. He is well qualified by his knowledge of conditions in the north country for the position. He is well known in Northern Ontario, having served as a member of the Timiskaming and Northern Ontario Railway Commission. He has had a wide experience, and not long ago resigned his appointment as Canadian trade commissioner at Glasgow, to become a member of the Ontario license board, which appointment he now resigns. Mr. Dane will handle the duties of loan commissioner in a highly satisfactory manner, as he has done the duties of his previous offices. Settlers suffering in this week's bush fires will be assisted by government loans. Mr. Dane is taking an active part in the relief work.

UNITED STATES FIRMS BLACKLISTED

British Government Forbids Trading With a Number of Banking and Commercial Houses

As no official or complete list of foreign firms blacklisted by Great Britain has been published as yet in Canada, *The Monetary Times* feels that special interest will be taken in the list of United States firms published herewith. This list is complete and official, having been transmitted to *The Monetary Times* from London, England, by mail. Changes or additions in the list will be noted in *The Monetary Times* from time to time as they are announced by the British government. The proclamations containing these lists prohibit "all persons, or bodies of persons, incorporated or unincorporated, resident, carrying on business, or being in the United Kingdom; from trading with any of the persons or bodies of persons" mentioned in the lists. These proclamations and others respecting trading with the enemy come into force in Canada from time to time as the Canadian government passes orders-in-council in regard to them.

The complete list for all countries includes several hundreds of names. All persons and firms who are resident or carrying on business in Persia, Morocco or Portuguese East Africa are blacklisted. Besides the United States firms mentioned below, the list also includes a number of firms in South America, Cuba, Japan, Netherland East Indies, Philippine Islands, Denmark, Greece, Netherlands, Norway, Portugal, Spain and Sweden.

Complete and official lists of the firms who are blacklisted in countries other than the United States will appear in *The Monetary Times* in forthcoming issues. Readers are advised to clip these lists and file them for reference in dealing with foreign sales or purchases. The United States list is as follows:—

UNITED STATES OF AMERICA.

Bauer, Philipp, & Company, 68 Broad Street, New York City.
 Beer, Sondheim & Company, New York.

Mr. L. C. Owen, of the Toronto branch of the Bank of Ottawa, has opened offices in the Standard Bank Building and will deal in government, municipal and corporation securities.

The purchase by Canadian investors of securities sold by the Allies in the United States to provide funds for the purchase of munitions and supplies is of no financial help to the Allies, for they have also very large purchases to make in Canada, and Canada is unequal to financing them unaided. She herself has been borrowing in the United States on a considerable scale. For Canadians in turn to buy foreign securities in this country is to undo in effect what was done when Canada borrowed from us. There is no cause of surprise therefore, in the news from Ottawa that the Dominion government is frowning on Canadian purchases of foreign securities issued here.—New York Annalist.

JULY FIRE LOSSES

Over One Million Dollars Worth of Property Destroyed—Thirteen Large Fires

The *Monetary Times*' estimate of Canada's fire loss during July amounted to \$1,159,285, compared with June loss of \$494,557 and \$773,269 for the corresponding period of last year. The following is the estimate for the July losses:—

Fires exceeding \$10,000	\$ 945,000
Small fires	63,076
Estimates for unreported fires	151,210
	\$1,159,286

No estimate is available of the heavy losses caused by forest fires in Northern Ontario.

The *Monetary Times*' record for the past four years shows the following monthly losses:—

	1913.	1914.	1915.	1916.
Jan.	\$3,913,385	\$2,796,312	\$1,249,886	\$1,649,217
Feb.	2,037,386	2,920,749	1,019,556	3,275,600
March	1,710,756	2,660,666	1,631,696	1,406,501
April	1,470,622	1,916,235	1,463,747	1,460,437
May	2,123,868	1,935,516	881,855	1,850,205
June	3,069,446	1,267,416	1,157,156	494,557
July	2,579,698	2,033,139	773,269	1,159,285

The fires reported in July at which the losses amounted to \$10,000 and over were:—

St. Evariste, Que., July 2	Residences and out-buildings	\$100,000
Avonlea, Sask., July 4	Warehouses, stores, etc.	125,000
Ashcroft, B.C., July 6	Conflagration	500,000
Vancouver, B.C., July 7	Lumber plant	10,000
Deseronto, Ont., July 9	Factory	100,000
Rideau Junction, Ont., July 11	Railway chutes ...	15,000
Renfrew, Ont., July 16	Factory	100,000
Jaffray, B.C., July 16	Lumber plant	100,000
Hamilton, Ont., July 21	Factory	50,000
Doon, Ont., July 22	Factory	40,000
Saltcoats, Sask., July 22	Milling plant	50,000
Chatham, N.B., July 24	Light plant	30,000
Dundas, Ont., July 30	Hydro station ...	125,000

Among the causes were lightning 3, matches 2, defective chimney 2, gasoline 1, oil stove 1, upset lamp 1, sparks 1, pot of tar 1, overheated stove pipe 1.

The structures damaged and destroyed included 38 residences, 7 stores, 7 barns and stables, 7 factories, 4 lumber plants, 4 warehouses, 3 hotels, 2 garages, 2 business sections, 2 lighting plants, 1 automobile, 1 incinerator, 1 college, 1 milling plant.

The following table compiled by *The Monetary Times*, shows deaths caused by fire during the first seven months of 1916 compared with previous returns:—

	1909.	1910.	1911.	1912.	1913.	1914.	1915.	1916.
January	16	27	27	27	14	26	8	10
February	8	15	12	11	21	18	11	20
March	16	20	18	24	22	27	23	23
April	18	37	20	15	11	22	14	6
May	21	15	28	18	33	8	8	14
June	16	52	13	6	18	12	2	6
July	4	15	110	9	9	8	13	213

The fires at which fatalities occurred were:—

Port Arthur, Ont., July 3	Burning store	1
Ottawa, Ont., July 4	Lighting fire with coal oil ..	2
Saskatoon, Sask., July 6	Clothing set alight	1
Munson, Alta., July 16	Burning building	4
Regina, Sask., July 24	Gas explosion	1
Quyon, Que., July 27	Burning vessel	4
*Northern Ontario, July 29	Forest fires (approximate)	200

*Reports vary from 200 to 500.

Dividend Notice

Notice is hereby given that a Dividend of Three Per Cent. (Twelve per cent. per annum) on the paid up capital of the Bank, for the quarter ending 31st August, has this day been declared, and that the same will be payable at the Bank and its branches on 1st September next.

The Transfer Books will be closed from the 24th to the 31st August, both inclusive.

By order of the Board.

J. P. BELL,
General Manager.

Hamilton, 24th July, 1916.

LOAN AND TRUST COMPANY BUSINESS

Ontario Companies' Receipts Were Less Last Year— Various Changes Compared

How the operations of loan and trust companies were affected last year by existing conditions in Canada is shown in the Loan Corporation statements issued by the Ontario government.

The grand total receipts of the loan companies (with permanent and with terminating stock), of loaning land companies and trust companies, doing business in Ontario which in 1913 were \$370,908,467, and in 1914 \$305,604,414, dropped last year to \$241,729,473. Of these \$118,594,872 was received as corporate, trustee representative, guardian or agent in trust, while \$123,134,601 was received by the corporations for their own use. The largest item in the receipts is the amount received from borrowers and investments. This totalled \$67,603,719 in 1914 and last year was less than \$50,000,000, the correct figure being \$49,845,811. The next largest receipts are the moneys received from depositors during the year. These aggregated \$45,298,798. Debentures issued during the year 1914 totalled \$13,238,537, while \$10,775,149 were issued last year, which is satisfactory in view of British Treasury restrictions. The loan companies having only permanent stock took by far the greatest proportion of deposits—namely, \$44,376,681 out of \$45,298,798. The deposits of trust companies which previously increased considerably, having changed from \$322,490 in 1912 to \$4,141,398 in 1913 and to \$8,107,786 in 1914, were nil last year with \$3,117,594 being received for guaranteed investments. Bank advances of all the four classes of companies last year amounted to \$1,495,368, while other borrowed money totalled \$134,579. According to the report of the provincial department all these amounts were received by the corporations for their own use.

Trust companies in their trustee and similar capacities, received from borrowers during the year 1914 a sum of \$47,677,268. Last year the sum received was \$39,997,661. Their real estate rents totalled \$1,414,116 and their real estate sales, \$1,860,585. Money received for investment amounted to \$57,672,785, as compared with \$69,880,782 in the previous year.

Loaned on Mortgages.

In 1915, the four classes of companies under review loaned on mortgages \$13,149,583, against \$27,286,009 in the previous year, and on other securities \$18,176,325, as compared with \$32,819,043. The companies repaid their banks \$6,102,245 in 1914 and \$7,111,766 last year and repaid other borrowed money amounting to \$369,238 in 1914 and \$287,928 last year. The cost of management of all the companies was \$3,418,358. The expenses on corporation account aggregated \$123,134,601 and on trust and agency account \$118,594,872, a grand total expenditure of \$241,729,473. Details of these receipts and expenditures appear in the accompanying table.

A total of \$15,141,451 of debentures of all these classes of companies mature during 1915-16, the greater portion of these are the debentures of loan companies having only permanent stock, the amount credited to them being \$13,987,941. Loan companies having terminating stock as well as permanent stock, or having terminating stock only, have \$736,417,306.

Interest Rates Paid.

It is interesting to examine the records of interest paid on the companies' deposits and various securities. Averaging the interest paid by the four classes of companies under review, we get the following result:—

Interest paid on	Rate per cent.			
	1915.	1914.	1913.	1912.
Deposits	4.229	4.119	3.750	3.7385
Debentures	4.683	4.570	4.509	4.4350
Debenture stock ..	4.0	4.0	4.0	4.0

The permanent stock loan companies paid in 1914 3.5871 per cent. on deposits, 4.5431 per cent. on debentures and 4.0 per cent. on debenture stock, compared with 5.60 per cent. on deposits and 5.125 per cent. on debentures paid by terminating stock loan companies. On the same accounts, the loaning land companies paid 3.50 per cent. on deposits and 4.381 per cent. on debentures.

The average rate of interest received on realty mortgages and other securities owned beneficially, may be summarized as follows:—

	Rate per cent. on			
	Mortgages of realty.		Other securities.	
	1914.	1915.	1914.	1915.
Loan companies (permanent stock)	6.975	7.107	5.715	5.823
Loan companies (terminating stock)	6.24	6.64	6.30	6.30
Loaning land companies	6.24	6.28	6.00	5.66
Trust companies	7.003	6.913	5.950	5.872

The average rate of interest received by the trust companies on realty mortgages, not owned beneficially, was 6.936 per cent. and on other securities not owned beneficially, 5.822 per cent. The number and amount of mortgages enforced by the two classes of loan companies and by the trust companies may be tabulated as follows:—

	Owned beneficially.		Not so owned.	
	No.	Amount.	No.	Amount.
Loan companies (permanent stock) ...	1,086	\$1,958,499	..	
Loan companies (terminating stock) ...	6	14,200	..	
Trust companies	69	197,140	343	\$904,916

The four classes of companies in 1915 wrote off or transferred to real estate, owned beneficially, \$713,004 and \$133,721 not so owned.

CANADIAN PACIFIC RAILWAY'S NOVELIST

"Hearts and Faces," by John Murray Gibbon, the Canadian Pacific Railway's well known publicity man, will elicit most appreciation from those who have knowledge of the technique of art, but it will not lack in interest for those who have toiled through the drudgery of any profession. The chief figure of the novel—if novel it may be called, for so real is the depiction of this character that the book is almost untinged by any glamor of fiction,—the chief figure, Mr. George Grange, of Aberdeen, Scotland, develops under the influence of an artist friend and mentor from a youth, almost lacking self-reliance, almost a recluse, to a man of decision and independence. This evolution is achieved after the youth's translation to the Bohemian life of London. Left alone to struggle for fame in this harder and sunnier social clime, he gains strength and vigor, and retains his birthright of clean, healthy Scottish manhood. The drudgery of study over, and fame as a portraitist having come upon him almost, as in Byron's case, in a night, he becomes obsessed by ambition such as urges forward strong-willed manhood in its twenties, and through that decade lives a life of "Work, work, work," achieving great progress and distinction as that modern type of portrait artist who snatches at effects. Almost on the verge of a nervous crisis, he calls upon his old mentor, who makes clear the error of his way; and once more he faces the drudgery of paint in a still sunnier clime and more Bohemian world of Paris and France. Again fame is achieved—this time the fame of true art—and wealth comes, not as the reward for human vanity, but as the merit of universal art. This life passes through the maze of the Bohemian world untouched by passion of divine love, though Samson-like, finally succumbing to the fascinations of a Delilah of the underworld. The underworld of femininity! Save for one beautiful life of womanhood of fifty-five years or more, which has a transitory early influence on the artist's career, the author has depicted nothing uplifting in womanhood. Here reality is uncertain, and here fiction has failed to touch the universally inspiring.—H. G.

"Hearts and Faces," by John Murray Gibbon; published by S. B. Gundy and Company, Toronto; price, \$1.35.

Commenting upon the Canadian Pacific's improved earnings, the London Statist anticipates that the accounts will show a rate of profit not far short of the highest figures ever attained. The factors responsible for the remarkable recovery in traffic and earnings are the 1915 crops, and the increased traffic resulting from good prices and war industries. Remarking that no increase in the rate of dividend is anticipated, the Statist says that any increase would be impolitic in view of the swing-back likely to occur after the war.

Is Your Will Correctly Drawn?

One familiar with the difficulties arising from improperly drawn or ambiguously worded Wills, would unhesitatingly advise you to have your lawyer draw your Will for you. Such precaution saves the possibility of misunderstandings. An Important point in a Will is to name a responsible Executor. This Corporation solicits the appointment.

FOREIGN LANGUAGES ARE NECESSITIES

In Developing Canada's International Relations Linguists are Needed in All Branches of Commerce, Etc.

BY A. T. DRUMMOND, LL.D.

Some years ago, Sir John Lubbock—now Lord Avebury—when addressing a meeting of the Chambers of Commerce in London, England, deplored the frequent necessity in mercantile and banking houses in that city of having to call in the German clerk whenever foreign correspondence was required. As a people, the British do not take to languages with that ease which distinguishes several continental nations. French has appealed to the more educated classes in England as a desirable language to acquire, but even with, in the past, the large business annually transacted with the Germans, the language of their country has not made much progress among English-speaking people.

Here, in Canada, we have largely followed English and Scotch educational methods, and this has involved much specializing in the Latin and Greek classics and the higher mathematics in the high schools, collegiate institutes and universities, to the detriment of that better acquaintance with the literature, history, languages, institutions and business and social customs of modern Europe which now is to prove so valuable in the large mercantile, manufacturing and banking houses of our great cities where the new foreign trade is being developed or being carefully considered. At the start, these houses have been met with a want of detailed knowledge of the foreign countries with which they were desirous of dealing, and this has applied to both principals and their staffs. The Dominion trade representatives in foreign capitals agree in insisting that the Canadian manufacturing houses should, on the spot, personally become acquainted with the foreign merchants and with conditions prevailing in their countries, if they are to develop the business. How few have the needed requirements for doing this!

Specialize in Languages, etc.

The subject has been brought by me to the attention of McGill, Queen's and Toronto Universities in connection with the general proposal that they should identify themselves more closely with the business life of the country, the suggestion being that they should establish courses which would appeal to business men's sons and others, in which, whilst not overlooking some of those studies which, with the college life, aid in general culture, would specialize in the languages, literature, institutions and business and social customs of France, Russia, Germany, Italy and Spain, the knowledge of the Spanish being also essential in business with Mexico and large parts of South America, and the West Indies. As trade expanded, the Japanese and Chinese languages would also require to be taken up. The three universities have regarded the suggestion with considerable favor, and it is anticipated that this important want which our new foreign trade has developed, will be met without delay. The Department of Education for Ontario has likewise become interested in the subject, whilst the Board of Education in London, England, has attached much weight to it, and fore-shadows important results in the near future in the movement for associating, more closely, education with industry, of which scientific and industrial research and the knowledge of foreign countries form part.

Affects Wide Range of People.

The foreign trade is, however, not the only reason which weighs in this matter. There can be no question that, after the war, and perhaps before it is ended, the relations of the overseas dominions to the mother country will be drawn so closely, that there will be active co-operation politically, and, up to a certain point, commercially, and that to our college men there will be thrown open positions in the imperial civil service, and diplomatic, consular, trade and other posts, all over the world, wherever Great Britain is represented.

Even in our own Dominion civil service, the new foreign trade has developed the need of a wider knowledge among our civil servants, particularly among deputy ministers, secretaries of departments, private secretaries, trade commissioners, foreign translators, etc., without referring to the value of this wider knowledge to the cabinet ministers themselves. And will not this be intensified under the anticipated new imperial regime?

There are other considerable classes who will be benefited by courses specializing in foreign literature, languages, etc., namely, scientific experts in colleges, factories, mills, etc., as well as all private investigators, and all engaged in any research work who require to consult foreign literature, and, in the course of their investigations, to visit foreign countries; not to speak of the thousands of people who go abroad for pleasure, and whose pleasure would be greatly enhanced by having beforehand more than a mere acquaintance in name with the countries visited.

TARIFFS AFTER THE WAR

Trade Policies of Britain and Germany—Canada's Needs and Necessary Plans

Mr. Beer's article in *The Monetary Times* of May 26th was evidently written after much consideration, and it covers the ground in a complete manner. The chief criticism, a western reader writes, would be that it deals almost with too many sides of the question.

One of the outstanding facts in connection with the German commercial policy has been the manner in which they dealt with the export trade—they gave the manufacturer protection in order that he might be assured of a home market large enough to enable him to manufacture on an economical basis. With this assured market the manufacturer was in a position to sell any surplus output for export without adding to the cost by providing for overhead charges. In addition to this advantage given to the export manufacturer Germany has, as you know, assisted him in other ways—by tariff rates on railways and by subsidizing foreign lines of steamers, etc. By this means Germany was able to develop a very important export trade in a comparatively short time, and to gain advantages thereby which have been of great importance during the present war, especially in the earlier stages of the war. On the other hand, the British policy has largely been to allow the export trade to take financial care of itself, and where protective tariffs have been established they have been formed without any special consideration of the affect which they might have upon exports.

Suggestions on Framing Tariff.

Canada as a debtor nation has undoubtedly to develop her export trade in order to pay interest charges. Further, for some years it may be difficult to obtain capital for development by means of loans and in that case it will have to be obtained by an increase in our exports. Therefore, the sound foundation on which to form a tariff for Canada would be:—

1st.—A general percentage rate on all imports for revenue purposes which should bear some relation to the amount contributed, directly or indirectly, by manufacturers in Canada to the national revenue, with rebates in respect to raw materials used for exports.

2nd.—That additional protection should be given with the direct object of fostering exports, and it should not be given excepting where a certain proportion of the class of goods manufactured were exported. The amount of such additional protection to be given on the recommendation of a tariff commission as suggested by Mr. Beer.

3rd.—That protective duties should be limited, where they applied to classes of goods not exported from Canada.

Imperial Trade Relations.

It seems to me that if we formed a tariff based on these fundamental principles it would at least be a logical tariff to which exceptions could be made to meet exceptional cases such as industries that it would be desirable to foster on national grounds.

It is quite evident that as soon as the war is terminated an effort will be made to form a common basis for tariff legislation throughout the British Empire, and also to differentiate between allied nations and neutral nations and hostile nations. If any such arrangements are carried out it certainly involves a common policy which to some extent will limit the fiscal powers of the Dominion, in fact, if not in form. Indeed, if the dominions ask for and secure representation in an imperial council it necessarily follows that to some extent the policy of the dominions will be controlled by the decisions of that council.

NEW WAR LOAN, 5¼ PER CENT?

Probable Price of Coming Issue—What the Government is Spending on War

The fact that the war is costing Canada \$700,000 a day should prove an incentive to national economy and to a heavy subscription to the forthcoming war loan. According to official figures issued at Ottawa last week, the war expenditure of the Dominion government now exceeds \$20,000,000 a month. The largest item in this expenditure is for pay and allowances, subsistence and assigned pay and separation allowances of the troops. This item is running at the rate of about \$12,000,000 a month. This is much more than is paid to the troops at present in Canada who number less than half the total Canadian forces recruited for the war, over two hundred thousand having gone overseas.

The pay of the overseas forces assigned to their families and dependants here, and their separation allowances, also paid here, constitute a large portion of the monthly war expenditure. The sterling exchange situation has had much to do with bringing about the payment in Canada of so large a portion of the pay of the overseas forces. As nearly as can be estimated, Canada's present war expenditure in Canada and in Britain, including the maintenance of troops actually at the front, is at the rate of about thirty million dollars a month, or three hundred and fifty million dollars a year.

This averages about \$1,000,000 a day, and is equivalent to about \$1,000 per annum per head, as the total enlistment is about 350,000 men. Of these there are now in Canada about one hundred and forty thousand.

Out of the revenues of the government for the year it now seems probable that a large amount of the principal of the war expenditure will be paid, as the budgets of 1915 and 1916 are both working satisfactorily. The balance of Canada's war expenditure this year will be defrayed partly from the funds of the domestic war loan issued in November last and from future war borrowings, concludes the official statement.

Funds are Accumulating.

Funds are accumulating here for the second war loan, which will be issued next month. Demand and notice deposits in the chartered banks at the end of June totalled \$1,195,000,000, although it must not be forgotten that current, call and other loans at home were about \$880,000,000. There is little doubt, however, that the second war loan will be fully subscribed. The amount of the loan, it is difficult to predict, especially as the bonds of the first war loan may be turned in as subscriptions to the second loan, as equivalent to cash at 97½. Predictions as to the size of the loan have ranged from \$100,000,000 to \$200,000,000. *The Monetary Times'* suggestion being a loan of \$100,000,000. The first loan was offered to the public at 97½, of which 10 per cent. was payable on application, 7½ per cent. on January 1st, and the balance in four instalments of 20 per cent. on the first of each succeeding month, the final payment being made on May 1st. About 75 per cent. of the loan, however, was paid up on January 1st, according to the option given to purchasers.

Terms of the Loan?

By some it is believed that the new loan will be issued at a slightly lower price, probably at some fraction between 97 and 96, but that the terms of payment will be equally as satisfactory as those of the previous loan. *The Monetary Times*, however, thinks it is a mistake to assume that the terms will be similar to those of the first loan, especially as the Dominion government's credit stands very high in New York. It is higher to-day than when the first war loan was issued there, and a great deal higher than was the case twelve months ago. The government can be expected to make its war loan offering attractive, but we believe that the greatest possible effort will be made in order not to sacrifice price and credit any more than is necessary. It would not be surprising were the loan made on a 5¼ per cent. basis.

If the loan is issued on more attractive terms than was the previous loan, holders of the old war bonds would naturally be inclined to turn in those bonds as subscriptions to the new loan. On the other hand, if the new loan is not sufficiently attractive the small investors, who it is desired, should be numerous and generous subscribers, will not participate heavily. The finance minister therefore has the difficult problem of making the price and terms of the loan exactly right.

The suggestion has been made in some quarters that the loan should be one of 4½ per cent. securities, issued at a discount consistent with market conditions. It is thought by advocates of this rate that the bonds ultimately would go to a higher premium than would be the case with 5 per cent. securities.

Brokers are inclined to think that the present loan will not be for a ten-year term as was the case with the previous loan.

GOVERNMENT EFFECTS TEMPORARY LOAN

Sir Thomas White has negotiated a loan with Canadian chartered banks to provide for current needs until the proceeds of the coming national loan of \$100,000,000, are received. The amount of the required temporary loan is \$25,000,000, the collateral being three-months treasury notes of 5½ per cent. It is understood that the banks offered \$30,000,000, and that this amount was accepted. Seventy per cent. of the loan will be placed to the credit of the Dominion government on August 1st, and 30 per cent. on September 1st. As the loan will be repayable on November 1st, the loaning banks will not be inconvenienced through a diminution of crop-moving funds.

CANADIAN BONDS IN UNITED STATES

Assessment Values, Debenture Debts, Etc., Count More Than Talk of Material Growth

Editor, *The Monetary Times*.

Sir,—In Canada the time has arrived for unusual caution and care in government and municipal financing, and the utmost economy in municipal operation. The war has brought us to a transition period. The sages, preferably the "Russell Sages," in every municipality and city in Canada should be induced to join in the councils of the government so that methods may be at once inaugurated that will cope with present day emergencies.

Through a combination of exceptional circumstances Canadian bonds in the United States have sold well. The officials of Canadian provincial governments, cities and municipalities have been so impressed with the reception that our bonds have met with in the States, that they are over-confident of the permanency of a demand in the United States market. The phenomenal amount of money that has been available for investment in securities and the lack of demand for money in the ordinary channels of business, and the fact that our bonds are exempt from taxation, have been factors in enhancing their value in the United States. Aside from the important fact, however, that effective remedies were applied after war was declared to prevent a piling up and an over extension of our municipal debt, the United States investors only recently discovered the wonderful resources of this country, particularly the prairie provinces, where we have the cheapest land, the best, and a large quantity of it—about two hundred million acres lying west of the Great Lakes.

Wanted the Cold Facts.

When first we offered Canadian bonds for sale in the United States, however, it was soon made clear to us that bigness and material growth counted but little, that our assessment values, our debenture debt, our tax levy, the purposes of our bond issues, our tax rate, our sinking funds, in fact, the management of our municipalities; the population of our cities and towns—all were being subjected to the closest scrutiny.

The allied governments paid approximately 5% per cent. for the soundest security in existence. The French government, in addition to giving collateral securities for \$100,000,000 3-year 5 per cent. notes, are paying upwards of 6 per cent. for money. These loans will undoubtedly establish an unprecedented rate of interest throughout the entire world. They are backed by the faith and unconditional credit of the world's two wealthiest nations. The Bank of England interest rate has advanced to 6 per cent. It is reasonable to suppose that in Canada the price of money in the future shall be as much a speculation as the price of wheat. The United States market should not be anticipated.

The capital derived in the past from Europe will not again for many years to come be available. We must now begin to devise ways and means to furnish funds for developments from home capital. After the close of the war, and when the time of readjustment comes, the vast volume of paper that is now being used in Europe to finance the war, will have to be redeemed. Europe will need its own capital at home.

Times Demand Economy.

The problem is so complex that it is difficult to prophesy just what will take place, but one thing is certain, and that is, that Canada must continue economy—must not mortgage the future,—for it is inevitable that she shall have to bear her share of the great burden which the British Empire has assumed in defence of her rights and the rights of others.

The price of securities of our western provinces, cities and municipalities, due to the concurrence of several influences, are more directly affected by war conditions than eastern securities—notwithstanding the fact that there is not a city in western Canada that has not reduced its controllable expenditure by a very substantial amount, that the farmer in western Canada has had an unusual crop, and the great source of the wealth of Canada lies west of the Great Lakes. The total debenture debt of Saskatchewan's seven cities, 71 towns, 228 villages, 295 rural municipalities, 3,352 school districts, and 191 rural telephone districts, representing a population of 571,473 amounts to \$42,587,705, a per capita debt of less than \$75. The city of Toronto alone, a city which is under splendid financial management,

has a per capita debt of over \$130, and a total debt of nearly \$80,000,000. Winnipeg's total bonded debt is about \$42,000,000. The average rate of interest earned on its \$6,000,000 sinking fund is 5.28 per cent. In 1914 Winnipeg's tax rate was 14.80 mills. Toronto earns on its sinking fund investments an average rate of interest of 3.65 per cent. Its tax rate is 23.75 mills. Winnipeg has the best managed sinking fund in Canada to-day and as a consequence the credit of the city is of the highest.

Encourage Home Investments.

The investment funds and the head offices of all our important financial institutions are concentrated in the east. There is a prejudice in the minds of all investors in favor of bonds of their own localities. The westerner having learned an expensive lesson in speculation is now turning his attention to investments that are fundamentally sound. Although a bit over-cautious as yet, it is to be hoped that he will see the wisdom of investing in the bonds of his own city or municipality. The credit of the community shall be improved to such an extent as the home investments may increase. In the United States the banks and trust companies are buyers of municipal bonds, and the immense demands of these institutions enhance the value of the local security to the extent, that each and every locality becomes thereby its own benefactor.

By being forced to rely upon her own resources, Canada has gained more in point of financial independence than she has lost. For the past two years she has been using her own currency, and carrying her own trade on her own credit, but beyond disposing of a few high-class Canadian securities we have received practically no money from our former sources of supply. The farmers are prosperous, farm lands are in fair demand and have more than held their own throughout this trying period. The merchant and manufacturer are enjoying the fruits of the farmers' prosperity.

Confidence of United States Investors.

Our municipal and government bonds, as well as our railway bonds, have for the past year, been well received in the United States. This reception may be due in the first place, to the large accumulation of money seeking investment in that country; and in the second, to the attractive returns which our securities offered compared with somewhat similar ones in the United States; and third, to the excellent record which Canadian government, municipal and railway bonds enjoy. To maintain the confidence of United States investors in Canadian securities would seem, therefore, absolutely necessary. The importance of public bodies maintaining their record and reputation, living up to the letter of their obligations, and providing for the prompt payment of principal and interest, cannot be too strongly emphasized.

Yours, etc.,

WILLIAM JENNINGS O'NEILL.

Winnipeg, July 31st

NEW BOND COMPANY IN THE WEST

Messrs. W. Ross Alger and Company have opened an office at 514-518 McLeod Building, Edmonton, under the management of Mr. W. Ross Alger, late manager of the debenture branch of the department of education of Alberta, for the purpose of transacting a general investment bond business. Mr. Alger is well known in financial circles, and has an excellent knowledge of the bond business. He has a wide financial experience, and his many friends wish him success in his new enterprise.

At a meeting of the Edmonton citizens league of one hundred, the following resolution was adopted: "That the interest on loans and mortgages be entirely extinguished during the war."

From the Timiskaming and Northern Ontario Railway over 120 men have joined the Canadian Expeditionary Forces, and the railwaymen's patriotic association of that line, have subscribed \$5,612 to the Canadian Red Cross Association, \$14,056 to the Canadian patriotic fund, as well as donating to enlisted employees the sum of \$6,521. The entire office staff are members of the 50,000 club of Toronto.

VALUE OF POLICY LOAN

But the Mortgaging of a Life Insurance Policy is Not Desirable Practice

Editor, *The Monetary Times*.

Sir,—I have read with great interest the article by Mr. R. W. Barton, A.I.A., on loans on life insurance policies appearing in *The Monetary Times* of July 14th, and while I cannot agree with all the author's conclusions in respect to this question, I am sure that most insurance men will agree that it is a practical impossibility to eliminate the loan privilege from our present life insurance policies. The loan question is closely associated with the question of cash surrender values, since if the assured is refused the privilege of a loan, it will in time of stress mean that he will be compelled to surrender his policy altogether, so that in any discussion of the loan question, in so far as it affects the position of a company in a time of great financial stress, the question of cash surrender values must of necessity rank in equal importance. It seems clear to me that we cannot abolish the loan feature without at the same time eliminating cash surrender values, and any one familiar with the conduct of a life insurance business on this continent knows what a disastrous effect it would have on new business if cash surrender values were eliminated.

Companies were Embarrassed.

Mr. Barton also deals with the possibility of a limited "run" on a company. Even in the hard times of 1907, which, as Mr. Barton points out, never amounted to a crisis in Canada, several of our Canadian companies were considerably embarrassed to find the funds to meet current surrenders and loans and this situation would be greatly accentuated if a real crisis developed. It seems to me that this possibility renders it all the more important that an insurance company should pursue an investment policy which would as far as possible insure a reasonable proportion of its assets being in a form readily convertible into cash. Even in normal times, however, it is most desirable from all points of view that loans on policies be reduced to a minimum, and the fact that Mr. Barton's tables show an increasing percentage in recent years is evidence of a condition that is far from reassuring. The provision that is being made for the assured's family is thus largely cancelled. It seems to me that the mortgaging of his life insurance policy is on an entirely different footing from the mortgaging of a man's home or other property, for the reason that it is a special provision made for a special purpose, and in many cases, the only provision that exists for the protection of the assured's dependants. It is not a case of protecting the policyholder against himself, but of protecting his family, and so it seems to me that the analogy Mr. Barton draws from the surrender of an endowment policy does not apply.

Vary Rate of Interest?

Mr. Barton proposes as an influence that would tend to reduce the gross amount of such loans that legislation be secured giving the companies the right to vary the rate of interest when interest rates are high, but this is very apt to defeat its own object in that the assured may prefer to surrender his policy altogether rather than pay high interest charges. In view of the fact that it is not desirable from a new business standpoint to eliminate the cash surrender and loan privileges from our policies, it seems to me that the most effective means at our disposal for curtailing the loan evil is education of our policyholders by means of a publicity campaign, either in the press, or by means of advertising leaflets or both. I am aware that it would only be after considerable hammering away that the result of such a campaign would be evident, but in the long run it should be effective in considerably curtailing the exercise of this privilege.

Yours, etc.,

L. K. FILE,

Assistant Actuary, Canada Life Assurance Co.

Toronto, July 27th.

Mr. George H. Smithers, of Messrs. Burnett & Company, of the Montreal Stock Exchange, has been elected a director of the Paton Manufacturing Company, to fill the vacancy caused by the death of Mr. George Hyde.

WESTERN CROP ESTIMATES

Decrease of 1,483,569 Acres is Shown—Figures from Three Provinces

Western Canada's estimated crop areas for 1916 in comparison with final crop statistics for 1915 have been compiled by Commissioner Sclanders, of the Saskatoon board of trade, in detail, as follows:—

Saskatchewan.

	Wheat.	Oats.	Barley.	Flax.
Acres, 1915 ..	6,884,874	2,846,949	272,299	539,674
Acres, 1916 ..	6,058,441	3,025,210	281,809	556,310
	— 826,433	+ 178,261	+ 9,510	+ 16,636

Saskatchewan's wheat decrease for 1916 is 826,433 acres (or about 12 per cent.), less increases of oats, 178,261 acres, barley 9,510 acres and flax 16,636 acres, so that the total 1916 acreage reduction is 622,026 acres, or about 6 per cent. under that of 1915.

Manitoba and Alberta.

Manitoba.

	Wheat.	Oats.	Barley.	Flax.
Acres, 1915 ..	3,664,281	2,121,845	1,039,849	64,863
Acres, 1916 ..	2,994,529	2,062,411	1,153,660	55,608
	— 669,752	— 59,434	+ 113,811	— 9,255

Manitoba's wheat decrease for 1916 is 669,752 acres, or about 18½ per cent. Oats decreased 59,434 acres and flax 9,255 acres, while the less 1916 increase in barley is 113,811 acres, making Manitoba's total 1916 acreage reduction 624,617 acres, or about 9 per cent. less than for the year 1915.

Alberta.

	Wheat.	Oats.	Barley.	Flax.
Acres, 1915 ..	1,660,076	1,570,596	374,062	41,243
Acres, 1916 ..	1,484,871	1,590,835	297,211	45,120
	— 184,205	+ 20,239	— 76,851	+ 3,877

Alberta's wheat decrease for 1916 is 184,205 acres, and the barley decrease 76,851 acres, and the 1916 oat increase is 20,239 acres and flax increase 3,877 acres, Alberta's total 1916 acreage reduction being 236,940 acres, or about 6½ per cent. less than for the year 1915.

The following comparative table shows 1915 and 1916 acreages in wheat, oats, barley and flax for the three prairie provinces:—

	1915. Acres.	1916. Acres.
Saskatchewan	10,543,796	9,921,770
Manitoba	6,890,838	6,266,208
Alberta	3,654,977	3,418,037
	21,089,611	19,606,015

Share of Each Province.

The decrease for 1916 being 1,483,569 acres, or about 7 per cent. for the three provinces under 1915 acreage. The foregoing decreases are made up as follows: Manitoba, 624,630 acres; Saskatchewan, 622,026 acres; Alberta, 236,940 acres. The 1916 percentage of acreage under the four main crops in question works out, per province, as under: Saskatchewan, 50 3-5 per cent. of total; Manitoba, 32 per cent. of total; Alberta, 17 2-5 per cent. of total.

ROYAL BANK STOCK OFFERED TO PUBLIC

The Royal Bank of Canada is calling for tenders for the whole or any portion of 1,640 shares of the unaccepted allotments and the unallotted fractions of the new issue of 4,400 shares announced in January last. The basis of the issue was approximately 1 share of new stock for every 27 shares of old. The terms of the Bank Act prevent the allotment of fractional shares, so holders of less than 27 shares were unable to avail themselves of the unusual opportunity of subscribing for Royal Bank stock at par. This stock is being offered to the public and any premium realized from the sale will be distributed pro rata among the shareholders who were unable to take up the new shares.

That Boy of Yours

What's to become of the lad in case you should die suddenly? Will he, at fourteen or earlier, be forced out into the world to earn a living?

Or will you make sure that he gets a proper start in life? You can do it, whether you live or die, by means of an Imperial Endowment policy.

WESTERN CANADA'S REFUNDING SCHEME

Doubt Expressed as to Ability to Purchase Appreciable Amount of Desired Securities

Discussing with *The Monetary Times*, the western Canada refinancing scheme, full details of which have appeared in these columns in previous issues, a Canadian bond broker said: "I have misgivings in regard to the wisdom of disturbing Canadian securities that are well sold in London for 30 or 40 years to come. The report that large blocks of Canadian bonds are coming back to New York from London has already had its effect upon new financing within my personal experience. Canada should wish to take advantage of the United States market, and not take a step of such magnitude that might seriously interfere with her own refinancing in the United States in two, three, five or ten years."

"It is a question in the United States market of supply and demand. The English investor is satisfied with the Canadian bond that he now holds. The British government has not in its wisdom demanded the mobilization of Canadian securities. The government will not penalize the home investor in order to compel him to turn into the treasury his Canadian bond holdings. Then in the interest of present day financing, for the sake of a small present profit, and in order to preserve for us the United States market, why not let well enough alone?"

Will Securities be Obtained?

Considerable doubt exists in the Canadian bond market as to whether any substantial amount of the Canadian securities desired can be mobilized in Great Britain. It is thought also that the British treasury will not deem it desirable to penalize those holders of the securities who do not desire to sell. The Canadian Gazette, of London, England, which is in close touch with Canadian finance in the world's metropolis, says: "Further comments in Canadian newspapers show that the idea still prevails that provincial government securities in this market can be purchased as a prelude to creations for the United States market. Nothing is more certain that no appreciable amount can be got at the present prices, and one would think that the present and future requirements of Canadian borrowers will of themselves suffice to satisfy the appetite of United States investors."

Alberta Watching Developments.

According to an interview given by Hon. C. R. Mitchell, provincial treasurer of Alberta, that province has from \$10,000,000 to \$15,000,000 of its securities in Great Britain and the Alberta authorities are watching the western refunding scheme closely. Mr. Mitchell said: "Up to the present the provincial authorities have taken no official action toward refloating this sum by the securing of New York bonds, as we have received no official word of the British mobilization scheme and there are other things to be considered in this connection, as for instance the time of the New York loans, rate of interest, etc."

"If this mobilization is for the benefit of the exchange and desired by Britain at the present time it would seem that it might be all-Canadian in that each province would endeavor to refloat in New York, but it is up to each province to act on its own account and to join the proposed mobilization scheme if it thinks advisable."

Some of the Considerations.

"The Alberta authorities are watching the scheme closely and if developments show that the refloating of the British loans in New York would be to advantage for this province, and with the conditions existent here, no doubt some action toward that end will be taken. Manitoba, however, is differently situated and has different conditions."

"If Alberta were to get the money to pay back British investors in New York the important things to inquire into are: How long would the loans received in the United States metropolis be for and at what rate of interest. If we could only get a short-time loan in New York we might be just as well off as we are for there is the possibility that the province might not be in a position to cover up when the money is required to pay back in New York."

The permanent buildings at the Canadian National Exhibition, Toronto, cost over \$2,500,000.

FINAL ESTIMATES OF CROP AREAS

Condition is Equal to Average but Acreage is Less—Live Stock Figures

The area sown to wheat in Canada is definitely estimated at 11,517,600 acres, which is 1,368,800 acres, or 11.3 per cent. below the high record of last year, when 12,986,400 acres were harvested; but 1,223,700 acres, or 11.9 per cent. above the harvested area of 1914, which was 10,293,900 acres, according to the final returns of the census and statistics office. The acreages estimated as sown to other crops are as follows: Oats 10,644,000, as against 11,365,000 last year; barley 1,397,900, against 1,509,350; rye 159,685, against 112,300; peas 101,420, against 196,210; mixed grains 410,770, against 466,800; hay and clover 7,974,000, against 7,875,000; alfalfa 89,900, against 92,630.

Of late sown crops the acreages are as follows: Buckwheat 355,500, against 343,800 in 1915; flax 723,000, against 806,600; corn for husking 183,700, against 253,300; beans 34,490, against 43,310; potatoes 448,800, against 478,600; turnips, etc., 156,200, against 172,700; sugar beets 15,000, against 18,000 and corn for fodder 297,070, against 343,400.

Wheat About Equal to Average.

The reports show that the prospects for grain crops are excellent throughout the west, but owing to the lateness of the season there will be a greater risk of damage from early frosts than last year. For all Canada the condition of the principal grain crops, expressed in percentage of the standard, ranges from 82 for peas to 91 for rye; but in the north-west provinces the condition is well over 90, and for Manitoba and Saskatchewan it is even higher than at the same date last year, when the high promise at the end of June was so abundantly fulfilled. Converting the figures in per cent. of a standard of 100 to the scale in which 100 represents the average condition on June 30 of the past eight years, 1908-1915, the condition becomes for wheat, rye, barley and oats as follows: Fall wheat 99.2, spring wheat 100.2, all wheat 100.2, rye 103.6, barley 98.5, oats 96. That is to say, if conditions between June 30 and the date of harvest are not abnormal, the anticipated yield per acre is about equal to the average for wheat, 3.6 per cent. above average for rye, about 2 per cent. below average for barley and 4 per cent. below average for oats.

Farm Live Stock.

It is estimated from the reports of correspondents that the numbers of farm live stock in Canada on June 30 were as follows: horses, 2,990,635; milch cows, 2,603,345; other cattle, 3,826,519; sheep, 1,965,101; swine, 2,814,672. As compared with 1915 these figures represent decreases of horses by 5,464; of milch cows by 63,501; of sheep by 73,561; and of swine by 297,228; but an increase of "other cattle" by 427,364. The decreases apply principally to eastern Canada; in the west all descriptions show increases over last year, except swine in all three provinces, and "other cattle" in Manitoba.

Hamilton's soldiers insured in private companies number 1,742, and the annual premium is \$121,279, so Secretary Kent, of the insurance committee, informed the city controllers. Soldiers covered by city, 8,000. Probable liability, assuming half are single and insured for \$500, married men for \$1,000, about \$6,000,000. Hamilton men killed, 250. Money received from companies, \$4,500. Amount given by city, \$1,563. City treasurer is beneficiary in trust in all policies.

Mr. B. S. Brown is chairman of the life committee of the British Columbia insurance federation, the other members are Messrs. Stanley Henderson, J. H. Poff, J. J. Roberts, J. A. Johnson, C. A. Crysdale, W. T. Tasker and W. J. Twiss. The committees of the other sections are:—Fire, Mr. A. W. Ross, chairman; Messrs. B. Garrett, D. E. Lang, F. W. Walker, J. L. Sumerfield and H. T. Devine. Marine, Mr. Leslie H. Wright, chairman; Messrs. C. H. Macaulay, D. B. Phillips and W. H. Billings. Surety, Mr. W. Thompson, chairman; Messrs. H. W. Falconer, T. B. Lewis, D. K. MacDonald, W. A. Wand and J. H. Watson. Automobile, Mr. C. H. Macaulay, chairman; Messrs. J. W. Boyd, H. W. Falconer, R. Winkler, E. Morrison, J. J. Hanley and J. E. Foster. Accident, Mr. D. Cramer, chairman; Messrs. W. S. Holland, A. C. Black, A. L. Steiner, R. Leith Rettie, A. K. Evans and J. E. Foster.

LEGAL NOTICE

CANADIAN GASOLINE CORPORATION, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 12th day of July, 1910, incorporating Arthur John Thomson and William Symon Morlock, solicitors; Samuel Davidson Fowler, solicitor's clerk; Violet Moffat, accountant, and Anna Latimer, office clerk, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To search for and recover and win from the earth, petroleum, natural gas, oil, salt, metals, minerals and mineral substances of all kinds, and to that end to explore, prospect, mine, quarry, bore, sink wells, construct works or otherwise proceed as may be necessary; to produce, manufacture, purchase, acquire, refine, smelt, store, distribute, sell, dispose of and deal in petroleum, natural gas, oil, salt, chemicals, metals, minerals and mineral substances of all kinds and all products of any of the same; (b) To trade in, deal in and contract with reference to lands or interest in land, mines, quarries, wells, leases, privileges, licenses, concessions and rights of all kinds covering, relating to or containing or believed to cover, relate to or contain petroleum, natural gas, oil, salt, chemicals, metals, minerals or mineral substances of any kind; (c) To acquire, purchase, take on lease or license, hire, hold, use, sell, grant leases of, grant licenses of, exchange, alienate, dispose of and otherwise deal in or contract with reference to lands or interests in land, personal property of all kinds or interests therein, rights, privileges, licenses and concessions, ships, boats or vessels of any description, wharves or wharfage facilities, docks and docking facilities, cartage plant, forwarding plant, warehouses and towing, wrecking and salvage plant or any interest in any of the same; (d) To manufacture and deal in appliances, implements, machinery, apparatus, goods and supplies in any way connected with or incidental to the operations of the company or to the use of any of the products of the company; to manufacture or trade in property and goods of all kinds; (e) To work, manage, operate, turn to account, explore, develop and improve the properties of the company, whether mining, agricultural or otherwise; (f) To deal in and contract with reference to timber lands, timber licenses and timber rights, and to cut, render merchantable, handle, manufacture, deal in and contract with reference to timber and lumber of all kinds and all products thereof; (g) To acquire, lease, construct, improve, own, use and operate works for the development of power, light and heat, to use, purchase, sell, supply, lease or otherwise deal in or contract with reference to power, light and heat, subject always to all local laws or regulations in that behalf; (h) To acquire, lease, construct, improve, own, use and operate irrigation works and works for the supply of water for other purposes, and to use, purchase, sell, supply, lease or otherwise deal in or contract with reference to water for irrigation or other purposes, subject always to all local laws or regulations in that behalf; (i) To acquire, lease, construct, improve, maintain, own, use, operate, sell, let and deal in dwelling houses, lodging houses and hotels; (j) To operate ranches or farms for live stock or agriculture, to breed, raise, keep, render marketable and deal in horses, cattle and live stock of all kinds, and to produce and deal in all products thereof and all agricultural products; (k) To operate construction or building plants and to take and carry out contracts for building or for construction work of any kind; (l) To undertake, carry on and execute transactions as financial or commercial brokers or agents; (m) Notwithstanding the provisions of section 44 of The Companies Act, to subscribe for, purchase, assume liability under, acquire, hold, sell, exchange, dispose of or otherwise deal in or contract with reference to bonds, debentures, stocks or other securities or obligations or any estate or interest therein; and to apply or accept, in whole or in part, as consideration for, satisfaction of or security for any contract, indebtedness or obligation, to or of the company, property, obligations, shares and securities of any kind at such valuation and upon such terms as may be agreed upon; (n) To acquire, dispose of or otherwise deal in properties, businesses or undertakings of all kinds similar in whole or in part to those of the company; to furnish aid to any business or undertaking similar in whole or in part to that of the company with which the company may have business relations, by way of loan, bonus, endorsement, agreement, guarantee, management or other service, and to manage, supervise and control the same in whole or in part and to act as agent or attorney for the same; (o) To carry on any other business which may seem capable of being conveniently or advantageously carried on in connection with the business of the company or calculated directly or indirectly to enhance the value of, to facilitate the realization of or to render more profitable any of the company's businesses, properties, or rights; (p) To invest the moneys of the company not immediately required in such investments as may from time to time be determined; (q) To co-operate in, aid in, subscribe towards or subsidize any proceeding or undertaking which may seem calculated directly or indirectly to benefit the company; (r) To acquire or undertake the whole or any part of the business, property and liabilities of any person, partnership, association or company having objects altogether or in part similar to the company, or carrying on any business which the company is authorized to carry on, or possessed of property which may seem suitable or desirable for the purposes of the company; (s) To apply for, purchase or otherwise acquire and to protect, prolong and renew patents, patent rights, trade marks, formulae, licenses, protections, concessions and the like, conferring or relating to any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, improve, develop or grant licenses in respect of or otherwise turn to account the property, right or information so acquired; (t) To enter into partnership or into any arrangement for sharing of profits, or expense, union of interests, co-operation, joint adventure, reciprocal concessions or otherwise, with any person, partnership, association or company carrying on or engaged in, or about to carry on or engage in, any business or transaction which the company is authorized to carry on or engage in, or any business or

transaction which may seem capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person, partnership, association or company, and to take or otherwise acquire shares and securities of any such partnership, association or company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (u) To take or otherwise acquire and hold shares in any partnership, or stock or shares in any association or company having objects altogether or in part similar to those of the company, or carrying on any business which may seem capable of being conducted so as directly or indirectly to benefit the company; (v) To apply for, promote and obtain from the Dominion of Canada or any other authority, whether Dominion, Provincial, Imperial, Colonial or foreign, and including subordinate and municipal authorities, any statute, ordinance, order, regulation or other authorization or enactment which may seem desirable to the company or calculated directly or indirectly to benefit the company; (w) To enter into any arrangements with any governments or authorities, supreme, provincial, civic, municipal, local or otherwise, that may seem conducive to the company's objects or any of them, and to obtain from any such government or authority any statutes, ordinances, licenses, contracts, orders, regulations, decrees, rights, powers, franchises, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with the terms of the same; (x) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company, or of its predecessors in business, or of any person, partnership, association or company allied with the company in business or subsidiary to the company, or in which the company holds shares or securities, or to benefit the dependents or connections of such persons, and to grant pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (y) To promote, form, organize, manage, develop, take interests or stock or shares in and assist financially or otherwise any partnership, association or company for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose which may seem calculated directly or indirectly to benefit the company; (z) To acquire, purchase, take on lease, hire, construct, improve, own, maintain, operate, manage, carry out and control plant, equipment, machinery, supplies, buildings, works, shops, warehouses, manufactories, pumps, tanks, tank cars, pipe lines, smelters, refineries, roads, ways, canals, bridges, electric works, electric plant, hydraulic works, hydraulic plant, boats, ships, docks, wharves, piers, gas works, cables, waterworks, reservoirs, aqueducts, flumes, ditches and all such other structures, works, conveniences and appliances as may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the acquisition, purchase, leasing, hiring, construction, improvement, ownership, use, maintenance, operation, management, carrying out or control thereof; (aa) Where such course is required for the purposes of the company or may seem calculated directly or indirectly to advance the company's interests, to acquire, purchase, take on lease, hire, construct, improve, own, use, maintain, operate, manage, carry out and control, but only upon lands owned or controlled by the company, or over which the company may have a right of license to that effect, such roads, ways, bridges, lines of rail, spurs, sidings, tracks, rolling stock, cables, wires, motors, locomotives, electrical plant and all such other structures, works, conveniences and appliances as may be required for the purpose of maintaining communication by telegraph or telephone, or of effecting the transport of goods or passengers, and to contribute to, subsidize or otherwise assist or take part in the acquisition, purchase, leasing, hiring, construction, improvement, ownership, use, maintenance, operation, management, carrying out or control thereof; (bb) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (cc) To sell or dispose of the property or undertaking of the company, or any part thereof, for such consideration as the company may think fit, and in particular, and notwithstanding the provisions of section 44 of The Companies Act, for shares, debentures or securities of any other partnership, association or company; (dd) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (ee) To sell, exchange, lease, dispose of, turn to account or otherwise deal with or contract with reference to all or any part of the property and rights of the company; (ff) To consolidate or amalgamate with any other company having objects similar in whole or in part to those of the company; (gg) To procure the company to be registered, licensed or otherwise recognized in any foreign country, and to designate and appoint persons therein as attorneys or representatives of the company with full power to represent the company in all matters according to the laws of such foreign country and to accept service for and on behalf of the company of any process or suit; (hh) To pay out of the funds of the company all or any of the expenses of or incidental to the formation and organization thereof; and to employ, contract with and provide for the remuneration of brokers, commission agents and underwriters upon any issue of shares, bonds, debentures, debenture stock or other securities of the company; (ii) To distribute or divide assets of the company in specie amongst the shareholders; (jj) To do all or any of the above things as principals, agents, contractors or otherwise, and either alone or in conjunction with others; to do all such other things as may seem directly or indirectly to be incidental to or conducive to or convenient or proper for the accomplishment of the purposes or the attainment of the objects of the company, or any of them, or expedient for the protection or benefit of the company; (kk) No power granted in any paragraph hereof shall be limited or restricted by reference to or inference from the terms of any other paragraph hereof. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Can-

LEGAL NOTICE

adian Gasoline Corporation, Limited," with a capital stock of three million dollars, divided into 3,000,000 shares of one dollar each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 15th day of July, 1916.

THOMAS MULVEY,

Under-Secretary of State.

THE LOWNDES COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the seal of the Secretary of State of Canada, bearing date the 20th day of June, 1916, incorporating Elroy Barrie Schroeder, manager; Charles Arnold Stone, accountant; Harry Booker Sweetapple Hammond, student-at-law, and Jessie Harold Whitcomb and Annie Hunter, spinsters, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—

(a) To manufacture, buy, sell and deal in goods, wares and merchandise of all kinds;

(b) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights;

(c) To apply for purchase or otherwise acquire, any patents, brevets d'invention, grants, leases, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to pay for the same in cash, shares or other securities of the company or otherwise, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired;

(d) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same;

(e) To enter into any arrangements with any Government or authorities, supreme, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges, franchises and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with or surrender any such arrangements, rights, privileges, franchises and concessions;

(f) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors or associates in business) or the dependents or connections, of such persons, and to grant annuities, pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object;

(g) To promote any company or companies for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company;

(h) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business, or capable of being profitably dealt with in connection with any of the company's property or rights for the time being;

(i) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable and transferable instruments;

(j) To purchase, lease or otherwise acquire and to hold, exercise and enjoy in its own name, all or any of the property, franchise, good-will,

rights, powers and privileges held or enjoyed by any person or firm or any company or companies, and to pay for such property, franchise, good-will, rights, powers and privileges wholly or partly in shares of the company wholly or partly paid up, and to undertake the liabilities of any such person, firm or company;

(k) To aid in any manner any corporation any of whose shares of capital stock, bonds, debentures or other obligations are held or are in any manner guaranteed by this company, and to do any act or things for the preservation and protection, improvement and enhancement of the value of any such shares of capital stock, bonds, debentures, or other obligations, and to do any and all acts tending to increase the value of any of the property at any time held or controlled by this company;

(l) To purchase, take or acquire by original subscription or otherwise, and to hold and, with or without guarantee, to sell or otherwise dispose of shares, stock, whether common or preferred, debentures, bonds and other obligations in and of any other company carrying on a business in whole or in part similar to that of the company, and to pay for such shares, stocks, debentures, bonds, and other obligations either in cash or partly in cash, or to issue shares of this company fully paid up or partly paid up in payment, and notwithstanding the provisions of section 44 of the said Act, to use the funds of the company in the purchase of shares, stock, debentures, bonds and obligations in and of any such other company, and to vote on all shares so held through such agent or agents as the directors may appoint.

(m) To sell, let or hire, or otherwise deal with the assets of the company, or any part thereof, for such consideration as the company may think fit, and in particular for shares, debentures, debenture stock or other securities of any other company;

(n) With the approval of the shareholders, to remunerate any persons for services rendered to the company, in such manner as the company may deem expedient, and more particularly by the issue and allotment of shares, bonds and other securities of the company, wholly or partially paid up, but nothing in this clause contained shall be deemed to limit the power of the directors to fix and pay the salary of any and all officers, servants, agents and employees of the company;

(o) To lend money to customers and others having dealings with the company and to take security for the loan of such money; to guarantee the performance of the contractual and other obligations of any such persons and to give any guarantee or indemnity as may seem expedient;

(p) To pay out of the funds of the company all expenses of or incidental to the formation, registration and advertising of the company, or in or about the promotion of this company or the conduct of its business;

(q) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations;

(r) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company;

(s) To do all or any of the above things as principals, agents, contractors or otherwise, and either alone or in conjunction with other, and either by or through agents, sub-contractors, trustees or otherwise;

(t) To do all such other things as are incidental or conducive to the attainment of any one or more of the above objects, and so that the objects specified in each paragraph of the clause shall, except when otherwise expressed in such paragraph, be in no wise limited or restricted by reference to or inference from the terms of any other paragraph or to or from the name of the company;

(u) To acquire and take over as a going concern the several businesses now carried on at the City of Toronto, in the County of York, under the Ontario Corporation, The Lowndes Company, Limited, with all the assets, stock-in-trade, and real and personal property owned or used in connection therewith and the goodwill thereof, and all the rights and contracts now held by said corporation, subject to the obligations, if any, affecting the same, and to pay for the same in paid-up shares of this company.

The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Lowndes Company, Limited," with a capital stock of five hundred thousand dollars, divided into 5,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 22nd day of June, 1916.

THOMAS MULVEY,

Under-Secretary of State.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

CROWN LIFE'S ASSISTANT MANAGER

Mr. H. R. Stephenson, actuary of the Crown Life Insurance Company, has been appointed assistant manager, retaining his position as head of the actuarial department in addition to his other duties. Mr. Stephenson is a fellow of the Actuarial Society of America and an associate of the Institute of Actuaries of Great Britain. He is one of the younger members of the actuarial profession, studious, agreeable and greatly interested in his work.

LIFE OFFICERS AND LIFE AGENTS

Mr. Alex. Bissett, manager for Canada of the London and Lancashire Life and president of the Life Insurance Officers' Association, at the Life Underwriters' convention at Hamilton conveyed the greetings of his association to the agents. "In the life insurance business, or profession," he said, "the intermediary or agent is essential to the company's success, and stands as a connecting link between the company supplying the benefit and the consumer or policyholder who requires the benefit. In practically every case the success of the company may be judged by the strength of this connecting link. The agency staff is indispensable to the company, and for that reason anything which will help to improve the methods employed by those in the ranks of that profession is worthy of the cordial support of all."

Referring to the subject of the lapse ratio, while admitting that there are a good many reasons for this, Mr. Bissett said he firmly believed that agents could do something more towards remedying this evil. It is a recognized fact that the average applicant looks to the agent for advice upon the plan of insurance to select, the amount of policy, and so forth. To the agent who is in business to stay, it is important that he should study his prospect's requirements, and to suggest such a plan of insurance and amount which will answer the needs of the future as well as of those of the present. In other words, greater care in writing the proper class of business will go a long way towards insuring a fair degree of permanence.

WHY CANADIAN PACIFIC STOCK SHOULD RESIST

"There are three excellent reasons why Canadian Pacifics should present a stiff front to market fluctuations at the present time," says "Canada," the Canadian illustrated weekly published in England. "The first is, of course, the splendid showing made by the company for the fiscal year ending with June 30th last, which we dealt with in last week's 'Canada'; the second is the practical certainty of the maintenance of the dividend on a 10 per cent. basis; and the third is the fact that the shares are not subject to the penalty income tax applicable to the American and Canadian securities included in the four lists of stocks and bonds issued by the American Dollar Securities Committee. This latter consideration has had great weight with American financiers, who hold that the discrimination in favor of C.P.R.'s should tend to put something of a premium on the stock, as its income yield is, of course, increased to the extent of the tax in comparison with other American securities which the treasury is prepared to purchase. One writer in dealing with the subject points out that the stock would also be released from the pressure of sales in New York, and might be one of the stocks to be included in a one-sided bull market, from which the dividend-paying American railroads would be necessarily shut out.' Whilst in view of the difficulty of estimating the stage of finality of the interest yield on investments it is rash to hazard an opinion as to the correct market valuation of even such a high-class security as C.P.R.'s in all the circumstances attaching to this investment, it does not seem extravagantly appraised at about 187, at which figure, it may be noted, on a 10 per cent. dividend basis, the yield works out at the rate of 5.34 per cent., a respectable return, even in these days of abnormal interest yields."

Mr. P. A. Robbins has been appointed managing director of the Hollinger Consolidated Gold Mines. The company's board of directors has been increased from five to seven.

Is Your Estate Properly Protected?

No matter how little or how much you own, these possessions make up your estate, and should be protected by efficient and economical management.

This can best be done by an Executor or Trustee.

This Company, by acting in this capacity, will give your estate the benefit of experience gained in the management of many estates, of large and of only moderate size, and will scrupulously guard the interests of your heirs.

No charge for drawing up your will when the Sterling Trusts Corporation is appointed your Executor and Trustee.

Our officers will give you further information on request.

DIVIDENDS AND NOTICES

UNION BANK OF CANADA

DIVIDEND No. 118

Notice is hereby given that a Dividend at the rate of eight per cent. per annum upon the Paid-up Capital Stock of the Union Bank of Canada, has been declared for the current quarter, and that the same will be payable at its Banking House, in the City of Winnipeg, and at its branches on and after Friday, the 1st day of September, 1916, to Shareholders of record, at the close of business, on the seventeenth day of August, 1916.

The transfer books will be closed from the 18th to the 31st of August, 1916, both days inclusive.

By order of the Board,

G. H. BALFOUR,

Winnipeg, July 20th, 1916. General Manager.

THE ROYAL BANK OF CANADA

DIVIDEND No. 116

Notice is hereby given that a Dividend of Three per cent. (being at the rate of Twelve per cent. per annum) upon the Paid-up Capital Stock of this Bank, has been declared for the Current Quarter, and will be payable at the Bank and its Branches on and after Friday, the First day of September next, to Shareholders of record of 15th August.

By order of the Board,

C. E. NEILL,

General Manager.

Montreal, P.Q., July 18, 1916.

BANK OF MONTREAL

Notice is hereby given that a Dividend of Two and One-Half per Cent. upon the paid-up Capital Stock of this Institution has been declared for the three months ending 31st July, 1916, and that the same will be payable at its Banking House in this city, and at its Branches, on and after Friday, the First Day of September next, to shareholders of record of 31st July, 1916.

By order of the Board.

FREDERICK WILLIAMS-TAYLOR,

General Manager.

Montreal, 21st July, 1916.

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 118

Notice is hereby given that a quarterly dividend of 2½ per cent. upon the capital stock of this Bank has been declared for the three months ending the 31st of August next, and that the same will be payable at the Bank and its Branches on and after Friday, 1st September, 1916, to shareholders of record at the close of business on the 16th day of August, 1916.

By order of the Board.

JOHN AIRD,

General Manager.

Toronto, 24th July, 1916.

ILLINOIS TRACTION COMPANY

DIVIDEND NOTICE

A Quarterly Dividend at the rate of Three per cent. (3%) per annum on the Common Stock of the Illinois Traction Company has been declared for the Quarter ending July 31st, 1916, payable August 15th, 1916, to Shareholders of record July 31st, 1916.

By Order of the Board.

GEO. M. MATTIS,

Treasurer.

Champaign, Ill.

NOTICE OF Judicial Sale of Property

Pursuant to the Order Nisi and the Final Order for Sale in S.C. 10623, Judicial District of Calgary, there will be offered for sale, with the approbation of a Judge of the Supreme Court of Alberta, by Henry M. McCallum, Auctioneer, at the Court House, in the City of Calgary, in the Province of Alberta, at Two o'clock in the afternoon, on Wednesday, the 6th day of September, A.D. 1916, standard time, the following lands and premises, being and comprising:—

1. The whole of the Railways and branches constructed or acquired by the Defendant between a point on the Canadian Pacific Railway, one mile west of Pincher Station, in the Province of Alberta, and Beaver Collieries, the property of North American Collieries, Limited, a distance of about 14 miles, with all lands or right-of-way owned or used by the Defendant as appurtenant thereto, stations, freight houses, side tracks, shops, yards, engine-houses and other buildings and structures used in connection with the said Railway and Branches, or any part thereof, together with the franchises of the Defendant in respect to the same.

Terms: Ten per cent. cash; 15% in ninety days; 25% in six months; 25% in 9 months and 25% in 12 months. The last three payments bear interest at 5%.

Dated at the City of Calgary, in the Province of Alberta, this 3rd day of July, A.D. 1916.

LAURENCE J. CLARKE,

Clerk of the Court.

Approved: "L. F. Clarry."

NICKEL REFINERIES IN ONTARIO

The International Nickel Company and the British-American Nickel Company will both erect refineries in the province of Ontario, according to the statement of Hon. G. Howard Ferguson, minister of lands, forests and mines.

Mr. Ferguson said that the work of the nickel commissions had resulted in the solution of the problem of refining the ore, and that both companies will commence operations, and work will begin as soon as the plans have been completed. The British-American Company is about to commence work for the development of power on the Wanapitei River, near Sudbury, for its smelter, and will erect a refinery at the same time. Port Colborne, Ont., is the location chosen for the International Nickel Company's refinery.

Messrs. N. W. Halsey and Company, 49 Wall Street, New York, have issued two interesting booklets for investors, "Bonds Favored by Banks in 1915," and "The Essentials of a Standard Public Utility Bond."

Mr. R. M. Kindersley has been elected governor of the Hudson's Bay Company, and Mr. Charles V. Sale, deputy-governor of the company, succeeding Sir Thomas Skinner and Mr. L. D. Cunliffe, respectively. The vacancy on the committee caused by the retirement of Sir Thomas Skinner has been filled by the election of his son, Mr. T. Hewitt Skinner.

You Can Improve Your Position

Have you heard of the Sales and Intelligence Departments of the Canada Life?

They give special assistance to the Company's representatives.

They teach a man the insurance business by correspondence and personal assistance free of charge

Then they place him in a position and help him to make good

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this. All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policyholders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

*NOTE.—It will be noted that the figures relating to the imports of coin and bullion for the twelve months ending May, 1916, amounted to \$34,129,108, as against \$192,349,976 for the same period of 1913-14. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

WAR LOAN AND BOND BROKERS

Bond Brokers Ask for Better Treatment in Regard to the Second War Issue

Bond houses are making preliminary arrangements for the part they will take in the marketing of the next war loan. They have in the aggregate many thousands of patrons and since the flotation of the first war loan, their lists of clients have been extended considerably, including a number of investors hitherto not very familiar with bond investments. Of the former war loan, Canadian bond houses handled, probably, 40 per cent. of the business, despite the fact that the banks and the life insurance companies, whose subscriptions were very large, placed none of their business through the brokers.

As the issue of the second war loan is but a few weeks distant, it is proper to recall that considerable dissatisfaction was expressed by a number of bond houses at their treatment on the occasion of the first loan. The complaints heard and recalled now are best put in the following statements of brokers: "A number of banks," they say, "refused to accept subscriptions to the first war loan, when the subscription forms bore the stamp of a bond house. In a number of cases the stamp was scratched out, obliterated by pencil marks or cut off altogether. Some branch bank managers appeared to have an erroneous idea that if the bond houses obtained a commission for subscriptions to the loan, the banks would not obtain their remuneration. Consequently, these men seemed to do their utmost to block the bond houses from getting credit for their subscriptions. The bond houses were all behind Sir Thomas White with their selling organization, and they expended much labor and money in helping to float the first loan. There was no legitimate reason, therefore, for such action on the part of many branch bank managers.

Known Ahead of Time.

"A week or more before the prospectus was issued, most, if not all, of the banks had in their possession full information respecting the loan. On the other hand, the government refused to give the bond houses any information regarding the loan until the day the subscription lists were opened. This meant that the bond houses had to use at least the first day (after the loan was opened for subscription) in getting their circulars and other selling matter in shape for mailing. The banks, therefore, had practically the whole of the first day of the loan offering, which is invariably the best day, all to themselves. For a week prior to the first day, the bond houses had no official knowledge on which to prepare their circulars, yet the banks were all this time in possession of the government circulars, which the bond houses were not permitted to see. We claim that this was unfair to the bond houses. No objection is raised to the banks being made the medium of the loan, for that arrangement is an admirable one. All we ask is that the banks and the bond houses be granted equal privileges.

Life Insurance Subscriptions.

"On the last occasion, the subscriptions of the life insurance companies to the loan were made direct to the government. It would be more fair if the life insurance companies' subscriptions were made through the bond houses. Those companies are our regular customers. We are selling bonds to them throughout the year. The sale of the war bonds to the insurance companies should be put through the regular channels of business.

"We hope that these points will be given proper consideration by the finance department in regard to the second war loan next month."

Mr. James Carruthers, who is making a trip through the Western wheat belt, summing up results of his visit, on his arrival at Edmonton, says: "Crop prospects at present in the Canadian North-West could not be better. They are uniformly good over all lines, and with a continuance of fine weather it looks as if Canada were going to be favored with another large crop. A few sections are damaged by hail-storms, but this happens every year. I never saw the country looking so well in the districts covered by the Grand Trunk Pacific between Winnipeg and Edmonton. Business conditions are very quiet, but it is believed that if the country pulls off another large crop this fall that they will improve very fast."

Banks and the Farmers

IMPORTANT *Conference at Winnipeg Dispels Misunderstandings and Brings Concessions to the Agricultural Interests—Usance of Promissory Notes, Livestock Loans and Co-operative Credit Associations Discussed—Bank Managers Will Be Discouraged from Acting as Insurance and Loan Company Agents.*

THAT the chartered banks of Canada at present have out on loan more than \$50,000,000 to farmers in the prairie provinces was a statement elicited at the recent conference at Winnipeg of organized farmers and of the general superintendents in charge of all the banks in the prairie provinces. The meeting was the first of its kind and proved satisfactory to all concerned, important practical results being achieved.

The bankers presented a written statement as follows:—

1—(a) Usance of promissory notes: In granting credits to farmers it has always been recognized by the banks that payment of the advances could not be expected until the proceeds of the season's crop would be available. Notwithstanding that credits are usually established for the season, there is an implied understanding that their continuance for that period is conditional on a maintenance of good faith on the part of the customer, and the object of limiting the term of discount is to enable a bank to protect itself at reasonable intervals in the event of any development seriously detrimental to the customer's standing. The same custom applies to all commercial credits. In practice this limitation is never taken advantage of unfairly to the injury of a customer, and its reasonableness has seldom been questioned.

It is the feeling of the western representatives of the banks that it would be unwise for them to give any general undertaking to discount farmers' notes drawn at a longer usance than the usual three and four months. They appreciate, however, the point raised by the farmers' representatives, and it will be their aim to arrange the maturities of notes representing farmers' borrowings so as to meet the convenience of their customers as far as possible, having regard to the merits of each individual case.

1—(b) Extensions of credit to carry grain: The practice of requiring an annual clean-up of the farmers' borrowings for one season before entering upon advances for the following season originated in the older settled provinces of the east. There it worked no hardship to the farmer, since no one crop was ever raised in sufficient quantity to render its marketing a strong factor in depressing prices, and the experience of many years demonstrates conclusively that in the long run the farmers who sold their grain when it was ready for market got a better result than those who frequently held in the hope of higher prices.

Until quite recent years the aim of almost all farmers in the West was to market their grain at the earliest possible date after harvest, and to get the year's indebtedness settled up. In these circumstances little or no objection was ever raised to the principle of a clean-up of bank borrowings by the end of the year or shortly thereafter. Now, however, that Canada has attained the position of the world's fourth largest wheat producer, and the marketing of its surplus has become an important factor in the world's markets, it is obvious that western farmers—and incidentally Canada as a whole—would profit largely if farmers' deliveries could be regulated so as to be spread more evenly over the period between harvest and harvest. Recognition of this fact has already found reflection in the policy of many banks having country branches and the members of the sub-section are prepared as far as possible, to finance their farmer customers so as to facilitate a gradual marketing of the grain.

In this matter also, however, it must be clearly understood that every case would require to be dealt with on its merits. A farmer whose financial position was a difficult one and who was in danger of being harassed by outside creditors, could scarcely expect that his banker would permit him to delay selling his grain merely in the hope of obtaining a higher price, unless the grain were independently warehoused and security thereon given to the bank.

2—(a) Loans to buy livestock for feeding: An advance to a farmer to purchase cattle at one season of the year to be fed and sold at a later season, has always been recognized as constituting a desirable banking transaction, and the banks are more than ever disposed to encourage the cattle-feeding industry and to carry loans for the period necessary to mature the livestock.

2—(b) Loans for stock raising: In view of the fact that the deposits of the banks are subject to withdrawal on demand or at short notice, it would be contrary to sound banking principles for a bank to bind itself to carry loans for a period of two or three years. Nevertheless, the bankers are thoroughly alive to all the necessities of the western livestock industry, and would approve of the practice of lending money to capable and industrious farmers for stock-raising operations and affording them every reasonable assistance to bring their young stock to maturity by renewing their notes from time to time on the merits of each case and as conditions may permit.

3—Co-operative Credit Associations: The disposition of the banks would be to lend their support to the develop-

ment of the farmers' co-operative movement so long as it proceeds on sound lines. If it should be found feasible to effectively organize farmers' co-operative credit associations, and provided it was clear that the collective obligation of such an association afforded added safety, the banks would undoubtedly be prepared to recognize this fact by according a reduced rate of interest.

4—Managers acting as agents for insurance and mortgage companies, grain commission firms, etc.: The possibility of abuses arising from bank managers acting as agents for fire and hail insurance companies, mortgage companies, grain commission firms, etc., to which attention was drawn at the last meeting of farmers and bankers, is fully appreciated by the banks, and such action will be discouraged.

Extension of Note Period.

After the reading of the above statement, a general discussion occurred. The bankers asked that the farmers follow a general practice of arranging for their season's credit early in the year, but pointed out that they could not grant floating credit on notes of nine and twelve months. They were quite willing to carry farmers in good standing until their crop was taken off and marketed, but to be consistent with sound banking principles, and because of the fact that most of the money in the banks was deposited on demand, it was necessary to review the securities throughout the year. On general principles, however, it was agreed that the notes where the standing of the farmers was unquestioned, would be for a somewhat longer term than had been usually practised, depending upon the merit of the individual cases.

A second form of credit was that for the marketing of the grain so that the farmers would not be compelled to throw it on the market as soon as threshing was over and thus force lower prices, as has been the custom for years past. This, the bankers readily agreed to, and it will be their practice in the future where individual merit warrants it to assist the farmers in carrying their crop so as to market it throughout the year in order to maintain prices at a uniformly higher level.

The third form of credit discussed was that for the production and feeding of livestock. It was pointed out that the banks could not grant credit for two and three years on straight notes, but they are quite prepared to assist in every way in the development of the livestock industry and would grant such credit on notes to be renewed from time to time to assist industrious farmers to get into the livestock business as quickly as possible. On the question of livestock credit associations it was pointed out that this would largely be a matter of development. There were several associations already organized in the West which were securing a reduction in the ordinary rate of interest, and the bankers were prepared to follow this practice where the organization was of a kind that gave added safety to the security of the loans granted.

Co-operative Buying.

The question of co-operative buying as is practised by local farmers' co-operative associations was also discussed, and it was pointed out by the farmers that such local associations frequently had difficulty to secure credit at the banks for the purchase of cars of twine, coal and lumber, and the farmers asked whether it was the policy of the bankers to discourage such co-operative purchases or to assist. The farmers showed how by such co-operative purchases they were able to reduce the cost of living, and the cost of farming, and the bankers declared themselves heartily in accord with the ideas, and that it would be their policy to assist the farmers in such business transactions. The bankers declared that they were in the

banking business only and were not interested in any lumber combine or any organization to force the distribution of goods through what are called "legitimate channels of trade." They considered it the proper function of a bank to assist in every way to put trade on a cash basis.

In connection with loans on livestock, which are now permitted by the amendment of the bank act made at the last session of parliament, it is provided that the security taken should be in the form of a chattel mortgage, which must be drawn by a lawyer at a cost of \$5 or more, and must be registered at an additional cost of several dollars. The farmers were not favorable to this form of security, as a chattel mortgage has an odium attached to it, and it is generally considered that when a farmer has a chattel mortgage his finances are not in the best shape. It was therefore agreed that it would be desirable to have an amendment to the bank act by which this security for loans on livestock could be taken in the form of a livestock lien in accordance with statutory provisions, so that it could be drawn by the banker and the farmer together without any cost, and could be registered at an expense of from ten cents to twenty-five cents. It is the intention to bring this to the attention of the minister of finance and, if possible, to secure the amendments necessary, both to federal and provincial statutes, and thus to prevent the stigma of the chattel mortgage in the development of the livestock industry.

Bankers as Insurance Agents.

There was discussion as to local managers acting as agents for various kinds of insurance and also for grain commission merchants and mortgage companies. All the superintendents of the larger banks stated that their managers were prohibited from carrying on this kind of business, as they regarded it not only as injurious to standard banking principles and policy, but injurious to farmers as well. It will, therefore, be their policy to see that this is prohibited, although it is understood that some of the smaller banks have not entirely prohibited the practice on the part of their managers.

It was urged on the part of the bankers that all complaints be sent in to the head office for adjustment. They stated that they did not hear a fraction of these complaints that were made to the organized farmers, and if such were sent to the superintendents they would be adjusted promptly and the difficulties cleared away.

The question of rates of interest was also discussed. The bankers said it was purely a matter of the volume of business and the security offered. The best farmers, whose business was always in good shape, secured a lower rate of interest than that generally prevailing, the rates running from 7 to 10 per cent. It was stated that it was a matter of indifference to the banks whether a note was discounted or whether the interest was paid at maturity. This was a matter of arrangement between the farmer and the local bank manager at the time of securing the loan.

Changes of Managers.

The question of the frequent change of managers was also discussed and the bankers said that it was impossible to improve this situation at the present time on account of the difficulty in securing a sufficient supply of managers. A large number of their local managers had gone to the war, and this fact formed one of the chief difficulties in the banking business to fill the vacancies of those who had enlisted. The rapid growth of Western business, necessitating rapid expansion by establishing many new branches, had also been difficult to keep pace with.

Further conferences will be held from time to time to take up other problems that may arise.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

The following table compiled by *The Monetary Times*, gives the bank loans to municipalities since August, 1913, to the latest month this year for which figures are available:—

	1913.	1914.	1915.	1916.
January	\$29,301,620	\$35,952,805	\$32,015,371	
February	30,372,854	38,437,903	35,149,915	
March	31,890,843	41,227,449	38,649,462	
April	30,168,812	43,031,360	44,371,050	
May	33,689,577	43,948,436	43,924,036	
June	37,260,571	46,889,816	46,773,032	
July	36,372,334	44,029,446		
August	\$41,310,281	39,664,534	46,020,730	
September	37,465,383	44,338,873	43,928,331	
October	37,846,369	47,316,076	45,682,230	
November	35,173,817	44,706,055	41,064,550	
December	30,518,573	38,256,947	30,878,028	

Watford, Ont.—A by-law to issue \$10,000 bonds to pay for the installation of hydro-electric system has been carried.

Preston, Ont.—An issue of \$20,000 5½ per cent. 10-year bonds have been awarded to Messrs. R. C. Matthews and Company, Toronto.

West Lorne, Ont.—An issue of \$6,500 6 per cent. 20 instalment bonds for school purposes has been awarded to Messrs. Mulholland, Bird & Graham, Toronto.

Aylmer, Que.—Tenders close on August 24th for \$35,000 5 per cent. 30-year bonds. H. Sexsmith, secretary-treasurer. (Official announcement appears on another page.)

Hamilton, Ont.—The sale of \$202,000 patriotic bonds has been completed. Mr. F. W. Baillie, of the Bankers Bond Company, Toronto, purchased \$25,000 of this amount.

British Columbia.—A certificate of approval has been issued by the provincial municipal department for West Vancouver's \$10,000 5½ per cent. twenty years ferry bonds.

Edmonton, Alta.—Tenders close 18th on a block of rural school district debentures amounting to \$5,150 seven per cent. ten instalment bonds with the exception of an issue for \$350, which is repayable in seven equal consecutive annual instalments. These bonds will be dated the 5th of August, 1916, with coupons maturing annually on the 5th of January. M. C. Elliot, manager bond branch of provincial department of education.

New Glasgow, N.S.—An issue of \$12,500 5 per cent. ten-year bonds has been awarded to the Maritime Trust Corporation, Halifax. The tenders were as follows:—

Maritime Trust Corporation	97.27
Sterling Securities, Limited	96.57
Eastern Securities, Limited	96.03
Dominion Securities Corporation, Limited ...	95.13
F. W. Nichols, Digby	94.36
J. C. Mackintosh & Company	94.31
W. F. Mahon & Company, Halifax	94.129

Portage la Prairie, Man.—For an issue of \$35,000 6 per cent. 20 instalment school bonds, there were eleven bids as follows, the first named being successful:—

W. L. McKinnon & Company, Toronto.....	99.802
Dominion Securities Corporation, Toronto..	99.581
Goldman & Company, Toronto	99.57
Canada Bond Corporation, Toronto	98.68

Town.—Herbert, \$2,800. G. L. Wheatley, Herbert.

CANADIAN VICKERS' LONDON ISSUE

An issue of £1,000,000 6 per cent. debentures is being arranged in London for the Vickers Canadian Company. This will be the first Canadian offering in London this year. The issue indicates extension of the company's work at its Montreal plant.

SASKATCHEWAN ELEVATOR COMPANY'S RETURNS

In the first season of the Saskatchewan Co-operative Elevator Company's operations there were 9,000 shareholders. This number has been doubled. The growth in the number of elevators has been from 46 in 1912, to 230 in this present season. In the first season the company handled 3,262,000 bushels, while it is anticipated in this season over 40,000,000 bushels will be handled.

Mr. C. A. Dunning, general manager, points to the record of individual elevators. The report of the elevator commission, upon which the system is based, assumed that each elevator would be filled three times during the season. With a few exceptions the elevators are of a 30,000 bushel capacity. At Cabri, the elevator handled 518,000 bushels; in other words it was filled more than 17 times during the season.

At a special meeting of the directors an eight per cent. dividend on the paid-up stock of the company was declared.

The Sterling Bank of Canada has issued a couple of attractive wall cards which should be in all offices and homes. "Save because the nation requires you to economize" reads one, while the other points out that "your future welfare depends upon the habits acquired to-day." Hung in schools, halls, factories, wherever people gather, it will exercise a good influence. This card is supplied free by the head office of the Sterling Bank in Toronto.

BURNABY BOND DISPUTE SETTLED

Toledo Firm Settles on Basis of Par and Interest to July 27th

The dispute in regard to the treasury certificates of the district of Burnaby, B.C., has been settled. Messrs. Spitzer, Rorick and Company, Toledo, Ohio, offered to settle on the basis of par and accrued interest to July 27th. This offer was accepted by the district of Burnaby. Spitzer, Rorick and Company voluntarily withdrew the suit in the New York courts and will pay all the legal expenses in connection with the action. The treasury certificate issue of \$1,250,000 has been redeemed and the collateral debentures of \$1,716,000 have been surrendered by the Equitable Trust, of New York, to the Royal Bank of Canada for cancellation.

Details of Case.

The details of this case were given fully in *The Monetary Times* of June 2nd. The district of Burnaby sold in November, 1913, to Spitzer, Rorick and Company \$1,250,000 three-year notes, the district having the privilege of redeeming them at any interest date after November, 1914, upon giving six months' notice, providing the proceeds for the retirement of the notes were derived from the sale of the collateral bonds held as security for the notes. Should the notes not be retired by the municipality by September 1st, 1916, the Toledo bond firm were to have the right to sell the bonds held as collateral against the notes at any price fixed by the bond house. The collateral bonds, which amounted to \$1,716,000, were 4½ and 5 per cent. long-term bonds, maturing in various years between 1927 and 1953. These were deposited with the Equitable Trust Company, of New York.

During the past year the municipality recognized that the conditions were changed, and that they would not require to spend as much money on local improvements, etc., as had been anticipated. They, therefore, sought power from the British Columbia legislature to make an issue of \$1,000,000 6 per cent. serial debentures, maturing in 20 instalments, in place of the \$1,716,000 long-term securities noted above. This action, they pointed out, would reduce the debenture debt by \$716,000, and would also reduce the annual levy by over \$15,000. This was considered a wise and economical move, in view of prevailing conditions, and the provincial legislature, therefore, gave the necessary authority for the change.

To Issue Serial Bonds.

The district then proceeded to issue the \$1,000,000 serial bonds, which, with the sinking funds already in hand, which had accrued on account of the collateral bonds of \$1,716,000, and the unexpended balance of the proceeds of the note issue would put the district in funds to retire the \$1,250,000 treasury notes, and still leave a small balance available for application to complete the various works authorized by the several by-laws under which the collateral bonds were issued. With the serial issue outstanding the notes automatically would be retired.

The district decided to call for tenders for the serial bonds. Spitzer, Rorick and Company did not bid for them. Several bids were received and the bonds were awarded to Wood, Gundy and Company, Toronto. The district stipulated that the proceeds from the sale of the \$1,000,000 serial bonds were to be paid to the municipality by a certain date. In this way they would have the funds to retire the notes in May instead of in November, 1916, thereby saving a half year's interest charges. Due notice of their intention to retire the treasury notes was advertised 30 days prior to May 17th. The Toledo bond house then issued an injunction on behalf of a number of the noteholders to restrain the district from redeeming the notes in the way proposed. The case has now been settled in the manner noted above.

INDEX TO THE MONETARY TIMES

The index to *The Monetary Times* for the half-year, January to June, 1916, will be ready shortly. Those desiring copies should apply to *The Monetary Times*, 62 Church Street, Toronto.

COBALT ORE SHIPMENTS

The following are the shipments of ore in pounds from Cobalt Station for the week ended August 4th:—

Temiskaming Mines, 62,156; Dominion Reduction Company, 65,000; Buffalo Mines, 72,330; La Rose Mines, 87,147; Trethewey Mine, 39,233; Beaver Consolidated Mines, 105,218; Coniagas Mines, 87,661. Total, 518,745 pounds, or 259 tons.

The total shipments since January 1st, 1916, now amount to 17,791,982 pounds, or 8,895.6 tons.

BRITISH COLUMBIA FARM LOANS

The first loans under the provisions of the Agricultural Credits Act were authorized recently by the Agricultural Credits Commission of British Columbia. Nineteen loans aggregating in amount \$25,300 were approved. Other applications are to be dealt with and if the reports of the appraisers prove satisfactory the loans will be approved.

To date there have been received 630 applications for loans from farmers resident in all sections of the province. These applications are for amounts ranging from \$250 to as high as \$20,000. It is the policy of the commission to deal as yet only with applications for moderate amounts. The aggregate amount covered by the applications already in is \$1,250,000. The money will be advanced to the farmers at a rate of not more than 6½ per cent.

CLEARING HOUSE RETURNS

The following are the returns of the bank clearing houses for weeks ended August 3rd, 1916, and August 5th, 1915, with changes:—

* Five days only (Civic Holiday).

Sir James A. M. Aikins has been appointed lieutenant-governor of Manitoba. Sir James Aikins was born in Peel County, and educated at Toronto University, and was admitted to the bar. From 1870 until 1896 he was counsel for the justice department; in 1880 he was one of the royal commissioners to investigate and report upon the administration of justice in the North-West Territories, and in 1900 was appointed counsel for the Manitoba government. He has been solicitor for the Canadian Pacific Railway in Winnipeg, and for other large corporations, banks, loan companies, etc., in Western Canada, and is on the directorate of several companies. *The Monetary Times* hopes that Sir James in his new and important office will continue his practical efforts to obtain greater uniformity in Canadian legislation. His work and influence in this matter in his new sphere should help to bring the necessary result.

BANKERS AND FARMERS

The joint committee on commerce and agriculture, appointed some months ago in Western Canada, is making progress sufficient to raise the hope that points of difference between East and West as well as between various interests in the West itself, are slowly approaching a mutually satisfactory position. A conference of farmers and bankers held at Winnipeg recently, has elicited again a statement from the Winnipeg sub-section of the Canadian Bankers' Association to the effect that the Canadian banks desire to assist to the utmost the development of Western Canada and to extend to the farmers every facility consistent with sound banking principles. The declaration this time was accompanied by specific promises of changes in regard to a number of the points raised by the agricultural interests. Briefly, these points are as follow:—

(1) A change will probably be made by the banks so that the notes of farmers will mature when the proceeds of the crop are available, and the bankers also declared their willingness to finance farmer customers so as to facilitate the gradual marketing of grain.

(2) The banks declare that they are willing to make generous advances to encourage the raising of livestock, to carry stock breeders, in a way which will permit the maturing of their stock, and to extend credit to capable farmers who engage in stock-raising.

(3) The banks are prepared to support co-operative credit associations, so long as they are carried out on sound business lines, and a reduced rate of interest may be expected.

(4) Bank managers are to be discouraged from acting as agents of loan and mortgage companies.

The bankers convinced the farmers at this historical conference that they were anxious for farmers' business. This is partly proved by the fact that they have \$50,000,000 of farm loans in the West at present and by the com-

petition between banks for this class of business. The banker-farmer conference of Western Canada is a happy omen.

TAX ON FOREIGN BONDS

The chief criticism of the Ottawa announcement that legislation may be introduced at the next session imposing special income taxation upon all non-Canadian securities held by Canadians, is that the warning has come late in the day. When the first British war loan was made, the chancellor of the exchequer immediately issued a statement suggesting that overseas citizens should not subscribe. When the Anglo-French loan was issued in the United States, again an official request was made to the effect that residents of the United Kingdom should not purchase the bonds. No such direct and official intimation was made by our own government until a few weeks ago. The Dominion government must have known that Anglo-French and other bonds were coming to this country in fairly large blocks. They were allowed to do so for several months, without official hindrance. Then came the belated request of the finance minister that such securities should not be purchased here and the subsequent suggestion that the bonds which have been purchased, will now be taxed. Had the government made a definite pronouncement at the proper time, the purchases would not have been made.

NORTHERN ONTARIO

Northern Ontario will have the sympathy and practical assistance of the southern section of the province in regard to the fire disaster. When the surviving settlers have been placed upon their feet again and the burned towns rebuilt, the Ontario government must consider seriously the desirability of ready-made farms in the North. Loans to settlers are helpful but ready-made farms are the only medium by which settlers in large numbers will be attracted to Northern Ontario. There is not time, in this century, for the settler to do the heartbreaking pioneer work in the bush as in days of yore. Nor is it good business. The government should do the rough work, so that the settler may become a producer at once.

TAXING LAND VALUES

In the interesting discussion in these columns during the past few weeks, regarding Canada's economic policy, and in the comments thereon of the daily press, much has been said as to the taxation of land values as a source of revenue. The Saskatchewan Grain Growers' Association at their annual convention urged as "the most equitable method of raising all public revenues," a tax upon land values. In February, the Canadian Council of Agriculture, representing the organized farmers of the various provinces, recommended that "in order to meet the deficit in the present revenues and eventually to raise the bulk of the national revenue," the system of direct taxation of land values should be introduced. In all these discussions and resolutions, nothing has been said as to how much it is expected to raise by means of such taxation. A large part of annual revenue in the past has been derived from customs revenue. In 1914, for instance, the customs department yielded 64 per cent. of the annual revenue. How far would a tax on land values meet our war expenditure of \$700,000 a day? The total civil expenditure of the

Dominion for the current fiscal year is estimated at \$160,000,000, which includes \$36,000,000 interest on public debt, of which \$20,000,000 is due to war loans. These figures must be borne in mind when suggesting ways in which to raise our national revenue.

Those who suggest the taxation of land values do not give details of a practical working scheme to raise substantial revenue. Mr. R. McKenzie, secretary of the Manitoba Grain Growers' Association, in a letter to *The Monetary Times* recently, stated that the taxation of land values would "provide ample revenue." It would be interesting to have Mr. McKenzie's exposition of a workable plan to effect the desired result.

HOW GERMANY TRADED

That German methods of investigating a market, challenge comparison with British methods, is the interesting statement made by Mr. C. Hamilton Wickes, the British government's trade commissioner in Canada and Newfoundland, in his annual report on Canadian trade. He adds also that such a comparison appears to indicate that the science of commercial penetration has not received in the past the same attention in the United Kingdom as in Germany. Mr. Wickes' conclusion, by the way, has a lesson also for Canada. The commissioner cites an actual case of the working of the German intelligence system, illustrating its efficacy. Two young Germans went to Montreal in the fall of 1912 to introduce a line of goods, and took a small office; neither had been to Canada before, but they had received advice that there would be a market for certain classes of articles. They worked hard for eighteen months, and at the end of that time had built up a considerable and profitable connection. When asked as to the reasons of their success, they explained that they had come to Montreal equipped with information as to (1) likely buyers in Montreal, Toronto, and other towns in the neighborhood; (2) the financial standing of such firms, and the names of the men employed by these firms upon whom it was advisable to call; (3) the articles of Canadian or foreign manufacture that they would have to meet in competition, and the prices of such articles, and (4) the customary terms of credit prevailing. All this information had been available to them in Germany before they set out for Canada.

Moreover, they were guaranteed sufficient living and office expenses; they knew that the principals whom they represented would second their orders with prompt delivery, and that they were well posted as to the details of trade, such as the preparing of invoices, declarations, etc., in accordance with the Canadian customs requirements.

Much as we dislike our brutal enemies, and with good cause, useful lessons may be learned from their highly organized commercial intelligence system.

MORAL OF TRADE RETURNS

The official statement of Canadian trade for the fiscal year ended March 31st last shows that exports exceeded imports by \$234,000,000, the former amounting to \$741,610,000, representing exports of Canadian merchandise alone and imports amounting to \$507,783,000. Deducting from the \$234,000,000 a sum of \$187,000,000, representing our annual interest charges payable in Great Britain and the United States, there was a favorable

balance of \$47,000,000, which is increased by \$38,000,000, representing exports of foreign merchandise, thus making the trade balance favorable to the extent of \$85,000,000. The exports of Canadian merchandise last year increased 81.1 per cent. and of foreign merchandise, 58 per cent. Imports during the past year decreased 17.9 per cent. when compared with the figures for 1914, but show an increase of 11.5 per cent. compared with the statistics for 1915.

These figures give rise to some apprehension. As pointed out recently by the Canadian Bank of Commerce, it is no longer necessary to import costly tools for the manufacture of munitions of war, as our plants are now well equipped. Of the material that enters into the making of a shell it is not necessary to import more than 5 per cent., and to fill other orders placed in Canada it may be necessary to import raw material on a limited scale, but allowing generously for all requirements that urgency justifies, there still remains a large volume of imports that come within the non-essential or undesirable class, a fact which indicates that national economy is not as great as it ought to be.

An examination of the details of our imports lends color to that view. The Canadian purchases abroad of jewellery, for instance, during the past year, were reduced only from \$898,000 to \$689,000. Imports of perfumery declined only from \$594,000 to \$553,000. Imports of pomades, while accounting for but a comparatively small amount, were doubled last year. We imported also many articles which are made in this country equally as well as in foreign markets. With all the fresh fruits which Canada grows, preserved and canned fruits were purchased from abroad to the extent of nearly \$500,000, together with \$6,700,000 worth of green fruits. Despite the fact that our fisheries last year gave an output valued at about \$31,000,000, with more in the sea awaiting capital and labor, still we imported fish valued at \$1,378,000. Is any great part of the favorable trade balance due to a national movement for economy or is the changing situation due almost entirely to the large war orders placed here and which in time will cease to be received and to the higher value rather than the greater volume of exports?

BUY A WAR BOND

In *The Monetary Times* last week, and in other papers, the department of finance urged that every citizen should save money for the Dominion war loan to be issued next month. It was pointed out that those who purchase a bond will help to win the war and obtain at the same time an investment of the highest class, yielding a most attractive rate of interest. The investor who says: "If the new loan is not as favorable as the first war loan, I will buy something else," has not yet conceived his duty as a citizen. While the price of the forthcoming loan may be fractionally less than in the case of the previous loan, the price and terms will be consistent with the high credit of the Dominion government and with money market conditions prevailing at the time of issue.

The first thing to do is to decide to subscribe to the loan. It is the duty of every man who cannot shoulder a rifle for the great cause for which our sons and brothers are fighting. The small subscription of the individual investor does its bit in the successful conduct of the war just as much, proportionately, as does the large subscription of the corporation.

MAY TAX FOREIGN BONDS HERE

Dominion Government May Introduce Legislation at Next Session of Parliament

An Ottawa despatch states that in view of the large purchases made in Canada of Anglo-French and other government bonds issued in the United States and the serious effect which the continuation of such purchases will have upon the exchange situation between Canada and the United States, it is now regarded as certain that at the next session of parliament legislation will be introduced imposing special income taxation upon all non-Canadian securities held by Canadians. The effect of such legislation which will be along lines somewhat similar to that at present in force in England and enacted for the same purpose, will cause the liquidation of the securities especially taxed. This liquidation will tend to benefit the exchange situation and preserve the Canadian market for purely Canadian issues. There is abundance of money in the United States to take up all these securities, the proceeds of which have been expended in the United States.

As a result of this intimation, it is expected that substantial sales of such securities, especially of Anglo-French bonds, will be effected prior to the issue of the Dominion war loan next month. The larger buyers of Anglo-French bonds during the past few months purchased such securities partly because no intimation had been given as to when the next war loan might be expected and few attractive investments were being offered at home. Funds, therefore, found their way into Anglo-French and other bonds. Small investors also did not know the date of the next war loan, and as the debenture stock issues (which Sir Thomas White stated in his budget speech would be offered between loan issues, to encourage small investments), had not been put on the market—there is still no news of them—small investors also placed a few thousands in the aggregate in Anglo-French bonds.

Considered a Warning.

Bond brokers interviewed by *The Monetary Times* are generally favorable to the attitude of the finance minister in this matter. They are inclined to think, however, that his utterance is more a warning to investors than an announcement of a decision to bring in the suggested legislation. They believe, too, that the warning will have the desired effect and that further purchases of such securities will not be made.

"I think," said a prominent Montreal bond broker in a statement to *The Monetary Times*, "that the large purchases which have been made of Anglo-French and other loans with Canadian money, the amount of which I would not attempt to estimate, should decidedly not have been made, and I do not think such purchases would have been made if a distinct pronouncement had been made by the premier or minister of finance regarding the impropriety of such purchase."

Tax on All Income.

"I think legislation should have been introduced two years ago imposing an income tax upon all income based upon the English system, and that legislation to this effect should be carried through as soon as possible, as it would give a large revenue and have an important effect which present taxation measures have not had towards forcing individual economy and a genuine saving by the people towards payment of the war expenses."

"I do not feel that special income taxation should be put upon non-Canadian securities unless such securities are marketable abroad, and until after ample notice is given that it is the desire of the government that such securities be sold and the money invested in Canadian government bonds."

"I think that in any income tax measure great care should be taken that such tax will not be payable in respect to the income from securities when the owner of same is subject to income tax thereon by reason of his residence in some other country."

"I cannot give any estimate of the amount of Anglo-French bonds purchased in Canada. They have been freely purchased by some of our institutions, who, I am sure, would not have done so if the undesirability of such purchase had received any publicity."

Another broker stated: "We feel that all resources of this country should be used for the benefit of the British Empire. We do not think it was ever intended that Canadians should invest in Anglo-French or other foreign government bonds. There is no question that there are some very attractive offerings but, taking the offerings into consideration, our own bonds should give a sufficient return of interest for the investing public."

The view is generally held that there are ample funds in the country for the subscription of the coming war loan, but it is thought that funds should be retained in Canada as we are by no means through with our war financing. The finance minister's warning will probably induce a little selling of foreign securities held here, will prevent further buying of such securities, and will help to make our war loan a success.

Ten Millions of Anglo-French.

Only approximate estimates of the volume of Anglo-French bonds purchased here are available. A well-informed bond broker, discussing the matter with *The Monetary Times*, put the figure at \$10,000,000, which he thought a very conservative estimate. Buyers in Montreal and district have apparently been heavy purchasers of these bonds. Some Russian bonds have also been purchased in Canada, but these have been bought chiefly by those who like a little speculative flavor to their bonds.

Broadens the Market.

The view is taken by some of the bond brokers that there is an advantage in having relieved the United States market of a certain amount of Anglo-French bonds as it tends to make that market better for Canadian securities. It is also contended that it is advantageous to broaden the Canadian investment market. On this point a Montreal broker said to *The Monetary Times*: "I think it is injudicious to consider a tax at this time. When an income tax is necessary it should be levied on all securities, irrespective of whether they are Canadian or not, and the mere fact that some of our investors are buying international securities tends to broaden the Canadian investment market and make it possible for the minister of finance to float much larger loans in Canada than would otherwise be the case. I feel that the more international our market can become the broader will become our scope of investments, and Canada will be able to float her future loans probably at a much lower and decreasing rate of interest than is now the case."

Would Not be Reasonable.

Another view was expressed to *The Monetary Times* in these words:—

"It would not be reasonable to tax Canadian holders of foreign securities purchased prior to the legislation which may be contemplated, as it would not appear just to subject them to additional stress at this time."

"It might be considered unpatriotic to tax holders of Anglo-French bonds. If we rightly understand the situation, the British government is not taxing Canadian securities, while imposing taxes on American and other neutral debentures and stock. Would it be wise for Canada to turn around and tax Anglo-French bonds?"

"If the government feels under the necessity of restricting the use of Canadian funds, why would it not be a good time to amend the insurance act and require that American insurance companies invest their surplus and reserves in connection with Canadian business, in Canadian government or municipal debentures, instead of their being allowed to invest them in United States railway and municipal bonds?"

Mr. T. J. Drummond, Montreal, who was widely known in the steel business in Canada, died on Sunday last. The late Mr. Drummond entered the firm of Messrs. Drummond, McCall & Company at an early age. In 1908 he was elected president of the Montreal Board of Trade. He was a member of the Institute of Mining Engineers, and president of the Lake Superior Corporation in 1909, and also of the Canada Iron Corporation. He was also a director of the Royal Bank of Canada, the Canada Car & Foundry Company, the Western Car Company, the Imperial Life Insurance Company, the New Brunswick Docks and Terminals Company, Limited, the Carlton Hotel Company, and the Rhodes Company.

NEW INCORPORATIONS

Canada's new companies incorporated this week number 49. The head offices of these companies are located in seven provinces. The total capitalization amounts to \$10,253,000.

The largest companies are:—

The Alberta Volcanic Oil Company, Limited....	\$2,000,000
Delta Copper Company, Limited	1,000,000
Empire Pulp and Paper Mills, Limited.....	2,500,000
Feldspar and Clay Products, Limited	1,500,000
Provincial Insurance Company, Limited	1,250,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	11	\$2,399,000
Quebec	6	244,000
British Columbia	9	3,785,000
Manitoba	8	349,000
Saskatchewan	9	1,357,000
Alberta	5	2,110,000
New Brunswick	1	8,000
	49	\$10,253,000

The following is a list of charters granted during this week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Golden, B.C.—D. R. Rolston, Limited, \$10,000.

Vernon, B.C.—The Vernon Growers, Limited, \$25,000.

Victoria, B.C.—Victoria Owl Drug Company, Limited, \$50,000.

Blackie, Alta.—The Blackie Hardware Company, Limited, \$30,000.

Alliance, Alta.—The Security Lumber Company, Limited, \$10,000.

Swift Current, Sask.—Alleach Theatre Company, Limited, \$20,000.

Prince Rupert, B.C.—Delta Copper Company, Limited, \$1,000,000.

Moose Jaw, Sask.—Crow Motor Sales Company, Limited, \$10,000.

Langford, B.C.—Langford Medicinal Plant Company, Limited, \$25,000.

Ashcroft, B.C.—Quesnel Forks Gold Mining Company, Limited, \$100,000.

Edmonton, Alta.—The Alberta Volcanic Oil Company, Limited, \$2,000,000.

Maple Creek, Sask.—The Calgary Beer Exporting Company, Limited, \$10,000.

Boston, England.—Provincial Insurance Company, Limited, £250,000 (\$1,250,000).

Calgary, Alta.—The Calgary Wholesale and Commission Company, Limited, \$50,000.

Regina, Sask.—National Holdings, Limited, \$10,000; the Regina Kennel Club, \$2,000.

Youngstown, Alta.—The Youngstown Building and Investment Company, Limited, \$20,000.

Milton, Ont.—Milton Foundry, Limited, \$40,000. A. Fasken, D. McArthur, E. H. Brower.

Murphy; Central Estates, Limited, \$40,000. H. R. Frost, E. M. Dillon, R. T. Birks; Monarch Film Company, Limited, \$25,000. C. F. Ritchie, G. Keogh, Annie Redpath; Laguna de Terminos Estate, Limited, \$24,000. K. D. McKenzie, W. W. Perry, A. M. Borthwick; International Time Recording Company of Cahada, Limited, \$500,000. E. B. Ryckman, A. L. Reid, S. G. Wharin.

WAR LOAN PAYABLE IN NEW YORK?

Will the new war loan be made payable in New York as well as elsewhere? The previous loan was made repayable at par in Canada only, namely, at Ottawa, Halifax, St. John, Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary and Victoria. To broaden the market of the second war loan, to be issued next month, it has been suggested that the bonds be made payable in New York as well as in Canada. This suggestion is having the consideration of the finance minister.

LUMBER EXPORTERS MUST COMPETE

(Staff correspondence.)

Vancouver, August 5th.

Mr. H. R. MacMillan, chief forester of British Columbia, has returned from his extended trade mission for the department of trade and commerce.

Wherever Mr. MacMillan went, he said, lumber from this continent, including British Columbia's product, was sold through United States firms. The importers of the countries did not know that any came from this province. United States exporters organized and made a study of the situation and went after the business, and what British Columbia got was mostly by their consent. Almost all the lumber exports were shipped through United States firms and billed as American lumber.

Mr. MacMillan urged co-operation on the part of lumber manufacturers here in studying market conditions and securing cargo space, so that exporters to the south may be competed with. In every British territory he visited he found a unanimous disposition on the part of firms handling lumber to keep their business in the empire. But they expected, and he thought it was only right, that this inter-imperial trade should be done on a business basis; that is, that British Columbia exporters should give a competitive price, must fill orders according to specifications, and that the quality should be what was being paid for.

 Steffens & Nolle, A. G., Calle Cangallo, 190, Buenos Aires.
 Sternberg, H., Junior, & Company, Calle Cangallo, 840, Buenos Aires.
 Stofen, Schnack, Muller & Company, Buenos Aires.
 Strothbaum, Felix (partner of Clausen & Company), Uruguay.
 Strothbaum, Gmo. (partner of Clausen and Company), Uruguay.
 Stubenrauch & Company, Puerto Deseado, Patagonia.
 Vasquez, Pablo, Salsinuedes, 211, Montevideo.
 Velasquez, Pedro, Uruguay.
 Vilmar, Rimlar & Company, Defensa, 560-571, Buenos Aires, Argentina.
 Vogel, F. W., & Company, Calle Defensa, 467, Buenos Aires.
 Wagenknecht & Company, Cerro Largo, 701, Montevideo, Uruguay.

Walder, Enrique (partner of Rabe Walder & Company), Uruguay.
 Warburg & Goldschmidt, Calle Bartolome Mitre, 1265, Buenos Aires.
 Wayss & Freytag, Calle Moreno, 508, Buenos Aires.
 Weil Hermanos & Company, Buenos Aires, Argentina.
 Wentzky, R. Von, Calle Corrientes, 685, Buenos Aires.
 Weygand & Zum Felde, Calle Peru, 1034, Buenos Aires.
 Wirth & Schiebeck, Calle Sarmiento, 372, Buenos Aires.
 Wolff, Buchholz & Company, Calle 25 de Mayo, 179, Buenos Aires, Argentina.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Blind River, Ont.—August 1—Business section, including the post-office, Methodist church, Royal Bank building, Trelaw and Menard's block, Inkster's barber shop and ice cream parlor, Mrs. B. Brooks' millinery shop, Mathers' blacksmith shop, Rivers' shoe shop, Poulin's jewellery store, Gray's tailoring shop, Braithwaite's hardware store, Christilaw's grocery, Arthur's men's furnishing store, and the offices of Dr. Giguere and Dr. J. M. Robert. Loss estimated, \$150,000.

Chatham, Ont.—August 2—Mr. S. Huff's residence, Alexandra Street. Loss slight.

Dungannon Tp., Ont.—August 1—Mr. W. Green's farm buildings. Cause, lightning.

Guelph, Ont.—August 4—Mr. S. Craig's garage and stable, 124 King Street. Loss, \$500.

Kingston, Ont.—Fire Chief Armstrong reports the following fires:—

July 27—Dwelling owned by Mr. M. J. Tetro, occupied by A. O'Reilly, 148 Ordnance Street. Loss, contents, \$250; insurance, \$1,000. Sun. Cause, spontaneous combustion from oily rags on shelf in shed. Fire extended into the main part of the houses and spread through the studding of walls up to the roof, also into the attached house, No. 146, occupied by Mr. J. Aikens, where loss was, building, \$210; contents, \$155. Insurance, building, \$1,000, Atlas; contents, \$1,000, Union Assurance.

July 28—Mrs. Taylor's residence, 24 Johnson Street, owned by McGill estate. Loss, building, \$400; contents, \$250. Insurance, building, Atlas, \$1,200; contents, \$300. Cause, boy four years old playing with matches caused a fire in the kitchen, and as the buildings are old, frame dwellings, it spread very quickly upwards to roof and into No. 26, occupied by Mrs. Richards, whose furniture was damaged somewhat by water. No insurance.

Moncton, N.B.—Mr. G. Gay's barn, etc., Botsford Street. Loss, \$3,000.

Niagara Falls, Ont.—August 5—Mr. P. Lococo's store, etc., Erie Avenue. Loss, \$700; insured.

August 8—Mr. F. Bell's cottage, occupied by Mr. M. Carr, Stanley Street. Loss, \$500.

Northern Ontario.—Estimates of losses have been given as \$2,000,000. One estimator states that the loss at Cochrane will be \$500,000.

Owen Sound, Ont.—July 31—Mr. J. Bunstead's barns. Loss, \$3,000; insurance, \$1,800, Walkerton Mutual.

Ste. Anne de la Pocatiere, Que.—Convent, etc., of Sisters of Ste. Famille. Loss, \$60,000.

Smith's Falls, Ont.—August 2—Office of the News. Loss not stated. Cause, gasoline.

Tillsonburg, Ont.—August 2—Mr. E. J. Malone's men's furnishing store. Cause unknown.

Winnipeg, Man.—August 2—Winnipeg Paint and Glass Company's plant. Loss, \$100,000; insured.

August 5—Club house of Winnipeg golf club. Loss, \$11,000. Cause, grease spilled on stove.

Woodhouse Tp., Ont.—Mr. E. Farr's barns and stables. Loss, \$7,000. Cause, supposed cigarettes.

Mr. C. A. Ross, manager of the Dominion Bank at Hamilton, is to be transferred to head office staff, Toronto. Mr. A. M. Bethune, manager of the St. Thomas branch, will succeed Mr. Ross, and he will be succeeded by Mr. A. T. Colson, of the Seaforth branch.

THE HOME BANK OF CANADA

ORIGINAL CHARTER 1854

QUARTERLY DIVIDEND NOTICE

Notice is hereby given that a Dividend at the rate of FIVE PER CENT. (5%) PER ANNUM upon the paid-up Capital Stock of this Bank has been declared for the THREE MONTHS ending the 31st August, 1916, and that the same will be payable at the Head Office and Branches on and after Friday, the 1st of September, 1916. LOAN AND TRUST COMPANIES' ASSETS

Forty-five Millions Increase Over Previous Return

The debentures payable in Canada of loan and loaning land companies doing business in Ontario in 1915, increased from \$24,726,476 to \$26,642,486. Comparatively few of these debentures are held in the Dominion. This is elicited from the annual report for 1915 of the Ontario registrar of loan corporations. Debentures payable outside of Canada, largely in Scotland, increased from \$77,066,347 in 1913 to \$77,465,323 in 1914, and to \$77,675,532 in 1915. There was also in existence at the end of last year \$1,792,777 debenture stock. The interest on these securities for the one year amounted to \$1,017,673. Among other liabilities to the public are due on loans in process of completion, \$451,218, in comparison with \$302,862 in the previous return; borrowings on mortgages and on other securities, which in 1913 were \$2,939,498, dropped in 1914 to \$1,334,793, and were last year only \$40,630, owing largely to the cessation of real estate activities; owing to banks, \$2,657,410; and miscellaneous liabilities, \$3,220,777. These four accounts include the figures of the trust companies also.

Trust Companies' Liabilities

The trust companies alone have in addition contingent liabilities; these in 1913 were \$271,293,762, and in 1914 \$305,002,125, and last year stood at \$350,248,048. The total liabilities of the various classes of companies are as follow:—

Class.	Total liabilities.	
	1914	1915
Loan companies (permanent stock).....	\$192,396,432	\$196,505,742
Loan companies (having terminating stock)	4,806,174	4,915,932
Loaning land companies	12,341,232	11,936,314
Trust companies	335,636,898	378,574,406

The grand total of liabilities to the shareholders and the public of all these companies doing business in Ontario is \$591,932,395. These corporations carry a large amount on deposit, a total of \$23,180,899, as compared with \$22,391,642 in 1914, and \$23,501,053 in 1913. The loan companies having only permanent stock account for the bulk of the deposits, the figures being \$20,361,768 in 1912, \$21,982,964 in 1913, \$21,737,913 in 1914, and \$22,412,199 last year.

Capital Stock Figures

The liabilities to shareholders alone in the case of permanent stock loan corporations are \$70,863,630, and of terminating stock concerns, \$2,361,203, while for loaning land companies, the amount is \$7,715,784, and for trust companies, \$23,867,714. The reserve fund of loan, loaning land and trust companies aggregates \$35,365,517. This compares with capital stock fully paid of (permanent) \$57,500,064 and (terminating) nil. The prepaid terminating stock totals \$131,960, and the instalment stock, \$266,490. The loan, loaning land and trust companies authorized capital permanent stock totals \$147,208,002, of which \$79,637,317 is subscribed. The terminating capital stock subscribed is \$1,199,770.

Details of Assets

Turning to the companies' assets, it is found that the total debts of all these companies, secured by mortgages of land, amount to \$167,643,566, divided as follows:—

	Mortgages of realty.	
	1914	1915
Loan companies (permanent stock).....	\$156,290,793	\$152,869,923
Loan companies (having terminating stock)	4,310,522	4,504,284
Loaning land companies	1,905,919	2,454,305
Trust companies	7,989,446	7,815,053
	Mortgaged land held for sale	
	1914	1915
Loan companies (permanent stock).....	\$246,973	\$399,551
Loan companies (having terminating stock)	41,435	38,043
Loaning land companies		
Trust companies	78,615	64,717

The interest on these sums approximates \$2,846,416. The companies of the various classes noted have also as assets debts secured in various ways and amounting to over \$40,000,000. They are divided as follows:—Secured by municipal debentures and debenture stock, \$3,764,670; government securities \$1,787,873; shareholders' stock, \$864,147; other stocks, bonds and securities, \$33,681,808. Office premises are valued at \$5,543,728. The total assets, owned beneficially, of the loan, loaning land and trust companies transacting business in Ontario, amount to \$241,684,347, and those not so owned, to

\$350,248,048, a grand total of assets of \$591,932,395. The accompanying table gives further details of the returns of the companies for 1915.

CANADA'S BORROWING RECORD

List of International Loans Floated in New York—Dominion's Requirements

During the two years of war Canada's borrowings in the United States have reached the total of \$301,797,000.

According to *The Monetary Times'* records, the loans are divided as follows:—

	LOANS BY UNITED STATES TO CANADA		
	1914 Aug. 4 to Dec. 31.)	1915 (Jan.-Dec.)	1916 (Jan. 1 to Aug. 1.)
Dominion government		\$45,000,000	\$75,000,000
Provincial governments	\$1,000,000	35,877,000	18,450,000
Municipal	6,900,000	32,455,000	20,763,000
Corporation	18,690,000	30,640,000	17,022,000
	\$26,590,000	\$143,972,000	\$131,235,000

United States as Lender

Foreign governments now owe the United States considerably over \$1,250,000,000 on their own securities taken in that country. Foreign loans and credits made there amount into \$1,206,459,000. In addition United States investors have gone to foreign markets to take advantage of war prices for old government issues. Extent of this buying is unknown, but it has certainly amounted to over \$45,000,000.

In considering the improved financial position of the United States in relation to other nations, account must also be taken of the great amount of United States corporate securities bought back since the war started. This is estimated between \$1,500,000,000 and \$2,000,000,000, by the New York Journal of Commerce.

It can be assumed that United States international credit position has been improved to extent of \$3,000,000,000 compared with before the war. This means that at 5 per cent. approximately \$150,000,000 more is being paid American investors in interest and dividends than formerly.

France Floated Loans

The \$100,000,000 three-year French loan arranged by New York bankers through American Foreign Securities Company stands next in size to the \$500,000,000 Anglo-French five-year loan made last year. It makes France the largest foreign borrower in that market, the earlier loan being divided equally between France and England. The latter country, having more United States corporate securities to sell back and being able to send over large amounts of gold, has needed to do less borrowing, although her purchases have been greater.

List of Borrowings

Below is a list of foreign loans and credits outstanding in the United States, with offering bases where sold to the public:

Anglo-French 5-year 5s on 5½ per cent. basis.....	\$500,000,000
French 3-year loan on 5½ per cent. basis	100,000,000
France one-year bank credits	30,000,000
French banks commercial credits	20,000,000
British banks extended loan	50,000,000
Miscellaneous credits, largely French	*80,000,000
Argentina: 5-year 6s on 6¼ basis	25,000,000
2 and 3-year 6s on 6¼ per cent. basis.....	10,000,000
1-year discounts 5 per cent. to 5½ per cent. basis	15,000,000
Russia 3-year loan on 6½ per cent. basis.....	50,000,000
Italy one-year 6s on 6 per cent. basis.....	25,000,000
Switzerland 3 and 5-year 5s on 6 per cent. basis...	10,000,000
Germany one-year treasury notes on 6 per cent. basis	10,000,000
Norway 2 and 3-year 6s on 6 per cent. basis.....	3,000,000
7-year 6s on 5.75 per cent. basis	5,000,000
Greece bank credits	7,000,000
Chile bank loan	6,000,000
Sweden 2-year 6s on 6 per cent. basis.....	5,000,000
China banking loans	4,000,000
Panama serial 5s	1,200,000
12-year 5s on 5.25 per cent. basis.....	1,250,000
Bolivia bank loan	1,000,000

Total	\$981,950,000
Canada	301,797,000

Total.....	\$1,283,747,000
------------	-----------------

COMPOSITION OF BANK ASSETS

Some Remarkable Changes—Considerable Amount of Dominion Bonds Purchased

In an interesting article in the *Journal of the Canadian Bankers' Association*, Mr. H. M. P. Eckardt discusses the changing form of bank assets. He points out that in this country, as in Europe, the special financing required for war purposes has necessarily produced some remarkable changes in the composition of bank assets. Thus, on July 31st, 1914, the specie and Dominion notes held by the Canadian banks represented 9 per cent. of their total assets, as against 11½ per cent. on May 31st, 1916; foreign call loans and bank balances were 10 per cent. of the total, whereas now they are 15 per cent.; security holdings were 6½ per cent., as compared with 11½ per cent. at present; mercantile loans and discounts at home were 53½ per cent., and now are 41½ per cent.

To Buy Dominion Bonds

The rise in the proportions of security holdings to total resources in particular brings into prominence several interesting questions bearing on Canada's progress and development after the war. Apparently, while the great struggle lasts, our banks will find it necessary to continue buying Dominion Government bonds, and perhaps British Treasury bills. So unless peace is concluded within a comparatively short time, there may be a further rise in the proportion. It is clear that the investment in securities mentioned has not exerted an adverse influence on our industry and trade. With conditions as they have been, the money could be spared. The general depression slightly antedating the war released large amounts of capital through liquidation of bank loans; and notwithstanding the abnormal activity of the war industries, there has been plenty of funds for all purposes; but sooner or later there will be occasion to again expand the home loans greatly in order to take care of general business expansion. Then, the war, of course, being concluded, the banks will be under pressure to withdraw funds from the headings which have been showing swollen figures, and put them into the discount lines of business customers. With reference to the other items mentioned—specie and Dominion notes, foreign call loans and balances—there will presumably be no difficulty in utilizing them for commercial loans. Can the same be said regarding the extra holdings of securities?

Not Loaded with Securities

It must be regarded as extremely fortunate that our banks had not been loaded up, arbitrarily or otherwise, with Government or other securities before the war, continues Mr. Eckardt. Thanks to this, they could buy for investment with safety and propriety a considerable amount of Government bonds as soon as the Government needed support of this kind. Doubtless a fairly large part of the Dominion bonds now acquired will be held to maturity. The rate of interest is satisfactory, and when London resumes its normal functions these bonds will serve excellently as cover for exchange drawings on that centre. It may be also that within a short time after cessation of hostilities Canada's 5 per cent. bonds will go to a premium of ten points or more. If so, the problem of disposing of them would present no difficulty—the banks could simply turn the securities over at a good profit to investors in the United States or England, and thus procure additional funds for enlarging current loans. Considering the comparatively short date of the Dominion bonds thus far purchased, and their high rate of interest, it does not seem likely that they will fall below the issue price when peace returns—unless the war lasts much longer than expected and the issues of the bonds reach dimensions much greater than is now anticipated. So long as the bonds can be sold without loss, realization will be easy to accomplish.

Loans to Munitions Board

The British treasury bills acquired in connection with loans granted to the Imperial Munitions Board, are short date securities, and will be provided for by the Imperial government when the floating debt is funded. There seems to be no reason for forebodings that these securities will develop into a lock-up. However, the banks might be expected to subscribe for long-term British bonds, issued to take care of maturing treasury bills. Even so, the bonds would be absorbed in the British investment market in a comparatively short time. For reasons of policy it may be considered advisable to hold either or both of these investments for a number of years, but as soon as circumstances in this country become such as to make it necessary for the banks to utilize all available funds it will no doubt be possible to arrange with bankers in London or New York for quick realization.

It is necessary to remember that to a certain extent the increased holdings of securities would be represented by new acquisitions of provincial government and municipal bonds. These would be carefully selected, and should not be difficult to dispose of when the funds are required. With the return of normal conditions in London the market there will be reopened, and probably the market in the United States will have been developed considerably. So it does not appear that the remarkable changes in the composition of the assets of the banks will be other than temporary; and we need not regard them as likely to check progress and development.

LOANS ON LIFE POLICIES

Editor, *The Monetary Times*.

Sir:—I read with a deal of interest in your issue of July 14th, the article by Mr. R. W. Barton on "Loans on Life Insurance Policies." The statistics compiled by Mr. Barton in regard to the rate of increase in policy loans in Canada and United States show the importance to the companies of this feature of the business.

Several companies have viewed with considerable alarm this rapid increase in borrowings on life policies, as it has been established that the practice of borrowing in this manner tends to increase the terminations, i.e., a great many policies lapse ultimately, largely on account of loans secured against them.

Mr. Barton's suggestion as to discouraging loans by advertising rather than attempting to govern them by legislation seems to be well advised, and might be adopted by the Canadian companies generally with benefit to both the policyholders and the companies.

Yours, etc.,

C. H. ARMSTRONG.

Imperial Life Assurance Company,
Toronto, August 1st.

LAURENTIDE POWER BONDS

A block of \$3,500,000 first mortgage 5 per cent. bonds of the Laurentide Power Company will be offered in the comparatively near future to investors in Canada and the United States. Of this issue, \$1,500,000 will be placed here, and the remaining \$2,000,000 in the United States, where the bonds will be offered at 90. The remainder of the bonds are owned by the Laurentide Pulp and Paper Company. Messrs. McDougall and Cowans, Montreal, are interested in these offerings. The capitalization of the Laurentide Power Company is as follows:—

	Authorized.	Issued.
First mortgage 5% bonds.....	\$7,500,000	\$6,500,000
Capital stock.....	10,500,000	10,500,000

The Laurentide Power Company, Limited, has been organized for the purpose of taking over from the Laurentide Company, Limited, all of its property and plant necessary for the development of the water power of the St. Maurice river at Grand Mere, province of Quebec. The company's hydro-electric development of 125,000 horse power was made possible by damming the St. Maurice river at Grand Mere, whereby a head of 80 feet is made available. The ownership of the property on both banks of the St. Maurice river for over eight miles above the site of the power plant, makes possible a great storage of water immediately available at the power site.

A further feature in regard to the storage of water is that the government of the province of Quebec is at present engaged in carrying out the construction of a system of dams at the head waters of the St. Maurice river, which will result in a storage basin of sufficient capacity to augment the normal flow of the St. Maurice river in its lowest stages approximately 80 per cent., thereby increasing the efficiency of all water power developments on the St. Maurice river. The storage in question will constitute the largest and most economical conservation of water so far undertaken on this continent.

The bonds are secured by a deed of trust to the Royal Trust Company, Montreal, as trustee, and constitute a first mortgage on the entire property now owned and hereafter acquired, including power development and generating station.

The following are the officers and directors of the Laurentide Power Company:—Messrs. J. E. Aldred, president; F. A. Sabatton, vice-president; W. S. Robinson, treasurer; directors: J. M. A. Acer, C. B. Hosmer, Howard Murray, J. E. Aldred, Edwin Hanson, F. A. Sabatton, George Chahoon, Jr., Julian C. Smith, A. A. Tilney.

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Ames-Holden-McCreedy Company.—The shareholders have ratified the proposal to issue \$1,000,000 6 per cent. five-year bonds, one-half million of which have been issued at par.

Hudson's Bay Company.—A dividend of 20 per cent. has been declared in respect of the year ended May last. Of this, 5 per cent. is from land proceeds and 15 per cent. is from trade profits. The former is not subject to income tax, being realization of estate. No dividend was paid in respect of the year to May 31st, 1915. The annual meeting was held on Wednesday.

Standard Ideal Company.—The company's plant at Port Hope, Ont., has been acquired by Mr. L. M. Wood, president of the Standard Chemical Company, and his associates, including Mr. W. D. Ross, Toronto, and Messrs. Cuff Brothers, Toronto. The new company will take possession at once, and in addition to carrying on the present line of business, it is stated, may engage in the manufacture of shells.

Winnipeg Electric Railway Company.—The company's May net earnings were \$103,277, an increase of \$16,527, or 12 per cent., over last year, as against a gain of 26.9 per cent. in April, 5.4 per cent. in March, and losses of 9.5 per cent. and 20.5 per cent., respectively, in February and January. May net is the smallest of the year to date. For the first five

months of 1916 net works out at \$542,937, an increase over last year of \$5,939, or slightly over 1 per cent.

Mond Nickel Company.—At the annual meeting of the Mond Nickel Company, Limited, Sir Alfred Mond, Bart., M.P., stated that profits during the year were £322,000, the progress was satisfactory, and that the mines were developing beyond expectations. The company had never been given any special encouragement to develop their supplies for war needs, and had gone through a prolonged struggle to get permission to have used in British armaments the only nickel manufactured within the empire. The regular 7 per cent. dividend on the preferred stock was paid and 20 per cent. dividend for the ordinary shares.

Canada Paper Company.—The obligations of Canada Paper Company to its preferred shareholders have been discharged by the payment of a cash dividend of \$28 a share, which called for a total disbursement of about \$100,000.

More than two years ago the company was in a position that would permit of regular dividend payments, offered a lump sum in payment of the arrears that had been accumulating for a number of years. The offer was accepted by about 90 per cent. of the shareholders, but the remaining 10 per cent. of the stock, some of which was tied up in estates, did not assent to the compromise plan. A cash declaration of 28 per cent. was made. Following that, 3½ per cent. was paid for the half-year to June 30th.

The dividend arrears settled by the \$28 distribution totalled 42 per cent. of the dividends for six years.

Ontario Steel Products, Limited.—The third annual statement shows the profits and loss account as follows:

Net profits after depreciation, \$152,019; balance from 1915, \$50,183, making a total of \$202,202, from which the following were deducted: Bond interest, \$36,000; preferred dividend of 1½ per cent., \$13,125; and carried forward, \$123,077.

Dividends paid and declared out of the year's earnings were only 5½ per cent., so the actual balance carried forward as the year's surplus was \$72,804, bringing the total at credit of profit and loss up to \$123,077. There are dividends in arrears on the preferred amounting to \$54,375. The total current liabilities were only \$111,087, against which were current assets of \$583,829, including \$69,224 cash. Current assets increased \$127,264 in the year, while current liabilities were \$37,850 more. Total assets amount to \$2,391,471.

Investment Corporation of Canada, Limited.

The company's returns for the year ended April, 1916, compared with the previous return, are as follow:—

	1915.	1916.
Gross receipts	£68,953	£54,852
Management	11,923	11,909
Debiture interest, etc.	16,881	13,981
Net profit	40,149	28,962
Preference dividend, 4½ per cent.	13,500	13,500
Ordinary dividend	14,000	10,000
Rate per cent.	7	5
Reserve, preliminary expenses, etc.	11,579	6,107
Balance	1,070	—645
Brought forward	1,449	2,519
Carried forward	2,519	1,874

Canadian Oil and Gas Company.—The production of the Canadian Oil and Gas Company last year dropped from 115,800 to 82,800 barrels, and the sales from \$91,300 to \$48,200, the average price realized slumping from 85 3-10 cents to 72 7-10 cents per barrel. The result of operations is a loss of \$41,700, without providing for bond interest, as compared with a loss of \$18,300 after meeting bond service in 1914. This reduces the credit at profit and loss to \$2,200. The chief asset of the Oklahoma Oil Company, the securities of which are largely held in Great Britain, consists of the bonds of the Canadian Oil and Gas, and in addition it has made advances to the undertaking to the extent of \$14,000. It is stated that the bond interest due from the Canadian Oil and Gas has been waived by the directors.

DOMINION BONDS TO BRITAIN

Canadian Government is Funding Temporary War Debt by Issues to Imperial Treasury

According to Ottawa dispatches, arrangements have been made by Sir Thomas White, Minister of Finance, for the funding of Canada's temporary war indebtedness in England. Under the arrangements now being perfected, the Dominion government will pay off from time to time its temporary indebtedness to the British government by the issue to the Imperial treasury of Dominion bonds bearing the same rate of interest and having the same securities as the issues of the Imperial government from the proceeds of which the advances have been made. The amount of bonds will be calculated having regard to the issue price of the Imperial securities.

Without Flotation Expenses

The Dominion government will, without flotation expenses, fund its temporary indebtedness by the sale of its bonds to the Imperial treasury, bearing interest at the favorable rate at which the Imperial authorities have been able to borrow in the London market since the outbreak of the war.

The Dominion government bonds will be payable in dollars, and all necessary adjustments of exchange will be made. On the whole, the exchange has been most favorable to the Dominion.

More than one hundred millions of temporary indebtedness of the Dominion will be met by the issue to the British treasury of three and one-half per cent. and four and one-half per cent. dollar bonds maturing in 1928 and 1945. These Dominion bonds will not be sold, but will furnish the basis of Imperial banking credits in the United States and Canada, from which payments will be made on this side of the Atlantic. The arrangement thus greatly assists the British government in its financing of the purchase of munitions and supplies of munitions, for which dollar credits are necessary.

Plan Proposed Last Fall

The plan embodies the proposal made by the Minister of Finance to Lord Reading and the representatives of the British treasury when in New York last fall arranging the \$500,000,000 Anglo-French loan. The minister had in view the purpose of clearing up by the issue of permanent securities the floating indebtedness of the Dominion, and at the same time providing the Imperial government with the best of collateral for banking advances. The Dominion securities will, of course, not be sold, but will continue to be owned by the Imperial government.

Dominion's Position Improved.

For a period after the outbreak of the war the Canadian Government borrowed the greater part of its war expenditure from the Imperial government. Subsequently, by reason of improvement in the revenues of the Dominion and the successful flotation of its loans on this side of the Atlantic, the Dominion became able to finance its own war expenditure in Canada, and also to assist the British government in financing here its purchases through the Imperial Munitions Board. For more than a year now the Dominion finance department has borrowed from the Imperial treasury only the amount represented by our expenditures in Great Britain and at the front. All advances so far received from the British government have been entered in the books of the Dominion as temporary borrowings.

Last fall the Dominion government arranged with the Imperial treasury for a total authorized loan of £30,000,000, to be availed of if necessary, at a rate not exceeding £2,500,000 a month during the present calendar year. The government is endeavoring to avail itself as little as possible of this provision on the part of the Imperial government.

HEAVY WAR LOAN SUBSCRIPTIONS.

Mr. J. P. Moore, secretary of the Canadian branch at Montreal of the Mutual Life and Citizens' Assurance Company of Australia, tells *The Monetary Times* that he has just received a cable advice from Australia to the effect that this company has subscribed £1,000,000 to the third war loan of the Australian commonwealth. The company's subscription to the first loan was £1,000,000, and to the second £1,250,000, so that the total subscribed is £3,250,000, or about \$16,250,000. This is a handsome amount. The third Australian loan has been a success.

FIRE INSURANCE RATES INQUIRY

Judge Masten Named as One of Commissioners in Ontario Investigation

Interest is reviving in the proposed inquiry of the Ontario government into the matter of fire insurance rates and kindred topics. The provincial government has a number of important matters in hand at present, including the political situation in the province, the nickel question, the Northern Ontario fire disaster, and the settlement policy to be pursued in that district, in addition to the problems of war finance. Premier Hearst is to be absent six or seven weeks in England as well as Hon. Dr. Pyne. It seems unlikely, therefore, that the inquiry will begin prior to September.

The commission will inquire into the control exercised by underwriters' associations and similar bodies over the method of regulating and placing insurance and also into insurance rates. *The Monetary Times* discussing the matter some time ago with the fire insurance company managers, was informed that the matter is receiving the attention of the Canadian Fire Underwriters' Association, and gathered that anything to be said from their viewpoint will be given in evidence before the commission.

Appointment of Commissioners

The Monetary Times understands that the personnel of the proposed commission of inquiry has already been suggested to the provincial government authorities, who have various names under consideration, the appointment of Mr. Justice Masten as one of the commissioners having already been announced by Premier Hearst last week. It is understood that at least one other commissioner is to be appointed.

Judge Masten had acquired a reputation as a capable and well-known barrister. Only recently he was called to the bench, resigning at the same time a directorship of the National Trust Company, which he had held but a few months. One of the most important cases in which Judge Masten appeared, prior to his call to the bench, was the Union Life trial at Toronto, in which he watched the interests of the attorney-general of Ontario. The character of the commission is a matter in which considerable interest is being taken by insurance companies, brokers and the public generally.

Rate Favoritism Denied

In urging, some months ago, the appointment of a commission in the Ontario House, it was suggested by Sir Adam Beck and other members, that the underwriters were accused of charging excessive rates, the rates in the city of London being cited as an example. The inquiry will be conducted under the public inquiries act, and the report of the commission is required by next session of the legislature.

It is understood that the Canadian Fire Underwriters' Association are preparing to meet the commission with considerable facts and figures. The general tone of the comments of fire insurance company officials is that they have no knowledge of any rate favoritism existing, such as has been referred to in the daily press from time to time. As one fire insurance company manager put it:—"The appointment of such a commission might serve to clear up any misunderstanding that may exist on the part of the public as to the methods of the Canadian Fire Underwriters' Association."

SUCCESSION DUTIES ON BANK SHARES

At a recent meeting of the executive council of the Canadian Bankers' Association it was unanimously agreed that the president, Sir Frederick Williams-Taylor, Messrs. E. L. Pease, N. Lavoie and John Aird, should constitute a committee to interview the premier of the province of Quebec on the question of double succession duties. At present the estate of a deceased shareholder of a bank or company who at the time of his death was domiciled in the province of Quebec and was the owner of shares in a company or bank the head office of which is in the province of Ontario, or vice versa, is called upon to pay succession duties to both provinces.

The Canadian Bankers' Association is desirous of obtaining a reciprocal arrangement between the provinces of Ontario and Quebec, providing that succession duties on such shares as described shall be paid to one province only, and in this connection the valuable co-operation of the Montreal and Toronto boards of trade and Canadian Manufacturers' Association has been secured in taking the matter before Premier Gouin.

LABOR UNIONS IN CANADA

Members' Numbers Show Decrease Owing Largely to Enlistment—Benefits Disbursed

The European war has evidently subjected Canadian trade unionism to a severe strain, the returns received for 1915 showing a loss of 120 local branches and 22,820 members, states the government report on labor organization in Canada. The total numerical strength of organized labor in Canada at the close of 1915 stood approximately at 143,343, made up as follows: 1,661 local branches owing allegiance to international organizations, comprising a membership of 114,722; 191 local branches of non-international bodies with a combined membership of 23,664; and 31 independent units with a reported membership of 4,957. These figures as compared with those of 1914, indicate a loss for the year 1915 of 113 local branches and 25,760 members of international organizations; a reduction of five branches of non-international bodies, but a gain of 2,729 in membership; the independent units, a loss of two, but a gain of 211 in the membership reported. The membership of all classes of organized labor in Canada as reported to the department for the past five years has been as follows:—1911, 133,132; 1912, 160,120; 1913, 175,799; 1914, 166,163; 1915, 143,343.

Labor and War

The extent to which the trade unionists of the Dominion contributed to the Canadian expeditionary forces is shown in this report. Of the 1,883 local branch unions in Canada, 961 have had one or more members enlist for overseas service since the beginning of the war. The trade unions furnished 11,972 recruits and 439 reservists, making in all 12,411 members in the ranks.

Nearly one-half of the local trade union branches is found in twenty-two cities, and these branches comprise over forty per cent. of the entire trade union membership in the Dominion. Montreal has 10,767 members; Toronto, 13,273; Winnipeg, 5,813; Vancouver, 4,557; Hamilton, 2,907; Ottawa, 2,658; London, 1,725; Edmonton, 1,954; Quebec, 2,783; Calgary, 1,769; Victoria, 1,378; Fort William, 790; Regina, 844; Halifax, 1,301; Saskatoon, 514; Moncton, 1,587; Lethbridge, 1,209; St. John, 1,978; St. Thomas, 1,441; Brantford, 383; Peterborough, 335; Moose Jaw, 901.

Benefits Paid by Unions

A table is furnished showing the expenditure on account of benefits paid during the year 1915 by the various central labor organizations operating in Canada. Of the international bodies 81 have benefit features on a varying scale. The total disbursements for 1915 amounted to \$14,565,365, an increase of \$1,727,378, as compared with the amount paid in 1914. Four of the non-international bodies reported having made payments on account of benefits, the total expenditure amounting to \$8,370.

The report is a directory of trade unions for the Dominion for 1916, including particulars of every local trade union in Canada, and a list of international and non-international central organizing bodies, together with addresses of the chief officers.

FARMS FOR SOLDIERS.

Contracts for 25 sets of farm buildings, together with the breaking of 40 acres on each farm, have been let by the Canadian Pacific Railway. This settlement is to be known as the "Van Horne Colony," after Sir William Van Horne. Each farm will consist of 160 acres, and on each will be built a dwelling, a barn and a machine shed. The farms will also be fenced. Work on the breaking, which represents 1,000 acres on the 25 farms, has already been started. The land will be sold to returned soldiers.

Mr. B. W. Tyre, Canadian manager of the Northern Assurance Company, who died at Montreal recently, was for thirty years in constant association with fire insurance circles in the Dominion. He was well known to underwriters in all the provinces, where his efforts have built up a substantial business for the Northern Assurance Company.

At a recent meeting of the executive council of the Canadian Bankers' Association, it was recommended that the American plan of quoting rates for inland exchange be adopted—that is so much per thousand premium or discount, as the case may be, e.g., \$1 per 1,000 instead of 1/10; also that the method of quoting sterling exchange be so much per pound, e.g., 4.90 instead of 10¼.

SUDBURY-COPPER CLIFF RAILWAY BONDS SOLD

A block of \$70,000 (of a \$75,000 issue) of 20-year 6 per cent. first mortgage bonds of the Sudbury-Copper Cliff Suburban Electric Railway, guaranteed by the town of Sudbury, as to principal and interest, has been awarded to Emilius Jarvis & Company, Toronto.

LONDON AND LANCASHIRE LIFE ASSOCIATION.

Having been well managed and having selected its risks with great care, the London and Lancashire Life and General Assurance Association has, during its fifty-three years' career, built up a substantial business establishment and an excellent reputation. At the end of last year, the total funds and assets of the association, excluding uncalled capital, amounted to \$22,090,817. After all payments last year, the life and annuity fund stood at \$19,747,194, showing an increase of \$228,751. The total income of the life department, according to the fifty-third annual report, recently presented, was \$2,701,190. During 1915 1,111 policies were issued for sums assured amounting to \$2,928,060, producing a new annual premium income of \$108,360 and single premiums of \$2,758. The total new premium income was therefore \$111,118. Re-assurances for \$233,375 were effected. The total life premium income, after deduction of premiums paid for re-assurances, amounted to \$1,949,394.

The company has \$14,346,810 of life insurance in force in Canada. The company's manager for the Dominion is Mr. Alex. Bissett, a careful underwriter, who has a splendid reputation. Mr. Bissett is also president of the Life Officers' Association of Canada this year. The London and Lancashire Life has been doing business here since 1863. Last year, it received premiums of \$455,168 in this country, the amount of policies new and taken up being \$1,075,011.

DOMINIONS ROYAL COMMISSION TO VISIT HERE

The Dominions Royal Commission will meet in Canada on September 21st next. This is the commission which, immediately prior to the outbreak of war, was completing a tour of the overseas dominions and making a study of the resources and industrial and economic conditions and possibilities with a view to imperial trade expansion on systematic lines.

The commission consists of Lord D'Abernon, chairman; Sir Alfred Bateman, Sir Rider Haggard and Messrs. Lorimer, Garnet, Tatlow, of the United Kingdom; Sir George Foster, of Canada; Mr. Sinclair, of New Zealand; Sir Jan Langerman, South Africa; Sir Edgar Bowring, Newfoundland.

Mr. F. C. T. O'Hara, deputy minister of trade and commerce, is the local officer of the commission. When war broke out the sittings of the commission in Canada had just begun, the cities of Halifax and St. John having been visited. When war was declared the Canadian programme was cancelled and the commission returned to England. The arrangements which had been made for sittings in various parts of Canada for the calling of witnesses, etc., will now be put into effect, the necessary instructions having been issued recently.

The *Monetary Times* understands that the commission is likely to commence its sittings at Sudbury and Cobalt during the first week in September, going west via Edmonton to Prince Rupert, starting the eastward portion of the trip from Vancouver about September 21st. The party in the western trip will probably consist of Sir George Foster, Mr. W. Lorimer, Mr. J. Tatlow, Honorable E. R. Bowring and Sir Rider Haggard.

In soliciting orders for the forthcoming Dominion government war loan, Messrs. A. E. Ames and Company, investment bankers, Toronto, state that the bonds will probably be issued in denominations of \$100, \$500 and \$1,000, and probably larger amounts, and may be either "registered" or "bearer" bonds as desired; that the period of the loan will probably be not less than ten years, and, probably, that payments may be made by instalments, and that the price is to be the same to all investors irrespective of the amount applied for. "We have no doubt," says the firm, "but that the loan will be a great success, having in mind that the Dominion government bonds rank ahead of all other Canadian issues, that Canada has been prosperous since the last loan, as evidenced by the great increase in deposits with the banks, and that Canadians are resolved to do their full share in furnishing money as well as men to end the war in the only way in which it must be ended."

London and Lancashire Life and General Assurance Association, Limited

Extracts from the Report of the Directors presented at the Fifty-Third Annual Meeting held in London, England, 1916.

LIFE BUSINESS

NEW BUSINESS—During the year 1,111 policies were issued for sums assured amounting to \$2,928,060 producing a new annual Premium Income of \$108,360, and Single Premiums of \$2,758, making a total NEW PREMIUM INCOME of \$111,118. Re-assurances were effected for \$233,375.

The sum of \$13,029 was received for the purchase of Immediate Annuities

The TOTAL LIFE PREMIUM INCOME after deduction of premiums paid for Re-assurances amounted to \$1,949,394.

The INCOME from INTEREST and DIVIDENDS on the Life and Annuity Fund was \$738,536 after deduction of Income Tax.

The TOTAL INCOME of the Life Department was \$2,701,190.

The CLAIMS by death, with bonus additions, amounted to \$1,182,937, including \$188,610 directly attributable to the War.

ENDOWMENT POLICIES matured during the year, representing Sums Assured of \$628,395 including bonus additions.

After payment of all outgoings, the LIFE and ANNUITY FUND showed an increase of \$228,751 and stood at \$19,747,194.

The Total Funds and Assets of the Association, excluding uncalled Capital, amounted at 31st December, 1915, to \$22,090,817.

SASKATOON REDUCES EXPENSES

Western City Makes Money on Some of Its Utilities

Mr. C. J. Yorath, city commissioner, Saskatoon, informs *The Monetary Times* that according to the auditors' (Messrs. Macintosh and Hyde) report for the first six months of the year there is a surplus of \$25,453, or in other words the appropriations for that period have been underexpended by this amount. This is in spite of the fact that the appropriations at the beginning of this year, as submitted by the commissioner to the council, had been reduced by the sum of \$73,242 compared with 1915 appropriations.

The expenditure for the first half of the current year is \$286,635. The reduction in expenditure will be appreciated when it is remembered that the expenditure for the first six months in 1913 was \$415,106, a reduction of \$128,470, or 30 per cent. The total general levy (excluding schools) for which the city council is responsible is this year \$432,938, compared with \$759,435 in 1913, a reduction in three years of \$326,497, or 43 per cent.

Public Utilities Show Profit

The three public utilities, i.e., electric light and power, street railway, and waterworks department, show a combined profit of \$15,782 compared with a loss of \$16,982 for the same period last year.

The electric light and power department shows a profit for the six months of \$13,854 after allowing \$52,086 for fixed charges, including sinking fund interest and depreciation. The total operating costs for the six months was \$82,399, compared with \$117,902 during the first six months of 1913, a reduction of \$35,502, or 29 per cent., in a period of three years.

The street railway, for the first time since its inception, shows a profit of \$3,291 for the six months after allowing \$26,466 for fixed charges. This profit is all the more satisfactory when it is remembered that for the same period last year there was a deficit of \$23,600. The total operating costs for the six months was \$60,238, compared with \$76,313 during the first six months of 1913, a reduction of \$16,075 in three years, or 21 per cent.

Waterworks' Small Loss

Owing to the exceptionally wet season and the high price of chemicals used for sedimentation purposes, the waterworks department shows a loss for the six months of the year of \$1,364, but there is little doubt that if the weather is dry during the third quarter this department will show a profit at the end of the year. The operating expenses of this department have been reduced in three years from \$63,972 to \$29,410, a reduction of \$34,561, or 54 per cent.

BRITAIN FAVORS CANADIAN EXPORTS

The controller of the British department of import restriction has notified the trade and commerce department, Ottawa, that he is prepared to consider favorably applications for licenses for the export to England from Canada of goods on the prohibited list. The condition attached, however, is that the goods in question were ordered before the date of the prohibition and are landed in the United Kingdom on or before September 15th.

The list of prohibited goods is long and consists of goods whose importation is wholly restricted and others for which licenses must be obtained. The dates of prohibition vary from March 1st last to recent periods. Ivory, leather, paper, cardboard, sewing machines, furniture and many other such commodities are on the lists in question. Canadian exporters of such goods as pulp and paper, cardboard, furniture, etc., whose importation is allowed by license only, and is as a general rule restricted to two-thirds the normal consumption, are being favored as far as possible by the British authorities in the granting of these licenses, it is learned. It is a species of preference within the empire.

In a circular asking clients to purchase the war bonds through their firm, Messrs. W. L. McKinnon & Company, bond dealers, Toronto, say:—"You will be able to purchase the new war loan through us without any extra cost whatever to yourself. The bonds of the Dominion of Canada are positively the highest grade which can be issued in this country. They are the best secured, the most marketable, and the readiest to obtain a loan upon, and they are the most convenient of all forms of securities obtainable in Canada."

MINING ACTIVE IN BRITISH COLUMBIA

Granby's Big Plant is Busy—Shipbuilding Industry Proposal Dropped

(Staff Correspondence)

Vancouver, August 7th.

In a trip up the British Columbia coast, one is able to see something of two of the big industries of the province. Even if the trip is not for the purpose of calling at such points as Powell river, where the big pulp and paper manufacturing plant of the Powell River Company is located, there is much to be seen. Off the mouths of the Skeena and Naas rivers are the big fleets of salmon fishing boats, for the Fraser river is the centre of the salmon fishery only on the lower coast. At the Skeena, the big canneries are busy, but packers say the sockeye run this year is not very heavy, although it is difficult to estimate the season's pack. There are other varieties of salmon which may run well into the autumn, and which would bring up the total.

Granby's Big Plant

The main centre of industry on the northern part of the coast is the big plant at Anyox, on Observatory Inlet, of the Granby Consolidated Mining, Smelting and Power Company. This large concern has at Grand Forks, in the Boundary district, the largest copper smelter in the British empire, and its smelter at Anyox is not much behind the Grand Forks plant in capacity. Doubtless in a few years it will be larger, for the company is steadily acquiring other properties in the northern district.

Anyox is one of the busy towns on the continent. It has all the earmarks of a "boom" town in general appearance, but behind all is the big payroll of the 1,200 men employed in the mines and the smelter. The mines in connection with the Grand Forks smelter are at Phoenix, but in the Anyox case, the mines and smelter are together, so that there are enough employees to make a good town. Just now the men are being paid a bonus of one dollar a day, because of the high price of copper, and with wages at \$4 and \$4.50 per day, there is much money being spent. Everybody works at Anyox, and as fast as houses can be put up, the men are bringing in their families. Already there is a population of about 2,000, with one school and another to be built. It is one of the towns in the west where hotel accommodation is at a premium all the time.

The townsite is owned by the company, with the store, etc., but everything possible is done to effect cordial co-operation between the men and the company. Their operations are an outstanding instance of what big capital is doing in this province. The success which has attended this company will mean a great deal for mining throughout all that section.

At the far end of Observatory Inlet is the Dolly Varden Mining Company's property. It is eighteen miles back from the water, but the copper ore is high grade. They have constructed a dock and a road back to the mine, but shipments have not yet been made. Chicago capital is behind this proposition.

Shipbuilding Industry Passed

If the federal and provincial governments had concurred in the proposal made by Mr. W. G. Trethewey, it is probable that a large shipbuilding industry would have been established on this coast. Mr. Trethewey came out from London with the proposal that the federal government allow the importation of requisite machinery free of duty, in view of conditions. Other concessions were asked of Premier Bowser. In neither instance did he receive encouragement. Mr. Trethewey and four others are understood to have been willing to put up \$500,000 each, but as the desired concessions could not be obtained, the matter has been dropped.

CROP FIGURES

Dr. A. Magill, chairman of the Dominion Grain Commission, estimates that Canada will have, this year, a "billion dollar grain crop." The Canadian Pacific Railway gives the following figures as to the acreage under crop this year:—Wheat, 11,517,000; oats, 10,644,000; barley, 1,397,900; rye, 159,685; peas, 101,420; mixed grains, 410,770; hay and clover, 7,974,000; alfalfa, 89,900; buckwheat, 355,500; flax, 723,000; corn for husking, 183,700; corn for fodder, 297,070; beans, 34,490; potatoes, 448,800; turnips, etc., 156,200, and sugar beets, 15,000.

8% NET FARM MORTGAGES

We want \$1,000 on each of thirty-two quarter sections of first-class land. Principal re-payable in five years; interest payable the First of January and the First of July. All expenses paid by the Mortgagors. Titles examined by MacDonald, Craig, Tarr & Ross.

LEGAL NOTICE

CANADIAN GASOLINE CORPORATION, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 13th day of July, 1916, incorporating Arthur John Thomson and William Symon Morlock, solicitors; Samuel Davidson Fowler, solicitor's clerk; Violet Moffat, accountant, and Anna Latimer, office clerk, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To search for and recover and win from the earth, petroleum, natural gas, oil, salt, metals, minerals and mineral substances of all kinds, and to that end to explore, prospect, mine, quarry, bore, sink wells, construct works or otherwise proceed as may be necessary; to produce, manufacture, purchase, acquire, refine, smelt, store, distribute, sell, dispose of and deal in petroleum, natural gas, oil, salt, chemicals, metals, minerals and mineral substances of all kinds and all products of any of the same; (b) To trade in, deal in and contract with reference to lands or interest in land, mines, quarries, wells, leases, privileges, licenses, concessions and rights of all kinds covering, relating to or containing or believed to cover, relate to or contain petroleum, natural gas, oil, salt, chemicals, metals, minerals or mineral substances of any kind; (c) To acquire, purchase, take on lease or license, hire, hold, use, sell, grant leases of, grant licenses of, exchange, alienate, dispose of and otherwise deal in or contract with reference to lands or interests in land, personal property of all kinds or interests therein, rights, privileges, licenses and concessions, ships, boats or vessels of any description, wharves or wharfage facilities, docks and docking facilities, cartage plant, forwarding plant, warehouses and towing, wrecking and salvage plant or any interest in any of the same; (d) To manufacture and deal in appliances, implements, machinery, apparatus, goods and supplies in any way connected with or incidental to the operations of the company or to the use of any of the products of the company; to manufacture or trade in property and goods of all kinds; (e) To work, manage, operate, turn to account, explore, develop and improve the properties of the company, whether mining, agricultural or otherwise; (f) To deal in and contract with reference to timber lands, timber licenses and timber rights, and to cut, render merchantable, handle, manufacture, deal in and contract with reference to timber and lumber of all kinds and all products thereof; (g) To acquire, lease, construct, improve, own, use and operate works for the development of power, light and heat, to use, purchase, sell, supply, lease or otherwise deal in or contract with reference to power, light and heat, subject always to all local laws or regulations in that behalf; (h) To acquire, lease, construct, improve, own, use and operate irrigation works and works for the supply of water for other purposes, and to use, purchase, sell, supply, lease or otherwise deal in or contract with reference to water for irrigation or other purposes, subject always to all local laws or regulations in that behalf; (i) To acquire, lease, construct, improve, maintain, own, use, operate, sell, let and deal in dwelling houses, lodging houses and hotels; (j) To operate ranches or farms for live stock or agriculture, to breed, raise, keep, render marketable and deal in horses, cattle and live stock of all kinds, and to produce and deal in all products thereof and all agricultural products; (k) To operate construction or building plants and to take and carry out contracts for building or for construction work of any kind; (l) To undertake, carry on and execute transactions as financial or commercial brokers or agents; (m) Notwithstanding the provisions of section 44 of The Companies Act, to subscribe for, purchase, assume liability under, acquire, hold, sell, exchange, dispose of or otherwise deal in or contract with reference to bonds, debentures, stocks or other securities or obligations or any estate or interest therein; and to apply or accept, in whole or in part, as consideration for, satisfaction of or security for any contract, indebtedness or obligation, to or of the company, property, obligations, shares and securities of any kind at such valuation and upon such terms as may be agreed upon; (n) To acquire, dispose of or otherwise deal in properties, businesses or undertakings of all kinds similar in whole or in part to those of the company; to furnish aid to any business or undertaking similar in whole or in part to that of the company with which the company may have business relations, by way of loan, bonus, endorsement, agreement, guarantee, management or other service, and to manage, supervise and control the same in whole or in part and to act as agent or attorney for the same; (o) To carry on any other business which may seem capable of being conveniently or advantageously carried on in connection with the business of the company or calculated directly or indirectly to enhance the value of, to facilitate the realization of or to render more profitable any of the company's businesses, properties, or rights; (p) To invest the moneys of the company not immediately required in such investments as may from time to time be determined; (q) To co-operate in, aid in, subscribe towards or subsidize any proceeding or undertaking which may seem calculated directly or indirectly to benefit the company; (r) To acquire or undertake the whole or any part of the business, property and liabilities of any person, partnership, association or company having objects altogether or in part similar to the company, or carrying on any business which the company is authorized to carry on, or possessed of property which may seem suitable or desirable for the purposes of the company; (s) To apply for, purchase or otherwise acquire and to protect, prolong and renew patents, patent rights, trade marks, formulae, licenses, protections, concessions and the like, conferring or relating to any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, improve, develop or grant licenses in respect of or otherwise turn to account the property, right or information so acquired; (t) To enter into partnership or into any arrangement for sharing of profits, or expense, union of interests, co-operation, joint adventure, reciprocal concessions or otherwise, with any person, partnership, association or company carrying on or engaged in, or about to carry on or engage in, any business or transaction which the company is authorized to carry on or engage in, or any business or

transaction which may seem capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person, partnership, association or company, and to take or otherwise acquire shares and securities of any such partnership, association or company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (u) To take or otherwise acquire and hold shares in any partnership, or stock or shares in any association or company having objects altogether or in part similar to those of the company, or carrying on any business which may seem capable of being conducted so as directly or indirectly to benefit the company; (v) To apply for, promote and obtain from the Dominion of Canada or any other authority, whether Dominion, Provincial, Imperial, Colonial or foreign, and including subordinate and municipal authorities, any statute, ordinance, order, regulation or other authorization or enactment which may seem desirable to the company or calculated directly or indirectly to benefit the company; (w) To enter into any arrangements with any governments or authorities, supreme, provincial, civic, municipal, local or otherwise, that may seem conducive to the company's objects or any of them, and to obtain from any such government or authority any statutes, ordinances, licenses, contracts, orders, regulations, decrees, rights, powers, franchises, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with the terms of the same; (x) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company, or of its predecessors in business, or of any person, partnership, association or company allied with the company in business or subsidiary to the company, or in which the company holds shares or securities, or to benefit the dependents or connections of such persons, and to grant pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (y) To promote, form, organize, manage, develop, take interests or stock or shares in and assist financially or otherwise any partnership, association or company for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose which may seem calculated directly or indirectly to benefit the company; (z) To acquire, purchase, take on lease, hire, construct, improve, own, maintain, operate, manage, carry out and control plant, equipment, machinery, supplies, buildings, works, shops, warehouses, manufactories, pumps, tanks, tank cars, pipe lines, smelters, refineries, roads, ways, canals, bridges, electric works, electric plant, hydraulic works, hydraulic plant, boats, ships, docks, wharves, piers, gas works, cables, waterworks, reservoirs, aqueducts, flumes, ditches and all such other structures, works, conveniences and appliances as may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the acquisition, purchase, leasing, hiring, construction, improvement, ownership, use, maintenance, operation, management, carrying out or control thereof; (aa) Where such course is required for the purposes of the company or may seem calculated directly or indirectly to advance the company's interests, to acquire, purchase, take on lease, hire, construct, improve, own, use, maintain, operate, manage, carry out and control, but only upon lands owned or controlled by the company, or over which the company may have a right of license to that effect, such roads, ways, bridges, lines of rail, spurs, sidings, tracks, rolling stock, cables, wires, motors, locomotives, electrical plant and all such other structures, works, conveniences and appliances as may be required for the purpose of maintaining communication by telegraph or telephone, or of effecting the transport of goods or passengers, and to contribute to, subsidize or otherwise assist or take part in the acquisition, purchase, leasing, hiring, construction, improvement, ownership, use, maintenance, operation, management, carrying out or control thereof; (bb) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (cc) To sell or dispose of the property or undertaking of the company, or any part thereof, for such consideration as the company may think fit, and in particular, and notwithstanding the provisions of section 44 of The Companies Act, for shares, debentures or securities of any other partnership, association or company; (dd) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (ee) To sell, exchange, lease, dispose of, turn to account or otherwise deal with or contract with reference to all or any part of the property and rights of the company; (ff) To consolidate or amalgamate with any other company having objects similar in whole or in part to those of the company; (gg) To procure the company to be registered, licensed or otherwise recognized in any foreign country, and to designate and appoint persons therein as attorneys or representatives of the company with full power to represent the company in all matters according to the laws of such foreign country and to accept service for and on behalf of the company of any process or suit; (hh) To pay out of the funds of the company all or any of the expenses of or incidental to the formation and organization thereof; and to employ, contract with and provide for the remuneration of brokers, commission agents and underwriters upon any issue of shares, bonds, debentures, debenture stock or other securities of the company; (ii) To distribute or divide assets of the company in specie amongst the shareholders; (jj) To do all or any of the above things as principals, agents, contractors or otherwise, and either alone or in conjunction with others; to do all such other things as may seem directly or indirectly to be incidental to or conducive to or convenient or proper for the accomplishment of the purposes or the attainment of the objects of the company, or any of them, or expedient for the protection or benefit of the company; (kk) No power granted in any paragraph hereof shall be limited or restricted by reference to or inference from the terms of any other paragraph hereof. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Can-

adian Gasoline Corporation, Limited," with a capital stock of three million dollars, divided into 3,000,000 shares of one dollar each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 15th day of July, 1916.

THOMAS MULVEY,
Under-Secretary of State.

THE LOWNDES COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the seal of the Secretary of State of Canada, bearing date the 20th day of June, 1916, incorporating Elroy Barrie Schroeder, manager; Charles Arnold Stone, accountant; Harry Booker Sweetapple Hammond, student-at-law, and Jessie Harold Whitcomb and Annie Hunter, spinsters, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:-

(a) To manufacture, buy, sell and deal in goods, wares and merchandise of all kinds;

(b) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights;

(c) To apply for purchase or otherwise acquire, any patents, brevets d'invention, grants, leases, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to pay for the same in cash, shares or other securities of the company or otherwise, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired;

(d) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same;

(e) To enter into any arrangements with any Government or authorities, supreme, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges, franchises and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with or surrender any such arrangements, rights, privileges, franchises and concessions;

(f) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors or associates in business) or the dependents or connections, of such persons, and to grant annuities, pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object;

(g) To promote any company or companies for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company;

(h) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business, or capable of being profitably dealt with in connection with any of the company's property or rights for the time being;

(i) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable and transferable instruments;

(j) To purchase, lease or otherwise acquire and to hold, exercise and enjoy in its own name, all or any of the property, franchise, good-will,

rights, powers and privileges held or enjoyed by any person or firm or any company or companies, and to pay for such property, franchise, good-will, rights, powers and privileges wholly or partly in shares of the company wholly or partly paid up, and to undertake the liabilities of any such person, firm or company;

(k) To aid in any manner any corporation any of whose shares of capital stock, bonds, debentures or other obligations are held or are in any manner guaranteed by this company, and to do any act or things for the preservation and protection, improvement and enhancement of the value of any such shares of capital stock, bonds, debentures, or other obligations, and to do any and all acts tending to increase the value of any of the property at any time held or controlled by this company;

(l) To purchase, take or acquire by original subscription or otherwise, and to hold and, with or without guarantee, to sell or otherwise dispose of shares, stock, whether common or preferred; debentures, bonds and other obligations in and of any other company carrying on a business in whole or in part similar to that of the company, and to pay for such shares, stocks, debentures, bonds, and other obligations either in cash or partly in cash, or to issue shares of this company fully paid up or partly paid up in payment, and notwithstanding the provisions of section 44 of the said Act, to use the funds of the company in the purchase of shares, stock, debentures, bonds and obligations in and of any such other company, and to vote on all shares so held through such agent or agents as the directors may appoint.

(m) To sell, let or hire, or otherwise deal with the assets of the company, or any part thereof, for such consideration as the company may think fit, and in particular for shares, debentures, debenture stock or other securities of any other company;

(n) With the approval of the shareholders, to remunerate any persons for services rendered to the company, in such manner as the company may deem expedient, and more particularly by the issue and allotment of shares, bonds and other securities of the company, wholly or partially paid up, but nothing in this clause contained shall be deemed to limit the power of the directors to fix and pay the salary of any and all officers, servants, agents and employees of the company;

(o) To lend money to customers and others having dealings with the company and to take security for the loan of such money; to guarantee the performance of the contractual and other obligations of any such persons and to give any guarantee or indemnity as may seem expedient;

(p) To pay out of the funds of the company all expenses of or incidental to the formation, registration and advertising of the company, or in or about the promotion of this company or the conduct of its business;

(q) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations;

(r) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company;

(s) To do all or any of the above things as principals, agents, contractors or otherwise, and either alone or in conjunction with other, and either by or through agents, sub-contractors, trustees or otherwise;

(t) To do all such other things as are incidental or conducive to the attainment of any one or more of the above objects, and so that the objects specified in each paragraph of the clause shall, except when otherwise expressed in such paragraph, be in no wise limited or restricted by reference to, or inference from the terms of any other paragraph or to or from the name of the company;

(u) To acquire and take over as a going concern the several businesses now carried on at the City of Toronto, in the County of York, under the Ontario Corporation, The Lowndes Company, Limited, with all the assets, stock-in-trade, and real and personal property owned or used in connection therewith and the goodwill thereof, and all the rights and contracts now held by said corporation, subject to the obligations, if any, affecting the same, and to pay for the same in paid-up shares of this company.

The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Lowndes Company, Limited," with a capital stock of five hundred thousand dollars, divided into 5,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 22nd day of June, 1916.

THOMAS MULVEY,
Under-Secretary of State.

52-2

BIG HOTEL FOR TORONTO

A large hotel is to be erected on the site of the Yonge Street Arcade, Yonge and Victoria Streets, Toronto, at an estimated cost of \$2,000,000. The building will be constructed and operated by the York Hotel Company, represented in Toronto by Major W. F. Dinnick, president of the Dovercourt Land, Building and Savings Company, and associated with other financial concerns. Others who are understood to be at the back of the York Hotel Company are: Messrs. Frank A. Dudley, New York; F. D. Corey, Buffalo; Sir William Mackenzie, Toronto; Sir Henry Pellatt, Toronto; H. C. Cox, Toronto; E. F. B. Johnson, K.C., Toronto; and G. P. Schofield, Toronto.

The Toronto city council yesterday decided to grant the company a fixed assessment for ten years on the hotel building, the business assessment to be based upon the fixed assessment. Plans will be drawn up immediately for the hotel and construction will be commenced next spring.

The journal of the Canadian Bankers' Association for July, edited by Mr. Victor Ross, is a very creditable production. It contains a number of valuable leading articles on financial and business subjects, such well known writers as F. W. Hirst, II. M. P. Eekardt, Arthur W. Kiddy, J. L. Payne and Norman Lambert being among the contributors. The editorial comment is up to date, crisp and interesting.

DEBENTURES FOR SALE

TOWN OF NORTH BAY

DEBENTURES FOR SALE

Sealed Tenders will be received by the undersigned up to 12 o'clock noon, Friday, the 1st day of September, A.D. 1916, for the purchase of the following issue of debentures of the Municipality of the Town of North Bay:—

\$15,000.00, debentures issued for Patriotic purposes bearing interest at the rate of Six per cent. per annum, repayable in Twenty equal annual instalments of principal and interest.

Delivery to be made at the Royal Bank of Canada at North Bay, Ont.

M. W. FLANNERY,
Treasurer, North Bay.

TOWN OF AYLMER, QUEBEC

DEBENTURES

Tenders will be received up to Thursday, August the 24th, 1916, by the undersigned, for the purchase of \$35,000, 30-year Debentures bearing 5% interest, and payable at the Office of the Secretary-Treasurer at Aylmer, Que., the interest payable semi-annually, that is to say, May the 1st and November 1st.

The money is to be used for the purpose of installing a Rapid Sand Gravity Filtration Plant.

Highest or any tender not necessarily accepted.

H. SEXSMITH,
Secretary-Treasurer.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 5c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

ACCOUNTANT and Bookkeeper; age 30; over 12 years' experience in bookkeeping and financial work, seeks position with Financial or Commercial Firm, having good prospects. Reply Box 497, *The Monetary Times*, Toronto.

AUSTRALIA'S THIRD LOAN SUCCESSFUL

Subscriptions for the third Australian war loan closed last week, the loan being successful. The issue was again at 4½ per cent., free of income-tax, the price of issue was par, and after allowing for accrued interest the net price was about £98 13s. 3d., which gives a yield, including redemption at par in 1925, of about £4 13s. 6d. per cent., a yield differing only slightly from that on the two previous issues. No amount was specified, but, as before, all subscriptions will be accepted. In not naming any amount for the present issue the government has attracted criticism, as the only point for comparison is the total amount authorized a few weeks ago by parliament, namely, £50,000,000. The probable amount of the subscription has not been estimated at present, but a good amount was received. The amount subscribed for the first issue in August, 1915, was £13,389,440, and for the second issue last January £21,655,580.

Nearly everything that Canada makes, mines or grows will be exhibited at the Canadian National Exhibition.

An expenditure of over \$300,000 is required to stage and prepare the Canadian National Exhibition each year.

COLONEL CANTLEY'S GOOD WORK

"But for the efforts of Colonel Cantley personally and of the Nova Scotia Steel Company," says the report of the royal commission on shell contracts, "it would have been impracticable to have obtained orders for the fabrication of shells in Canada. The War Office had been of the opinion that acid steel, which is not made in Canada, was the only suitable material for the manufacture of shells, and particularly of high explosive shells. Basic steel is the only kind of steel made in Canada, and this the War Office would not accept. After elaborate and costly experiments under the direction of Colonel Cantley, the Nova Scotia Steel Company succeeded in producing a quality of basic steel which, after exhaustive tests, the War Office was finally persuaded to accept; and the placing of orders for shells to be manufactured in Canada was assured. By the 31st of May, 1915, manufacturing establishments in Canada were employed in the fabrication of shells as follows:—

Kind of Shell.	Establishments Employed.
15-pounder shrapnel	33
18-pounder shrapnel	235
18-pounder high explosives	110
4.5 howitzers	16
Production of tri-nitro-toluol	2"

JULY RAILWAY EARNINGS

Canada's transcontinental railways' earnings were the largest of any month for the present year. The total monthly earnings compiled from issued returns of the Canadian Pacific Railway, Grand Trunk Railway, and Canadian Northern Railway are as follows:—

Month.			%
January	\$14,724,216	+ \$3,966,003	36.9
February	14,667,915	+ 3,237,879	28.3
March	17,344,243	+ 3,731,539	27.4
April	18,077,805	+ 4,959,127	37.8
May	19,959,336	+ 7,224,934	56.7
June	19,840,173	+ 6,659,139	50.5
July	20,956,091	+ 7,040,445	50.6

The following are the transcontinental weekly railway earnings during July:—

Canadian Pacific Railway.

	1916.	1915.	
July 7	\$2,616,000	\$1,666,000	+ \$ 950,000
July 14	2,738,000	1,635,000	+ 1,103,000
July 21	2,641,000	1,070,000	+ 971,000
July 31	3,800,000	1,476,000	+ 1,324,000

Grand Trunk Railway.

	1916.	1915.	
July 7	\$1,155,029	\$ 990,278	+ \$ 164,751
July 14	1,211,393	980,629	+ 221,764
July 21	1,140,226	980,998	+ 159,328
July 31	1,824,715	1,543,852	+ 275,853

Canadian Northern Railway.

	1916.	1915.	
July 7	\$ 885,100	\$ 429,400	+ \$ 455,700
July 14	874,900	449,700	+ 425,200
July 21	866,900	447,700	+ 419,200
July 31	1,207,300	634,900	+ 572,400

The following is the Canadian Pacific Railway's June report together with that for the company's fiscal year:—

For the Month of June, 1916.

	1916.	1915.	
Gross	\$ 11,892,609	\$ 7,512,033	+ \$ 4,380,575
Expenses	8,262,976	4,834,002	+ 3,368,973
Net	3,689,633	2,678,030	+ 1,011,602

For the 12 Months.

	1916.	1915.	
Gross	\$129,481,885	\$98,865,209	+ \$30,616,875
Expenses	90,255,965	65,200,532	+ 14,065,382
Net	49,225,920	33,574,627	+ 15,651,293

Is Your Estate Properly Protected?

No matter how little or how much you own, these possessions make up your estate, and should be protected by efficient and economical management.

This can best be done by an Executor or Trustee.

This Company, by acting in this capacity, will give your estate the benefit of experience gained in the management of many estates, of large and of only moderate size, and will scrupulously guard the interests of your heirs.

No charge for drawing up your will when the Sterling Trusts Corporation is appointed your Executor and Trustee.

Our officers will give you further information on request.

DIVIDENDS AND NOTICES

UNION BANK OF CANADA

DIVIDEND No. 118

Notice is hereby given that a Dividend at the rate of eight per cent. per annum upon the Paid-up Capital Stock of the Union Bank of Canada, has been declared for the current quarter, and that the same will be payable at its Banking House, in the City of Winnipeg, and at its branches on and after Friday, the 1st day of September, 1916, to Shareholders of record, at the close of business, on the seventeenth day of August, 1916.

The transfer books will be closed from the 18th to the 31st of August, 1916, both days inclusive.

By order of the Board,

G. H. BALFOUR,

Winnipeg, July 20th, 1916.

General Manager.

THE ROYAL BANK OF CANADA

DIVIDEND No. 116

Notice is hereby given that a Dividend of Three per cent. (being at the rate of Twelve per cent. per annum) upon the Paid-up Capital Stock of this Bank, has been declared for the Current Quarter, and will be payable at the Bank and its Branches on and after Friday, the First day of September next, to Shareholders of record of 15th August.

By order of the Board,

C. E. NEILL,

General Manager.

Montreal, P.Q., July 18, 1916.

BANK OF MONTREAL

Notice is hereby given that a Dividend of Two and One-Half per Cent. upon the paid-up Capital Stock of this Institution has been declared for the three months ending 31st July, 1916, and that the same will be payable at its Banking House in this city, and at its Branches, on and after Friday, the First Day of September next, to shareholders of record of 31st July, 1916.

By order of the Board.

FREDERICK WILLIAMS-TAYLOR,

General Manager.

Montreal, 21st July, 1916.

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 118

Notice is hereby given that a quarterly dividend of 2½ per cent. upon the capital stock of this Bank has been declared for the three months ending the 31st of August next, and that the same will be payable at the Bank and its Branches on and after Friday, 1st September, 1916, to shareholders of record at the close of business on the 16th day of August, 1916.

By order of the Board.

JOHN AIRD,

General Manager.

Toronto, 24th July, 1916.

NOTICE OF Judicial Sale of Property

Pursuant to the Order Nisi and the Final Order for Sale in S.C. 10623, Judicial District of Calgary, there will be offered for sale, with the approbation of a Judge of the Supreme Court of Alberta, by Henry M. McCallum, Auctioneer, at the Court House, in the City of Calgary, in the Province of Alberta, at Two o'clock in the afternoon, on Wednesday, the 6th day of September, A.D. 1916, standard time, the following lands and premises, being and comprising:—

1. The whole of the Railways and branches constructed or acquired by the Defendant between a point on the Canadian Pacific Railway, one mile west of Pincher Station, in the Province of Alberta, and Beaver Collieries, the property of North American Collieries, Limited, a distance of about 14 miles, with all lands or right-of-way owned or used by the Defendant as appurtenant thereto, stations, freight houses, side tracks, shops, yards, engine-houses and other buildings and structures used in connection with the said Railway and Branches, or any part thereof, together with the franchises of the Defendant in respect to the same.

Terms: Ten per cent. cash; 15% in ninety days; 25% in six months; 25% in 9 months and 25% in 12 months. The last three payments bear interest at 5%.

Dated at the City of Calgary, in the Province of Alberta, this 3rd day of July, A.D. 1916.

LAURENCE J. CLARKE,

Clerk of the Court.

Approved: "L. F. Clarry."

You Can Improve Your Position

Have you heard of the Sales and Intelligence Departments of the Canada Life?

They give special assistance to the Company's representatives.

They teach a man the insurance business by correspondence and personal assistance free of charge

Then they place him in a position and help him to make good

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this. All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policy-holders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

SIMPLICITY FIRST

is about as important in your life assurance as "Safety First," because a contract that is not simple to understand may not be safe for your particular purpose.

The life assurance policy of the future must be an attractive and exactly worded contract, but above all CLEAR and SIMPLE — the new policy standard as set by

*NOTE.—It will be noted that the figures relating to the imports of coin and bullion for the twelve months ending May, 1916, amounted to \$34,129,108, as against \$132,349,976 for the same period of 1913-14. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

CAMPAIGN AGAINST FALSE ADVERTISING

The Retail Merchants' Association of Canada have recently inaugurated a vigorous campaign against false advertising and have appointed committees to censor advertisements appearing in the press, and to follow up any suspicious or doubtful claims made by the advertiser. Already there have been several convictions secured in both Toronto and some of the outside towns. The practice of misrepresentation, false claims, and generally deceptive matter in advertising, has become a real menace to the legitimate dealer, and if allowed to continue in the bold and defiant way it has been doing of late, is bound to demoralize legitimate and honest methods of selling. Wholesalers and manufacturers are as pronounced against this evil as the retailer, and readily recognize its demoralizing influence. Therefore, they are in hearty accord with the movement set going by this association to clear up things, and are co-operating as much as possible with that object in view. One of the chief reasons why the Retail Merchants' Association of Canada are pressing the issue, is the fact that this practice of false advertising and other illegitimate methods of securing business invariably hits the honest merchant who is striving to pay his debts and conduct his business in a straightforward way. The men chosen on the various committees who will investigate suspicious claims in advertising will be active business men who are familiar with the prices and values of the commodity advertised. This is a strong factor and gives the Association a decided advantage in securing the judgment of men thoroughly familiar with the goods.

"We have made only a start," said Mr. R. M. Trowern, secretary of the association, in a statement to *The Monetary Times*, "but intend to press the matter vigorously until we succeed in stamping out the practice. At the general meeting of the Dominion board, to be held in Winnipeg this month, the subject will be still further discussed, and plans adopted to cover the whole Dominion."

TOY FAIR AT NATIONAL EXHIBITION

The directors of the Canadian National Exhibition were so favorably impressed with the first Canadian toy fair that they asked the minister of trade and commerce to arrange for a repetition of it at the Canadian National Exhibition, opening in Toronto on August 26th, 1916. The Toy Association responded heartily to an invitation from Sir George Foster, thus ensuring the success of the second Canadian toy fair. In addition to those who exhibited at the first toy fair a number of other Canadian toy manufacturers will be represented at the Canadian National Exhibition.

An interesting supplement to the weekly bulletin of the department of trade and commerce, Ottawa, entitled "Toy Making in Canada," has just been issued. It is pointed out therein that in considering the question of the manufacture of toys in Canada the value of the home market is an important factor. In the fiscal year 1914, which ended four months before the outbreak of war, the total value of toys imported into Canada was \$1,037,000, of which about \$580,000 worth came from Germany and \$5,600 worth from Austria. In that year we imported from the United States toys to the value of over \$293,000, while toys from the United Kingdom were valued at over \$91,000, imports of French toys at over \$33,000, and imports of Japanese toys at over \$26,000, very small quantities coming from Holland, Belgium, Switzerland, Italy and China. For the fiscal year ending March 31, 1916, Canada imported only \$642,190 worth of toys, as compared with \$1,037,000 for the fiscal year before the war began. The toys imported from the United States for the fiscal year 1916 were valued at \$476,581, a very large proportion of the whole. From the United Kingdom Canada imported toys to the value of \$76,772, while toys from France were valued at \$27,339 and toys from Japan at \$66,965. In a normal year it requires considerably over a million dollars worth of toys at manufacturers' prices to satisfy the demands of the Canadian market. The cost to the consumers is much greater.

At a meeting of the executive council of the Canadian Bankers' Association, it was decided to suggest to the larger teaching institutions of the country the advisability of giving special attention to tuition in the Spanish language in view of the prospects of closer trade relations with the South American republics after the war. In this connection it may be noted that a correspondence course in commercial and banking Spanish will be instituted in connection with the banking courses this autumn.

LONDON FORGING AHEAD

That London, Ontario, has had a wonderful record of continued prosperity during the past few years, which has been maintained since the war started, is the information contained in a statement to *The Monetary Times* by Mr. Gordon Philip, secretary of the local board of trade. The population has increased from 56,358 in 1915 to 58,055 in 1916. In 1891, the population was 31,240. The post office revenue a year ago was \$221,911. The annual receipts at the customs port of London during the past few years show a substantial growth and now amount to over \$1,100,000. The bank clearings of the city last year were \$89,774,787.

London is an important manufacturing centre. As Mr. Philip says: "The logical location for a Canadian branch factory would be some point at which the following requirements are combined: First, a city of sufficient size so that an adequate labor supply is available at all times; second, superior railway facilities, so that the manufactured product may be shipped readily throughout the Dominion; third, the place at which raw material and fuel can be most economically assembled. These three essentials of profitable manufacturing are combined at London—the commercial centre of the western Ontario peninsula."

One of the latest industrial newcomers to London is the H. S. Hall Company of Jersey City. This firm, which has six factories in the United States, has leased temporary premises at London and will build a \$25,000 factory next spring. They are manufacturers of lisle and chamissette gloves and will weave the fabric at their new factory there. At first the company will employ from 50 to 75 persons, but expect to reach 125 in a year when the new factory will be built. The Toronto representative of the H. S. Hall firm, Mr. Charles Phillips, states that London was chosen chiefly because of its ability to supply sufficient labor.

The Dominion Copper Products Company, Limited, with Dominion charter, has increased its capital stock from \$400,000 to \$1,000,000.

British Credit Stands Unimpaired

STERLING in New York Has Been Maintained This Year at About \$4.76½, While History of the German Mark Has Been "Pitiable"—If War Ends Next March, There Will Be Sufficient Money to Provide for Peace Settlement—Extra Taxes Will Be Reduced Immediately War is Ended.

GRATIFICATION has been caused throughout the British Empire by the statement recently made by the Right Hon. Reginald McKenna, chancellor of the exchequer, regarding the financial condition of Great Britain, and his declaration that no matter how long the war may last, Great Britain will be able to maintain her credit to the end.

The importance of such a statement at the end of two years of a gigantic struggle, in which money plays not the least important part, cannot be over-estimated, it is felt in London, and special value, therefore, attaches to the following interview accorded to press correspondents in London by the chancellor of the exchequer, who completes the survey which he presented to parliament.

Chancellor McKenna began by recalling the facts of Great Britain's financial mobilization. He said:—

"It is by comparison with the past that we can best realize the magnitude of the problem with which Great Britain is faced to-day, as you know our present expenditure is at the rate of about \$25,000,000 a day, or about \$9,125,000,000 a year. All that was spent by us during the many years of revolutionary and Napoleonic wars would not suffice for six months of the present struggle.

"Our last war in the South African campaign cost us \$1,250,000,000 and lasted two and one-half years. To-day this sum would be used up in less than two months.

"The civil war in the United States was particularly costly, but the \$3,330,000,000 which historians say was spent by the Northern States during those four years is equal to little more than four months of our present expenditure, yet these enormous figures are not out of proportion to our task.

"We have kept the seas of the world open for ourselves and our allies. We closed them to our enemies. An army so small as to be thought negligible at the beginning of the war has been expanded in less than two years into a force competing in size and equipment with those vast continental armies which had taken generations to build up.

"We converted industrial England into one great naval and military workshop. It is due to say that without the patriotism and self-sacrifice of those who are fighting and working for us finance alone would have been helpless; but, on the other hand, without the support of our wealth, even this unparalleled outburst of enthusiasm could have accomplished little. Our army is fighting overseas and as a result its maintenance is far more costly

than that of any other. Our industrial organization was less designed for war purposes than that of any other of the great belligerents, and its conversion has been relatively more costly; nor have our financial resources been used for ourselves alone. Our allies have looked to us for help, and we have gladly given it, but this is no light service, for we are making loans to them and to our own dominions at a rate exceeding a million pounds a day.

"When you remember that our national expenditure before the war had just reached a figure of \$1,000,000,000 a year, you will realize the enormous revolution that must be taking place in the life of every individual when the nation was asked to meet nearly ten times this sum. It has involved a mobilization of financial resources not only unequalled but hitherto unimagined in history by any country. It has been a British tradition to meet the cost of war as far as possible by taxation, and we maintained that policy even in this unprecedented struggle.

"Out of a total expenditure for the current year of \$9,125,000,000 no less than \$2,500,000,000 being met by taxation, we have increased certain indirect taxes on tobacco, tea, sugar, etc., and we have introduced new ones on matches, table waters, entertainments, etc., but our heaviest demands have been made through direct taxes, our citizens to-day paying in an income tax from slightly under 1 per cent. when their incomes are very small, up to over 41½ per cent. when their incomes are very large. Before the war they paid two-fifths of 1 per cent. on very small incomes to 13 per cent. on very large incomes. Finally, we have accomplished that from any increase in profits earned during the war 60 per cent. shall be surrendered to the State.

"Our position is so sound that if we were to end the war at the end of the current financial year, that is to say on March 31, 1917, our present scale of taxation would provide not only for the whole of our peace expenditure and the interest on the whole national debt, but also for a sinking fund calculated to redeem that debt in less than forty years, and there would still remain a surplus sufficient to allow me to abolish the excess profits tax and to reduce other taxes considerably.

"I may perhaps be allowed to explain this more precisely: Our total revenue for the current year is estimated at \$2,545,000,000. Our expenditure in the last full year of peace was about \$1,000,000,000. To arrive at an estimate of an after-the-war expenditure on the assumption

that it is over by next March, we must add another \$590,000,000 for interest and the sinking fund on the new debt, together with a further sum of about \$100,000,000 for pensions, making a total yearly expenditure of about \$1,690,000,000. The surplus on the existing taxation is, as you see, \$855,000,000, leaving after the withdrawal of \$430,000,000 received from the excess profits tax a margin of \$425,000,000.

"The taxes are the financial contribution toward the war which every citizen is forced to make, and our revenue from these sources is equal to between one-quarter and one-third our total expenditure. For the rest we must rely on the voluntary effort of individuals on loans, and we have not been disappointed. We have appealed to the country at different times and in different ways, and on each occasion we have been more than satisfied with the result. From the beginning of the war we have obtained and are continuing to obtain large sums through sales of treasury bills. These sums represent in part the contributions from the money market in its narrower sense, and in part a definite investment.

"Our first war loan, in November, 1914, did not appeal further than to the moderately large investor. With the second war loan, in July, 1915, we decided on a more general mobilization of savings and in order to bring this about we introduced a complete innovation in our financial history. It was arranged that subscriptions to the new loan could be made through the post-office for amounts as low as \$25, and further that even these small subscriptions could be paid in five instalments. For the first time the workingman was invited to take a direct share in financing the country other than through taxation. In the past the Briton had shown no strong inclination toward thrift, and there were many who doubted the possibility of any sudden change, but the last twelve months have proved we were right.

"The same impulse which brought our young men flocking to the colors and made possible our army of to-day, is now at work for the mobilization of our wealth. Among all classes the war savings campaign, which was started at the time of the second war loan, has grown so rapidly in extent and intensity that every one to-day realizes not only the duty of fighting, if that is possible, but the further duty of contributing as large a share as is possible to the financial resources of the State and reducing personal expenditures to a minimum. Economy lectures and economy exhibitions have combined to drive home this new truth to every class, and already to-day there are some 5,000 war savings associations affiliated with the National War Savings Committee.

"In every part of the country the new form of investment has been introduced, making it possible for the humblest to 'do his bit.' In every post-office can be bought 15s. 6d. war savings certificates, which entitles the holder to receive £1 in five years' time. Subscriptions to these certificates can be made in 6d. stamps, a facility which has allowed even school children to play their part, and to which they have responded with enthusiasm. From the end of February to July 29 17,500,000 of these war savings certificates had been sold. A further investment now open is the 5 per cent. exchequer bond, in denomination of \$25, \$100 and \$250, sold through the post-office. Since its introduction, in the middle of January, \$14,000,000 has been received from this source alone, and these results represent real savings by small investors, not mere withdrawals from savings banks, although from the beginning of the war to the end of July, 1916, small investors had lent for the use of the State through savings banks, through the post-office 4½ per cent. war loan issue, and through the post-office exchequer bonds and

war savings certificates, an aggregate of not more than \$400,000,000. They are now lending more than \$40,000,000 a month and at a steadily increasing rate.

"Another side to the mobilization of our financial resources is the restriction of consumption. This, too, is in part compulsory, in part voluntary. We have found it necessary to prohibit certain imports and restrict others. High prices again have done something toward keeping down the consumption of many articles, but much more is due to the realization by the individual that it is his duty to limit his own demands, and in this way to set free all possible goods and services for use of the State. Here, too, the economy campaign has done good work, and lectures and exhibitions have spread the knowledge of a new domestic economy.

"This campaign was necessary for several reasons. Now that he has realized the need for economy, the Englishman is saving with energy and goodwill, but England in the past was not a thrifty country, and it was clear that unless this need of saving was forcibly impressed upon our people their earlier habits might involve us in unpleasant consequences. Money spent on what in normal times would be regarded perhaps as a harmless luxury means diversion of goods and services from the use of the State, and it is now being recognized that extravagance and waste are unpatriotic.

"Fortunately, unemployment is almost unknown, many trades enjoying high wages. These conditions have enabled the working classes to take their share in financing the war." Chancellor McKenna then spoke of "another side to our financial mobilization."

"It is one of the great surprises of the war," he said, "that in spite of the diversion of almost all our manhood into the army or into other war work we have been able to maintain our exports at their present high level. For several months ended in July our trading exports were £350,000,000 (\$1,750,000,000) in values, not quite £17,000,000 (\$85,000,000) less than for the corresponding period of 1914. Even allowing for the present higher range of prices, this result has been achieved only through the determination of all who are not fighting, both men and women alike, to work as they never worked before. The energy of our munition workers and their willingness to give up holidays of every kind is well known, but this zeal has found a counterpart in almost every industry and trade in the country.

"Great as it is, however, this effort has not been sufficient to meet the large claims made on us from abroad for payment for the goods purchased on our own account and on account of our allies, and we have been forced to fall back on past savings. This is not surprising when it is remembered that our expenditure from the outbreak of the war to the present time has been something over £2,600,000,000 (\$13,000,000,000). The most easily realizable part of our past savings is our holdings of American securities and foreign securities generally, which are now being mobilized. With this side of our war finance America is more familiar than with any other. The individual has been asked to sell or lend his United States securities for the use of the government and an additional tax has been imposed on securities which the government is willing to buy or borrow.

"The principle of the tax is a fair one. It would be unjust when so many have willingly offered their securities that those who hold back should not contribute their share, but the tax is hardly penal and has primarily served as a reminder to those who have been far too busy on the work before them to pay attention to earlier appeals.

"You would like to know what is the amount of United States securities, of which we obtained control,

and I wish I could tell you, but I fear that I must stop short of the actual figures and content myself with saying that the aggregate is extremely satisfactory and has relieved me of all fears in regard to the problem of providing exchange to meet our expenses in the United States.

"During the whole of the year we have kept sterling in New York at about \$4.76½, and I have every hope that we shall continue to maintain this rate. In comparison with this the history of the mark has been pitiable. It has fallen lower and lower in a series of meaningless fluctuations, which no efforts of the German government have been able to prevent, and it now stands at a discount of not far short of 25 per cent.

"If peace comes after another eight months of war Great Britain, as I have said, will not only be able to meet its normal peace expenditure, together with pensions and interest and sinking fund on the war debt, but will also be in a position to reduce considerably its present taxation.

"Germany, to make both ends meet after the war, will have to raise about double the amount of its present taxation—a task which even the Germans themselves ap-

pear to think is hardly to be accomplished without something very like a revolution. Until recently our enemies talked of meeting this huge expenditure by war indemnities, but on this point they have now become more reticent.

"I have every reason to be satisfied," said the chancellor in conclusion. "The revolution in our daily life which has been forced upon us by the war has been carried through more smoothly than the most confirmed optimist could have thought possible. I will not speak of what has been done by our army and navy, but I can assure you that the same spirit moves them both in bringing about that financial mobilization of which I have spoken. Taxation unparalleled in the history of any nation has been borne without complaint; indeed, I can say with enthusiasm that we have learned to work harder. We have learned to do without, not because we cannot get what we want, as is the case with Germany, but voluntarily, because we see that our cause demands it. (I know no truer test of patriotism) and we have learned to save as we, as a nation, have never saved before."

AMERICAN LOAN TO BRITAIN

Amount Will Be \$250,000,000 2-Year 5 Per Cent. Notes at 99—Details of Issue Made Public

Details of the second large United States loan to Great Britain were made known on Wednesday, when J. P. Morgan and Company made public copies of a syndicate letter containing the terms on which \$250,000,000 will be supplied on two-year notes. Details are substantially as announced in earlier statements on page 30 of this issue of *The Monetary Times*.

The notes are to bear interest at 5 per cent., and, like those recently placed here by France, are to be fully secured by collateral, with a margin of 2 per cent. in value over the sum advanced. Unlike the French loan, however, the notes are to be a direct obligation of Great Britain. The notes will be dated September 1, and will mature two years later, but, at the option of the government, they may be redeemed in whole or in part on 30 days' notice on any day before maturity at 101 and interest for the first year, or at 100½ and interest during the second year. Both interest and principal are payable in New York, in United States gold coin, without deduction for any British taxes.

Small Syndicate Concerned.

The syndicate underwriting the issue is considerably smaller than that which brought out the recent offering of \$100,000,000 of French notes, and it will be terminated October 1, or earlier. The bankers signing the syndicate letter are: J. P. Morgan and Company, the First National Bank, the National City Bank, William A. Read and Company, Harris, Forbes and Company, Lee, Higginson and Company, Kidder, Peabody and Company, Brown Brothers and Company, Guaranty Trust Company, Bankers' Trust Company, Farmers' Loan and Trust Company, Central Trust Company, of Illinois, Chicago, and Union Trust Company, of Pittsburg.

Deposited Securities.

The deposited securities will consist of three groups of \$100,000,000 each. The first will be made up of stocks, bonds, and other securities of United States corporations; the second of bonds or other obligations of Canada, either as maker or guarantor, and stocks, bonds and other securities of the Canadian Pacific Railway; and the third of bonds or other obligations of Argentina, Chili, Norway, Sweden, Switzerland, Denmark and Holland.

The proceeds of the loan will all be expended in the United States, and will be used in part to take up maturing short-term loans. The notes will be offered next week at 99, the syndicate members receiving them at 98.

Agricultural conditions are favorable in New Brunswick, and large crops are anticipated. The harvesting of the hay crop, which is large, is proceeding.

LIFE UNDERWRITERS' MEETINGS

Mr. J. Burt Morgan, Victoria, B.C., president of the Canadian Life Underwriters' Association, stated at Edmonton that the importance of life insurance to the people generally, justified the proposal to include in every university and high school, and even in the common school curriculum, some instruction, either in the form of lectures or through text books, on this subject. It was deplorable that so many men in business and professional life failed entirely to have any knowledge of principles or practice of life insurance. He had interviewed some of the university presidents on this question and intended to see the head of every university in Canada and urge upon them the necessity for education along this line.

The present membership of the Dominion association is about 1,000, and Mr. Morgan's ambition is during his term of office to increase it to 2,000 members.

In Alberta, Mr. George H. Page, manager for Alberta of the New York Life, has moved to Los Angeles, and Mr. F. B. Summers, at Edmonton, has been promoted to the position.

Mr. F. E. Pegler, of the Manufacturers' Life, is acting as president of the Alberta Underwriters' Association in place of Mr. Page.

Mr. D. M. Le Bourdais of the Imperial Life field force has been appointed secretary of the association for the ensuing year.

One of the outstanding impressions created in the minds of his Calgary hearers by Mr. Bastedo, superintendent of the Dominion government annuities department, was the indispensable nature of the work done by the life insurance agent in placing insurance. There is no doubt that the forms of insurance offered by the Dominion government to the public in the shape of annuities and to the civil servants in the shape of civil service insurance, is supplied at rates that cannot be touched by the private companies, but in spite of low rates and other favorable provisions, only a small portion of those to whom it is offered have availed themselves of the opportunity.

It seems to require the intervention of the agent in order to induce the average person to provide for the future.

The Quebec Life Underwriters' Association recently held a Diner-Causerie. The proposers on the toast list were Messrs. Antoine Lesage, J. S. Martineau, O. Morin, J. T. Chenard, A. Lemieux, and M. Monaghan.

The Canadian Trade Commission, which has been conducting a campaign in the interests of Canadian business, has carried out its mission most successfully. It was announced last week that 1,700 forms have been filled in by British manufacturers and merchants, who pledged themselves to purchase from and sell to Canadian houses the goods which were formerly purchased from and sold to enemy countries.

LIFE INSURANCE VOLUME SATISFACTORY

Business is Being Maintained—Canadians Are Underinsured—Views of Mr. H. C. Cox

That the volume of life insurance being written by the companies in Canada, generally, is satisfactory, was the statement made by Mr. H. C. Cox, president of the Canada Life Insurance Company, Toronto, in an interview with *The Monetary Times*. Mr. Cox, who is in a position to feel the pulse of the life insurance business, added that the manner in which the volume of business is being maintained, despite adverse circumstances, is remarkable. His own company, for example, had written new business to date this year 25 per cent. ahead of the corresponding period of 1915. Their Detroit agency, in charge of Mr. Zacharias, had written \$1,000,000 of new business this year to the end of July.

"Many of the best insurance risks, the young men of the country and physically fit, have left for the front," said Mr. Cox, "but we find the substantial business men are inclined to take more insurance. Farmers throughout the country are in good financial condition as a result of bountiful crops and the high prices they are receiving for their products. Considerable life insurance is being placed with them. It is sometimes difficult to convince the farmer of the benefits of insurance, but when he realizes the need for life insurance and pays his first premium, he seldom drops his policy."

Canadians are Underinsured.

Mr. Cox is thoroughly convinced that Canadians are very much underinsured. This point he made clear in addressing the shareholders at the last annual meeting of his company. "Surely," he said then, "every man left at home is worth to his dependants the sum which Canada is paying to have him and them protected. This would suggest the insuring of this great human asset for the enormous sum of three thousand millions of dollars, while we have at present in force a little more than one thousand millions, covering only about one-sixth of those who could, and should, avail themselves of the service and help of life assurance. It is therefore obvious that our people are seriously underinsured, a matter of import to all of us since the lack of such protection as the insurance companies afford tends to increase the possibility of her citizens becoming a charge upon the state."

Taxing of Foreign Bonds.

Discussing the government's suggestion to tax foreign securities held in Canada, Mr. Cox stated that these securities should not have been bought here, as such purchases defeated the objects for which the loans were made in the United States. The Canada Life, like many other insurance companies, holds a small block of Anglo-French bonds, but these were purchased prior to the semi-official announcement from Ottawa as to the institution of a tax on such securities. At the same time, he pointed out that the life insurance companies had taken large blocks of the first Canadian war loan and were preparing to do the same in regard to the second loan next month.

Mr. Cox is leaving next week on a business trip to the prairie provinces and to British Columbia. His heavy responsibilities and duties have prevented him from making this trip for about two years. As he believes that every Canadian business man should be thoroughly posted in regard to his own country's position and development, he has made a special effort to arrange his business affairs so as to take the trip at the present time.

NEW TORONTO BOND FIRM

Mr. R. A. Daly, who for some years has been in charge of the investment department of the Bank of Nova Scotia, is entering the bond business, and the new firm of Messrs. R. A. Daly and Company have opened offices in the Bank of Nova Scotia Building, 38 Melinda Street, Toronto. Mr. Daly graduated from the University of Toronto in 1906, and entered the Crown Bank where he remained for a little over a year. He then took Master's degree at the Wharton School of Finance in the University of Pennsylvania, and since that time has been associated with the Bank of Nova Scotia in their Toronto and New York offices, and in recent years in charge of the bank's investment department at Toronto.

CLEARING HOUSE RETURNS

The following are the returns of the bank clearing houses for weeks ended August 10th, 1916, and August 12th, 1915, with changes:—

	Week ended Aug. 10, '16.	Week ended Aug. 12, '15.	Changes.
Montreal	\$ 61,621,428	\$ 54,975,632	+ \$ 6,645,796

MANITOBA'S GOLD FIELDS

In the Rice Lake district of Manitoba, there is gold. How much and the grade of ore are matters which have not been determined as yet. Prospecting and development work cannot be done to any extent just now as the worst sort of mosquito is in control of the district. In the meantime, the mosquito of Rice Lake does not bother the speculator and the professional mining optimist of Winnipeg. To those men, the Rice Lake region is merely "the greatest gold mining camp in the world." But practically the only reliable report of the neighboring gold fields of Winnipeg is that of Professor R. C. Wallace of the department of geology at the University of Manitoba. In his report to the provincial public utilities commission, he expresses the fear that real development will be hampered by the action of speculators, who have indiscriminately taken up a large number of claims for promotion purposes, and are to that extent blocking the work of real prospectors. The district, he notes, is still a prospect camp in early stages of development. There is nothing as yet actually to indicate that there will be any very large mines in the district. Several successful mines may, however, develop on a smaller scale—and the district may prove a valuable asset to the province. The best opportunities appear to be in the central granite or in the porphyry near the contact with the granite. The quartz veins are somewhat larger in the granite than in the porphyry, but on account of the origin of the gold and associated rock, values may be found to be more persistent in depth in the porphyry. In any case, it is essential to the ultimate welfare of the district that development proceed along sound lines, and that a sufficiently clear idea of pay values in lateral extension and in depth be obtained before any attempt be made to instal expensive milling machinery.

In short, the Rice Lake camp is in the experimental stage. That fact should be borne in mind by the small investor who can well afford to depend for information upon such authorities as Professor Wallace and the provincial utilities commission.

CONSCRIPTION OF WEALTH

Labor, as represented and sometimes misled by well-paid and shrewd labor leaders, still has a tendency to regard capital as an opponent. The story of capital *versus* labor is an old one, with the most obvious fact overlooked that the more tolerant and helpful each is of and to the other, the better is it for both. Wealth, which after all is created by, and distributed to both labor and capital, seems to act as the traditional red rag to labor. A deputation of the trade union congress waited upon Premier Asquith this month in regard to the possibility of lessening the price of food and the deputation suggested that wealth should be conscripted. The premier cited some facts that show that wealth as an aid to war is not being overlooked. He pointed out that whereas an income of £500 before the war paid £13 income tax, it now paid £51 tax. The tax on an income of £1,000, he said, had risen from £38 to £139, and on an income of £5,000, from £292 to £1,502. The premier said he did not think any other country was imposing anything comparable to these contributions from the well-to-do classes, "and I do not know that the process has yet come to an end," he added.

A British peer, a banker, discussing the increased taxation in England, recently said: "The government is taking a big share of our profits and of our income. They can have it all to help finish the war, so long as they leave us enough for bread and butter." That is actually the spirit predominating in both the British laborer and the British peer.

NICKEL

The people of Canada wish that Sir Oliver Mowat had been successful in his endeavors as far back as 1891, to have the British admiralty acquire control of the Ontario nickel deposits. There is a conviction in the minds even of a great number of those men who represent capital, that a national asset so vastly important as is nickel, and about 90 per cent. of the world's supply of which is in the soil of the British Empire, should be controlled and operated by the British Empire, preferably by our own governments. It would be good business. Only now do we fully realize the part which nickel plays in the nation's lives.

But the capital invested in the nickel industry must have fair treatment. There must not be confiscation without adequate compensation. It is not unreasonable to suppose that our governments could make a purchase arrangement satisfactory to the nickel interests, to the nation and to the Empire. While the financing of such a deal presents difficulties in war times, it may properly be regarded as a war measure and the financing might be accomplished jointly by the governments directly concerned. The war is changing the stereotyped views of old, and for substantial reasons. What may have appeared a comparatively unimportant question in the days of Mowat is a vital matter in the days of Borden, Hearst and Asquith. It is fair to assume that the nation will be at the back of our governments in any comprehensive nickel policy they can frame for the benefit of the British Empire, an empire whose eyes have been opened to the grip which Germany has had of things we thought we owned. The measures by which it is now proposed to deal with this question are a step in the right direction but not sufficiently far-reaching.

TAMPERING WITH MORTGAGE SECURITY

If the security of first mortgages on farm lands is tampered with, capital is made more timid and the farmer ultimately suffers. *The Monetary Times* has endeavored to make this plain for many years past and has given actual examples of the harm which has been done by unwise legislation affecting mortgages. It is gratifying to have in this connection the support of the Grain Growers' Guide, a paper representing the organized farmers of the West. Discussing in a recent issue the recent conference in Winnipeg between mortgage company representatives and the Canadian Council of Agriculture, of the prairie provinces, that journal says: "There was a general agreement that all legislation prejudicially affecting the security of a first mortgage on farm lands should be discouraged because it is absolutely certain to react and throw an extra burden on the farmers in higher costs and higher rates of interest. From this standpoint the seed grain advanced by the Federal government in 1915 will make more trouble for farmers and mortgage companies than all other legislation combined and it will be a very serious problem to adjust the matter satisfactorily. Now, however, that both the farmers and the mortgage companies are fully alive to the seriousness of these matters it is probable that similar legislation, both provincial and federal by both political parties, will be far less common."

As soon as borrowers generally realize that legislation which injures the security of first mortgages, reacts upon them, we may, perhaps, expect more foresight on the part of certain legislators.

KAISER IN SASKATCHEWAN

After two years of war the post office department has changed the name of a Saskatchewan post office from "Kaiser" to "Peebles." *The Monetary Times* suggested to the Saskatchewan government over a year ago that the name of the village of Kaiser in that province should be changed.

MINING IN BRITISH COLUMBIA

That Americans are more experienced than Canadians in the conduct of the mining industry, is the statement made by the Hon. Lorne A. Campbell, minister of mines of British Columbia. "Our mining area," he stated in an interview with the Victoria press, "in British Columbia is greater than the total mineral area of the United States and Mexico combined—and, it is believed, quite as rich. Previous to the war the United States was a borrowing nation. Great Britain is not, of course, lending us money for the present. Therefore, if we want money for mining development or for anything else at the present time we must make our borrowings in New York."

"I am glad to say that United States capital is coming into British Columbia in ever-increasing quantities for the development of our mines, and with it desirable United States mining men with years of experience behind them are coming in to lend us of their skill and their ability in the direction of expenditure of that money. This country was a great mining country once, and she has become a great mining country again. In every place where men meet in British Columbia one notices the increasing number of mining men from all over the earth to look into prospects and to invest money here. But our mineral wealth is of little use to us without men and money to develop it. Anyone who expects to secure capital for the development of British Columbia mines anywhere else until after the war than in the United States, if given charge of the administration of the country, will carry forward little development of our national resources."

CONFISCATION WITHOUT COMPENSATION

British countries have enjoyed a remarkable record in regard to the fair treatment of capital. In Canada in recent years, however, there has arisen a tendency to override even the most common rights of invested capital. This factor has appeared both in the East and in the West. Moratorium laws have been enacted months after the war crisis had passed, despite the fact that a moratorium is an emergency measure only. The rights of lenders have been flouted by unfair legislation, hastily passed, especially in Western Canada. Prohibition bills are becoming law in one province after another, and while *The Monetary Times* is in sympathy with the prohibition movement, it is also in sympathy with the principle of compensation. Governments cannot with advantage to themselves or to the people they represent, disregard altogether the rights of capital which they have in the past cordially invited to invest here.

Many millions of British capital have been placed in British Columbia. In the British Columbia Breweries, for instance, there is \$2,500,000 of British capital, the company having sold that amount of bonds in London in 1912. Interested parties were then given definitely to understand that any money invested in the brewing business of the province would be safeguarded by the government as to compensation. The new act, however, makes no provision whatever for compensation.

Victims of Freak Legislation.

Commenting upon this, the London Financier says that "even the most cursory consideration of the question will show that the British Columbia government, in passing such an act and submitting it to the electorate for approval, has not only been unjust to the liquor trade but has very thoughtlessly injured the fair fame of the province, if not of the whole Dominion. It goes without saying that if prohibition without compensation comes into force and investors in such enterprises as the British Columbia Breweries lose the whole of their capital the credit of British Columbia in the London market will be irreparably injured. People will no longer invest money in a country in which legislation of a confiscatory character has been initiated by the government and endorsed by the electors. They expect, especially in a British colony, reasonable security and protection for their capital, and if, as in this instance, they are to be made the victims of freak legislation and fanaticism, disguised as social reform, they will become suspicious of British Columbian investments and give them perhaps a deservedly wide berth. There is no desire among British investors to interfere in the domestic affairs of any of our overseas possessions. If the people of British Columbia want prohibition, by all means let them have it; but let it be prohibition based on principles of justice and equity, and providing for adequate compensation to all who stand to suffer financial loss through its operation, and not a scheme involving spoliation of the most dangerous and ruthless type."

Savors of Animus.

That is but typical of the comment which is heard in investment circles in London just now. The London Financial Times says this: "It would be well if English investors in the British Columbia Breweries took prompt and energetic action to protect their interests. It is also necessary that the government of the province should be made aware that English capital would hence-

forward hesitate to invest in British Columbian securities if adequate compensation were withheld in this instance, and that the credit of the province would be seriously impaired in this market. It would be deplorable if, just when there is an ardent desire for closer unity and co-operation, the reproach of confiscation without compensation were incurred by any self-governing unit of the British Empire, especially if that unit were British Columbia, which has been, and will be again, largely dependent upon English capital for its development.

"The question of compensation is entirely apart from any consideration of the wisdom or folly of a total prohibition policy per se, though that has been fraught with serious consequences in American States which have gone dry. But it is certainly anomalous that, while the existing Bowser Act is treated thus early in its operation as a scrap of paper where licensed interests are concerned, the new act that dispossesses those interests still appears to permit the importation and sale of liquor through what may be called underground channels. The procedure, in short, savors of animus, and not solely of zeal for the public interests. Still, it is hard to believe that the extremists will be permitted to expunge \$2,500,000 of invested British capital without equivalent compensation. It is equally hard to believe that the people of British Columbia, if they understood the facts of the particular case, would be parties to such expropriation, or that the government, with, presumably, full knowledge of its shattering effect on the credit of the province, would sanction the injustice.

"Imagine what an outcry would arise if the position were reversed and British Columbia investors with a stake of over two million dollars in an English industrial undertaking found that our government had decided to eliminate the whole industry it had hitherto recognized and taxed, treating it as outside the moral law and entitled to no compensation? If the government and people of British Columbia consider the case from that point of view they must surely see the grievous wrong that would be inflicted on English investors in British Columbia Breweries if, in the event of the prohibition act coming into force, restitution of capital were withheld. They should also see that their own true interests involved the fair treatment of British investors."

Ontario's Policy.

There has been disregard for the rights of capital in Ontario also in connection with the provincial government's hydro-electric policy. While objection to public ownership and government operation is not urged here, capital which has been encouraged by governments to invest in this country should be accorded proper treatment. Whenever the Ontario government discovers that invested capital stands in the light of its high ambitions, the legislature passes an act to remove the shadow. Capital may be willing to accept public ownership as a competitor, but it has a right to expect that legislatures will not use as a bludgeon the powers which the people give them. The Electrical Development Company has been refused a fiat permitting the company the right to sue in the courts for a declaration that the erection of a power plant at Niagara Falls constitutes a violation of the agreement between the province and the company. The company, it is understood, will appeal to the Dominion government to disallow the act authorizing this hydro development at Niagara Falls.

These are but two examples of many which are beginning to have a serious effect on the regard of the British and foreign investor for Canada as a field for investment.

RETROACTIVE TAX ON NICKEL PROFITS

Ontario's Minister of Mines Says There Will Be One— Nickel Output Closely Guarded

Speaking at a political meeting in Toronto, this week, Hon. G. Howard Ferguson, minister of lands and mines, stated that a retroactive tax is to be placed upon the profits of the International Nickel Company. "At present," Mr. Ferguson is reported as saying, "the nickel commission (comprising representatives of the Imperial and Ontario governments) are dealing with that question, and I can say this to you, without disclosing improperly any information as to what the commission are doing, that we are pretty well satisfied we have got an improved and equitable method to meet the whole mining situation, with a better tax in the future. So far as the nickel situation is concerned, when legislation is brought down making a new tax next winter that legislation will say that, so far as International Nickel is concerned, it will be retroactive, just as Sir Thomas White's war taxes were retroactive, and we will get a fair share of the profits."

Only 4 Per Cent. German.

With reference to the statement that 25 per cent. of the stock of the International Nickel Company was in the hands of the Krupps of Germany, Mr. Ferguson said he was prepared to show that not only not 25 per cent., but not 4 per cent. of the stock of the International Nickel Company was held by any German or Austrian. He said that practically every acre of valuable nickel Ontario possessed was given away to private corporations by the Liberal Administration, whereas the present government, since it came into power, had not given one solitary acre of its nickel lands to any other than the private prospector. Hon. Mr. Ferguson referred to the discovery in the province of a successful commercial process for the refining of Ontario ores, and said that, as a result of the nickel commission and the chemists and metallurgists who worked with them, they had to-day both the large companies coming to the government and saying: "We are prepared to come into the province of Ontario and refine our nickel." Mr. Ferguson added: "We are to-day negotiating with them for the development of power for this very purpose."

Embargo on Nickel.

Regarding the talk about an embargo on nickel, Mr. Ferguson declared the allies at one time in this war were largely dependent on the munition factories in the United States for supplies. The British Empire undertook to make contracts with firms in the United States, and with reference to nickel the British government practically took charge of the operations of the International Nickel Company and they are operating that to-day.

"Not one ton of nickel," declared Mr. Ferguson, "goes out of the refinery the order for which is not submitted to the British Admiralty and approved before it is sent out. Not one ton of nickel matte goes out of this country except by license of the Dominion government, whereby it can be traced to its ultimate end, where it is turned out in the form of munition supply."

Regarding the supplies on board the Deutschland, Mr. Ferguson said "the Dominion and provincial governments to-day know just how much nickel there was on the Deutschland, just where it came from, what its source was, and we know it never came from the International Nickel Company."

"I challenge any man in the Dominion of Canada to put his finger on one tittle of evidence that nickel has been getting to the enemy through International Nickel channels," he concluded.

CANADA'S PROGRESS REVIEWED

For fifteen years the Canadian Annual Review has furnished in one volume a useful and educative survey of public affairs in the Dominion. The latest issue is divided into these sections: The World War; British Empire in Action; Canada and the War; Canadians at the Front; United States and the War. Its contents are varied and interesting.

GREAT BRITAIN'S BLACKLIST

Firms in Brazil With Whom British Citizens Should Not Trade

Clippings of the blacklists now being published in *The Monetary Times* should be filed for reference. The publication in this paper was the first publication in Canada of the complete, correct and official lists. All Morocco, Portuguese East Africa and Persia firms are blacklisted. Eighty-five United States firms and individuals are blacklisted, the names and addresses being published in full in *The Monetary Times* of August 4th. The Argentina and Uruguay list, containing many names, appeared in our last week's issue. The Brazil blacklist follows:—

BRAZIL.

Achim & Company, Joinville, Sta. Catharina.
Ahrns, Edouardo, Rua Dos Albigebes, Bahia.
Albuquerque, Antonio de, Para.
Arp & Company, Rua do Onvidor, 102, Rio de Janeiro.

BRITISH COLUMBIA HAS STATE INSURANCE

Arbitrarily eliminating the privilege of employers to insure with accident and liability insurance companies and adopting state insurance, British Columbia is now preparing to put its workmen's compensation act in force. It is not, therefore, surprising to find Mr. F. W. Ilinsdale, the expert employed to put the act in operation, saying in an interview on the Pacific coast:—

"In most states and provinces there is some type of workmen's compensation in force, but undoubtedly those of Washington Oregon, Ohio, Ontario, Nova Scotia and British Columbia are in a class by themselves. In most of the others the laws provide for the operation of a state fund, but the choice has been left to employers to carry insurance with liability insurance companies. The result has been very much to the disadvantage of the state fund in that the overhead charges for the expense of operating the fund is virtually the same, though only a portion of the business is being done."

CANADIAN PACIFIC RAILWAY'S GOOD REPORT

Will Company Pay the Business Profits War Tax?—
Special War Work

The Canadian Pacific Railway earned 16.76 per cent. on its \$260,000,000 of common stock during the company's fiscal year ended June 30th. This compares with 11.25 per cent. in the previous year, and with 19 per cent. in the record year of 1912-13. The table at the foot of the page gives the figures for the past year, as presented at the meeting of the company's directors at Montreal on Monday.

In comparing results, it must be borne in mind that since 1912 there have been large increases in common stock capitalization. That, for example, explains the fact that, despite the gain in the actual balance available for dividends, the percentage earnings of 16.76 on the common stock for the past year compare with more than 19 per cent. earned in the 1912-13 period.

Some Record Figures.

After making provision for all charges and deductions, including pension fund and preference stock dividends, the balance available from all sources for distribution on the common shares was \$43,585,113 compared with a corresponding balance of \$39,128,223 in the record year of 1912-13, an increase of \$4,456,890, or more than 11 per cent. As compared with 1914-15, the gain is \$14,325,866, or approximately 50 per cent.

The special income account last year totalled \$9,940,955, or about \$1,000,000 lower than in the previous year. The past year's figures, however, appear in the statement with the note "after making allowance for contingent reserves." What appropriations come under this heading and their amount are matters which will probably be revealed in the complete report for the year, which will be presented at the company's annual meeting in October.

What About War Tax on Profits?

No provision has been made in the income account for any payment under the Dominion war profits tax. The question of the company's liability under the new taxation act, has been discussed, although official statements on the matter have not been issued by either Sir Thomas White, finance minister, or by Lord Shaughnessy, president of the

railroad. The appropriation for contingent reserves may possibly include contingent liabilities in regard to the tax. Supposing that the company is liable for the tax, still it cannot be stated definitely whether the company will be allowed to earn 7 per cent. on both its preference and common stocks, or only on the common before its profits are subject to the 25 per cent. tax, and, further, whether the profits of the system or only those from railway operation are to be taxed. If the extreme case is taken—namely, that a profit equal to 7 per cent. on the common stock only, is to be free of tax, and that the tax is applicable to the profits of the entire system, the position may be tabulated as follows:—

Profits	\$49,225,000
Less tax-free profit of 7 per cent. on common	18,200,000
Net taxable profit	\$31,025,000
Less 25 per cent. of taxable profit	7,756,250
Balance, equal to 8.94 per cent. on common stock	\$23,268,750
Extra 3 per cent. on common, making total dividend of 10 per cent.	7,800,000
Balance, equal to 5.10 per cent. on common stock, after deduction of war profits tax and 10 per cent. dividend on common stock	\$15,468,750

The net surplus for the year after payment of fixed charges, pension fund, etc., was \$15,444,158. Putting the war tax point in another form, should the company have to pay the business profits war tax estimated above at \$7,756,250, the net surplus for the year would be reduced to \$7,687,908. It will not be known until the annual meeting in October, whether the allowance for contingent reserves fully covers the business profits war tax, if payable. If so, and the company pays the tax, the net surplus for the year would be brought up to \$15,444,158 again.

A further point regarding the operations of the Canadian Pacific Railway last year, is the special war work the company is performing, from which a large revenue has probably been derived. No announcement has been made as to this income, but apparently it will be set aside to a special fund to be dealt with subsequently.

CANADIAN VICKERS' ISSUE

It is Fourth of Our Public Offerings in London Since War
—Company Doing Admiralty Work

As noted in *The Monetary Times* last week, arrangements are being made for the issue of £1,000,000 6 per cent. debentures of the Vickers Canadian Company, Limited. The issue will be redeemable probably by a sinking fund during a period of twenty years. This is the first Canadian offering in London this year and only the fourth since the war commenced. The other three, made in 1915, were Dominion government, Grand Trunk and Canadian Northern loans, aggregating \$41,175,000. The regulations of the British treasury requiring all applications for capital in the United Kingdom to be sanctioned by the treasury have, as is known, reduced Canadian borrowings overseas to a minimum, Canadian financing now being done almost entirely in the United States and at home. Prior to the war, British investors were supplying the bulk of Canadian funds. In 1912, for instance, the sales of Canadian high-grade securities totalled \$273,000,000, of which Great Britain purchased \$204,000,000, or nearly 75 per cent. Since the war commenced in August, 1914, Canadian securities placed in the United States have totalled only \$301,797,000 and in Great Britain only \$46,175,000, including the Canadian Vickers' issue now being made.

It is highly probable that the fact that the Vickers company is doing considerable work for the British admiralty in its plant at Montreal induced the British treasury to allow the issue of the company's securities in the London market.

Continually Expanding Plant.

The debenture issue in London will be made under the auspices of the English parent company. It is generally thought that the issue indicates a considerable expansion of the company's plant in Montreal with a view to a greater participation in the shipbuilding industry, which is now an unusually important industry, and will be still more so after the war.

Speaking to *The Monetary Times* recently, a representative of Canadian Vickers, Limited, stated that the company was continually extending its plant. "At present," he said, "we are entirely engaged in British admiralty work. After the war, we anticipate that there will still be government work for our plant, but we shall be active, too, in building commercial boats, tramp steamers, for instance."

The Canadian Vickers Company in May last launched from the Montreal plant the largest ice-breaking vessel ever built. In speaking at the ceremony, Sir Robert Borden, prime minister, said he looked forward to the time when Canada would have a new industry, the building of steel ships, and the time when the Dominion of Canada would take her place in the world as the largest builder of commercial tonnage, as had his native province in the days of the sailing ship.

Bigger than Parent Company?

As to the cost of building steel ships in Canada, he felt that the price of their construction would decrease more and more until, in twenty years, it would not be greater than in the motherland. "When we in Canada," added the prime minister, "shall carry on the shipbuilding industry, it may be that this company, whose guests we are to-day, may have so increased in importance as to be larger than the parent company in England. If our industries have been of such great value to us in times of war, can we not look forward to shipbuilding in Canada in peace times, and in war times, too, if we should ever be confronted with the situation we are now in?"

Officers and Manager.

Mr. F. Orr Lewis is president of the Canadian Vickers, Limited. Mr. J. W. Norcross, vice-president and managing director of the Canada Steamships Lines, Limited, was elected a director of the company in April.

Mr. Philip Leslie Miller is manager of the company, which carries on business as shipbuilders, ship repairers, engineers and boilermakers. He served five years' apprenticeship with Gourlay Brothers and Company, shipbuilders, Dundee, Scotland, and spent one year at St. Andrew's University, Scotland. In competition at the Royal Naval College, Greenwich, England, he gained a free studentship and

admiralty scholarship, entitling him to three years' course in naval construction at that college. He completed the three years' course and qualified in a final examination in 1901, being appointed by the British admiralty to the Royal Corps of Naval Constructors, as a member of which he served twelve years in the British civil service, being employed in the construction department of the admiralty and of the royal dockyards at Portsmouth, Hong Kong and Malta. He supervised the construction of warships on the Clyde on behalf of the British admiralty, 1908-1911. In 1911, he was loaned by the British government to the Turkish government to supervise the construction of dreadnought battleships being built in England for the Turkish government, resigning from this position in 1913 and from the Royal Corps of Naval Constructors to take his present position at Montreal.

NO TRADING WITH GERMANS

The British Empire Union of Canada, with headquarters in Toronto, has for its motto, "No more German immigrants, no more German shipping, no more German labor, no more German goods, and no more German influence." The objects of this organization are as follow: To carry out in Canada a policy similar to that of the British Empire Union of the United Kingdom; that is to say (1) to protect Canadian industries against German competition; (2) to make an end of German influences in commerce, finance and politics; and (3) to combat German aggression, open and secret.

The executive committee of the union is composed of follows: James P. Murray, J.P. (chairman), Professor Alfred Baker, M.A. (Toronto University), Controller R. H. Cameron, F. C. Daniel, Rev. H. T. F. Duckworth (Dean of Trinity College), J. Castell Hopkins, F.R.G.S., Rupert E. Kingsford, P.M., Colonel Noel Marshall, J. E. Murphy, Dr. L. E. Rice, M.D., W. H. Smith, Chevalier J. Enoch Thompson, K.C.I., Alex. H. Wright, and C. H. Blackmore, secretary, 152 Bay Street, Toronto.

The union has just issued an attractive pamphlet, "No Trading with Germans," being a reprint of a recent article in *The Monetary Times*, by Professor H. T. F. Duckworth, dean of Trinity College, Toronto. The pamphlet is issued at 10 cents and is well worthy of perusal.

In addition to Professor Duckworth's article, there is an appendix which gives some interesting matter. There it is related that a wholesale hardware merchant of Toronto, whose extensive business gives him a position of some distinction, was invited to join the Anti-German League. His reply was, "Certainly not! I intend to keep German goods after the war. Why shouldn't I?" A wholesale jeweler of Toronto also declined to join the League. He had a large and profitable business in the sale of German jewelry, and intended to continue importing such jewelry.

A drygoods merchant, who conducts a large business in Toronto, has publicly deprecated the harboring of hatred against Germans. His firm recently sold German goods marked "Made in Spain." An important retail-trading firm has imported German goods since the outbreak of the war. The German marks on the packages were covered with red labels inscribed "Made in Canada." A Toronto manufacturer, who has made large profits upon a contract for the supply of munitions of war has declared that he does not believe in bearing malice and that we ought to admit German immigrants and import German goods into the country after the conclusion of peace.

The attention of these men, and of all who are like-minded with them, is called by the British Empire Union League, to a number of statements such as the following:—

"The war of the future will be the economic war, the struggle for life on the largest scale. May my successors always bear this in mind, and always take care that Germany will be prepared when this battle has to be fought."—Bismarck.

The Bank of Hamilton has leased the Traders Bank building, Toronto, for its chief Toronto branch.

Mr. F. C. Armstrong has resigned his post as joint general manager of the Export Association of Canada, Limited, and will resume his military duties as captain of a Canadian regiment. Mr. A. Ramsay, of the London office of the association, will act as the British representative.

CANADIAN TRADE EXPANDING

Half a Billion Dollars Increase During Twelve Months Ended May

The volume of Canadian trade for the 12 months ended May, 1916, shows an increase of nearly \$500,000,000 as compared with the corresponding period of 1913, the year before the war. The total trade for the year ended last May is valued at \$1,563,230,513. The increase in trade is chiefly due to the greater volume of exports. Canadian produce exported totalled \$820,000,000, as against \$432,000,000 in 1915, \$429,000,000 in 1914, and \$358,000,000 in 1913.

The heaviest export has naturally been to the United Kingdom. In 1913 exports thither totalled \$180,000,000, in 1916 they totalled \$518,000,000, nearly treble that amount. To the United States they increased from \$167,000,000 to \$337,000,000, while to France they increased from \$3,000,000 to \$37,000,000.

Classes of Exports.

The exports of Canadian produce for the 12 months ended May last, were divided as follows:—

Exports of	Value.
Mine	\$ 68,727,974
Fisheries	23,103,465
Forest	52,316,834
Animal produce	107,482,272
Agricultural produce	299,035,751
Manufactures	261,999,746
Miscellaneous	7,917,394
Total	\$820,583,436

Imports from Britain.

Imports from the United Kingdom decreased from \$143,000,000 in 1913 to \$86,000,000 in 1914; from the United States from \$445,000,000 to \$444,000,000; from France from \$15,000,000 to \$6,000,000; and from Germany from \$14,000,000 to \$57,509.

The importation of dutiable goods dropped from \$447,000,000 in 1913 to \$321,000,000 in 1916. This is a decline of

nearly one-fourth. The duty collected in 1916 amounted to \$114,000,000, as against \$116,000,000 in 1913.

Of the Dominion's total imports, 74 per cent. came from across the border, and only 14 per cent. from the United Kingdom. Of Canada's total exports, however, only 38 per cent. went to the United States, and 59 per cent. to the United Kingdom.

The preliminary statement of the trade of Canada for May, with comparisons, appeared in *The Monetary Times* last week. The preliminary statement for June, with comparisons, appears in the current issue.

BANKS AND MUNITIONS CREDIT

An Ottawa dispatch last week stated that the \$25,000,000 transaction (representing an advance to the munitions board for the purchase by Great Britain of munitions here) was greatly facilitated by the offer of the minister of finance to re-discount at any time the Imperial treasury bills held as collateral for the advances. "Available bank funds," added the message, "are so large that it is not probable that such re-discounting will be at all necessary, but the fact that facilities for rediscounting have been provided has made possible the transaction on so large a scale."

This statement was not altogether correct, as the second advance by the banks for munitions was \$24,000,000, the total now amounting to \$100,000,000. The transaction scarcely could have been greatly facilitated by the offer of the minister of finance to rediscount at any time the Imperial treasury bills. Very few of the banks apparently have taken advantage of the offer, and it is understood that no bank was to partake in the recent advance if it had to borrow money from the government under the provisions of the finance act.

The Western Land and Townsite Company, Limited, with Manitoba charter, has decreased its capital stock from \$100,000 to \$20,000.

The O'Keefe Brewery Company, of Toronto, Limited, with Ontario charter, has increased its capital stock from \$2,000,000 to \$2,500,000.

* In these municipalities the assessment is taken in the previous year. Populations for these are the figures taken in 1914.

† Denotes that the latest returns are not yet in, and the figures given are the latest available.

NOTE.—The property assessed for schools only is included in the total assessment in previous column. The item of municipal taxes includes, besides the general rate, the county rates and local improvements.

The debenture debts at the end of 1914 of the principal towns and townships in Northern Ontario were as follow. Some of the towns were destroyed in the recent fire disaster. These debts have been increased in some cases by sales of bonds this year. Matheson, for instance, sold to the Canada Bond Company, last month, \$20,000 5 per cent. bonds due in 1941. Cochrane sold in March \$5,000 6 per cent. bonds due in 1926, to Brent, Noxon and Company. Timmins, the town created by the Hollinger Gold Mining Company, suffered little as a result of the fire. In November last, this town sold \$4,744 6 per cent. 10-year bonds, the purchasers being the Hollinger Mining Company. In February a bank advance of \$18,000 from the Imperial Bank to Timmins was authorized. The Ontario government will probably help with the financing of the stricken towns. Asked by *The Monetary Times* as to the interests of the holders of bonds of these towns, Hon. T. W. McGarry, provincial treasurer, said recently: "There will probably be some scheme worked out. The government will certainly do all they can to relieve the situation as far as possible."

TO AVOID LITIGATION

Having your Will properly drawn up by a solicitor and naming an Executor competent to deal fairly by all parties in careful execution of the terms of the Will, nearly always prevents litigation. The competency of this Corporation to act as Executor is evidenced by the \$72,000,000 of Trust Funds already confided to our care. Write for explanatory booklet.

BANBURY V. BANK OF MONTREAL

Action in London Creates Discussion in Banking Spheres —Judge's Summing Up

The verdict given in London courts against the Bank of Montreal for £25,000 in the much-discussed Banbury case is being appealed by the bank, a course which was generally anticipated.

The hearing was concluded, before Mr. Justice Darling and a special jury, in the King's Bench Division. The action was brought by Capt. Cecil Banbury against the Bank of Montreal claiming £25,000, which he said he advanced (and lost) to the Westholme Lumber Company, Canada, on the advice of the late Mr. Galletly, formerly manager of the bank's branch at Victoria, B.C. The advice was alleged to be negligent, and there was a suggestion that part, at any rate, of the money was used for the purpose of reducing an overdraft owing to the bank by the lumber company. In its defence the bank, according to the report of the Canadian Gazette, denied that Capt. Banbury was a customer, or that it was under any duty to advise him; it denied that the advice alleged was given, or, if given, relied upon, and said Capt. Banbury acted on his own judgment. If Mr. Galletly did give any such advice as alleged (the bank further said), he was acting outside the scope of his authority, and the bank denied that it had any concern with the application of the money. Mr. Gordon Hewart, K.C., M.P., Mr. Douglas M. Hogg, and Mr. S. Lowry Porter were for the plaintiff; Sir John Simon, K.C., M.P., and Mr. Raeburn for the bank.

To Advise Carefully.

Summing up the case, his Lordship said he was unable to leave this case to the jury simply for them to find "for the plaintiff" or "for the defendant," because a number of questions required to be decided before that conclusion could be reached. He would therefore have to leave several questions for them to answer, and neither they nor anybody else need be at the least apprehensive that he would attempt to decide any of these facts for himself. The facts had to be decided by the jury, and his duty would be done if he ruled on any questions of law. The action was brought to recover damages, and it was said that the damages were due from the Bank of Montreal because one of its managers advised the plaintiff. If it was his duty, and he had authority from the bank in this particular case to advise him and he did advise him, then he was bound to advise him carefully. If he advised him not carefully, but negligently, and the plaintiff thereby lost his money, the bank was liable to him in damages. The first thing for them to consider, therefore, would be: Had Mr. Galletly authority, as a manager of a branch of the bank, to advise the plaintiff to advance £25,000 on mortgage to the Westholme Lumber Company? Mr. Galletly was a man of great experience. Nobody had said he was dishonest, but he might have been negligent for all that; he might not have advised the plaintiff to the best of his ability, and he might have had some sort of motive which actuated him and which made him less careful than he would ordinarily have been.

Letters That Were Written.

The correspondence in the case showed that he had been advocating that more business should be done with the Westholme Lumber Company, and it was perfectly clear that he thought well of this undertaking. He thought well of its prospects, and if he thought that, he could recommend the venture to Capt. Banbury. If the jury found that he did not think well of it, and found he had been writing letters to that effect, then they would say it was very wrong of him to speak as alleged, and he could only have done so if he were a thoroughly dishonest man. Nobody had said he was; in fact, everybody had said he was a scrupulously honest man. But however well the jury might be inclined to think of Mr. Galletly, his lordship thought it would have been better, after his own district manager (Mr. Sweeney) had said, "Don't you let Cameron (the president of the lumber company) suppose that we will finance this scheme," he had not mentioned this proposition to anybody. It might be an explanation of a good deal that Mr. Galletly was about to retire. He saw Capt. Banbury first on September 7th, and retired on the 14th.

He had no interest in Capt. Banbury whatever, and his final act as a manager for the bank led to Capt. Banbury

doing that for the Westholme Lumber Company which Mr. Sweeney said the bank itself would not do. At that time the bank had a very strong interest in advancing capital to this company because the bank had lent money to it. But the bank was not willing to pay another penny even to save the interest it had. When Capt. Banbury came along, instead of saying nothing about this doubtful company, Mr. Galletly mentioned it to him. Whatever might be imputed against the bank, everything must be laid at the door of Mr. Galletly. It was known that Mr. Galletly was very anxious that this matter of the Westholme Lumber Company should be cleared up. He might have been anxious to save his bank from a lot of anxiety, and he could retire with credit instead of going out of office under the shade of a bad investment. In a postscript to one of his letters on August 13th he had said: "I should like to get this straightened out before I leave." That (said his lordship) might give the jury a cue of all that Mr. Galletly did. On September 7th came Capt. Banbury quite casually and quite unexpectedly with a letter from Sir Edward Clouston. "Gentlemen," said his lordship, "what an opportunity for getting it all straightened out! Here was Capt. Banbury with £25,000 to invest; Mr. Galletly was inclined to believe—obviously inclined to believe—the best of this Westholme Lumber Company, and it may be that he was much too easily convinced." His lordship went on to say that three days after Capt. Banbury decided to lend his money, Mr. Galletly wrote to Mr. Meredith, who became the general manager of the bank:—

Confirmation of Engineer.

"To satisfy ourselves in the matter we recently engaged the services of a well-known and reliable engineer, Mr. C. E. Cartwright, to inspect the work and report fully. This he had done, and I enclose you a copy of his report. . . . I am pleased at the result, as it justifies the faith I have always had in the integrity and ability of the company. It is on the strength of this report that they succeeded in obtaining the additional capital referred to."

That was Capt. Banbury's capital, said his lordship. Mr. Galletly believed in Cartwright's report, and could anyone doubt that, being in that frame of mind, to advise Capt. Banbury to put his money into it was a likely thing for him to have done, because he felt so confident about it? Just at the very moment when Mr. Galletly had this high opinion of the company and Mr. Sweeney a low one, in comes the Cartwright report, which confirmed Mr. Galletly, and on the same day in comes Capt. Banbury. Dealing with the questions he would have to leave to the jury his lordship said, on the question of authority he did not raise the point of general authority because Mr. Hewart, for the plaintiff, only contended that, in the particular circumstances of this case, seeing what was the position between the bank and the Westholme Lumber Company, seeing the correspondence that had passed, and seeing what was the interest of the bank in getting financial assistance for the lumber company, there was authority given to Mr. Galletly to advise Capt. Banbury.

Questions With Jury.

If he had authority, it did not follow that the bank was liable for what, it was said, Mr. Galletly advised the plaintiff. Sir John Simon contended that Capt. Banbury had not given an accurate account of the conversation with Mr. Galletly, and that Mr. Galletly merely introduced him to Mr. Cameron, with whom, and the officers of the lumber company, the matter was arranged, entirely independent of any advice by Mr. Galletly.

His lordship then left certain questions with the jury, who, after consideration, brought in a verdict against the bank for £25,000.

After hearing legal arguments on the findings of the special jury his lordship three days after entered judgment in favor of Capt. Cecil Banbury.

Registrar Pottinger has announced the settlement of the list of contributories of the Bank of Vancouver, and as a result of the decision each of the 600 shareholders of the defunct institution will be responsible for the payment of the balance due on his shares. The holdings of shares run from one to 150 shares. All the contributories, however, are discharged from liability under the double liability clause, the registrar ruling that the action of the liquidator in finding them liable was premature. All interest charges on overdue instalments of stock also are struck out.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Hollinger Consolidated Gold Mines, Limited.—In the four weeks ending July 14th gross profits of the mine were \$215,165 from 45,320 tons of ore of an average value of \$9.15 per ton.

Seneca-Superior Silver Mines.—A further dividend has been declared by the Seneca-Superior Silver Mines, being the regular dividend of 10 per cent. with a bonus of 20 per cent. The distribution will include shareholders on record on August 5th, and will be paid on August 15th. The company has still approximately \$17,000 in ore to be treated.

Smart-Woods, Limited.—In connection with \$500,000 bond sale, *The Monetary Times* learns these bonds are first mortgage 6 per cent. 15-year serial bonds, and take the place of the present issue of one million dollars which has been held as collateral against advances by the bank. The recent issue of half a million are all the bonds which this company has outstanding. These bonds were sold in the United States.

Canada Steamships Lines.—The arrears of dividends on the preferred stock of the Canada Steamships Lines have been reduced by a payment of 1½ per cent., which is the same amount as paid to the preferred shareholders on May 1st. It is believed that another payment of 1½ per cent. will be made on November 1st, and that in addition the preferred

shareholders will receive the regular 7 per cent. dividend for 1916.

Montreal Ammunition Company.—This company has paid another 100 per cent. dividend, making a total of 750 per cent. that has been paid to shareholders.

The Dominion Bridge Company is understood to own 51 per cent. of the company's \$300,000 capital stock, and the parent company has already benefited from these subsidiary dividends to the extent of about \$1,125,000. It is said that dividends received by the parent Bridge company will exceed the \$1,300,000 which it is distributing to its own shareholders this year in dividends and bonuses. That will leave the large earnings of the Dominion Bridge Company as a clear surplus.

The Ammunition Company was reported to have been a large buyer of the Dominion war loan in the spring and a proportion of its dividend distributions has been in the form of these bonds instead of cash. This 100 per cent. dividend has been paid in bonds.

Canadian Car and Foundry Company.—On the ground that power to regulate interstate commerce rests with the interstate commerce commission, and that the regulations of any other sovereign power are abortive, Federal Judge Rellstab has declared that the embargo on the shipments of munitions through Jersey City placed by the commissioners of Jersey City is illegal. He has granted a preliminary injunction to the Canadian Car and Foundry Company restraining the Jersey City commissioners and the Delaware, Lackawanna and Western Railroad from enforcing the embargo.

Though he ruled that the situation was one within the jurisdiction of the interstate commerce commission, Judge Rellstab said he was not ready to concede that state police powers are entirely abrogated by the federal commission board, and he added that if a municipality felt it had a grievance it should appeal to the commerce board.

Nova Scotia Car Works, Limited.—The property, etc., of the Nova Scotia Car Works have been sold to a syndicate represented by Hon. F. B. McCurdy, M.P., for \$167,500. The sale is subject to a mortgage held by the city of Halifax amounting to \$120,000. The bidding between Mr. T. S. Rogers, acting on behalf of the Nova Scotia Steel and Coal Company, and Mr. McCurdy advanced \$500 at a time from \$154,000, which had been ordered by the court as an initial bid.

Mr. F. B. McCurdy, for the Canada Corporations, opened the bidding at \$154,000, and the property was finally awarded to him at \$167,500. The terms of the sale call for the deposit of 10 per cent. of the price, the balance to be paid on delivery of the deed.

It is thought that the purchasers of the property bought it in order to conserve it in the interest of the security holders of the company, now in liquidation.

Ames-Holden-McCready Company.—The company's profit and loss account shows net profits of \$321,791, leaving a surplus for the year of \$52,861 after providing for bond interest and depreciation of \$54,700 and \$45,082 applied to bad debts and reserve. The balance carried forward, \$30,885, brought the total at credit of profit and loss account to \$83,746, and from this \$74,707 was applied to provide for losses applicable to 1914-15 and previous years, leaving a surplus of \$9,038.

The balance sheet of the company shows accounts payable \$532,306, bills payable \$264,081, a total of \$797,287, as against cash on hand \$80,626 and accounts of bills receivable of \$906,773, a total of \$987,399. Bank loans, including a special loan of \$450,000 on the war contract, stand at \$2,046,000, while the stock on hand is carried at \$2,406,642. Bonds outstanding are \$914,000, preferred and common stock \$6,000,000 and surplus \$9,038, making total liabilities \$9,766,327, as against \$8,535,216 two years ago, when the last report was issued.

Hudson's Bay Company.—The profits of the company for the past year amounted to £23,000 from the fur trade and £247,000 from sale shops and other trading, as compared with a loss of £33,000 and a profit of £63,000 last year.

f. o. b. Ford, Ontario

These prices are positively guaranteed against any reduction before August 1st, 1917, but there is no guarantee against an advance in price at any time.

Ford Motor Company of Canada
Limited
Ford, Ontario

Governor Kindersley commented on the less extravagant mood of those responsible for the conduct of municipal affairs in Canada. This had, he said, resulted in a reduction of taxation, which, he said, had increased by £75,000 since 1911.

The company intended to take a number of test cases to the Canadian courts with respect to taxation in Saskatchewan and Alberta and other provinces.

The company had also been hard hit by the introduction of the prohibition laws, which the chairman described as drastic and very detrimental to the company's stores.

In regard to legislation, the company were advised that their rights were being infringed upon, and, therefore, in this case also legislation will be resorted to because infringement is the fundamental issue affecting not only our liquor business, but the far greater question of the general trading rights of the company in the Dominion.

Pacific Burt Company, Limited.—The profit and loss account for the fifteen months ended March 31st is as follows: Net profits were \$86,009; the balance carried forward at January 1st, 1915, \$27,472. Preferred dividends took \$56,875; common dividends, \$13,000; the amount written off cost of establishing new departments was \$13,813, leaving a balance to carry forward of \$29,792.

Mr. S. J. Moore, president, states that the net profits for the fifteen months' period recorded are in the proportions of \$68,684 for the year 1915 and \$17,325 for the quarter ending March 31st, 1916.

The company's fiscal year has been altered so as to end with March 31st instead of December 31st as formerly.

Expenses formerly incurred in the establishing of new departments have been written off in full, the amount being \$13,813.

An appraisal of the company's properties has been completed by the American Appraisal Company. From this it is apparent that the amount standing at the credit of real estate and plant reserve account is \$16,025 in excess of the requirements. This excess amount has been transferred to reserve for other assets, which now stands at \$31,025. The company's assets are shown at \$1,563,746.

Montreal Tramways Company.—The comparative statement of the profit and loss account is as follows:—

	1916-1915.	1915-1914.
Gross earnings	\$6,600,765	\$6,525,232
Operating expenses	3,707,053	3,713,996
Net earnings	\$2,902,712	\$2,811,235
Deduct:—		
City's percentage of earnings..	\$ 418,084	\$ 414,140
Interest on bonds and loans...	806,721	825,415
Interest on debenture stock....	800,000	800,000
Taxes	93,600	92,800
	\$2,118,405	\$2,132,364
Net income	784,307	678,871
Dividends	323,871	278,880
Surplus	\$ 460,436	\$ 399,991
Deduct:—		
Trans. Cont. renewal account..	\$ 275,000	\$ 275,000
War tax (1915-16)	74,013	
	\$ 349,013	\$ 275,000
Transferred to general surplus	111,422	124,991

The company's assets total \$39,009,758.

President E. A. Robert states that the company under its trust indenture is entitled to issue bonds on its capital expenditure to an amount equal to 75 per cent. thereof, and under this provision it is now entitled, when it shall so desire, to have bonds certified to an amount of \$963,485.

During the year there has been redeemed and cancelled \$163,233 of the underlying bonds of the company. The amount of underlying bonds redeemed to date is \$1,146,746.

In connection with the underlying bonds purchased during the year the sum of \$3,387, representing the difference between par value and the purchase price thereof, has been credited to the general surplus account.

The directors, acting on the authority of a by-law passed by the shareholders, issued 10,000 shares of common stock, which has been allotted to the shareholders at par.

North Atlantic Fisheries Company.—From the statement presented at a recent shareholders' meeting it was shown that the company owes the Canadian Bank of Commerce \$102,000 and other floating liabilities, which make a total obligation requiring settlement of about \$150,000. The immediate cause of the meeting was a notice from the Bank of Commerce that their account must be liquidated by August 31st. The directors of the company have guaranteed to the bank \$65,000 of the bank's account. The bank has on previous occasions asked for the return of the loan.

Notwithstanding the fact that the North Atlantic Fisheries has been operating on a limited scale, they were able last year to pay the interest on the loan and \$4,000 on the principal, the revenue for this coming altogether from the cold storage department of the company's business, nothing having been done in any other branch. Several attempts had been made to dispose of the company, which has a voluntary property, but on account of war conditions this had been found impracticable. To obtain the funds with which to pay off the bank, the directors recommend that the preferred shareholders, holding stock of a par value of \$500,000, be asked to subscribe to an issue of 6 per cent. bonds of a par value of \$250,000 at 75. They will be asked to take bonds to an extent of half their preferred stock. A resolution to this effect was adopted. It would appear if the company is liquidated now, the shareholders are in danger of losing their investment.

The company has made an actual cash expenditure on its plant of nearly \$500,000. The company's capital is \$500,000 in preferred shares and \$500,000 common shares.

WESTERN CANADA'S REFUNDING SCHEME

The proposal to convert from sterling into dollars certain issues of Manitoba, Saskatchewan and Winnipeg securities, which were originally sold in England, with a view to the use of the securities in their new form in the United States, has for its object, as stated previously in *The Monetary Times*, the facilitating, as far as practicable, of the financial operations under the direction of the British treasury board. "Whatever advantages may accrue to the issuing bodies under the tentative plans now being considered will be more or less offset by the shortening of the time of maturity," is the comment of the scheme in the latest monthly commercial letter of the Canadian Bank of Commerce.

A despatch from Winnipeg this week says that at a special meeting of the Manitoba cabinet on Monday further arrangements were made in regard to this plan. The order-in-council authorizing the initial commitment, amounting to \$3,000,000, was finally passed on Tuesday, it is understood. Interim bonds to that amount have been sent by the provincial government to J. P. Morgan and Company, New York, which firm has approved the issue.

The money from the sale of the new bonds will be used to redeem provincial securities being mobilized in England by the Imperial government. The mobilization is said to be proceeding at a slower rate than was anticipated.

A Canadian Associated Press cable message from London on Monday stated that official announcement had been made that the British treasury is desirous of purchasing City of Winnipeg 4 per cent. consolidated registered stock, 1940-60. The price offered is 80, plus accrued interest to date. Transfer holders of £5,000 upwards may communicate direct with the American Dollar Securities Committee, Old Jewry, London. Others are invited to offer through bankers or brokers, the treasury paying the commission on the transfer. The offer will not have the effect of rendering dividends on the security liable to an additional income tax.

COBALT ORE SHIPMENTS

The following are the shipments of ore in pounds from Cobalt Station for the week ended August 11th:—

Trethewey Mine, 37,329; Coniagas Mines, 54,805; Mining Corporation of Canada, 87,431; Dominion Reduction Company, 85,600; Alladin Cobalt Mine, 50,400; La Rose Mines, 87,448; McKinley-Darragh-Savage Mine, 168,388.

Total, 572,401 pounds, or 286 tons.

The total shipments since January 1st, 1916, now amount to 18,364,383 pounds, or 9,182.1 tons.

LOANS ON LIFE POLICIES

Practically Impossible to Eliminate Them—Should Government Issue Dominion Notes in Times of Emergency?

BY R. W. BARTON, A.I.A.

The comments received upon the article on loans on life policies which appeared in *The Monetary Times* of July 14th last unanimously agree that it is, as Mr. File remarked in his letter last week, "a practical impossibility to eliminate the loan privilege from our present policies."

Mr. File rightly associates the question of surrender values very closely with that of policy loans. Discussion of this point was purposely omitted in that article, to be dealt with at a later date, because, while the Dominion Insurance Act permits the companies, under certain circumstances, to defer the grant of a loan for three months, no such provision is made for surrender.

Unless an amendment to this effect is made to the act the companies are between the devil and the deep sea. They must either grant an immediate loan or accept a surrender of the policy. It seems, therefore, that such an amendment should be made as soon as possible.

Precedents for Legislation.

Precedents for legislation in this respect are not lacking. The same reasons that made it advisable to give power to defer a loan apply to the question of surrender.

The special acts by which many British life companies are incorporated usually empower the withholding of payment of claims in times of pestilence or other emergency upon payment of a fixed rate of interest, sometimes as low as 4 per cent. This is also on a par with the right reserved by the chartered banks of Canada to require three months' notice of the withdrawal of savings deposits. Competition would ensure that this notice would only be required in moments of real, general emergency.

Difficulties of 1907.

With regard to the possibility of a limited "run" upon the companies, Mr. File mentions that in 1907, the last year of any exceptional financial stress experienced in Canada, some companies were embarrassed to find funds to meet policy loans and surrenders.

The following table, showing the increase in policy loans and increase in assets, amongst the principal Canadian companies in that year, with the percentage of increase in assets absorbed by the increase in loans, is of interest:—

Company.	Started.	Increase in 1907.	Percentage
		Policy loans.	Assets. of increase.
Canada	1847	\$ 941,613	\$ 1,714,868 54.91
Confederation ..	1871	234,983	799,544 29.39
Continental	1899	7,310	170,586 4.29
Crown	1901	33,037	76,998 42.91
Dominion	1889	27,495	179,174 16.16
Excelsior	1890	25,442	207,827 12.24
Federal	1882	45,162	266,923 16.92
Great-West	1892	139,114	577,937 24.07
Home	1892	3,921	90,090 4.35
Imperial	1897	88,713	547,350 16.21
London	1874	20,170	266,535 7.57
Manufacturers' ..	1884	248,004	986,859 25.13
Mutual	1870	277,361	1,270,869 21.82
National	1899	18,949	98,641 19.21
North American ..	1881	252,582	781,639 32.31
Northern	1896	16,614	144,643 11.48
Sun	1871	549,954	2,195,902 25.04
		\$2,930,424	\$10,367,385 28.27

The high percentage of the Canada Life is due to the fact that this company was nearly double the age of any other company, and its policy reserves—and, therefore, its loan values—were correspondingly higher. This company also wrote a large business in the United States, and consequently felt the force of the financial panic there in the same year. And yet it was not so much the Canada Life as other and younger companies that were most inconvenienced by the sudden demands of policyholders.

Several companies had pursued a policy of investment in certain selected securities, and it is interesting, in fol-

lowing the subsequent investments of the different companies, to note modification in that policy. A useful lesson was taught the administrators of life assurance institutions in 1907, and the problem has been one for consideration ever since.

Mr. File is of opinion that the mortgaging of a life insurance policy is on an entirely different footing from the mortgaging of a home or other property, because it is a special provision for a special purpose, and in many cases the only provision that exists for the protection of the assured's dependents. This idea exists in the mind of the life assurance administrator rather than in that of the policyholder. In fact, the wish that it should be so considered is probably father to the thought.

Policyholders resent any interference, however tactful, in their dealings with their policies. Even the present agitation and well-meant efforts of the companies to reduce the call for these loans is scaring would-be applicants and diverting money to savings accounts that might be paid in premiums. For over half a century policyholders have been taught that the most useful and most attractive feature of a life policy is that a loan can be raised upon it in moments of emergency, and that it can always be surrendered for a more or less satisfactory sum when its purpose has been served or if it cannot be kept up. To forbid policy loans and surrenders would as surely damage life insurance in Canada as stopping the snow, if that were practicable, would damage a Canadian harvest.

Other Disadvantages of Restriction.

Even if the companies obtained power to refuse loans on policies, it could hardly be made illegal for policyholders to obtain loans from other sources. Yet they would be placed at a disadvantage in doing so. Reducing the sources of supply would increase the rate of interest to be paid and bring into the field unscrupulous lenders, who in the end would probably obtain the whole policy, and so perhaps worry the life assured to the grave—a triple loss to the company of a good investment, a premium contributor, and a too early claim.

Policy Loans Good Investments.

Nor are policy loans, to a limited extent, an undesirable investment for the companies. It is not twenty years since the rate of interest on these loans was lowered in Great Britain to make them more attractive to the borrower. One of the largest Canadian life companies charges to-day 10 per cent. on premium obligations, and this does not stop the call. The rate of interest charged upon policy loans has hitherto been a high one in Canada in comparison with the market rate. The yield to the companies has probably been higher in this class of investment than in any other. There are no losses. The cost of collection is infinitesimal. They require no special supervision, such as mortgages of land, which, although yielding an apparently high rate, cost 1 to 2 per cent. for supervision and other expenses.

Government Might Help.

As Mr File remarks, it is important—we would say imperative—that an investment policy should be pursued by the companies which will ensure a reasonable proportion of the assets being in a form readily convertible into cash. There seems to be a simple way to meet the difficulty, at least one worth consideration. Legislation has compelled the companies to make these loans, and also to invest some portion of their funds in Canadian government securities. In times of emergency the government might be empowered to issue Dominion notes against the deposit of these government securities, and so enable the companies to carry out their government-imposed obligations without incurring losses on realization by the compulsory sacrifice of securities in times of stress or panic. Details would have to be worked out, but the principle seems reasonable, especially in consideration of the compulsory nature of the loans and the government requirements as to the companies' investments.

Hon. J. J. Foy, K.C., who died recently, left an estate of \$135,000, which is to be divided among his three daughters, Miss Marie Foy, Mrs. Florence MacIntosh, of Vancouver, and Mrs. Pauline Reid. The testator left \$28,500 insurance to Miss Foy, and the residue is divided into three parts equally among the three daughters in trust funds.

BRITISH LOAN IN UNITED STATES

Negotiations for Credit of \$250,000,000 in Progress— Canadian Securities Involved

Negotiations are expected to be completed within a few days, according to New York dispatches, for the raising of a new British loan of approximately \$250,000,000 in the United States. This loan will run for two years, with interest at 5 per cent., the notes to be offered at 99. Securities for this loan, it is reported, will include deposits of about \$300,000,000 of Canadian, Argentine and Swiss government bonds and stocks and bonds of United States railroad and industrial corporations.

Messrs. J. P. Morgan and Company, Brown Brothers and Company and the National City Bank of New York are the sponsors for the loan. As to interest rate and the proportionment of securities, there is still a difference which is being discussed by representatives of the British government and United States bankers. The latter are contending for a return which should attract investors irresistibly.

While an agreement has been reached that United States railway stocks shall be the major portion of the collateral, there is a disagreement regarding the minor part. The borrowers offer more South American securities than Canadian and English. As the former are virtually unknown in the United States the syndicate bankers are insisting upon more Canadian and English than South American.

Tying Up Securities.

The fact that the loan is likely to be made against United States and other securities held or borrowed by the British government, in the most active speculative circles is held to be the most influential factor in bringing about a sharp rise in the leading railroad securities. It is pointed out that if millions of dollars' worth of them are to be tied up for some time as collateral for such a loan the foreign selling of United States securities would be greatly reduced.

Mobilizing Securities.

In anticipation of this loan it is understood that the British treasury has lately greatly enlarged the list of United States securities which are being "mobilized" to make them available for financing in the United States. The latest list of these securities to reach this side of the Atlantic includes more than 200 stocks and bonds, and further additions to the list are being made.

The British government has undertaken to buy these United States securities from their English owners or to borrow them in cases in which the owners for some reason are not in a position to part with them outright. The purchased securities are available for sale in the United States or along with the borrowed securities may be used as collateral for loans in the New York market.

British War Finance.

Including the vote of credit of £450,000,000 passed in the British House of Commons in July, Great Britain's war votes to date have been £2,832,000,000. The British government issued its first war loan of £331,000,000 in November, 1914 at 95. A second war loan was issued at par in July, 1915, amounting to £600,000,000. The Anglo-French war loan in the United States, of which Great Britain obtained half, was issued in October, 1915. Since that date the British government has financed by means of special banking credits in the United States and by internal issues of exchequer bonds, treasury bills and other securities.

The Saskatchewan department of agriculture has made a special enquiry concerning the appearance of black rust in the province, and from the reports to hand black rust has developed in a few instances, but is confined, as far as it is possible to learn, to the south-eastern part of the province. It is estimated that some crops on the lighter soils will be cut about the 15th of the month, but cutting will not become general throughout the province before the last week in August. The wheat is now fully headed out and maturing rapidly. Having is in full swing and is generally abundant, although on account of the wet weather it has been found inopportune to put it up at present, but with drier weather this may be remedied.

To Yield 6.31%

LEGAL NOTICE

CANADIAN GASOLINE CORPORATION, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 12th day of July, 1916, incorporating Arthur John Thomson and William Symon Morlock, solicitors; Samuel Davidson Fowler, solicitor's clerk; Violet Moffat, accountant, and Anna Latimer, office clerk, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To search for and recover and win from the earth, petroleum, natural gas, oil, salt, metals, minerals and mineral substances of all kinds, and to that end to explore, prospect, mine, quarry, bore, sink wells, construct works or otherwise proceed as may be necessary; to produce, manufacture, purchase, acquire, refine, smelt, store, distribute, sell, dispose of and deal in petroleum, natural gas, oil, salt, chemicals, metals, minerals and mineral substances of all kinds and all products of any of the same; (b) To trade in, deal in and contract with reference to lands or interest in land, mines, quarries, wells, leases, privileges, licenses, concessions and rights of all kinds covering, relating to or containing or believed to cover, relate to or contain petroleum, natural gas, oil, salt, chemicals, metals, minerals or mineral substances of any kind; (c) To acquire, purchase, take on lease or license, hire, hold, use, sell, grant leases of, grant licenses of, exchange, alienate, dispose of and otherwise deal in or contract with reference to lands or interests in land, personal property of all kinds or interests therein, rights, privileges, licenses and concessions, ships, boats or vessels of any description, wharves or wharfage facilities, docks and docking facilities, cartage plant, forwarding plant, warehouses and towing, wrecking and salvage plant or any interest in any of the same; (d) To manufacture and deal in appliances, implements, machinery, apparatus, goods and supplies in any way connected with or incidental to the operations of the company or to the use of any of the products of the company; to manufacture or trade in property and goods of all kinds; (e) To work, manage, operate, turn to account, explore, develop and improve the properties of the company, whether mining, agricultural or otherwise; (f) To deal in and contract with reference to timber lands, timber licenses and timber rights, and to cut, render merchantable, handle, manufacture, deal in and contract with reference to timber and lumber of all kinds and all products thereof; (g) To acquire, lease, construct, improve, own, use and operate works for the development of power, light and heat, to use, purchase, sell, supply, lease or otherwise deal in or contract with reference to power, light and heat, subject always to all local laws or regulations in that behalf; (h) To acquire, lease, construct, improve, own, use and operate irrigation works and works for the supply of water for other purposes, and to use, purchase, sell, supply, lease or otherwise deal in or contract with reference to water for irrigation or other purposes, subject always to all local laws or regulations in that behalf; (i) To acquire, lease, construct, improve, maintain, own, use, operate, sell, let and deal in dwelling houses, lodging houses and hotels; (j) To operate ranches or farms for live stock or agriculture, to breed, raise, keep, render marketable and deal in horses, cattle and live stock of all kinds, and to produce and deal in all products thereof and all agricultural products; (k) To operate construction or building plants and to take and carry out contracts for building or for construction work of any kind; (l) To undertake, carry on and execute transactions as financial or commercial brokers or agents; (m) Notwithstanding the provisions of section 44 of The Companies Act, to subscribe for, purchase, assume liability under, acquire, hold, sell, exchange, dispose of or otherwise deal in or contract with reference to bonds, debentures, stocks or other securities or obligations or any estate or interest therein; and to apply or accept, in whole or in part, as consideration for, satisfaction of or security for any contract, indebtedness or obligation, to or of the company, property, obligations, shares and securities of any kind at such valuation and upon such terms as may be agreed upon; (n) To acquire, dispose of or otherwise deal in properties, businesses or undertakings of all kinds similar in whole or in part to those of the company; to furnish aid to any business or undertaking similar in whole or in part to that of the company with which the company may have business relations, by way of loan, bonus, endorsement, agreement, guarantee, management or other service, and to manage, supervise and control the same in whole or in part and to act as agent or attorney for the same; (o) To carry on any other business which may seem capable of being conveniently or advantageously carried on in connection with the business of the company or calculated directly or indirectly to enhance the value of, to facilitate the realization of or to render more profitable any of the company's businesses, properties, or rights; (p) To invest the moneys of the company not immediately required in such investments as may from time to time be determined; (q) To co-operate in, aid in, subscribe towards or subsidize any proceeding or undertaking which may seem calculated directly or indirectly to benefit the company; (r) To acquire or undertake the whole or any part of the business, property and liabilities of any person, partnership, association or company having objects altogether or in part similar to the company, or carrying on any business which the company is authorized to carry on, or possessed of property which may seem suitable or desirable for the purposes of the company; (s) To apply for, purchase or otherwise acquire and to protect, prolong and renew patents, patent rights, trade marks, formulae, licenses, protections, concessions and the like, conferring or relating to any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, improve, develop or grant licenses in respect of or otherwise turn to account the property, right or information so acquired; (t) To enter into partnership or into any arrangement for sharing of profits, or expense, union of interests, co-operation, joint adventure, reciprocal concessions or otherwise, with any person, partnership, association or company carrying on or engaged in, or about to carry on or engage in, any business or transaction which the company is authorized to carry on or engage in, or any business or

transaction which may seem capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person, partnership, association or company, and to take or otherwise acquire shares and securities of any such partnership, association or company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (u) To take or otherwise acquire and hold shares in any partnership, or stock or shares in any association or company having objects altogether or in part similar to those of the company, or carrying on any business which may seem capable of being conducted so as directly or indirectly to benefit the company; (v) To apply for, promote and obtain from the Dominion of Canada or any other authority, whether Dominion, Provincial, Imperial, Colonial or foreign, and including subordinate and municipal authorities, any statute, ordinance, order, regulation or other authorization or enactment which may seem desirable to the company or calculated directly or indirectly to benefit the company; (w) To enter into any arrangements with any governments or authorities, supreme, provincial, civic, municipal, local or otherwise, that may seem conducive to the company's objects or any of them, and to obtain from any such government or authority any statutes, ordinances, licenses, contracts, orders, regulations, decrees, rights, powers, franchises, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with the terms of the same; (x) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company, or of its predecessors in business, or of any person, partnership, association or company allied with the company in business or subsidiary to the company, or in which the company holds shares or securities, or to benefit the dependents or connections of such persons, and to grant pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (y) To promote, form, organize, manage, develop, take interests or stock or shares in and assist financially or otherwise any partnership, association or company for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose which may seem calculated directly or indirectly to benefit the company; (z) To acquire, purchase, take on lease, hire, construct, improve, own, maintain, operate, manage, carry out and control plant, equipment, machinery, supplies, buildings, works, shops, warehouses, manufactories, pumps, tanks, tank cars, pipe lines, smelters, refineries, roads, ways, canals, bridges, electric works, electric plant, hydraulic works, hydraulic plant, boats, ships, docks, wharves, piers, gas works, cables, waterworks, reservoirs, aqueducts, flumes, ditches and all such other structures, works, conveniences and appliances as may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the acquisition, purchase, leasing, hiring, construction, improvement, ownership, use, maintenance, operation, management, carrying out or control thereof; (aa) Where such course is required for the purposes of the company or may seem calculated directly or indirectly to advance the company's interests, to acquire, purchase, take on lease, hire, construct, improve, own, use, maintain, operate, manage, carry out and control, but only upon lands owned or controlled by the company, or over which the company may have a right of license to that effect, such roads, ways, bridges, lines of rail, spurs, sidings, tracks, rolling stock, cables, wires, motors, locomotives, electrical plant and all such other structures, works, conveniences and appliances as may be required for the purpose of maintaining communication by telegraph or telephone, or of effecting the transport of goods or passengers, and to contribute to, subsidize or otherwise assist or take part in the acquisition, purchase, leasing, hiring, construction, improvement, ownership, use, maintenance, operation, management, carrying out or control thereof; (bb) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (cc) To sell or dispose of the property or undertaking of the company, or any part thereof, for such consideration as the company may think fit, and in particular, and notwithstanding the provisions of section 44 of The Companies Act, for shares, debentures or securities of any other partnership, association or company; (dd) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (ee) To sell, exchange, lease, dispose of, turn to account or otherwise deal with or contract with reference to all or any part of the property and rights of the company; (ff) To consolidate or amalgamate with any other company having objects similar in whole or in part to those of the company; (gg) To procure the company to be registered, licensed or otherwise recognized in any foreign country, and to designate and appoint persons therein as attorneys or representatives of the company with full power to represent the company in all matters according to the laws of such foreign country and to accept service for and on behalf of the company of any process or suit; (hh) To pay out of the funds of the company all or any of the expenses of or incidental to the formation and organization thereof; and to employ, contract with and provide for the remuneration of brokers, commission agents and underwriters upon any issue of shares, bonds, debentures, debenture stock or other securities of the company; (ii) To distribute or divide assets of the company in specie amongst the shareholders; (jj) To do all or any of the above things as principals, agents, contractors or otherwise, and either alone or in conjunction with others; to do all such other things as may seem directly or indirectly to be incidental to or conducive to or convenient or proper for the accomplishment of the purposes or the attainment of the objects of the company, or any of them, or expedient for the protection or benefit of the company; (kk) No power granted in any paragraph hereof shall be limited or restricted by reference to or inference from the terms of any other paragraph hereof. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Can-

adian Gasoline Corporation, Limited," with a capital stock of three million dollars, divided into 3,000,000 shares of one dollar each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 15th day of July, 1916.

THOMAS MULVEY,
Under-Secretary of State.

NEW INCORPORATIONS

Less Than Twenty Charters Granted—Mining Company Has \$2,000,000 Capital

Canada's new companies incorporated this week number 16. The head offices of these companies are located in five provinces. The total capitalization amounts to \$2,910,000.

The largest company is:—

Davidson Gold Mines, Limited \$2,000,000

Grouping the new concerns, according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	7	\$2,655,000
Quebec	5	135,000
British Columbia	1	25,000
Manitoba	2	45,000
New Brunswick	1	50,000
	16	\$2,910,000

The following is a list of charters granted during this week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Vancouver, B.C.—Henry C. Macaulay and Company, Limited, \$25,000.

Sudbury, Ont.—J. G. Henry, Limited, \$40,000. J. G. Henry, A. A. Jackson, W. E. Sinden.

Prescott, Ont.—Mint Products Company, Limited, \$10,000. E. J. Noble, J. R. Allen, P. J. McAndrews.

Windsor, Ont.—Ojibway Steel City Land Company, Limited, \$40,000. J. H. Stewart, H. E. Baker, J. H. Nolan.

St. Johns, N.B.—L'Entrepot Frigorifique de St. Jean, Limitée, \$50,000. P. Trahan, E. Papineau, J. N. Decarié.

Chambly Basin, Que.—La Compagnie de Conserves de Chambly Basin, Limitée, \$40,000. A. Simard, R. Weiss, J. Simard.

St. Catharines, Ont.—The Wells Garage Company, Limited, \$40,000. Daisy Y. Stanton, C. J. Bowman, W. M. Marquis.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Walkerville, Ont.—For the issue of \$25,000 5 per cent. 10-year patriotic fund bonds, which were awarded to the Imperial Bank, the bids, as received by Mr. G. Miers, town clerk, were:—

Imperial Bank of Canada	\$24,445.00
G. A. Stimson and Company	24,415.00
R. C. Matthews and Company	24,352.00
Canada Bond Corporation	24,272.50
A. E. Ames and Company	23,990.00
Kerr, Fleming and Company	23,787.50

Montreal North, Que.—The taxpayers have voted on a by-law to expend \$250,000.

Greemore, Ont.—For the issue of \$16,000 6 per cent. 30-year school bonds, two bids were received by Mr. J. Hood, treasurer, the first named receiving the award. The bids were: Canada Bond Corporation, \$16,581; Kerr, Fleming and Company, \$16,380.

Saskatchewan.—The following is a list of bonds reported sold by the local government board:—

School Districts.—Elmwood, \$6,200; Conquest, \$7,500; Monmouth, \$1,500; Twin Creek, \$1,200.

Rural Telephone Companies.—Fillmore, \$3,500; Range-line, \$12,000; Zangwill, \$15,000; Salvador, \$20,600; River Park, \$4,800; Phoenix, \$6,200; Dodsland, \$4,800; Mountain View, \$11,500.

Village.—Luseland, \$2,000.

Cochrane, Ont.—A deputation comprising Mayor Rothschild, W. McD. Douglas, president of the board of trade, T. S. Atkinson, manager Bank of Ottawa, and Dr. A. B. Cameron, of Cochrane, waited upon the provincial cabinet this week and asked the government to make a grant of \$40,000 to the town or to guarantee its bonds, in consequence of the financial position in which the town finds itself through the destruction of the great part of it in the recent fire. The promise of a guarantee of \$25,000 of the town's bonds was made, and the provincial government will purchase \$10,000 school bonds.

Saskatchewan.—The following is a list of bond applications granted by the local government board:—

School Districts.—Byglad, \$1,200. T. Kirnlang, Canwood; Husiatyn, \$1,000. M. Drabiniasty, Box 206, Prince Albert; Dubois Lake, \$1,200. J. Luciuk, Wakaw; Meadow Grove, \$1,000. J. Johnson, Leask; Birling, \$1,200. P. F. Cassidy, Maidstone; Major, \$1,500. C. A. McMechan, Major.

Rural Telephone Companies.—Handel, \$20,000. J. E. Graham, Handel; Kelfield, \$8,000. C. O. Banting, Kelfield; Paragon, \$9,500. C. O. Banting, Kelfield; Ruthilda, \$9,000. C. O. Banting, Kelfield; Lockwood, \$7,000. E. D. Gardiner, Lockwood; Odessa, \$1,400. R. W. Kirschke, Odessa; Lampman, \$5,000. A. C. Moynes, Lampman; Flaata, \$6,600. A. Marriott, Bromhead; Glen Eagle, \$8,000. L. B. Wheatley, Asquith; Butterson, \$4,300. M. H. Hall, Butterson; Shaunavon Pioneer, \$3,600. J. A. George, Shaunavon; Crooked Valley, \$7,000. Geo. A. Bailey, Scott; Spy Hill, \$3,000. J. H. Watson, Spy Hill; Maple Valley, \$10,500. J. R. Ross, Davidson; Tysdale, \$3,100. Jos. Eastvold, Briercrest; Bluffview, \$11,600. K. Bennett, R.R. No. 1, Regina; New Deloraine, \$4,800. A. J. Robertson, Davidson.

The bond houses expect to do a large business in the new Canadian war loan to be issued next month. They make no charge for their services to purchasers of the bonds. Messrs. Wood, Gundy and Company, Toronto, in asking that orders be placed through that firm, say in a recent circular: "At the time of the last issue many of our clients very wisely subscribed for more bonds than they actually required, applying the profit on the resale of a portion of these to reduce the cost of the balance held. Investors subscribing through us have the advantage of our efficient distributing organization for resale of the bonds. In connection with the last loan we resold for clients at a profit an amount almost equal to the total subscriptions received in this office."

DEBENTURES FOR SALE

TOWN OF NORTH BAY

DEBENTURES FOR SALE

Sealed Tenders will be received by the undersigned up to 12 o'clock noon, Friday, the 1st day of September, A.D. 1916, for the purchase of the following issue of debentures of the Municipality of the Town of North Bay:—

\$15,000.00, debentures issued for Patriotic purposes bearing interest at the rate of Six per cent. per annum, repayable in Twenty equal annual instalments of principal and interest.

Delivery to be made at the Royal Bank of Canada at North Bay, Ont.

M. W. FLANNERY,
Treasurer, North Bay.

TOWN OF AYLMER, QUEBEC

DEBENTURES

Tenders will be received up to Thursday, August the 24th, 1916, by the undersigned, for the purchase of \$35,000, 30-year Debentures bearing 5% interest, and payable at the Office of the Secretary-Treasurer at Aylmer, Que., the interest payable semi-annually, that is to say, May the 1st and November 1st.

The money is to be used for the purpose of installing a Rapid Sand Gravity Filtration Plant.

Highest or any tender not necessarily accepted.

H. SEXSMITH,
Secretary-Treasurer.

LOANS AND ADVANCES TO THE DOMINIONS

Several interesting facts bearing on the loans and advances made by the British Government to the overseas Dominions and Allies were elicited in Mr. McKenna's speech on the recent supplementary vote of credit in the British house of commons. During the current year to July 22nd these advances have amounted to £157,000,000. In reply to a question put by Mr. Rawlinson on the subject of repayment, the chancellor stated that the terms of such advances would generally be that "the loans are made on treasury bills, which are to be rediscounted up to a certain period after the declaration of peace." The period varies in different cases. Questioned also as to the rate of interest, Mr. McKenna replied as follows:—

Sir C. Henry: There is no fixed rate of interest?

Mr. McKenna: No fixed rate. The rate was to vary according to the date for the time being in this country. We take from the various borrowing countries bills corresponding to our treasury bills, which we undertake to rediscount as they fall due up to a certain period after the end of the war; the rate of discount at which we take the bills must depend on the rate of money for the time being in this country.

Mr. Henderson: Not necessarily the same?

Mr. McKenna: No; the terms are not identical in every case. We have to consider the terms of variation. But the general rule is that out of those loans we do not make money, but we think it quite reasonable that the rates which we have paid should be repaid to us.

A further point of importance was elucidated during the discussion in the fact that all loans are sterling loans, repayable in London.

Canada has not had occasion to borrow from the Imperial government for Canadian war expenditures for about a year now, except for expenditures in Britain or at the front. The Dominion government is now paying off its temporary indebtedness to the British government by the issue to the Imperial treasury of Dominion bonds bearing the same rate of interest, and having the same maturities as the issues of the Imperial government from the proceeds of which the advances had been made. About \$100,000,000 is involved in the first transaction of this nature.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 3c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

ACCOUNTANT and Bookkeeper; age 30; over 12 years' experience in bookkeeping and financial work, seeks position with Financial or Commercial Firm, having good prospects. Reply Box 497, *The Monetary Times*, Toronto.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

CITY AGENT WANTED.

(FIRE INSURANCE)

A well-established Fire Insurance Company wants an energetic man with good connection to act as City Agent for Toronto. Company will furnish free office, with help for first year. Liberal commission with good salary. State age, experience. Applications will be treated confidentially. Box 1, *The Monetary Times*, Toronto.

QUALIFIED ACTUARY, with seventeen years' experience, would change connection if satisfactory opportunity were afforded. Has thorough knowledge of every phase of Head Office and Investment work. Would consider an opening with Life Company or with Financial Firm or Corporation where his experience and abilities would be of service. Negotiations of any kind strictly confidential. Address "Actuarius," care of *Monetary Times*, Toronto.

LABOR AND ITS ORGANIZATION

Are strikes justifiable? is an outstanding question, owing to current happenings. The answer supplied in a recent survey of American labor organization is, "Agitation and even strikes are justifiable both legally and morally." The author suggests that "the labor movement of to-day in all of its essential elements is the movement of organized labor." Professor Groat in his useful volume has furnished an interesting guide to the study of a question of immense importance. He has concerned himself chiefly with the activities of the unions, of which he has selected those that are most important in themselves, and best illustrative of the spirit and purposes of unionism. The background of the labor movement, the current forms of association, and the transitional movements are fully described. Both sides of the issues involved are presented, and various representative opinions from many different sources introduced.

The chapters include such topics as Wage Theories; Modern Industrialism; Unionism; Trade Union Statistics; The Strike; The Boycott; The Closed Shop and Legislation.

The Study of Organized Labor in America, G. G. Groat, Ph.D. Price, \$1.75. Published by the Macmillan Company of Canada, St. Martin's House, Bond Street, Toronto.

Is Your Estate Properly Protected?

No matter how little or how much you own, these possessions make up your estate, and should be protected by efficient and economical management.

This can best be done by an Executor or Trustee.

This Company, by acting in this capacity, will give your estate the benefit of experience gained in the management of many estates, of large and of only moderate size, and will scrupulously guard the interests of your heirs.

No charge for drawing up your will when the Sterling Trusts Corporation is appointed your Executor and Trustee.

Our officers will give you further information on request.

DIVIDENDS AND NOTICES

CANADIAN PACIFIC RAILWAY COMPANY

DIVIDEND NOTICE

At a meeting of the Board of Directors, held to-day, the following dividends were declared:—

On the Preference Stock, two per cent. for the half-year ended 30th June last.

On the Common Stock, two and one-half per cent. for the quarter ended 30th June last, being at the rate of seven per cent. per annum from revenue and three per cent. per annum from Special Income Account.

Both dividends will be paid on 30th September next to Shareholders of record at the closing of the books in Montreal, New York and London at 3 p.m. on Friday, 1st September next.

All books will be reopened on Thursday, 5th October next.

By order of the Board,

W. R. BAKER,
Secretary.

Montreal, 14th August, 1916.

UNION BANK OF CANADA

DIVIDEND No. 118

Notice is hereby given that a Dividend at the rate of eight per cent. per annum upon the Paid-up Capital Stock of the Union Bank of Canada, has been declared for the current quarter, and that the same will be payable at its Banking House, in the City of Winnipeg, and at its branches on and after Friday, the 1st day of September, 1916, to Shareholders of record, at the close of business, on the seventeenth day of August, 1916.

The transfer books will be closed from the 18th to the 31st of August, 1916, both days inclusive.

By order of the Board,

G. H. BALFOUR,
General Manager.

Winnipeg, July 20th, 1916.

BANK OF MONTREAL

Notice is hereby given that a Dividend of Two and One-Half per Cent. upon the paid-up Capital Stock of this Institution has been declared for the three months ending 31st July, 1916, and that the same will be payable at its Banking House in this city, and at its Branches, on and after Friday, the First Day of September next, to shareholders of record of 31st July, 1916.

By order of the Board.

FREDERICK WILLIAMS-TAYLOR,
General Manager.

Montreal, 21st July, 1916.

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 118

Notice is hereby given that a quarterly dividend of 2½ per cent. upon the capital stock of this Bank has been declared for the three months ending the 31st of August next, and that the same will be payable at the Bank and its Branches on and after Friday, 1st September, 1916, to shareholders of record at the close of business on the 16th day of August, 1916.

By order of the Board.

JOHN AIRD,
General Manager.

Toronto, 24th July, 1916.

THE ROYAL BANK OF CANADA

DIVIDEND No. 116

Notice is hereby given that a Dividend of Three per cent. (being at the rate of Twelve per cent. per annum) upon the Paid-up Capital Stock of this Bank, has been declared for the Current Quarter, and will be payable at the Bank and its Branches on and after Friday, the First day of September next, to Shareholders of record of 15th August.

By order of the Board,

C. E. NEILL,
General Manager.

Montreal, P.Q., July 18, 1916.

CITY OF SASKATOON

Prompt Payment of Taxes Will Save 12%

Owners and others interested in property in the City of Saskatoon are advised that a DISCOUNT OF 4% (equivalent to 12% per annum) is allowed on current general and school taxes if the first half or the whole is paid on or before the 31st day of August, 1916.

All properties upon which there are unpaid arrears will be SOLD FOR TAXES on the 1st day of November. A penalty of 2½% is added every three months to unpaid arrears (equivalent to 10% per annum). The next penalty of 2½% is added on the 1st day of October.

C. J. YORATH,
Commissioner.

Saskatoon, Sask.

POSITIONS AND MEN WANTED

A well-known fire insurance company is seeking a city agent for Toronto. A good salary, with liberal commission, is offered and the company will furnish office accommodation and help, free of cost, to their new agent, for the first year.

A qualified actuary, with 17 years' experience, has written *The Monetary Times*, stating a desire to change connection, should a satisfactory opportunity offer. He would like to obtain a position with a life insurance company or with a financial house, where his experience would be of value.

Further particulars of these matters appear in our advertising columns.

Brantford, Ont., has granted a fixed assessment of \$10,000 for fourteen years to the Dominion Steel Products Company. This plant will employ some 400 hands.

You Can Improve Your Position

Have you heard of the Sales and Intelligence Departments of the Canada Life?

They give special assistance to the Company's representatives.

They teach a man the insurance business by correspondence and personal assistance free of charge

Then they place him in a position and help him to make good

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this. All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policy-holders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

*NOTE.—It will be noted that the figures relating to the imports of coin and bullion for the twelve months ending June, 1916, amounted to \$34,058,009, as against \$132,602,879 for the same period of 1914-15. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Beaumaris, Ont.—August 14—Summer cottage of Miss Hall, Guelph.

Belleville, Ont.—August 15—Messrs. Johnsons Brothers' livery. Loss, \$3,000. Mr. J. Lafferty's. Loss, \$1,200; Cumming's Estate. Loss, building, \$2,500.

Barrie, Ont.—August 15—Steamer Otanbee. Loss, \$10,000.

Dover Township, Ont.—August 8—Mr. A. Cadotte's barns. Loss, \$6,000. Cause, lightning; Mr. McGrail's barns. Cause, lightning.

Calt, Ont.—August 8—Mr. A. Stuart's barn, Puslinch. Partially insured with Puslinch Mutual. Cause, lightning.

Coderich, Ont.—August 13—Allison Brothers' fruit store. Loss, \$200. Cause, stove.

Hamilton, Ont.—August 14—11 and 13 Edinburgh Avenue and 218-220 Ottawa. Loss, \$3,000.

Harrow, Ont.—August 8—Mr. J. Quick's barn. Cause, lightning.

Lakeport, Ont.—August 12—Mr. J. Cowie's residence. Cause, gasoline stove exploded.

Luskville, Que.—August 14—Mr. H. Pilon's store. Loss, \$3,000.

Merlin, Ont.—August 8—Mr. W. Barr's barns. Loss not stated. Cause lightning.

North Vancouver, B.C.—August 8—Mr. Vada's residence, Fourth Street. Loss, \$2,500.

Ottawa, Ont.—August 13—Mr. W. W. Wylie's residence, 190 Carling Avenue. Loss, \$2,000.

Quebec, Que.—August 9—Barber shop of Mr. H. Moreau. Cause, overheated stove.

August 10—Mr. H. Paquet's residence. Loss not stated. Two deaths.

St. Genevieve, Que.—August 13—Mrs. Demers' residence. Loss, \$2,500. Insured.

Sidney Township, Ont.—August 14—Mr. A. Thompson's residence. Insurance, building, \$900; contents, \$300.

St. Ursule, Que.—August 14—Canadian Northern Railway bridge.

Tic Island, Ont.—August 13—Miss Cruso's ice house. Cause, spontaneous combustion.

Toronto, Ont.—August 14—New Method Laundry stables, River Street. Loss, \$3,500.

Wallaceburg, Ont.—August 7—Mr. D. F. Rae. Loss unknown. Cause, lightning.

Whitby, Ont.—August 15—Bush fire caused by engine sparks.

Windsor, Ont.—August 13—Canadian Glass Company's plant, McDougall and Albert Streets. Loss, \$2,000. Cause, spontaneous combustion.

Winnipeg, Man.—August 11—Leslie's, Limited, warehouse, Fort Street and Graham. Loss, \$25,000. Insured.

Yarmouth Township, Ont.—August 8—Mr. W. Matthew's barn. Loss, \$3,500, partially insured.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Blind River, Ont.—August 1—Fire Marshal E. P. Heaton finds that in this fire the total number of people suffering damage was 33. The aggregate loss is practically \$175,000 and the insurance loss \$85,833. About 50 per cent. of the aggregate loss being insured. Much of this is due to some of the sufferers carrying no insurance at all.

Victoria, B.C.—Fire Chief Davis reports the losses for July as follows: Loss, buildings, \$715; loss, contents, \$223; total loss, \$938; insurance, buildings, \$79,200; insurance, contents, \$850; total insurance, \$80,050; property at risk, \$415,500. There were 17 alarms.

Vancouver, B.C.—Fire Chief Carlisle's returns show that the total loss by fire during the month of July was \$16,616, the insurance loss was \$8,841, leaving the property loss above insurance \$7,775. The total value of property involved was \$144,100. The department responded to 33 alarms. The following list shows the causes of fires; Unknown origin, 7; chimney fires, 3; fire had broke out again, 1; flying sparks, 10; overheated stove pipe, 1; tar pots, 3; false alarms, 1; bush fire, 1; gasoline explosion, 1; fires outside city limits, 2; overheated gas plate, 1; short circuit, 1; and electric iron left turned on, 1.

HAIL INSURANCE LOSSES IN SASKATCHEWAN

Claims amounting to \$1,000,000 or over will be paid out by the Saskatchewan municipal co-operative hail commission as a result of the recent disastrous hail storms, estimates Mr. J. E. Paynter, chairman of the commission. Over four thousand claims have come in to the office of the commission in the last few days, and officials state that this has been the worst year for hail since the commission was organized in 1913. It is thought that the entire revenue for the current year, which will amount to a little over a million dollars, will be required to meet the losses.

Chatham, Ont., has raised the interest rate on its bonds from 5 to 5½ per cent. The issue is being sold "over the counter."

WAR ORDERS PLACED BY LORD SHAUGHNESSY

The purchasing department of the British War Office in Canada, organized under Lord Shaughnessy and employing systems and machinery of the Canadian Pacific Railway, had placed up to May 1st a total business in Canada for various general supplies, not including munitions, of \$13,000,000. Since then the business placed has amounted to over \$4,000,000, making a total of over \$17,000,000, more than \$7,000,000 of which represents transactions during the current year. About the most important business which has been received since last report covers additional orders for canned beans with pork to the extent of about 12,000,000 cans.

Conduct of Municipal Sinking Funds

UNITED STATES *Investors Are Particularly Interested In This Phase of Canadian Municipal Finance—Borrowers Must Study Requirements of the Market So As To Encourage Investment Here—Promptness In Meeting Our Obligations, Interest and Principal, Is Vital.*

BY T. BRADSHAW

Finance Commissioner, City of Toronto

Prior to the declaration of war in August, 1914, practically all of our municipal securities were absorbed in Great Britain or at home. Since that epoch-making event, and as a result of it, a new and most important market has been developed. The United States, which had previously been "nibbling" at some of our offerings, has become deeply interested, and has made substantial purchases. We might almost say that New York, for the time being, has assumed the relationship which London occupied.

When normal conditions once more prevail, London will, no doubt, be open again to us, and if so, instead of having, as formerly, only two sources to supply our capital needs, we shall be in the favored position of having three.

The increasing interest exhibited by our neighbours is illustrated by considering the value of the municipal debentures purchased by them in each of the last five years: in 1911, out of total offerings of some \$47,000,000, they took \$2,335,000, or 4.95% of the whole; in 1912, \$3,900,000, or 8%; in 1913, \$22,100,000, or 19.12%; in 1914, \$25,600,000, or 30.29%; and in 1915 no less than \$32,500,000, or 48.80% of the whole.

The following statement, compiled from Mr. E. R. Wood's reports, sets forth the proportion of securities absorbed in the three markets:—

RECORD OF CANADIAN MUNICIPALS MARKETED IN THE YEARS 1911-1915.

Year	Sold in Canada		Sold in United States		Sold in Great Britain		Total Sales
	Amount	Per cent.	Amount	Per cent.	Amount	Per cent.	
1911	\$16,326,378	34.62	\$ 2,334,467	4.95	\$28,498,443	60.43	\$47,159,288
1912	13,761,482	28.42	3,876,406	8.	30,777,074	63.58	48,414,962
1913	25,850,653	22.33	22,135,762	19.12	67,775,510	58.55	115,761,925
1914	25,105,320	29.82	25,559,548	30.29	33,723,563	39.89	84,388,431
1915	34,052,677	51.20	32,455,396	48.80	None	—	66,508,073

Canadian investors, who are best acquainted with the constitution and government of their municipal institutions, evidence their faith in them by increasing from year to year the amount of their investments. Last year such investment was over 34 millions of dollars, exceeded one-half of the whole, and was greater than the amount absorbed by Great Britain in the years 1911, 1912 or 1914.

Our friends across the border have the reputation of thoroughly investigating a proposition before making a commitment. Their cautious and gradual investment in Canadian securities illustrates this. During the past four or five years they have been watching and studying our growth. They have been examining into our civic administrations. The history and records of our municipal debts, as well as the manner in which we have met our obligations, are known to them. Frequent visits to our cities and journeying through our Provinces have been made by experienced bond men. Numerous inquiries about and investigations of our municipal laws, have been instituted. It is not too much to say, that the United States investor has been favorably impressed with the vast resources of our country, its growing industries, the stability of our institutions, and the general excellency of our government, and it is believed that, as this knowledge grows, the market for our securities will continue to widen.

Up to the present, the American market has chiefly bought the bonds of our more important communities. In trying us out they have, naturally, selected our choicest offerings, and it is believed that their experience has been satisfactory and that, in practically every instance, no disappointments have followed. Shortly it may be expected that consideration will be given to county securities and those of smaller established cities.

In this connection it is most desirable that we should be impressed with the value of this new market, and cultivate it assiduously. We should study its requirements in such a way as to encourage it to take still further interest in our problems and produce. The method in which securities are issued should conform to its requirements, for example: interest on bonds should be made payable half-yearly and by coupon; bonds should be in round amounts; principal and interest should be payable in some important American city, as well as in Canada; the repayment of principal in large issues and for long terms, should be according to the instalment principle. The time of marketing and the frequency of our appeals should receive consideration. It is poor policy to force bonds upon a

dull and disinterested market, and to make frequent calls for capital. Promptness in meeting our obligations, interest and principal, is vital. Our past record, in this connection, with few exceptions, is all that could be desired.

But above all, the American investor must be satisfied with the financial administration of our affairs. He will be particularly interested in the management of our sinking funds. Perhaps no feature of civic finance in the United States has had occasion to receive more attention and criticism than the conduct of sinking funds. Unfortunately, many instances can be quoted across the border of inefficiency and mal-administration in this branch of municipal administration. Too often the fund has been left in the hands of incompetents, resulting in serious losses. In other instances, the true function of the fund has not been recognized and, in consequence, its monies have been utilized for purposes entirely foreign to those for which they were accumulated. When the debts which the fund was assumed to liquidate, fell due, large deficits were discovered and a process of refunding had to be resorted to.

This brings me to my main theme:

In the early part of this year I was asked by His Worship, Mayor Porter, and the board of control of the city of Ottawa, to make an investigation of the City's sinking fund. Although extremely busy at the time, the opportunity was welcomed, because I had been deeply interested for some years in the administration of civic sinking funds and believed that an investigation of the city of Ottawa's fund might be helpful, not only to that municipality, but to others; and for the reason that, Ottawa being the capital of the Dominion, and a thoroughly representative Canadian city, the findings would be of value to our American friends whose growing interest in our securities has been referred to. Mayor Porter was good enough to consent to the publication of my report, and when your Association asked me to contribute a paper on some phase of municipal finance, I thought I might venture to submit it.

I do not propose to read the report, but simply to refer to some features contained in it:—

Ottawa, at the time of the examination, had a bonded debt of \$14,417,577—of this amount, \$13,094,362 was represented by sinking fund bonds, and \$1,323,315 by annuity instalment bonds. The investigation dealt with the sinking fund which was being accumulated to meet the \$13,094,362 of sinking fund debt. The debt had been incurred during the last thirty years; it represented two hundred and forty-two different loans which fall due from year to year during the next thirty-seven years.

The result of the investigation disclosed that the city should have in its sinking fund \$3,003,147. It was most gratifying to find that it not only had this amount but, in addition, a surplus of no less than \$317,369, or 10% more than the sum required.

The following comparisons of the results of the investigation, with the City's own record, indicate that its affairs had been conservatively exhibited: while the liabilities of the fund, according to the investigation, amounted to \$3,003,147, the City had computed them at \$3,164,355, or \$161,207 more than they actually were; the assets of the fund were found to be \$3,320,516, whereas the City had only taken credit for \$3,279,406, or \$41,110 less than they actually were; the surplus over all liabilities, according to the investiga-

tion, was \$317,368, the City having only taken credit for \$115,050, or \$202,318 less than actually existed.

It is advantageous for any enterprise or institution, which has been carrying on its operations under the same management for many years, to have someone from the outside come in and review its work. A strong tendency exists to continue to do things in the same way, because they have always been done in that way. The outside investigator is almost sure to discover reasons why a continuance of customs which might have been satisfactory years ago, is no longer desirable. It is not intended, however, to discuss here methods which, it is believed, might be improved upon, for they are fully dealt with in the report.

The average rate of interest earned by the fund was 3.74%. It, of course, should be the aim of those administering the fund, to so invest the monies that, consistent with absolute safety, the highest rate shall be earned. A difference of only one per cent. would bring the average rate up to 4¾%, and would mean that the fund would have annual additional earnings of \$30,000.

We hear much about the difficulty of operating such public works as electric light and waterworks systems, street railways, etc., so that they will produce a surplus revenue over expenditure and debt charges, but seldom, or never, is there presented to us the possibility of a sinking fund being so administered that it will produce a surplus and thus contribute materially to the City's revenue.

A word might be said as to the character of the investments in the Ottawa sinking fund: Of the \$3,300,000 in the fund, \$1,855,000 consisted of that city's own bonds; Dominion and Provincial Government securities accounted for \$300,000, and the balance of \$1,165,000 was made up of cash, etc. It will be noticed that 56% of the holdings comprised the bonds of the City itself, and in the report the question is raised as to the desirability of making further such investments.

The outstanding and important features, however, of the whole investigation are: that for all outstanding debenture debts, the City had on hand good interest-bearing investments or cash, of an amount substantially in excess of the full sinking fund requirements; and that the fund had been honestly administered.

It is believed that the facts disclosed in the report will tend to enhance the favorable opinion already entertained in the United States, of the administration of our important municipal bodies, and add to the good reputation of their credit and securities.

(The above paper was presented on behalf of Mr. Bradshaw at the annual convention of the Union of Canadian Municipalities at Montreal this week).

INDEX TO THE MONETARY TIMES

The index to *The Monetary Times* for the half-year, January to June, 1916, is now ready. Copies may be had on application to *The Monetary Times*, 62 Church Street, Toronto.

Mr. C. H. Easson, manager of the chief Toronto branch of the Bank of Nova Scotia, has resigned to become vice-president of Brown's Copper and Brass Company.

The Ontario government has set aside \$100,000 as the first instalment of the money which the province proposes to loan to the settlers of Northern Ontario to enable them to develop their farms.

COLONIAL BANK CHANGES PLANS

May Not Use Canadian Charter at Present—Is London City and Midland Coming Here?

The unconfirmed report that the London City and Midland Bank, of England, will apply for a Canadian charter at the next session of parliament, and that it may have taken over the Colonial Bank's project, has aroused considerable interest here. While *The Monetary Times* has not yet received confirmation of this story, it is nevertheless quite true that the directors of the bank are rather disappointed to find that probably they will not be allowed to establish branches in Canada under the new charter which they have just obtained from the Imperial government. They did not expect to be allowed to issue notes, but they expected to be allowed to transact under their own name a similar business to that which Canadian banks transact in London and in New York.

Colonial Bank and Canada.

The Colonial Bank, with headquarters in London, England, decided about two years ago, to enter the Canadian field. In reviewing the year's business of the Colonial Bank at the annual meeting of the shareholders, the chairman, Mr. C. R. Gurney Hoare, stated in April, 1915, that the board of directors had made an application to the Canadian government to promote a bank in Canada. Every year the volume of business of the West Indies with Canada more and more tended to increase, and they had for some years intended to establish a branch there. In making application to the government they were met in so favorable a manner that the directors thought it desirable to take action at once, and though they were unable to act without authority from the British government, they felt their hands would be strengthened in their application for such authority if they showed how readily the proposal to open a bank had been received in Canada. Mr. A. R. Doble, of Montreal, was later appointed as the bank's representative in Canada.

London City and Midland's History.

If the London City and Midland Bank decides to assume a more active role in regard to Canadian financing, the event will prove of interest. It is the largest British bank and is well known as an institution, taking a leading part in the policy of amalgamation that has been so marked a feature of the British banking system during recent years. Originally, the bank was a purely country one, being known as the Birmingham and Midland Bank, which was formed in 1836 with a paid-up capital of £50,000 only. For nearly half a century, as the London Statist relates, the bank pursued the even tenor of its way as a Birmingham concern, and it was not until 1885 that the number of branches open, touched double figures. It is since 1891 that the bank has been transformed from a local institution to the position it now occupies, entry into London business being secured that year by the absorption of the Central Bank of London, Limited.

Since that time, by means of the various amalgamations that have taken place, the number of offices has risen rapidly. In 1891, the bank had 65 offices open for the transaction of business. By the end of 1900 the number was 316, and by the end of 1913, the number had been brought up to 845. The number is now about 1,066. Though the great increase has been chiefly brought about, as indicated, by the policy of amalgamation carried out, the number has also been augmented by new branches in various places. As an example of this it may be pointed out that during 1914 no fewer than 29 new branches were opened, apart from the number of extra offices secured by means of the absorption of the business of the Metropolitan Bank (of England and Wales), Limited.

Policy of Amalgamation.

To indicate the extent to which the amalgamation policy has been carried out, a list of the banks which have been amalgamated into the London City and Midland Bank is given: 1837, Birmingham and Midland Bank, Limited; 1851, Bate and Robins, Stourbridge; 1862, Nicholls, Baker and Crane, Bewdley; 1883, Union Bank of Birmingham, Limited; 1889, Coventry Union Banking Company; 1889, Leamington Priors and Warwickshire Banking Company, Limited; 1890, Derby Commercial Bank, Limited; 1890, Exchange and

Discount Bank, Limited; 1890, Leeds and County Bank, Limited; 1891, Central Bank of London, Limited; 1891, Lacy, Hartland, Woodbridge and Co., West Smithfield, London; 1892, Manchester Joint Stock Bank, Limited; 1893, Bank of Westmoreland, Limited; 1894, Preston Banking Company, Limited; 1896, Carlisle City and District Bank, Limited; 1896, Channel Islands Bank, Limited; 1897, Huddersfield Banking Company, Limited; 1897, North-Western Bank, Limited, Liverpool; 1897, Oldham Joint Stock Bank, Limited; 1898, City Bank, Limited; 1899, City of Birmingham Bank, Limited; 1900, Leicestershire Banking Company, Limited; 1901, Sheffield Union Banking Company, Limited; 1901, Yorkshire Banking Company, Limited; 1904, Nottingham Joint Stock Bank, Limited; 1908, North and South Wales Bank, Limited; 1909, Bradford Banking Company, Limited; 1913, Sheffield and Hallamshire Bank, Limited; 1913, Lincoln and Lindsey Banking Company, Limited; 1914, Metropolitan Bank (of England and Wales), Limited.

Though the paid-up capital has risen considerably during the past 30 years, the increase has been almost entirely due to the amalgamations that have occurred, and only once during this somewhat long period have the shareholders been invited to subscribe for fresh capital. The result is that whereas in 1885 the capital and reserve combined formed a proportion of 17.4 per cent. to the total liabilities, this proportion at the end of 1915 had fallen to 5.3 per cent.

Last Year's Accounts.

The year 1915 proved satisfactory for the London City and Midland Bank, the net profit amounting to £1,130,976, as compared with £1,079,086 for 1914, the profits being shown as usual after transferring to inner reserves a substantial amount for the purpose of strengthening the institution. The dividend was maintained at 18 per cent., absorbing a sum of £745,803, and the whole of the balance, together with a large proportion of the carry forward, was utilized for writing down investments, etc. The amount transferred to investment account was £642,860, writing down all securities to the prices ruling on December 31st last, except war loans, which were taken at cost. A sum of £30,000 was transferred to bank premises redemption fund, and £20,000 to officers' pension fund, the amount carried forward being £113,598, as compared with £421,285 brought in. This latter sum, however, was abnormally large, being specially strengthened to meet any possible emergencies.

NEW COMPANY BUYS STANDARD IDEAL PLANT

The Standard Ideal Company's plant at Port Hope, Ont., as stated in the last issue of *The Monetary Times*, has been acquired by Mr. L. M. Wood, president of the Standard Chemical Company, and his associates, including Mr. W. D. Ross, Toronto; Messrs. Cluff Brothers, Toronto; and Mr. M. L. Davis. The new company's name is the Port Hope Sanitary Manufacturing Company, and its capitalization \$1,250,000. It will take possession at once, and in addition to carrying on the present line of business, it is stated, may engage in the manufacture of shells.

SIR FREDERICK WILLIAMS-TAYLOR HOME AGAIN

Sir Frederick Williams-Taylor, general manager of the Bank of Montreal, has returned to Montreal from his visit to England and France, where, in addition to his varied banking duties, he appeared as a witness in the Banbury banking case and paid a visit to the firing-line in France.

Sir Frederick is always welcomed amongst British financiers, amongst whom he has been very successful in placing large amounts of Canadian high-class securities in past years. On reaching Moncton on the return journey Sir Frederick Williams-Taylor, a native of that city, was accorded a civic reception, in replying to which he remarked: "We Canadians are peace-loving and industrial, but we are a proud and virile people. In this great war we have thrown aside the implements of peace and taken, against our will, to those of war, and with the adaptability of the race from which we sprang we are writing incidents in this great encounter, of which neither the classics nor history produce any surpassing counterparts."

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Tilbury, Ont.—\$4,000 bonds, to Mr. H. C. Bookmiller, Tilbury.

Sherbrooke, Que.—The city redeemed in cash recently \$50,000 bonds issued in 1891.

Franklin R.M., Man.—\$10,000 5½ per cent. 20-year bonds, to the Manitoba government

Point Edward, Ont.—\$7,000 6 per cent. 10-instalments, to Industrial Mortgage Company, Sarnia.

Kitchener, Ont.—The Ontario cabinet has passed an order in council changing Berlin's name to Kitchener.

Toronto, Ont.—For the first time in its history, the city is not carrying any bank loans. A short time ago, the city had bank loans of about \$5,000,000, so that a great improvement has been made in the position in this respect.

Rural Telephone Companies, Sask.—Detroit, \$2,400 7 per cent. 15-instalments; South Halbrite, \$5,000 7 per cent. 15-instalments; Thurby, \$11,200 7 per cent. 15-instalments, to Messrs. W. L. McKinnon and Company, Toronto.

British Columbia.—Certificates of approval have been issued by the municipal department of the province as follows: West Vancouver, bonds, \$10,000, issued under by-law No. 84, ferry, 20-years; 5½ per cent., payable half-yearly; Trail, bonds, \$7,500, issued under by-law No. 157, school, 20-years, 6 per cent., payable half-yearly.

Arthur, Ont.—For the issue of \$15,000 6 per cent. 30-instalment bonds, Mr. D. T. Small received six bids as follows:—

G. A. Stimson and Company, Toronto		\$15,691
Canada Bond Corporation, Toronto		15,553
Brent, Noxon and Company, Toronto		15,131
Imperial Bond Company, Toronto		15,117
W. L. McKinnon and Company, Toronto	...	14,967
R. C. Matthews and Company, Toronto		14,888

Saskatchewan.—The following is a list of bonds reported sold by the local government board:—

School Districts.—Shackleton, \$2,500; Bygland, \$1,200; Heller, \$1,400; St. Jude, \$1,200; Meadow, \$1,000; Oakdene, \$1,200; Patriotic, \$1,600; Bulth, \$1,500.

Rural Telephone Companies.—Harris, \$31,000; South Webb, \$18,500; North Valley, \$2,800; Spy Hill, \$13,000; Goodlands, \$6,000; Tipperary, \$600; Riverdene, \$8,300; Echo, \$1,000; Marine, \$11,200.

City.—Weyburn, \$17,676.74.

Milton, Ont.—The issue of \$5,000 6 per cent. 10-instalment bonds were awarded to Messrs. G. A. Stimson and Company, Toronto. The bids were all from Toronto firms:—

G. A. Stimson and Company		101.83
Imperial Bank		101.28
Canada Bond Corporation		100.772
Brent, Noxon and Company		100.74
C. H. Burgess and Company		100.64
A. E. Ames and Company		100.16
Mulholland, Bird and Graham		99.02

Edmonton, Alta.—According to City Comptroller Mouat's report for the six months ended June 30, the city's controllable expenditures were \$347,213, a reduction of \$100,299, as compared with the same period in 1915. The total expenditures for the year, are expected to be in the neighborhood of a quarter of a million dollars less than in 1915. The cost of central administration in 1915 was over half a million dollars less than for the year 1914, and in two years the controllable expenditures, under central administration, will show a reduction of over three-quarters of a million dollars. The civic revenues for the half-year was \$234,491, a decrease of \$127,000.

Saskatchewan.—The following is a list of bond applications granted by the local government board:—

School Districts.—Drinkwater, \$12,000. J. A. Anderson, Drinkwater; Scotia, \$1,600. Henry Allan, Pennant; Glenarchy, \$1,200. A. R. Chase, Meyronnes; Sandy View, \$800. C. I. Bell, Sceptre; Bladworth, \$600. R. S. Lovatt, Blad-

worth; Staynor Hall, \$1,200. E. E. Smith, Staynor; Spy Hill, \$5,000. J. E. Brown, Spy Hill; Garden Prairie, \$1,600. S. Harrison, Star View; Old Guard, \$2,000. D. Mare, Tilney. Rural Telephone Companies.—Stockholm, \$7,600. B. R. Edquist, Stockholm; Wheat Valley, \$4,500. W. B. Jones, Success; Birch Hills, \$7,000. A. Jamieson, Birch Hills; St. Leonards, \$12,500. Chas. Napper, Kamsack; Glenford, \$1,700. J. R. Grose, Glenside; Elfros, \$12,000. A. Kristinson, Elfros; Cabri Southern, \$23,000. T. S. J. Derman, Cabri; Fielding, \$10,000. Robt. Ireland, Fielding; East Lockwood, \$8,700. E. D. Gardiner, Lockwood; Iola, \$1,200. Thos. Annut, Fairmount; Kansas, \$5,900. J. R. Funk, Drake; Kerrobert Eastern, \$19,700. A. M. Carlile, Kerrobert; Gilroy, \$15,400. A. G. Murrell, Gilroy; Evans, \$6,400. O. E. Tysdal, Briercrest.

BANK BRANCHES OPENED AND CLOSED

During July, 1916, there were 13 branches of chartered banks opened and 3 closed, according to Houston's Bank Directory:—

Branches Opened—13.

†Belgrave, Ont.		Canadian Bank of Commerce.
Buctouche, N.B.		Royal Bank of Canada.
Camp Borden, Ont.		Home Bank of Canada.
Camp Borden, Ont.		Bank of Montreal.
Drummondville, Que.		Canadian Bank of Commerce.
Haileybury, Ont.		Banque d'Hochelaga.
Montreal, Que. (Amherst and Ontario Street)		Banque d'Hochelaga.
Morant Bay, Jamaica		Bank of Nova Scotia.
Plato, Sask.		Northern Crown Bank.
Quebec, Que. (St. Sauveur)		La Banque Nationale.
†St. Alexandre d'Iberville, Que.		La Banque Nationale.
†St. Malachie Station, Que.		Banque d'Hochelaga.
St. Martine, Que.		Banque d'Hochelaga.

Branches Closed—3.

Regina, Sask. (Broad Street)	..	Bank of Ottawa.
St. Justine (Dorchester), Que.		Banque Provinciale du Canada.
Ville Marie, Que.		Quebec Bank.

†Sub-branches.

CLEARING HOUSE RETURNS

The following are the returns of the bank clearing houses for weeks ended August 17th, 1916, and August 19th, 1915, with changes:—

	Week ended Aug. 17, '16.	Week ended Aug. 19, '15.	Changes.
Montreal	\$ 69,935,063	\$ 52,232,179	+ \$17,702,884
Toronto	42,975,807	33,503,589	+ 9,472,278
Winnipeg	44,622,032	14,719,492	+ 29,902,540
Vancouver	5,904,465	5,022,179	+ 882,286
Ottawa	4,480,683	3,368,780	+ 1,111,903
Calgary	4,191,906	2,535,906	+ 1,656,000
Quebec	4,114,028	3,403,419	+ 710,609
Hamilton	3,586,110	3,220,941	+ 365,169
Edmonton	4,055,099	1,720,073	+ 2,335,026
Halifax	2,273,804	2,185,763	+ 88,041
London	1,858,357	1,750,666	+ 107,691
Regina	2,277,233	1,477,138	+ 800,095
St. John	1,836,202	1,499,315	+ 336,887
Victoria	1,478,200	1,328,728	+ 149,562

PREPARING FOR THE FUTURE

In June, Sir George Foster, minister of trade and commerce, announced that his department would convene this autumn a convention of the business men of Canada to advise together "out of their practical and varied experience and knowledge as to the best means of meeting the coming situation and of mobilizing the business forces of Canada so as to employ our labor, increase our production and enlarge our markets along peace lines." The conference has not yet been summoned but will probably be held next month or in October. In the meantime, a memorandum regarding the proposed national trade and commerce convention, prepared by Mr. F. G. McAlister, B.A., has been issued by the department of trade. It suggests that the problems before the business interests of the country may be studied from the following standpoints:—

(a) The standpoint of the various factors that enter into the upbuilding of trade, such as market opportunities at home and abroad, credit information and banking facilities, commercial training, transportation facilities, labor, immigration, industrial equipment, industrial research, and the study of raw materials.

(b) The standpoint of the various classes of goods into which the production of the country falls.

To certain problems, developing from each of these viewpoints, it is proposed to assign a number of committees. It is also suggested that group "b" be confronted with a series of questions. In addition, it is suggested that as a matter of convenience, first in handling the secretarial side of the work, and later in keeping the convention from being swamped by irrelevant suggestions and discussion, a committee on recommendations be appointed, and that to this committee all other committees doing "field work" hand in their memoranda prior to the convention.

The outline contained in the memorandum (which necessarily has been prepared with some haste) as to the work to be done by the Manufacturers' Association, board of trade, committees, and so on, is well defined, but it is intricate and unless the government assigns men in various localities to devote their time during the next few weeks to organize, we fear that the proposed plan will bring little practical result to the convention. There should be government representatives in the leading communities so that the government may make sure of the success of the first gathering here of this kind. A large gathering will not necessarily be a successful one. A meeting attended by men representing the various groups interested—agriculture, transportation, banking, manufacturing, and so on—with speakers who can put their case clearly and concisely, will tend to achieve results. A conference of this kind is not without great effort "rescued from becoming a mere theatre for declamation and debate," to use Sir George Foster's words.

In the meantime, every business man must take an active interest in the matter.

WAR EXPORTS AND PEACE

The total trade of Canada for the twelve months ended June, exclusive of coin and bullion, was valued at \$1,565,436,000. Of this, imports of merchandise represented \$595,921,000 and the exports \$969,514,000. The difference between the value of our imports and exports of merchandise in that period was therefore \$373,000,000. After making allowance for the payment of \$187,000,000 interest charges to Great Britain and the United States, there is a balance of trade in favor of Canada amounting to \$186,000,000.

Of the exports, totalling \$966,514,000, only \$96,000,000 represented the export of foreign produce, the remaining \$873,413,000 being exports of Canadian produce. These were made up as follows:—

Mine	\$ 71,834,835
Fisheries	23,248,778
Forest	53,259,354
Animal produce	108,147,108
Agricultural produce	323,510,530
Manufactures	284,495,047
Miscellaneous	8,917,802

Comparing these figures with those for the similar period of 1914, it is found that our exports of mineral products have increased during the year 22 per cent.; fisheries exports by 15 per cent.; exports of forest products, 23 per cent.; agricultural products, 75 per cent.; animal produce, 96 per cent.; agricultural produce, 75 per cent.; the exports of manufactures, by 365 per cent.; and miscellaneous classes by 4,426 per cent.

Agricultural products represent the biggest item in our exports and probably will always do so. But the fact that Canadian manufacturers have been able to increase their export trade to a volume nearly five times as great as it was two years ago, gives an idea of the productive power of Canadian factories. The present unusual demand for Canadian manufacturers' goods is due to the war. The problem which confronts them is to measure and encourage, at home and abroad, the demand for their goods after the war. Something substantial has to be found to take the place of war orders. How many manufacturers are allowing to-day's prosperity to shadow to-morrow's problems?

ONTARIO POLITICS

In the South-West Toronto constituency of Ontario this week a Liberal candidate defeated a Conservative nominee and transformed a government majority of 4,000 into an opposition majority of 643. This event in a strongly conservative province leads *The Monetary Times*, which has never taken a part in partisan politics, to repeat what was stated in these columns after a similar event in the North Perth constituency of Ontario.

The Ontario government may easily discover the reasons which accounted for the defeat of their candidate by reading the heart of the rank and file. They are ignorant of or blind to the dissatisfaction of members of their own party and of voters at large. The Ontario cabinet has become a bureaucratic institution in a democratic country. That is the verdict of hundreds of Conservatives who will take the strongest possible measures, as they say themselves, "to teach the government a lesson." The dislike of bureaucracy is shared by the opposition and by independent voters who are becoming more numerous as years pass because of the unsatisfactory political state.

The same argument applies to federal politics and to politics in other provinces. The political machine has been running the country, the people being generally regarded as automatic parts of the machine to be cranked at will. While the blame for the present condition rests with the country at large, the time has come when the people are beginning to revolt. They do not like bureaucracy, or premiers (some without backbones, some without honesty), or bribery and corruption in high places, all of which they have had in the last few years in nauseating quantities. If politicians refuse to read the signs they will have to taste defeat at the polls. Defeat of such mistaken ideas of government is good for the country.

INDIFFERENCE TO VITAL STATISTICS

People who would be extremely particular in seeing that valuable live stock is registered, are totally indifferent to the registration of their children. This statement is made in the Public Service Bulletin, published by the Ontario government, and which, among other things, describes the work of the registrar-general. Confirmation is found in this report of the statement frequently made by *The Monetary Times*, that the Canadian people and, to some extent, the authorities, show serious neglect in the matter of vital statistics. These records are of great importance but in this country they lack completeness and uniformity to a surprising extent. "Notwithstanding the fact that there are certain laws and penalties (in Ontario) regarding this very important matter, as well as free forms supplied by the department to facilitate such registration, it is remarkable that a fairly large number of people neglect the matter until threatened with the law," says the report.

Physicians are required by law to notify births which they attend. It is stated that the physician fails to do this "many times." The registrar-general's department then interferes and, as the report says, many a physician has recently been taught by legal conviction that this duty must be carried out. Our governments should not hesitate to exercise to the fullest extent the laws governing the registration of vital statistics.

WESTERN CANADA'S REFUNDING SCHEME

The announcement that the British treasury will to-day withdraw its offer to purchase Manitoba and Saskatchewan securities at 80 plus accrued interest, in connection with the refunding plan of these provinces, is apparently an intimation that the scheme has not proved as successful as was anticipated. The treasury last month stated its desire to purchase these securities but the offer has held good for only a few weeks. The treasury's announcement this week confirms the view expressed in these columns on July 28th to the effect that it was unlikely that large holders of the securities concerned would sell at the price mentioned. The talk of \$36,000,000 of Canadian Western securities, now in London, coming on the New York market during the next few months, as was stated here at that time, should be accepted with reserve. The indications then were that the total amount would be relatively small. This impression is given strength by the British treasury's attitude this week.

It is to be hoped that this new development will counteract the disturbed conditions in the New York market, so far as Canadian securities are concerned—conditions caused by the rumors that a heavy volume of our Western securities were to be placed there.

AGRICULTURE AND MARKETING

Some interesting sidelights were thrown upon the subject of farming at the recent rural conference in Edmonton. Deputy minister of agriculture Craig stated that only 4 per cent. of the cultivatable land of Alberta is at present in use, and he followed this statement with one that farming must be made more profitable and rural life more attractive in order to solve such problems as keeping the boy on the farm. That is a proper view which is slowly gaining ground. Not until governments recognize it and work assiduously to that end will the farmer get the best out of farming and the nation get the best out of the agricultural industry.

The poor methods of marketing constitute one of the drawbacks to the progress of farming. Mr. Craig drew attention, for instance, to such unscientific market processes as the shipping of timothy seed from Alberta to Toronto and the reshipping of some of it to British Columbia for sale. About 100,000 tons of seed were shipped in the grain from Alberta to the Great Lakes ports in one season. While most of these were good for feed, the farmer was allowed nothing for them. There was no loss to the consignees as most of the seeds were ground and sold to the farmers as fancy stock foods.

The industry of agriculture is shackled with poor marketing methods and poor facilities. No other industry would tolerate them for three months. While this factor stays, the price gap between the grower and the consumer will remain and the grower will not receive returns commensurate with the labor and the capital expended and the ability necessary to carry out his work.

QUEBEC NEW GOOD ROADS LOAN

One of the chief questions which will be considered at the forthcoming session of the Quebec legislature will be the proposed new loan of \$10,000,000 for improvement of highways.

MANITOBA CROP REPORTS

Wheat is Unsatisfactory, Oats Very Fair and Barley Moderately Good

After a careful inspection of the province of Manitoba, covering a period of eight days, I regret to say that the condition of the wheat crop in Manitoba is very unsatisfactory, states Miss E. Cora Hind, commercial editor of the Manitoba Free Press. Depreciation from the excellent report of July 23rd is marked. I do not think that it is at all likely that the average yield of the entire province will exceed 11 or 12 bushels at the outside. This is just a little better than half a crop. The average yield of the province of Manitoba, covering a period of 20 years, is 18.98, or practically 19 bushels per acre.

Not Much No. 1 Northern.

Acreage estimated for the present year is 2,994,529, as against 3,332,000 in 1915. At 12 bushels to the acre on this year's acreage the province would have 35,934,348 bushels. This in itself at present and prospective prices would not be bad, if the quality of the wheat was good, but grain men and millers may at once make up their minds to the fact that the percentage of No. 1 Northern will be negligible; and there will be very little No. 2.

There are many thousands of acres which are being and will be mown down and burned as they lie, without any attempt to thresh them. In some districts the farmers have been wise and cut the rusted grain before it went too far and have made it into good feed, figuring that at the present price of labor there was not sufficient in it to pay for cutting and threshing.

Other Crops Fair.

The picture is not all a dark one, however, for while the wheat crop has suffered severely Manitoba still has bread and seed and some to sell. There will be a very fair crop of oats and a moderately good crop of barley. In some sections the early barley is excellent, but in many places it, too, has suffered from rust. There is abundance of hay and root crops, and alfalfa and corn are of the best. Many of the oat crops are late and, therefore, it is a little difficult to make an estimate of the yield, but 45 bushels at the present time does not look too far out of the way. This, on an acreage of 2,062,411, would give 18,608,495 bushels.

REBUILDING NORTHERN ONTARIO TOWNS

The Editor, *Monetary Times*:

Sir,—As it is the intention of the Ontario government to afford assistance in the reconstruction of Northern Ontario, it is reasonable to suppose that they will exercise some control wherever they make advances for this purpose.

It is to be hoped that the lunacy of building frame rows will not again assert itself, to the almost dead certainty of sweeping fires destroying properties and endangering lives. I do not know what the conservation commission may be doing, but the fire in the parliament buildings and the conflagration in Northern Ontario are not testimonials to their efficiency.

There is now an opportunity for the assertion of some authority and some usefulness on their part in preventing the suicidal erection of buildings which not only endanger others, but prevent the construction of good buildings to stand helpless against the assaults of flames from frame buildings adjoining them. No frame or shingle-roofed building should be allowed within twenty-five feet of any other erection, and every proprietor should be required to keep ready for instant use pails for the purpose of extinguishing fires and hooks for the demolition of sheds, etc.

Henry Lye.

Vancouver, August 16th

Mr. Lye has been writing on fire prevention topics for forty years and is well known in fire insurance spheres.

Mr. E. R. Peacock, Toronto, chairman of the bondholders' committee of Mexico Tramways Company, who has for some time been in London in connection with the affairs of the bondholders, has returned to Toronto.

WHEAT PRICES AT HIGH LEVEL

Montreal Authority Estimates Smaller Crop but Good Prices

Mr. James Carruthers, Montreal, who is in touch with the grain situation throughout Canada, has issued the following authoritative survey of conditions:—

"The crops of the province of Manitoba are badly damaged from rust and the probabilities are that the yield will only be about half as great as a year ago, while the quality will be very poor, being principally No. 3 Northern and under."

"Saskatchewan and Alberta promise better, but harvesting has only commenced, and it all depends upon the weather for the next two weeks as to what these provinces will yield."

Total Yield Estimates.

"A good many guesses are made as to what the total yield will be for the three provinces and these range from 165,000,000 to 200,000,000 bushels of wheat, but until the wheat is actually thrashed, it will be difficult to tell just what the crop will yield, as there is no doubt that the quality has been cut down all over the three provinces."

"If the European war continues until next year, present prices are justified, as the United States will have very little surplus for export this year. Therefore, I believe prices will be on a high level this year."

"The oat crop is fair, but the yield is nothing as high as last year."

"Hay crop is magnificent all over the three provinces."

Prices Will be Higher.

"With the probability of high prices for grain this coming season, the Canadian farmers should make up in price what they lose in yield, although the railways will not have anything like the quantity of grain to carry this year as compared with last."

"The reports I got from the United States north-west are very bad and the chances are that Minneapolis mills will be buying Manitoba wheat later on and paying the duty."

ONTARIO FIRE INSURANCE ENQUIRY

The first sitting of the commission recently appointed by the Ontario government to inquire into the matter of fire insurance rates and kindred topics will be held on Tuesday next at the Parliament Buildings, Toronto. The official announcement appears on page 33.

GRESHAM LIFE ASSURANCE SOCIETY

Among the active British life underwriting corporations in Canada is the Gresham Life Assurance Society, Limited. Last year this company wrote through its world-wide connections \$6,144,760 in new assurances. The society in Canada steadily maintains its stride under the management of Mr. Arch. R. Howell. The balance sheet under consideration shows assets totalling \$54,917,890. The investment reserve account is shown as \$1,996,765. Death claims amounted to \$2,132,900. The ratio of the company's expenses to premiums was 19.4 per cent.

ARE CANADIAN SECURITIES AFFECTED?

Following a cable announcing that the British treasury would withdraw its offer for Saskatchewan and Manitoba bonds to-day, the gist of which transaction appears on page 29, a Canadian Press despatch says: "Further measures are contemplated by the British government to bring about the mobilization of such Canadian and neutral securities as have not been turned over to the government. In the house of commons the chancellor of the exchequer, Reginald McKenna, said it was the intention of his department to apply to parliament for the power to impose a further income tax of two shillings on the returns from all such securities which have not been deposited with the treasury. He added that he trusted everyone would realize it was a public duty to deposit securities without delay."

NEW INCORPORATIONS

Twenty-eight New Charters—Export Companies at Montreal

Canada's new companies incorporated this week number 28. The head offices of these companies are located in four provinces. The total capitalization amounts to \$4,579,700.

The largest company is:—

Tashorn Mines, Limited \$3,000,000

Grouping the new concerns, according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	12	\$3,554,700
Quebec	4	370,000
Saskatchewan	8	415,000
Manitoba	4	240,000
	28	\$4,579,700

The following is a list of charters granted during this week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Regina, Sask.—The Peoples Grocery, Limited, \$20,000.

Hughton, Sask.—The Bourbon Farming Company, Limited, \$105,000.

Estevan, Sask.—The Lignite Briquette and Power Company, Limited, \$100,000.

Bristol, England.—William Cowlin and Son (Canada), Limited, £20,000 (\$100,000).

Galt, Ont.—United Films, Limited, \$49,000. M. C. McInnes, A. P. Gaver, H. O. Pierce.

Berlin, Ont.—Huck Glove Company, Limited, \$50,000. J. A. Huck, W. J. Motz, Mary Huck.

Emily, Ont.—Omeme Telephone Company, Limited, \$2,700. S. T. Connell, H. J. Jones, J. H. Thorn.

Owen Sound, Ont.—Jackson Telephone Company, Limited, \$8,000. W. Caswell, G. R. Hewitson, W. H. Marshall.

Ottawa, Ont.—The Second Avenue Land Company, Limited, \$75,000. R. Mulhall, Alice E. Mulhall, J. H. Ferguson.

Bridgeburg, Ont.—Canadian Chicago Bridge and Iron Company, Limited, \$100,000. G. T. Horton, R. H. Murray, M. B. Horton.

Moose Jaw, Sask.—McKinney Iceless Refrigeration Company, Limited, \$40,000; Sterling Coal Company, Limited, \$20,000; Moose Jaw Poultry, Pigeon and Pet Stock Association, Limited, \$10,000; W. B. Hooker and Company, Limited, \$20,000.

Winnipeg, Man.—The Consolidated Stationery and Fancy Goods Company, Limited, \$75,000. A. E. Hamilton, W. J. S. Scrimmes, W. W. Scrimmes; the Hadden Manufacturing Company, Limited, \$60,000. J. Hadden, Mabel Hadden, Lily Genser; Wellington Pharmacy, Limited, \$5,000. A. Ellison, O. Margolese, Rose Ellison; A. R. Davidson, Limited, \$100,000.

Montreal, Que.—Boss Lock Nut Company of Canada, Limited, \$50,000. G. R. Drennan, F. G. Bush, F. B. Common; the Land Securities Company of Canada, Limited, \$200,000. K. W. Blackwell, F. H. Wilson, A. A. Allan; Anglo-Canadian Export Company, Limited, \$50,000. A. P. Mathieu, G. W. Singleton, W. T. Curran; Overseas Export Company of Canada, Limited, \$100,000. H. J. Elliott, J. S. Lamarre, E. C. Baker.

Toronto, Ont.—B. Weiss and Son, Limited, \$45,000. H. L. Steele, J. Weiss, J. M. Bullen; Guaranty Securities Corporation, Limited, \$150,000. Elizabeth Knox, Emma P. King, Eva Levitt; Lincoln Electric Company of Canada, Limited, \$40,000. G. Hunt, L. G. McAndless, Clara Secombe; James, London and Hertzberg, Limited, \$20,000. J. T. Howard, E. A. James, Kate M. James; Lindsay Estates, Limited, \$15,000. A. A. Scully, Janet M. Young, Irene Rouse; Tashorn Mines, Limited, \$3,000,000. A. D. Crooks, A. W. Roebuck, W. C. Wickett.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Civic Investment and Industrial Company.—The company's stock was listed on the Montreal Stock Exchange on Tuesday last. This listing is the largest since the \$60,000,000 issue of Canadian Pacific Railway in 1913. The authorized issue is \$75,000,000, of which \$58,803,600 has been issued. The amount listed is \$56,025,000.

Canadian Car and Foundry Company.—The negotiations between the representatives of the Canadian Car and Foundry Company and the new Anglo-Russian Commission in New York, have been completed. By the arrangement, the car company obtains an extension of time for the carrying out of the big Russian contracts. In addition, an agreement has been made regarding all differences respecting interest on moneys. It is considered that the basis of agreement will enable the car company to carry through its entire contracts in a satisfactory manner to the company itself.

Price Brothers, Limited.—In connection with the offering of \$500,000 6 per cent. notes by the Royal Securities Corporation, it is stated Price Brothers' annual output, with additions under construction in operation, will be 100,000,000 ft. b.m. of merchantable lumber, 72,000 tons newsprint paper, 58,000 tons ground wood pulp, 25,000 tons sulphite pulp. The present output of newsprint is 57,000 tons per annum, and 45,000 tons of ground wood pulp. The proceeds from sale of the \$500,000 note issue are to be used for installation of additional paper making unit, construction of a storage dam, etc. The company has sold at advantageous prices, its pulp and paper output for six months to come and its lumber output for the current year has practically all been sold at profitable prices.

Canada Bread Company.—The company's manufacturing profits for the year ended June 30 were \$223,771, as compared with \$287,195 in 1915.

Bond interest and preferred dividends absorbed \$159,321. Depreciation allowance was \$50,000, and for bond redemption there was allotted \$12,500. The return compared with that of the previous year is as follows:—

	1916.	1915.
Manufacturing profits	\$ 223,771	\$ 287,195
Bank interest earned	10,579	10,760
Bond discount and interest ...		769
Total profits	234,350	298,724
Interest on bonds	71,821	72,235
Preferred dividend	87,500	87,500
Expenses and patents written off		10,000
Income, less bond interest and preferred dividend and before any writing off	75,029	138,989
Per cent. on common	3	5.15
Depreciation	50,000	50,000
Bond redemption reserve	12,500	40,700
Carried forward	105,993	93,464
Cash on hand	198,037	281,453
Active assets	339,628	424,091
Invested assets	5,070,491	4,965,448
Total assets	5,410,119	5,389,540
Current liabilities	102,039	143,054

Mr. Mark Bredin, in his report, refers to the labor shortage and announced that the company would subscribe for \$100,000 of the new Dominion war loan. The annual meeting of the company is to be held September 7th.

SECURITY HOUSES AND WAR LOAN

How They Helped to Distribute the First Loan—Question of Advertising Salesmanship

Discussing the work of the security houses in relation to the war loan, Mr. R. D. Bell, of Montreal, writes:—

The country is now awaiting a new war loan which in point of size and interest rate will doubtless be similar to the last one. When the first loan was announced there was much doubt as to the nation's ability to absorb it. At the time we pointed out that the general investment and trade position assured the success of the proposed loan of \$50,000,000, although we had hardly anticipated that the demand for the loan would be so great as to call for double that amount. To-day the capacity for absorbing another hundred millions is beyond doubt, thanks not only to the general position but also to the fact that the last loan has now been thoroughly distributed. The real success of a bond issue is measured not only by the amount of original applications but also more importantly by the subsequent market for the issue and the ability of the public to absorb another one later on. In this connection we do not think that the work accomplished by the security houses has been fully appreciated.

Distribution of Issue.

The essence of the success in any security issue is that element known as distribution—i.e., the lodgment of each unit in the hands of the ultimate consumer for permanent investment. In the last loan a great proportion of the applications were made, first, by the banks, whose magnificent assistance did much to assure the original offering but who naturally did not buy to keep all of their subscriptions unless necessary. There were also many applications, aggregating probably a large amount, by individuals, business firms and institutions who appreciated the prestige of subscribing or who subscribed merely to help out with the intention of selling later on if possible. There were also applications of those who subscribed with the intention of keeping their investment.

Bulk of Nation's Investment.

If the distribution of the war loan had stopped there it would not be possible to-day easily to sell another one, nor would the issue subsequently have been maintained in the open markets at a premium over the offering price. The government's work was done and the work of the banks was done but the work of the security houses was but half finished. From that time until to-day by salesmen, advertising, circulars and correspondence the security houses, through whom the bulk of the nation's investment is done, have worked to complete the necessary distribution of the war loan. We estimate that a greater amount of war loan bonds passed through the security houses since the original issue than during the offering week, and that the greater part of the hundred millions was eventually handled by the security houses. The work was not profitable as distribution involves a greater cost than the commission basis covers, but it served the customers of the houses by giving them an excellent investment and it served the nation by providing the necessary resting place for the entire issue.

First Loan Thoroughly Distributed.

To-day the last war loan can be said to be thoroughly distributed; it has passed out of the hands of those who bought for temporary investment into the hands of the ultimate consumer. The decks of the banks are clear for another participation. The loan is held to-day in small denominations and among a great many more people than immediately after the original offering.

As a result, the government can now approach the public with a new loan of great size with confidence that the market can absorb it.

This time the government is apparently taking steps to assist in the actual merchandising of the loan and the premonitory advertisements now appearing are, we hope, only initial efforts to that end. We trust that the actual offering of the issue will not be confined to a mere technical prospectus. The example of the British government in using real advertising salesmanship to distribute its war loans can be profitably followed, concludes Mr. Bell.

The attention of *The Monetary Times* has been drawn to the fact, in this connection, that concurrently with the

arrangements for the new British loan in the United States, the British government has carried on an advertising campaign for the sale of its 5 per cent. exchequer bonds in the United States. The advertising was designed to appeal to Britons overseas and apparently was a hint to such not to subscribe to the new loan in the United States.

CANADIAN CAR AND FOUNDRY'S NOTES

An issue of \$1,000,000 one-year debenture notes of the Canadian Steel Foundries, Limited, endorsed by the Canadian Car and Foundry Company, Limited, were made a year ago. Mr. F. A. Skelton, secretary-treasurer of the latter company, informs *The Monetary Times* that of these notes \$380,000 have been retired and \$120,000 more will be retired by September 30th. The balance will either be retired at their maturity date in October, or arrangements made to renew same.

GROUP INSURANCE REGULATIONS

Much interest has been shown in Canada in what is generally known as group insurance. The applications for this class of business received by the Prudential Insurance Company of America are subject to the following general regulations:—

Each group must consist of the employees of a single person, firm or corporation, numbering not fewer than 100, and the transaction must be made with the employer, who will be responsible for the premiums. The insurance will cover all the employees, except that at the option of the employer only those employees who have been in the service for some minimum period, such as six months or a year, may be included in the group.

The amount insured on each life is to be fixed at the discretion of the employer, and may be uniform, for example, \$500 or \$1,000, or graded according to class of occupation, period of service or amount of salary or in such fashion as may best suit the particular organization in question. No greater sum than \$3,000, however, will be insured on any individual life, and, except in special cases, the minimum insurance will be \$250.

Provision is made for insuring employees who enter the service after the issue of the group policy, and also for increasing the insurance, according to schedule, where the amount of insurance on an individual life is graded according to some definite plan that calls for increases from time to time.

If a preliminary investigation proves satisfactory, the company will issue the group policy without medical examination of the individual employees, but additions to the amount of insurance by way of either granting insurance on new employees or increasing the insurance on present employees, will be granted only upon evidence of insurability acceptable to the company, which may necessitate, at the company's discretion, the satisfactory passing of a medical examination.

Rates of premium will depend upon the ages of the employees, and will vary according to the nature of the occupations of the employees, and will be quoted after proper investigation and classification of the risks included.

Provision is made for an employee who may leave his employment after having been insured for at least one year to have the right to take out a policy for the amount of his insurance at the regular rate of premium, for his occupation, without medical examination, and so continue his protection even if then uninsurable.

A disability clause provides for payment of the amount insured in instalments extending over five years upon disability prior to age 60 of male employees.

All group insurance policies will be issued on the annual dividend, one-year renewable term plan. Premiums are ordinarily payable yearly in advance, but in special cases quarterly or monthly premiums will be accepted.

Regulations as to military and naval service in time of war provide for permission to engage in such service upon application to the company and payment of any extra premium which may be charged.

Claim-settlement options will be of the same form as those under the Prudential company's intermediate policies.

It is not the desire nor the intention of the Prudential company to substitute group for individual insurances.

THE HOME BANK OF CANADA

ORIGINAL CHARTER 1854

QUARTERLY DIVIDEND NOTICE

Notice is hereby given that a Dividend at the rate of FIVE PER CENT. (5%) PER ANNUM upon the paid-up Capital Stock of this Bank has been declared for the THREE MONTHS ending the 31st August, 1916, and that the same will be payable at the Head Office and Branches on and after Friday, the 1st of September, 1916. The Transfer Books will be closed from the 17th to the 31st of August, 1916, both days inclusive.

By Order of the Board,

JAMES MASON,

LOW INTEREST ON DOMINION LOANS

Correspondent Suggests that Government Annuities Should Be Medium for Raising Money

BY ED. RUTHVEN.

On money borrowed direct from the public by means of such a war loan as is now in course of flotation the Dominion government pays nominally 5 per cent. yearly. The real rate of interest, if we allow for charges, such as brokerage, expense of administration and bonuses to borrowers, is within a fraction of $5\frac{1}{2}$ per cent.

This is a high rate of interest for so solvent a borrower as the Dominion of Canada to pay; it would have been regarded as high even so lately as three years ago.

Through the post-office and other savings banks, the government borrows about 50 millions at 3 per cent., or, with expenses added, less than four per cent. Unfortunately, it seems hardly probable that this form of borrowing can be greatly extended; nobody has a plan to "boost" the government savings banks.

But there is a method of governmental borrowing which might be extended without limit and at a saving of interest amounting to not less than 20 per cent. of the present interest charge on the public debt. This method is by the extension of the system of government annuities.

Active Correspondence Campaign.

Like the North-West Mounted Police and the Hydro-Electric, the government annuity is a Canadian institution. The system was set going in 1908 with the avowed object of making it Canada's answer to the ever-present problem of old-age pensions. A feeble attempt was made at first to push the scheme by means of paid lecturers, but about four or five years ago this form of propaganda was replaced with a poster campaign. This also seems to have been abandoned. The annuities branch is now attached to the post office department and depends for its publicity upon the post office, together with an active letter-writing campaign by the officers of the branch who seem to be enthusiasts in their line.

All told, the Dominion government has taken in as payments for annuities—that is, it has borrowed by this means from the people of Canada—about \$3,100,000. Say \$100,000 of this capital sum has been returned in annuity payments, leaving the net amount of borrowings through the annuities at \$3,000,000. The interest rate allowed is 4 per cent. There are no bonuses of any kind. Also there are no brokerages or expenses except those of administration. Whether we count the expenses as a percentage on the total amount borrowed or whether we count them as a deduction from each year's business and charge the 4 per cent. on the net amount of the year's borrowings, it works out to practically the same thing—the net charge upon the amount of this loan is $4\frac{1}{2}$ per cent., or about 1½ per cent. less than the charge for the big war loans that are floated in these latter days.

In Favor of Annuities.

The saving effected by borrowing by government annuities instead of by war loan would amount to more than \$600,000 on the pending flotation of \$50,000,000. That is to say, if borrowing by government annuities and by war loan were otherwise equally desirable, the government could make money by paying anything up to \$600,000 a year, or the present worth of that payment, if thereby it could sell annuities to represent borrowings to the amount of the pending loan.

But the two plans are not otherwise equally desirable; there is a great, almost infinite balance in this respect in favor of the government annuities.

Looked at first from the point of view of the government, two considerations command special attention. The first is that the money raised by the sale of government annuities is borrowed from the mass of the people direct instead of from the banks, insurance companies and large investors. It is a commonplace of banking that the more a loan can be spread the better for the borrower. Again, borrowing on annuities instead of on bonds means that the debt is self-liquidating or, if we prefer so to regard it, the money is borrowed in perpetuity, for if the system were popularized the increase in the country's population would mean that for every dollar paid back to an annuitant two dollars or more would come in from new purchasers.

Then, look at it from the point of view of the people as a mass. Here also two points are obvious. First, the extension of any system of old-age pensions means that fewer people are left anxious as to their future or burdensome upon their friends or the community when that future becomes the present. Second, the money put into annuities is quite different from that put into bonds. A bank, insurance company or private investor buying stock in the war loan uses money taken from some other investment. But the money put into government annuities is really of the character to which the good old adage applies—"A penny saved is a penny gained." If ten thousand people could be miraculously led to begin the purchase of government annuities at 10 o'clock to-morrow morning, 90 per cent. of the money of the first payment, and about 100 per cent. of all future payments, would be money that otherwise would be fooled away or worse. Other advantages in government annuities as against war loans will naturally suggest themselves.

The question that arises, then, is this: Can money in large sums be borrowed by the Dominion through the system of government annuities?

Many people will say, No, at once. A few may say, Yes with as little hesitation. But possibly Pope's oft-quoted words about fools and angels may have some application here. Obviously, it would be the height of folly to say that a plan untried yet involving manifest difficulties would certainly succeed. On the other hand, there are many facts within common knowledge which must afford encouragement to those who think the scheme worth trying.

Effort to Popularize System.

First, there is the government annuities system itself. Every citizen of Canada is witness to the very infantile effort to popularize the system. Yet money is now coming in at the rate of \$400,000 a year and the business is steadily, though slowly, increasing. If we consider the small beginnings of banking, insurance, or any other form of finance, it is not hard to imagine that, with a vigorous propaganda behind it, the system of government annuities might also grow to great proportions? It is freely predicted that Canada's public debt will be \$1,000,000,000 at the end of the war. That is a tremendous sum. But the total of money in the savings banks at the credit of Canadians is millions greater. The total of life insurance policies carried in the regular companies is also greater than this impending debt. When so much has been accomplished by private initiative and enterprise, surely something of the same kind can be worked out by the government in a matter so obviously to their own advantage, as well as to the advantage of all the individuals making up the Canadian community, as the extension of the government annuities system.

Government Advertising Campaigns.

The government thinks it worth while to spend \$50,000 upon an advertising campaign for thrift and production. No doubt the campaign was greatly successful. But if a thrift campaign were launched with ten times that money behind it every year and were given special point and purpose by being directed to the selling of government annuities, is it not obvious that a great deal of money indeed would be saved by the people that now is lost and would be placed in the government's hands as an annuity fund?

There are single agencies of single life insurance companies in the United States that collect millions of dollars a year for business actually created by themselves. Is it unreasonable to believe that the whole Dominion of Canada could be made to yield tens of millions a year for annuities?

If all the expected public debt could be incurred on government annuities, instead of on war loan bonds, the saving in interest alone would be over \$10,000,000 a year. It may not be possible to save the whole of this vast sum, but it would be worth a great deal of trouble to save any considerable part of it.

The Scottish Union and National Insurance Company has been licensed to transact automobile insurance in Canada in addition to its present business of fire, tornado and sprinkler leakage insurance.

An issue of \$500,000 6 per cent. first mortgage serial bonds of Smart-Woods, Limited, particulars of which have appeared in *The Monetary Times*, is being offered in the United States by Messrs. Peabody, Houghteling and Company, Chicago.

NEW BRITISH LOAN

Successful Offering this Week—Some of the Notes May Find Way Here After Our War Loan

The offering of \$250,000,000 2-year 5 per cent. gold notes in the United States this week is naturally the chief event in the bond market. The notes were underwritten at 98, being oversubscribed, as stated in *The Monetary Times* last week, and were offered at 99 less a selling commission of $\frac{1}{8}$ of 1 per cent. to dealers.

The syndicate books for the underwriting were closed on August 18th, with applications for an amount considerably in excess of the total available. No effort was made by J. P. Morgan and Company to get a large number of participants, it having been decided in advance to limit the underwriting to a small number of firms and many of the subscriptions will not be entertained. Other applications will be cut down it is said. Requests from many investors were also received for the notes at the offering price of 99. The books for the public subscription were opened this week.

The semi-official intimation from Ottawa recently that government securities issues made in the United States purchased by Canadians, may possibly be taxed when held in Canada, has naturally prevented any important volume of the present British loan being purchased here. The finance minister also made recently a specific request that foreign government securities issued in the neighboring republic, should not be bought by Canadians. Sir Thomas White then pointed out that on account of our rapidly increasing war expenditure and the heavier demands which the future will make in this respect, it is of supreme national importance that the financial resources of Canada should be conserved for our own purposes, and that as much as possible of the national debt should be held in Canada. He added that there is an abundance of capital in the United States to absorb all issues made in that country, and the allied interests will not, therefore, suffer through Canadians refraining from participation and husbanding their resources to meet their own national needs. Under the war measures act the government has power to prohibit the offering of foreign securities in Canada, as has been done in Great Britain, but has preferred to rely upon the patriotism of the Canadian investing public rather than to adopt repressive measures.

Some May Come Here.

It is thought, however, that some of this loan will find its way to Canada in the future, after the forthcoming domestic war loan has been fully subscribed. Banks, insurance companies and other institutions are preparing to take large blocks of the domestic war loan. Aside from that, they have heavy funds for investment and some of those funds may find their way into the new British loan.

The collateral securing the notes consists of stocks, bonds and other securities in United States corporations to the aggregate value of not less than \$100,000,000, calculated on the basis of prevailing market prices; bonds or other obligations of the government of the Dominion of Canada, either as maker or guarantor; and stocks, bonds and other securities of the Canadian Pacific Railway, with a marketable value of not less than \$100,000,000; and bonds or other obligations of Argentina, Chile, Norway, Sweden, Switzerland, Denmark and Holland, to the aggregate value of not less than \$100,000,000.

Announcement will be made later on of the names of the securities that are deposited as collateral for the \$250,000,000 British loan, but the amounts of the issues will not be given. The bankers as yet do not know just what securities will be back of the loan or how much other New York Stock Exchange collateral will have to be deposited temporarily, pending the arrival of the permanent collateral from England.

Inclusion of Canadian Pacific Stock.

The inclusion of "stock, bonds and other securities" of the Canadian Pacific Railway, side by side with Dominion of Canada bonds, as the only Canadian collateral in the loan is regarded here as an indication of the high standing of Canadian Pacific Railway credit in the world's money markets. Canadian Pacific issues were readily available from the London borrower's viewpoint, because of the large British holdings of all classes of the company's securities. From the United States lenders' viewpoint, they were apparently very desirable as representing an undertaking whose high standing has appealed to United States judgment.

Pending the arrival and deposit of a portion of any of the collateral in the three groups, the British government undertakes to deposit temporarily with the Farmers' Loan and Trust Company either approved New York Stock Exchange collateral, or cash, or both.

Provision is made that from time to time the British government may sell for cash any of the pledged securities, in which event the proceeds of sale shall be received by the trust company and applied to the retirement of notes by purchase, if obtainable at or below the redemption price, or otherwise by redemption by lot at such redemption price.

It is also provided that, with the approval of J. P. Morgan and Company, substitutions of collateral may be made, such substitutions, however, are not to vary with relative amounts in value of the three several groups above mentioned. The notes are secured equally and ratably by pledge with the Farmers' Loan and Trust Company of the above-mentioned collateral.

If Values Depreciate.

If the pledged securities shall depreciate in value because of the change of market price or rate of exchange, so that the 20 per cent. margin becomes impaired, the British government will deposit additional securities, so that at all times securities of a value in New York City equal at least to 120 per cent. of the amount of the loan shall be held.

At the option of the British government, notes will be redeemable, full or in part, on thirty days' notice, on any day until and including August 31, 1917, at 101 and accrued interest and on any day thereafter until and including August 31, 1918, at 100 $\frac{1}{2}$ and accrued interest. Both principal and interest are to be payable in New York in United States gold coin, without deduction for any British taxes, present or future.

The syndicate which has been formed to underwrite the notes at 98 will expire October 1, 1916, unless sooner terminated by the managers.

Associated with J. P. Morgan and Company in offering participation in the syndicate are the First National Bank, National City Bank, Harris Forbes and Company, William A. Read and Company, Brown Brothers and Company, Lee, Higginson and Company, Kidder, Peabody and Company, J. and W. Seligman and Company, Guaranty Trust Co., Bankers' Trust Company, Farmers' Loan and Trust Company, Central Trust Company, of Illinois, Chicago and Union Trust Company, of Pittsburgh.

NEW SOUTH WALES ISSUE POORLY RECEIVED

The New South Wales issue in London at 5 $\frac{1}{2}$ per cent. resulted in the underwriters taking 80 per cent. of the total of £2,500,000 anticipated. The underwriters will gradually place the bonds with investors.

COST OF LIVING

The index number of the Labor Department for the month of July indicates that the cost of living is dropping slightly. This applies both to the budget of retail food prices and to the index number of wholesale cost.

A list of thirty staple foods cost \$8.46 in July, as compared with \$8.51 in June, \$7.80 in July of 1915, and \$7.42 in July of 1914. The wholesale price index number stood at 178.8 for July, compared with 180.6 for June, 150.2 for July, 1915, and 134.6 for July, 1914.

In retail prices, mutton, salt pork, milk, butter, potatoes, beans, evaporated apples and prunes declined slightly, but beef advanced somewhat. In wholesale prices, fodder, cattle and beef, sheep, fresh fruits, soda, raw silks, jutes, tallow, metals, chemicals, and raw furs averaged lower, but grains, hog products, dairy products, vegetables, breadstuffs, woollens, cottons, flax products, leather, implements, paints, oils and glass, iron beds and sundries averaged higher. Retail prices in coal and wood also averaged higher.

As compared with July of last year prices were higher in all groups except grains and fodder. In the retail prices of foods all commodities were higher than in July, 1915, and July, 1914, except milk. Rents, however, averaged lower.

FOR SMALL INVESTORS

To bring mortgage investments of the highest grade within reach of those who are only able to invest from \$500 to \$5,000, this Corporation offers a plan of investment by which the investor is guaranteed security and a good rate of interest. This

Guaranteed Investment Pays Five Per Cent.

Each investment of this class is secured by first mortgage on improved property, which stands as security during life of the investment.

PREPARING FOR GREATER PRODUCTION

Economic and Development Commission Will Investigate Future

The order in council by which the economic and development commission was appointed covers a great variety of important questions, such as the whole field of agriculture, colonization, immigration, labor, employment for returning soldiers at the end of the war, improvement of highways, branch railway development, the attraction of capital in the country, and the extension of trade relations, and as all Canadians are affected the commission is desirous of all possible information and assistance in their research. The order in council states in part that the need is everywhere recognized of stimulating greater production in Canada, and especially agricultural production, the immense importance of which has been emphasized by reasons of conditions arising out of the war.

Problems of Production.

In connection with opportunities for increased agricultural production it is necessary to bear in mind the importance of: (a) Improved methods of production with a view to a better return to the producer; (b) assisting this purpose by proper instruction and demonstration; (c) increasing the acreage under production; (d) attracting immigration of a type which would aid in ensuring a large and permanent agricultural population; (e) stimulating and encouraging co-operation among the producers; and (f) providing cold storage and abattoir facilities.

Prime Minister Borden observes that the agricultural production of Canada is of a highly diversified character and is spread over a great territory comprising an enormous area of fertile land of which only a small percentage is at present tilled.

The conditions of soil, climate and situation are so varied as to emphasize the necessity of pursuing methods of cultivation and purposes of production which are especially suited to any particular locality under consideration.

The great area of territory embraced within the Dominion creates unusual problems which affect: (a) Distribution of products in our home markets and the trade thus created between the several provinces and their various communities; (b) the transport of products to our national ports from which they shall eventually reach their destination abroad; and (c) their transport to the market of destination abroad.

Encourage Canadian Manufacturing.

The Prime Minister states that so far as is compatible with conditions herein mentioned it is manifestly in the public interest that before export the product should be converted through manufacture in Canada into the form in which it is proposed to be consumed or used; thus encouraging and stimulating those industries subsidiary to agriculture which can be carried on successfully in the Dominion.

Important questions as to the marketing of our food products, including consideration of the time at which and the methods by which this is accomplished, should receive careful attention. The value of co-operative efforts among the producers, and the importance of reducing the present great discrepancy between the price received by the producer and that paid by the consumer, should not be overlooked.

It has been represented to the government that large numbers of persons who before emigrating to Canada had been engaged in agricultural pursuits, have not settled upon the land in Canada, but have been attracted by the opportunities for obtaining high wages in cities and towns and in the construction of railways and other works. The opportunities for thus obtaining work have recently become considerably restricted and this result has brought about a greater degree of unemployment than usually prevails. It further appears that large areas of land for which homesteaders have secured patents are not under cultivation, and it is considered that the causes which have led to these results are a proper subject for thorough inquiry. In this connection inquiry should be made as to the means by which and the lines upon which the federal government, whether upon its own sole initiative or in co-operation with provincial governments can best carry out an effective scheme of colonization or land settlement at the close of the war.

The return to Canada, after the conclusion of the war, of the Canadian troops, and the probable immigration into Canada of other British soldiers and of men from the allied armies, after peace shall have been established, should also engage the attention of the commission in order that every reasonable opportunity through the assistance and co-operation of the federal and provincial governments may be afforded to those who may seek employment.

Transportation Is Under Notice.

The question of transportation, whether by land or water carriage, is for reasons above indicated closely connected with the problems under consideration. With this should be considered the advantages which would undoubtedly be derived from permanent improvement of highways which are in truth an important part of our transportation system.

The approaching completion of two additional trans-continental railways is a very important element in our transportation problem. It has been represented to the government that their construction has considerably anticipated the present capacity of the Dominion to provide traffic for trunk lines; while on the other hand important portions of newly settled territory are without the facilities which would be afforded by branch lines incident to a more carefully considered system of railway development. The condition thus created invites the careful attention of the commission.

Canada Will Yet Borrow.

As Canada has been and will be for many years a borrowing country requiring capital for extending and developing its agricultural and manufacturing industries, and as the securing of capital at reasonable rates of interest is essential for increased production and continued progress, this subject should also be taken into consideration. It is to be observed that no proposal which would deter capital from seeking investment in this country, or which would unfairly affect that already invested under established conditions would in the final result assist Canadian producers in any branch of industry.

It seems reasonable that under the conditions which have developed during the past six months opportunities will arise for widening and extending our markets to the advantage not only of Canada but of the countries and communities with which trade may thus be created or extended. The steps already taken by the government for that purpose should be brought to the attention of the commission and their consideration invited.

WILL THERE BE A TRIPLE TARIFF?

Speaking at a conference of city business men in London, England, Mr. J. W. Woods, of Toronto, chairman of the Canadian trade commission, stated that the impressions they had derived from their visit to the continent would be of great service in arriving at a wise conclusion on fiscal matters.

There could be no doubt that after the war the United States and Japan would be able to manufacture so cheaply that Great Britain would have to reconsider her position. In France and Italy the prevalent idea was that there should be a triple tariff, the highest for Germany and associates, the lowest for the Allies, with a middle tariff for neutrals. Great Britain should now declare her policy. A question of such magnitude as the tariff ought to be taken out of politics and dealt with in a sensible, scientific way. The adoption of free trade by Canada, he was quite sure, was out of the question.

Mr. T. H. Wardleworth, of Montreal, related how, when Canada gave a preference to the mother country, Germany replied by putting a heavy surtax on German goods. The result was that in one year German exports to Canada shrank 60 per cent. After the war there would be serious labor problems in Great Britain. He thought they would best be solved by fiscal reform. Only in that way could trade be retained. The cost of transport would also require serious consideration, because the German rate of freight was more to the advantage of buyers.

Mr. Faithful Begg held out little hope of the adoption of a triple tariff while there was such a strong undercurrent of free trade, nor did he believe it possible to take the tariff out of politics, because "politicians had too much original sin."

MORE PRODUCTION FOR EMPIRE

Suggestions for Solution of Canada's After-War Problems

Have we not in the past made something of a fetish of trade? asked Sir George E. Foster, minister of trade and commerce, recently, in an address at the Royal Colonial Institute. You have your own opinions about free trade. You have a right to them, but these are times which tend to loosen the soil of our minds, and even Free Traders may find it necessary to modify their theories. We talk of trade, we struggle and fight for trade. We have gone a long way in the past to exalt a subsidiary thing into a primary thing, and we ought to revise our ideas. What is trade after all? It is only an incident. If we make it the ultimate end we are on the wrong track. Trade is simply the handmaid of a royal mistress whose lineage goes back to the primal days and whose stock will not run out while the world lasts. That royal mistress is production. Trade and more trade you call for because of the profit you make.

Develop Primary Resources.

Production and more production should be the slogan in order that the primary resources of the empire may be developed. Developed for what purpose? Not simply that individuals shall make millions to go to their heirs, not that some firms shall derive immense profits. Profits are good, let them go to those that deserve them in good measure, but the idea to be kept in view is that development and production and trade by which it is brought about are all subsidiary to something else, and that is the national welfare, the good of the nation, a great practical, concrete thing, the uplifting of the nation. Men at the head of mighty establishments and great businesses have said: "I hope that this war will teach us the higher things—teach us to value the intermediary things for what they are worth and no more, and to work in earnest unselfishness henceforth for the uplift of humanity."

Define our Attitude.

We must, said Sir George, define our attitude towards the enemy. Does that need many words? Sometimes he thought No; sometimes, Yes. Make no mistake; right in cherished Britain and in every outpost of the Empire, there are men, and not a few, who will meet you with this statement: "When war is over we cannot, of course, cherish hatreds. The world is, after all, one family. We shall need what Germany can give. Germany must be allowed to recuperate and rebuild. Let things when peace comes go on as before." There are men, not a few, who are striving for that to-day, and who will strive for it to-morrow. And you have to be up and wide awake in order to counteract that influence. I am not an apostle of the doctrine of hate. But I have a memory. I propose to keep it. I am not going to forget what the Germans have done in ignoring sacred pacts, in tearing up treaties, in outraging the humanities, in wholesale looting, cruel and ghastly barbarity, and in that, worst of all, treachery to the sacred claims of friendship and hospitality, under cover of which they wrought their infamies. These are things I do not propose to forget. Do you?

Eliminate the German.

The revelation that has been made of the German heart and the German purpose in these two years of war is my sufficient guarantee for demanding that, for this generation at least, German goods, German wares, German partnerships, German businesses, and Germans themselves shall be excluded from the pale of the British Empire. Give them a good, long time to repent, but be sure they do repent, and in sackcloth and ashes, before they ask to be admitted into the community of decent civilizations. Up to that time justice to ourselves and to our Allies designates our attitude.

Harbor development is being pushed on the western side of St. John harbor by both the government and the Canadian Pacific Railway. The government has awarded a contract for the filling on Pier 16 to the Maritime Dredging Company. It has also contracted with the Canadian Pacific Railway to do filling in the same locality, the object being to complete connection with the new pier for the coming winter. The Canadian Pacific Railway is increasing its yardage space and systematizing its tracks so as to permit of the quicker handling of freight.

HAIL INSURANCE IN SASKATCHEWAN

Municipal Commission's Agents Are Seeking Business—\$2,000,000 Losses Paid

The Saskatchewan municipal hail insurance commission, in accordance with legislation passed at the last session of the provincial legislature, has inaugurated a system of co-operative, or mutual insurance, whereby a farmer whose crop is situated in a rural municipality under the hail insurance act may procure insurance to the extent of \$5 per acre in addition to the \$5 provided for by the 4 cents per acre assessment made by municipalities which have passed the hail insurance by-law.

Agents have been appointed to solicit business for the commission in 139 rural municipalities, and the reception given by the farmers to this new system will insure a wide distribution of the risk. The commission, however, has completed arrangements with several good companies whereby a portion of the risk can be reinsured where the amount of insurance applied for is greater than is considered safe to carry. This arrangement has been carried out in a number of districts, wherever, in fact, it was considered that there was even a slight risk of overloading, while in other districts where the farmers taking this additional insurance were more isolated and scattered it was not considered necessary to effect reinsurance.

Scheme for Additional Protection.

The rate charged for the additional hail insurance is 5 cents per acre for each dollar of insurance, which is 1 per cent. per acre less than is usually charged, but the commission calculates that the fact that its administration expenses are so low that the deficiency in revenue caused by reduction of 1 per cent. in the rates will be easily made up.

Up to the present time approximately \$2,000,000 of additional insurance is being carried, by which it will be seen that the scheme has been well received, and its initiation timely and popular. Losses incurred so far are, if anything, less than might reasonably be expected at this time of the year, so that there is at present a reasonable prospect that from the additional hail insurance scheme will result a substantial surplus with which to carry on operations next year. It is intended to hold 50 per cent. of this surplus in a reserve fund, and to use the other 50 per cent. in the payment of dividends to the assured on the basis of the premiums paid.

Results Obtained.

A few facts showing the present standing of the commission are appended: Losses paid to date nearly \$2,000,000; surplus, \$544,825; estimated current year's revenue, \$1,000,000; municipal insurance in force at \$5 per acre, \$30,000,000; additional insurance in force, \$2,000,000; revenue from additional insurance, \$100,000. These figures, the Public Service Monthly says, show the extent of the success of the municipal hail insurance commission as a farmers' co-operative insurance organization.

SHIPBUILDING IN NOVA SCOTIA

United States Consul Henry H. Balch, Yarmouth, Nova Scotia, writes:—

"There is a marked revival of the wooden shipbuilding industry in the Yarmouth consular district; 29 sailing vessels, averaging about 250 tons each, have either been constructed the present year or are in course of construction, which is about double the tonnage built in any recent year. Shipbuilding of this consular district for many years has been confined to the yards at Shelburne, in Shelburne county, and Liverpool, in Queens county, but several new yards have been opened recently in Digby county, where at least eight vessels are being constructed. The scarcity of bottoms and the prevailing high freight rates are the immediate causes of the present activity in shipbuilding. It is estimated that the cost of construction has advanced 40 per cent. over what it was five years ago. The majority of the vessels being built are for general trade; the remainder, however, will be used in the fisheries.

"Previous to 1907 the shipbuilding industry of the province of Nova Scotia was greater than that of any of the other provinces in the Dominion. Since 1907, however, Ontario, Quebec and British Columbia have each furnished a greater number of vessels and tonnage than Nova Scotia."

New Prices August 1, 1916

The following prices for Ford cars will be effective on and after August 1st, 1916

Chassis	<u>\$45000</u>
Runabout	<u>47500</u>
Touring Car	<u>49500</u>
Coupelet	<u>69500</u>
Town Car	<u>78000</u>
Sedan	<u>89000</u>

f. o. b. Ford, Ontario

These prices are positively guaranteed against any reduction before August 1st, 1917, but there is no guarantee against an advance in price at any time.

Ford Motor Company of Canada
Limited
Ford, Ontario

CROP YIELDS ESTIMATED

Returns of Fall Wheat, Hay, Clover and Alfalfa—Rust in Manitoba

The preliminary estimate of the average yield per acre of fall wheat in Canada for 1915 is 25.76 bushels, as compared with 29.41 bushels last year, 21.41 bushels in 1914 and 23.26 bushels, the average of the six years 1910 to 1915, according to the figures of the census and statistics office.

The harvested area of fall wheat in the five provinces of Ontario, Manitoba, Saskatchewan, Alberta and British Columbia amounts in 1916 to 1,042,200 acres, as compared with 1,208,700 acres in 1915, and the total estimated yield for this year is 26,850,000 bushels as compared with 35,551,600 bushels last year and 20,837,000 bushels in 1914. In Ontario the total estimated yield for 1916 is 18,773,000 bushels from 774,800 acres, an average yield per acre of 24.23 bushels, and in Alberta, the other large fall wheat growing province, the total yield is estimated at 7,520,000 bushels from 247,700 acres, an average of 30.36 bushels per acre.

Hay Shows Large Yield.

The estimated yield of hay and clover in 1916 is 14,941,000 tons from 7,974,000 acres, as compared with 10,953,000 tons from 7,875,000 acres in 1915 and 10,259,000 tons from 7,997,000 acres in 1914. The average yield per acre works out in 1916 to 1.88 ton, which is the largest on record for Canada. The total yield of 14,941,000 tons is also the largest hay harvest gathered in Canada, as well as one of the best in quality. Alfalfa shows a total yield of 166,000 tons from 89,900 acres, as compared with 261,955 tons in 1915, the average yield per acre being 1.85 tons against 2.83 tons.

The condition of spring-sown grain is about equal to last month, being over 80 per cent. of the standard representing a full crop. On July 31, 1915, the figures were exceptionally high, being over 90 per cent., but in 1914 they were below 80 per cent. The respective percentages this year are as follows: Fall wheat 82, compared with 80 on June 30; spring wheat, 89 both dates; all wheat, 87 both dates; oats, 83 and 86; barley, 83 and 88; rye, 87 and 91; peas, 75 and 82.

Crop Conditions.

The condition of other crops on July 31 was as follows: Beans, 82; buckwheat and mixed grains, 83; flax, 86; corn for husking, 74; potatoes, 84; turnips, 87; mangolds, 85; hay and clover, 100; alfalfa, 95; corn for fodder, 79; sugar beets, 82; and pastures, 95. Converted into a standard wherein 100 represents the average yield per acre of the eight years 1908 to 1915, the condition of the principal grain crops at July 31, 1916, was as follows: Fall wheat, 102.5; spring wheat, 106; all wheat, 105; rye, 103.5; barley, 101.2; oats, 105; flax, 105. That is to say, the yields per acre of these crops according to their appearance on July 31 are expected to be above the average yields of the previous eight years, 2½ per cent. for fall wheat, 6 per cent. for spring wheat, 5 per cent. for all wheat, 3½ per cent. for rye, 1.2 per cent. for barley, 5 per cent. for oats and 5 per cent. for flax. Many correspondents in Manitoba report the appearance in the wheat crops of rust due to murky atmosphere and extreme heat. They were not able to estimate the extent of the damage beyond stating that this would be serious if not checked by a change of weather.

GOOD AVERAGE CROP

Mr. G. E. Cork, the Regina representative of Messrs. C. E. A. Goldman and Company, bond brokers, Toronto, was a visitor to the head office of *The Monetary Times* this week. Mr. Cork, who is well posted on the Western situation, states that despite damage caused by rust and hail, a good average crop will probably be gathered in the Western provinces as a whole. The railroads are still shipping out last year's crop.

Comparatively few bond issues are offering in the West, said Mr. Cork, although a number of rural telephone issues have been made. Construction of telephone systems is being delayed by a serious shortage of labor.

Mr. Cork is taking six weeks' holidays in Eastern Canada and will then return to Regina.

WAR LOAN NEXT MONTH

Probable Terms Are Discussed—Question of New York Payment

While no official information is available, the Canadian war loan is likely to be issued about the middle of September, following the close of the holiday season.

As bond houses are already canvassing for subscriptions to the loan, there is some discussion as to its terms. It has apparently been decided to make the issue one of a definite amount, and not, as in the previous case, an issue of \$50,000,000 increased to \$100,000,000 on account of its oversubscription. The general impression is that the forthcoming loan will be for \$100,000,000, and that the term will be for 15 years. If this is so, it is thought that in order to conform to market conditions, the issue price will be a little better than 97½.

Payable in New York.

If the loan were made payable in New York as well as in Canada, it would be of some advantage. At the same time, when the Dominion government issued its \$75,000,000 loan in New York last March, the prospectus issued by Messrs. J. P. Morgan and Company and other bankers interested in the flotation, stated: "We are advised that the government of the Dominion of Canada will issue no further loan in the United States during the current calendar year." The coming war loan probably could be made payable in New York, but not offered there officially. Such a step, presumably, would have to have the consent of J. P. Morgan and Company and the banking houses associated in the previous loan in the United States. They might object to such a course as it would be equivalent almost to offering another Canadian loan in New York.

Subscriptions in United States.

Although the first war loan of \$100,000,000 sold in November, 1915, was payable in Canada, approximately \$10,000,000 of subscriptions to it came from the United States, although no special efforts were made to interest investors there. These subscriptions were chiefly from insurance companies and a few came from smaller investors. After the closing of the subscription list, further blocks of the bonds were sold in the neighboring republic. There are certain factors operating against any large blocks of the forthcoming Canadian loan being taken in New York, as the French loan of \$100,000,000 was only recently placed in that market and the British loan of \$250,000,000 was offered there this week. The United States government also contemplates the issue of \$130,000,000 of bonds, partly to pay expenses of militia mobilization. Despite these considerations, however, and in view of the fact that the British and French loans are short-term, while the Canadian loan will be for 10 or 15-years, a substantial block of the new Canadian loan is likely to go to the United States.

Corporation Subscriptions.

Subscriptions to the loan by industrial and other corporations are expected to be much larger than in the previous instance. In November, these corporations were not in a position to subscribe heavily to the war loan. To-day they are in a sound financial position, having retired much of their floating indebtedness and in many cases, all of it. Substantial cash surpluses have been built up and as a number of these corporations have made their profits from war orders they will probably place heavy funds in the war loan.

Private investors, also, are expected to subscribe in large numbers. Bond brokers report the receipt of several orders from clients, "on whatever terms the loan is made." As almost a year has elapsed since the first war loan, the small investors will probably be in a position to duplicate their subscription to the first loan. The total number of subscribers to the first war loan was 24,862.

"Visit Vancouver" is the invitation conveyed in a descriptive booklet of the beauty spots and pleasure resorts in the neighborhood of that Pacific coast city. Mr. J. Reginald Davison, industrial commissioner, will send copies to those interested.

GREAT BRITAIN'S BLACKLIST

Enemy Firms in Bolivia, Chile, Colombia, Cuba, Ecuador, Paraguay and Peru

Various portions of Great Britain's blacklist have already appeared in *The Monetary Times*. Below we print the list for Bolivia, Chile, Colombia, Cuba, Ecuador, Paraguay and Peru. In previous issues appeared the lists for the United States, Argentina, Uruguay and Brazil. All persons and firms in the United Kingdom are forbidden to trade or deal in any way with these firms and individuals. These lists are complete, official and correct. They were transmitted to *The Monetary Times* by mail from London, England.

WESTERN REFUNDING SCHEME

British Treasury Withdraws Its Offer to Purchase Manitoba and Saskatchewan Securities

A London cable message dated Monday, stated that the British treasury had announced that its offer, made in July last, to purchase at 80, plus accrued interest, Manitoba 4 per cent. debentures of 1949, the 4 per cent. registered stock of 1950, Saskatchewan 4 per cent. bonds of 1949 and the registered stock of 1951, will be withdrawn to-day, August 25th.

No official information is as yet available as to why this course has been taken, but probably it is due to the fact that the results of the plan to mobilize certain western Canadian securities has not proved very successful. Instead of large blocks of these securities coming on to the New York market, therefore, only a few millions are likely to be sold there and many of these have already been placed quietly in the United States.

Less than Anticipated.

The total debt of Manitoba, Saskatchewan and Winnipeg in the United Kingdom is \$58,000,000, of which it had been hoped to purchase at least \$36,000,000 in Great Britain, re-financing that amount in New York. The position outlined by those responsible for the scheme may be tabulated as follows:—

Borrower.	Debt in London.	Minimum desired to be refinanced in New York.
Manitoba	\$16,000,000	\$10,000,000
Saskatchewan	9,000,000	6,000,000
Winnipeg	33,000,000	20,000,000
	<u>\$58,000,000</u>	<u>\$36,000,000</u>

While those primarily interested in the scheme had hoped to buy at least \$36,000,000 of these securities in London, the total purchased will probably be considerably less.

Results in London.

London advices transmitted to *The Monetary Times*, state that a fair amount of Manitoba stock has come in as a result of the British treasury's invitation. There has apparently been some misunderstanding as to the position of the treasury in the transaction as in many quarters it was at once assumed when the mobilization of these securities was announced, that the increased income tax would apply were these securities not turned into the treasury. This was not the case.

The Saskatchewan issues have not come in so readily as the Manitoba. The western Canadian issues recently made in the United States in connection with this transaction, will probably take care of all securities mobilized to date in this group.

Large Holders Unwilling.

While the British treasury agreed to the mobilization of the securities, the holders were not penalized for refusing to sell after the British treasury's intimation that they were willing to purchase. It was generally thought that the treasury would not take such a course in regard to those securities, and that view has proved correct. Now comes the intimation, as noted above, that to-day their offer to purchase these securities, is withdrawn.

Recent advices from London seemed to indicate that it was unlikely that the large holders of these western securities

in the United Kingdom would sell at the price mentioned, 80 and interest, because such a sale necessitated the burden of a very heavy capital loss and it was difficult, if not impossible, to reinvest the proceeds to any better advantage. While there were available government securities yielding 6 per cent., these were short-term issues and could therefore be considered in this connection.

London Press View.

Discussing the subject in its investment notes, our London contemporary, Canada, says: "It is of course possible that only a moderate response may be made to the appeals. It may also be pointed out that the Manitoba government are really exchanging a long-dated security for a short-dated issue, as it is understood that the new security to be placed in New York will only run for ten years. Such an exchange is not without its speculative possibilities, as no one can foretell what monetary conditions will be like ten years ahead. However, such operations as these if they can be carried out should certainly be to the material advantage of the Mother Country. In effect they will transfer existing Canadian indebtedness to the United States upon what would appear to be favorable terms, and release money here that will be very acceptable in Great Britain at the present time for reinvestment in our own war securities. In recent statistics we have shown how the competition of the latter has upset the equilibrium of existing Canadian government, provincial and municipal issues, and it can well be understood that in view of the readiness with which United States investors have absorbed the latter, that strenuous efforts should be made to benefit from the low range of quotations current in this country for Canadian issues generally as a result of the financial disorganization caused in the Mother Country by the financing of the war, to retire them and reissue them in the United States."

Forty carloads of flour presented to the federal government by the Saskatchewan Grain Growers' Association was shipped to Montreal last week by the trade and commerce department. It will be sent across the Atlantic promptly.

Mr. Richard Arthur Daly, late in charge of the Investment Department of The Bank of Nova Scotia, announces the opening of offices in The Bank of Nova Scotia Building, 38 Melinda Street, Toronto, where he will deal in high-grade Government, Municipal and Corporation Bonds under the firm name of **R. A. Daly & Company.**

TORONTO, ONTARIO
 AUGUST TWENTY-FIFTH
 NINETEEN SIXTEEN.

WEEKLY RAILWAY EARNINGS

The following are the earnings of Canada's transcontinental railways during the two weeks ended August 14th:—

Canadian Pacific Railway.

	1916.	1915.	
August 7	\$2,985,000	\$1,787,000	+ \$1,198,000
August 14	2,943,000	1,815,000	+ 1,128,000

Grand Trunk Railway.

August 7	\$1,256,376	\$993,773	+ \$ 262,603
August 14	1,236,989	1,004,412	+ 232,577

Canadian Northern Railway.

August 7	\$ 868,000	\$ 438,500	+ \$ 429,500
August 14	841,500	427,600	+ 413,900

VICKERS ISSUE IN LONDON

The Canadian Vickers issue, an extended reference to which was made in *The Monetary Times* last week, was offered to the public in London on August 17th, the issue being made by the Law Debenture Corporation. The issue was £1,000,000 6 per cent. first mortgage registered debentures of £100 each, redeemable at 103 within 25 years by means of a half-yearly cumulative sinking fund of 2 per cent. per annum.

"The fact that this issue has received the treasury authorization," says a Windermere cable despatch, "shows the government's appreciation of the public importance of the undertaking. The issue has been well received in the press. The Financial Times calls it admirable and cordially recommends it to investors. The debentures are the first charge on land and works in Montreal, and all assets of the company. Moreover, Vickers unconditionally guarantee the debentures in every respect."

A later cable states the list for applications to the Canadian Vickers £1,000,000 6 per cent. first mortgage registered debentures was closed on Monday with the issue oversubscribed.

SWEDEN, CANADA'S COMPETITOR

Canada, being an exporter of several of the lines mentioned below, the annual report of the Swedish chamber of commerce, London, Eng., is worthy of note.

As regards wood pulp, it may be mentioned that during the fiscal year just closed nearly 70 per cent. of the 1,135,000,000 pounds of pulp imported by the United States came from Canada, while most of the remaining 30 per cent. came from Norway and Sweden. The report states:—

"In spite of the interruptions which every industry has had to reckon with owing to the world war, the exchange of trade between the United Kingdom and Sweden proceeded on normal lines as regards such staple goods as timber, iron and steel, wood pulp, paper, matches, and glassware. Many minor trades were able for the first time to find a market for goods in England, owing to the absence of the competition of the central European states. No detailed statistics are available yet, and it is, therefore, difficult to say whether Anglo-Swedish trade has increased in volume, although it may be safe to say that it has increased in value, owing to the high prices ruling in almost every industry. Towards the end of the year many fresh trade restrictions came into force. Transactions were made more difficult, and the procedure for exchanging licences between the two countries more cumbersome."

"The importance of Sweden as a transit country for Anglo-Russian traffic has been clearly demonstrated during the past year, and the question of a daily steamship service between England and Sweden has again been discussed by the council. It has also been the subject of discussions in Sweden. Schemes which were impracticable a few years ago now seem to be feasible."

"Sweden has maintained the strictest neutrality—in commercial matters as in everything else. She has asked for no favors from any of the belligerents, and has, therefore, been able to treat all alike. It is clear from speeches by Swedish politicians that Swedes are unanimous in upholding their rights as a free and independent nation."

GRAND TRUNK SELLS NOTES IN NEW YORK

Messrs. Blair & Company, New York, recently purchased \$2,000,000 Grand Trunk Railway Company of Canada 5 per cent. two-year collateral gold notes, dated August 1st, 1916, and are offering them at a price of 98½ and interest, to yield about 5.80 per cent. These notes are the direct obligation of the company, and are specifically secured by pledge with the trustee of approximately \$3,265,000 par value of Grand Trunk Railway Company of Canada 4 per cent. consolidated debenture stock. This collateral is 20 per cent. in market value in excess of the par value of the notes, and the company agrees to maintain it in amount at less 10 per cent., market value, in excess of the issue.

Earnings of the Grand Trunk Railway, after payment of interest on the debenture stock and all other fixed charges, amounted to \$2,068,896 for the calendar year 1914 and \$2,485,328 for 1915. The proceeds of the present note issue are to provide additional terminal facilities.

RURAL MUNICIPALITY'S TAXATION

A judgment of importance to Saskatchewan rural municipalities was given by the privy council of Great Britain, according to a despatch, which states:—

"The privy council has dismissed the appeal of Alexander Smith against the rural municipality of Vermillion Hills, arising out of an action in which the appellant was held liable to pay taxes totalling \$3,000 due on lands in Saskatchewan."

The above means that the contention of rural municipalities that leaseholders are liable to taxation has been upheld. The claim was upheld by a single judge of the supreme court of Saskatchewan at the trial, by the supreme court *en banc*, by the supreme court of Canada, and now by the privy council of Great Britain. The question, which has been somewhat prolonged, is now settled, and will enable many rural municipalities to know exactly the revenues on which their estimates may be based. In the western part of the province particularly the application of this decision will mean a considerable increase in municipal revenue.

PROBLEMS OF THE UNITED STATES

The publication of a series of little volumes regarding the national problems of the United States has apparently been well timed by the authors, in view of the presidential election in the autumn. "Americanization" is the title of one of the volumes, which is from the pen of Royal Dixon. "Why have we left any loophole through which a foreign prince can insert the tentacles of his authority to retain the allegiance of newcomers to the United States?" is one of the pointed questions he asks. The answer, he says, is the same to that and to all other queries "relative to our year of discontent. We have forgotten the epic of America. We have been slothful in glorifying it, in teaching it, and, above all, in practising it."

Mr. Dixon emphasizes the importance of his subject in saying: "At the root of all problems for us to-day and inextricably bound with every phase of our international relations resides one necessity: the alien hearts that are with us, but not of us; the brother who is but a stranger within our gates." What, then, he asks, is Americanization and what must it aim to accomplish? This is the theme of his book. His answers to it and the broad, practical and suggestive programme which he outlines are based on the results of his association with the National Americanization Committee. In the course of his text he takes up such topics as What Every American Should Know, American Citizenship, America and Women's Clubs, National Preparedness and The New America.

Another volume of the same series is "Straight America," by Miss Frances A. Kellor. It seeks to show how the United States may secure a more united nationalism. The authoress endeavors to discover "what is the matter with the United States," and furnishes a definite programme of action which sounds a call to national service.

These volumes are published by the Macmillan Company of Canada, St. Martin's House, Bond Street, Toronto. Price, 50 cents each.

8% NET FARM MORTGAGES

We want \$1,000 on each of thirty-two quarter sections of first-class land. Principal re-payable in five years; interest payable the First of January and the First of July. All expenses paid by the Mortgagors. Titles examined by MacDonald, Craig, Tair & Ross.

LEGAL NOTICE

CANADIAN GASOLINE CORPORATION, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 12th day of July, 1916, incorporating Arthur John Thomson and William Symon Morlock, solicitors; Samuel Davidson Fowler, solicitor's clerk; Violet Moffat, accountant, and Anna Latimer, office clerk, all of the City of Toronto, in the Province of Ontario; for the following purposes, viz.:—(a) To search for and recover and win from the earth, petroleum, natural gas, oil, salt, metals, minerals and mineral substances of all kinds, and to that end to explore, prospect, mine, quarry, bore, sink wells, construct works or otherwise proceed as may be necessary; to produce, manufacture, purchase, acquire, refine, smelt, store, distribute, sell, dispose of and deal in petroleum, natural gas, oil, salt, chemicals, metals, minerals and mineral substances of all kinds and all products of any of the same; (b) To trade in, deal in and contract with reference to lands or interest in land, mines, quarries, wells, leases, privileges, licenses, concessions and rights of all kinds covering, relating to or containing or believed to cover, relate to or contain petroleum, natural gas, oil, salt, chemicals, metals, minerals or mineral substances of any kind; (c) To acquire, purchase, take on lease or license, hire, hold, use, sell, grant leases of, grant licenses of, exchange, alienate, dispose of and otherwise deal in or contract with reference to lands or interests in land, personal property of all kinds or interests therein, rights, privileges, licenses and concessions, ships, boats or vessels of any description, wharves or wharfage facilities, docks and docking facilities, cartage plant, forwarding plant, warehouses and towing, wrecking and salvage plant or any interest in any of the same; (d) To manufacture and deal in appliances, implements, machinery, apparatus, goods and supplies in any way connected with or incidental to the operations of the company or to the use of any of the products of the company; to manufacture or trade in property and goods of all kinds; (e) To work, manage, operate, turn to account, explore, develop and improve the properties of the company, whether mining, agricultural or otherwise; (f) To deal in and contract with reference to timber lands, timber licenses and timber rights, and to cut, render merchantable, handle, manufacture, deal in and contract with reference to timber and lumber of all kinds and all products thereof; (g) To acquire, lease, construct, improve, own, use and operate works for the development of power, light and heat, to use, purchase, sell, supply, lease or otherwise deal in or contract with reference to power, light and heat, subject always to all local laws or regulations in that behalf; (h) To acquire, lease, construct, improve, own, use and operate irrigation works and works for the supply of water for other purposes, and to use, purchase, sell, supply, lease or otherwise deal in or contract with reference to water for irrigation or other purposes, subject always to all local laws or regulations in that behalf; (i) To acquire, lease, construct, improve, maintain, own, use, operate, sell, let and deal in dwelling houses, lodging houses and hotels; (j) To operate ranches or farms for live stock or agriculture, to breed, raise, keep, render marketable and deal in horses, cattle and live stock of all kinds, and to produce and deal in all products thereof and all agricultural products; (k) To operate construction or building plants and to take and carry out contracts for building or for construction work of any kind; (l) To undertake, carry on and execute transactions as financial or commercial brokers or agents; (m) Notwithstanding the provisions of section 44 of The Companies Act, to subscribe for, purchase, assume liability under, acquire, hold, sell, exchange, dispose of or otherwise deal in or contract with reference to bonds, debentures, stocks or other securities or obligations or any estate or interest therein; and to apply or accept, in whole or in part, as consideration for, satisfaction of or security for any contract, indebtedness or obligation, to or of the company, property, obligations, shares and securities of any kind at such valuation and upon such terms as may be agreed upon; (n) To acquire, dispose of or otherwise deal in properties, businesses or undertakings of all kinds similar in whole or in part to those of the company; to furnish aid to any business or undertaking similar in whole or in part to that of the company with which the company may have business relations, by way of loan, bonus, endorsement, agreement, guarantee, management or other service, and to manage, supervise and control the same in whole or in part and to act as agent or attorney for the same; (o) To carry on any other business which may seem capable of being conveniently or advantageously carried on in connection with the business of the company or calculated directly or indirectly to enhance the value of, to facilitate the realization of or to render more profitable any of the company's businesses, properties, or rights; (p) To invest the moneys of the company not immediately required in such investments as may from time to time be determined; (q) To co-operate in, aid in, subscribe towards or subsidize any proceeding or undertaking which may seem calculated directly or indirectly to benefit the company; (r) To acquire or undertake the whole or any part of the business, property and liabilities of any person, partnership, association or company having objects altogether or in part similar to the company, or carrying on any business which the company is authorized to carry on, or possessed of property which may seem suitable or desirable for the purposes of the company; (s) To apply for, purchase or otherwise acquire and to protect, prolong and renew patents, patent rights, trade marks, formulae, licenses, protections, concessions and the like, conferring or relating to any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, improve, develop or grant licenses in respect of or otherwise turn to account the property, right or information so acquired; (t) To enter into partnership or into any arrangement for sharing of profits, or expense, union of interests, co-operation, joint adventure, reciprocal concessions or otherwise, with any person, partnership, association or company carrying on or engaged in, or about to carry on or engage in, any business or transaction which the company is authorized to carry on or engage in, or any business or

transaction which may seem capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person, partnership, association or company, and to take or otherwise acquire shares and securities of any such partnership, association or company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (u) To take or otherwise acquire and hold shares in any partnership, or stock or shares in any association or company having objects altogether or in part similar to those of the company, or carrying on any business which may seem capable of being conducted so as directly or indirectly to benefit the company; (v) To apply for, promote and obtain from the Dominion of Canada or any other authority, whether Dominion, Provincial, Imperial, Colonial or foreign, and including subordinate and municipal authorities, any statute, ordinance, order, regulation or other authorization or enactment which may seem desirable to the company or calculated directly or indirectly to benefit the company; (w) To enter into any arrangements with any governments or authorities, supreme, provincial, civic, municipal, local or otherwise, that may seem conducive to the company's objects or any of them, and to obtain from any such government or authority any statutes, ordinances, licenses, contracts, orders, regulations, decrees, rights, powers, franchises, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with the terms of the same; (x) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company, or of its predecessors in business, or of any person, partnership, association or company allied with the company in business or subsidiary to the company, or in which the company holds shares or securities, or to benefit the dependents or connections of such persons, and to grant pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (y) To promote, form, organize, manage, develop, take interests or stock or shares in and assist financially or otherwise any partnership, association or company for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose which may seem calculated directly or indirectly to benefit the company; (z) To acquire, purchase, take on lease, hire, construct, improve, own, maintain, operate, manage, carry out and control plant, equipment, machinery, supplies, buildings, works, shops, warehouses, manufacturing, pumps, tanks, tank cars, pipe lines, smelters, refineries, roads, ways, canals, bridges, electric works, electric plant, hydraulic works, hydraulic plant, boats, ships, docks, wharves, piers, gas works, cables, waterworks, reservoirs, aqueducts, flumes, ditches and all such other structures, works, conveniences and appliances as may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the acquisition, purchase, leasing, hiring, construction, improvement, ownership, use, maintenance, operation, management, carrying out or control thereof; (aa) Where such course is required for the purposes of the company or may seem calculated directly or indirectly to advance the company's interests, to acquire, purchase, take on lease, hire, construct, improve, own, use, maintain, operate, manage, carry out and control, but only upon lands owned or controlled by the company, or over which the company may have a right of license to that effect, such roads, ways, bridges, lines of rail, spurs, sidings, tracks, rolling stock, cables, wires, motors, locomotives, electrical plant and all such other structures, works, conveniences and appliances as may be required for the purpose of maintaining communication by telegraph or telephone, or of effecting the transport of goods or passengers, and to contribute to, subsidize or otherwise assist or take part in the acquisition, purchase, leasing, hiring, construction, improvement, ownership, use, maintenance, operation, management, carrying out or control thereof; (bb) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (cc) To sell or dispose of the property or undertaking of the company, or any part thereof, for such consideration as the company may think fit, and in particular, and notwithstanding the provisions of section 44 of The Companies Act, for shares, debentures or securities of any other partnership, association or company; (dd) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (ee) To sell, exchange, lease, dispose of, turn to account or otherwise deal with or contract with reference to all or any part of the property and rights of the company; (ff) To consolidate or amalgamate with any other company having objects similar in whole or in part to those of the company; (gg) To procure the company to be registered, licensed or otherwise recognized in any foreign country, and to designate and appoint persons therein as attorneys or representatives of the company with full power to represent the company in all matters according to the laws of such foreign country and to accept service for and on behalf of the company of any process or suit; (hh) To pay out of the funds of the company all or any of the expenses of or incidental to the formation and organization thereof; and to employ, contract with and provide for the remuneration of brokers, commission agents and underwriters upon any issue of shares, bonds, debentures, debenture stock or other securities of the company; (ii) To distribute or divide assets of the company in specie amongst the shareholders; (jj) To do all or any of the above things as principals, agents, contractors or otherwise, and either alone or in conjunction with others; to do all such other things as may seem directly or indirectly to be incidental to or conducive to or convenient or proper for the accomplishment of the purposes or the attainment of the objects of the company, or any of them, or expedient for the protection or benefit of the company; (kk) No power granted in any paragraph hereof shall be limited or restricted by reference to or inference from the terms of any other paragraph hereof. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Canadian Gasoline Corporation, Limited," with a capital stock of three million dollars, divided into 3,000,000 shares of one dollar each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 12th day of July, 1916.

THOMAS MULVEY,

Under-Secretary of State.

LEGAL

Pursuant to the provisions of "The Public Enquiries Act," R.S.O., 1914, Cap. 18, the undersigned has been appointed a Commissioner—

"(1) To inquire into and report upon:

"(a) The methods by which Insurance Companies registered or licensed by the Province of Ontario, their representatives or agents, transact all classes of business except the business of Life and Marine Insurance, but more particularly as to Fire Insurance, Automobile Insurance, Plate Glass Insurance, Boiler Insurance and Accident Insurance.

"(b) The methods, rules, regulations and practices of all Associations, of such Insurance Companies and Associations of representatives or agents of such Insurance Companies with regard to making, promulgating, enforcing or controlling rates, commissions, forms, clauses, contracts or the placing of Insurance.

"(c) The advisability of adopting statutory conditions for automobile, plate glass, boiler and accident insurance policies.

"(d) The existing laws of Ontario in relation to the foregoing and their practical operation.

"(e) The existing laws in Ontario in relation to unlicensed insurance and their practical operation.

"(f) Any matter arising out of the foregoing which it is necessary to investigate with a view to the above inquiries.

"(2) To make any such recommendations in regard to the above as he may think advisable."

PUBLIC NOTICE.

Notice is hereby given that a sitting will be held at the Parliament Buildings, Toronto, Ont., on Tuesday, the 29th instant, at eleven o'clock in the forenoon, for the purpose of considering generally the subject of the above inquiry, grouping the parties to be heard, determining the order in which the questions will be considered, and taking the evidence in

possession of the department respecting the matters in question, making further appointments and considering such further matters as may be presented.

All persons interested in the above inquiry are invited to attend at the above time and place.

Tickets of admission to the Parliament Buildings may be had on application to F. Clitheroe, the Secretary to the Commission, at the Parliament Buildings, Toronto, Ont.

Dated at Toronto, Ont., this 23rd day of August, 1916.

G. A. MASTEN,
Commissioner.

ROYAL EXCHANGE ASSURANCE

The fire department of the well-known Royal Exchange Assurance, London, Eng., received premiums during the company's past fiscal year of \$4,600,000 and interest income of \$4,650,000. The losses totalled \$2,350,000, and expenses of management, etc., were \$1,790,000; \$350,000 was transferred to profit and loss account. The fire fund amounts to about \$2,100,000. Accident insurance premiums were \$1,420,000, and losses \$515,000. Management costs, etc., were \$590,000. The sum of \$250,000 was transferred to profit and loss account, the general accident fund now reaching to more than \$1,000,000. The company's total balance of profit and loss account amounts to some \$2,600,000. This corporation, which has assets totalling \$38,675,000, is actively engaged in the above classes of business in Canada under the active management of Mr. Arthur Barry, manager for Canada, Montreal.

Mr. Barry is a well-known underwriter, and is largely responsible for the excellent business and good reputation of the company in this country.

Notices are being sent to members of the Ancient Order of United Workmen with reference to the revaluation of policies, which was recently completed by Professor McKenzie, of the Toronto University.

DEBENTURES FOR SALE

TOWN OF NORTH BAY

DEBENTURES FOR SALE

Sealed Tenders will be received by the undersigned up to 12 o'clock noon, Friday, the 1st day of September, A.D. 1916, for the purchase of the following issue of debentures of the Municipality of the Town of North Bay:—

\$15,000.00, debentures issued for Patriotic purposes bearing interest at the rate of Six per cent. per annum, repayable in Twenty equal annual instalments of principal and interest.

Delivery to be made at the Royal Bank of Canada at North Bay, Ont.

M. W. FLANNERY,
Treasurer, North Bay.

QUEBEC HAS SURPLUS

Hon. W. G. Mitchell, provincial treasurer of Quebec, has announced that the ordinary receipts of the province for the fiscal year ended June 30th, 1916, amounted to \$9,647,982.77, and that the ordinary and extraordinary payments for the same period amounted to \$9,436,688.08, the surplus of ordinary revenue over ordinary and extraordinary expenditure for the fiscal year ended June 30th, 1916, being \$211,294.69.

TAX ON LAND VALUES PROPOSED

The Canadian Single Tax Association has decided to urge upon the Dominion government the raising of extra revenue by a tax upon the land values of the Dominion. It is pointed out in the resolution that the national debt of Canada exceeds half a billion dollars, and at the present rate of expenditure will probably amount to one billion dollars at the close of the war. This debt and also the soldiers' pension fund necessitates a large increase in Canada's national revenue. The association suggested that no material increase in revenue could be derived through customs duties without seriously increasing the cost of living and crippling trade, adding greatly to the burden of the Canadian people.

The land values of Canada were a national resource, created by the community at large, which might be taxed without interfering with industry, crippling trade, or increasing the cost of living, but, on the contrary, would have a reverse effect of forcing idle land into use and promoting enterprise and business activity. It was estimated, for instance, that a tax of 1 per cent. on land values of Canada would produce an additional revenue of approximately \$80,000,000 per annum with a maximum of equity and certainty, and might be collected through existing municipal organizations with a minimum of expense. The resolution was moved by Mr. H. Timmis, Montreal, seconded by Mr. A. W. Roebuck, Toronto.

In connection with these representations to the Dominion government the conference of the single taxers, held at Niagara Falls, Ont., agreed to form a Canadian committee for the taxation of land values, of which Mr. W. M. Southam, of the Ottawa Citizen, has been elected president; Mr. T. A. Crerar, of the Grain Growers' Grain Company, Winnipeg, vice-president; Dr. Floyd, Toronto, vice-president; and Mr. C. A. Bowman, Ottawa, honorary secretary-treasurer.

Mr. Samuel H. Powell has been appointed manager of the buying department of William P. Bonbright and Company, Inc., 14 Wall Street, New York. For ten years Mr. Powell has been associated with N. W. Halsey and Company in similar capacity.

Messrs. A. H. Martens and Company, bond dealers, of Toronto, have opened an office in the Fleming building, Des Moines, Iowa. Since war began this progressive brokerage house has opened branches in New York, Philadelphia, St. Louis, Detroit and Des Moines, U.S.

ACCOUNTANT and Bookkeeper; age 30; over 12 years' experience in bookkeeping and financial work, seeks position with Financial or Commercial Firm, having good prospects. Reply Box 497, *The Monetary Times*, Toronto.

CITY AGENT WANTED.

(FIRE INSURANCE)

A well-established Fire Insurance Company wants an energetic man with good connection to act as City Agent for Toronto. Company will furnish free office, with help for first year. Liberal commission with good salary. State age, experience. Applications will be treated confidentially. Box 1, *The Monetary Times*, Toronto.

QUALIFIED ACTUARY, with seventeen years' experience, would change connection if satisfactory opportunity were afforded. Has thorough knowledge of every phase of Head Office and Investment work. Would consider an opening with Life Company or with Financial Firm or Corporation where his experience and abilities would be of service. Negotiations of any kind strictly confidential. Address "Actuarius," care of *Monetary Times*, Toronto.

CROP OF 180,000,000 BUSHEL

A prominent official of the government in Western Canada stated at Ottawa that the prairie wheat crop would be from 180,000,000 to 200,000,000 bushels, and that of the 1915 crop there will be 40,000,000 bushels in Canada on September 1st.

The rust area is confined to Southern Manitoba, and South-eastern Saskatchewan, comprising the federal constituencies of Provencher, Lisgar, Souris, part of Brandon, Portage la Prairie and Assiniboia. Along the main lines of the Canadian Northern and Grand Trunk Pacific the black rust is not found. Hail in Saskatchewan caused greater damage than to any previous crop.

Is Your Estate Properly Protected?

No matter how little or how much you own, these possessions make up your estate, and should be protected by efficient and economical management.

This can best be done by an Executor or Trustee.

This Company, by acting in this capacity, will give your estate the benefit of experience gained in the management of many estates, of large and of only moderate size, and will scrupulously guard the interests of your heirs.

No charge for drawing up your will when the Sterling Trusts Corporation is appointed your Executor and Trustee.

Our officers will give you further information on request.

INVEST IN RUBBER

BECAUSE these British Plantation Rubber Companies already to-day supply over two-thirds of the raw material of the World's rubber industry.

BECAUSE civilization demands more and more rubber annually and these scientifically cultivated plantations control the supply.

BECAUSE the security is freehold acreage under the British flag. It is prudent and advantageous to spread your investments within the Empire.

BECAUSE now is an exceptionally advantageous juncture, owing to war conditions and favourable rates of exchange, for buying into this new progressive industry.

BECAUSE 10% is the present dividend yield, combined with stability and good prospects.

DIVIDENDS AND NOTICES

CANADIAN PACIFIC RAILWAY COMPANY

NOTICE TO SHAREHOLDERS

The Thirty-fifth Annual General Meeting of the Shareholders of this Company, for the election of Directors to take the places of the retiring Directors and for the transaction of business generally, will be held on Wednesday, the fourth day of October next, at the principal office of the Company, at Montreal, at Twelve o'clock noon.

The Common Stock Transfer Books will be closed in Montreal, New York and London at 3 p.m. on Friday, the first day of September. The Preference Stock Books will be closed in London at the same time.

All books will be re-opened on Thursday, the fifth day of October.

By order of the Board,

W. R. BAKER,
Secretary.

Montreal, August 14th, 1916.

UNION BANK OF CANADA

DIVIDEND No. 118

Notice is hereby given that a Dividend at the rate of eight per cent. per annum upon the Paid-up Capital Stock of the Union Bank of Canada, has been declared for the current quarter, and that the same will be payable at its Banking House, in the City of Winnipeg, and at its branches on and after Friday, the 1st day of September, 1916, to Shareholders of record, at the close of business, on the seven-teenth day of August, 1916.

The transfer books will be closed from the 18th to the 31st of August, 1916, both days inclusive.

By order of the Board,

G. H. BALFOUR,
General Manager.

Winnipeg, July 20th, 1916.

THE ROYAL BANK OF CANADA

DIVIDEND No. 116

Notice is hereby given that a Dividend of Three per cent. (being at the rate of Twelve per cent. per annum) upon the Paid-up Capital Stock of this Bank, has been declared for the Current Quarter, and will be payable at the Bank and its Branches on and after Friday, the First day of September next, to Shareholders of record of 15th August.

By order of the Board,

C. E. NEILL,
General Manager.

Montreal, P.Q., July 18, 1916.

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 118

Notice is hereby given that a quarterly dividend of 2½ per cent. upon the capital stock of this Bank has been declared for the three months ending the 31st of August next, and that the same will be payable at the Bank and its Branches on and after Friday, 1st September, 1916, to shareholders of record at the close of business on the 16th day of August, 1916.

By order of the Board,

JOHN AIRD,
General Manager.

Toronto, 24th July, 1916.

BANK OF MONTREAL

Notice is hereby given that a Dividend of Two and One-Half per Cent. upon the paid-up Capital Stock of this Institution has been declared for the three months ending 31st July, 1916, and that the same will be payable at its Banking House in this city, and at its Branches, on and after Friday, the First Day of September next, to shareholders of record of 31st July, 1916.

By order of the Board.

FREDERICK WILLIAMS-TAYLOR,
General Manager.

Montreal, 21st July, 1916.

LAKE OF THE WOODS MILLING COMPANY, LIMITED

DIVIDEND NOTICE

Notice is hereby given that quarterly dividends of 1¼% on the Preferred Stock and of 2% on the Common Stock of Lake of the Woods Milling Company, Limited, have been declared, payable on Friday, September 1st, 1916, to Shareholders of record at the close of business on Saturday, August 26th, 1916.

By order of the Board,

R. NEILSON,
Assistant Secretary.

NEW BRITISH LOAN OVERSUBSCRIBED

The British government's \$250,000,000 note issue in New York, which was offered to the public on Wednesday, was oversubscribed in two days. Full particulars of the issue and the personnel of the underwriting syndicate appears elsewhere in this issue.

JULY BANK STATEMENT

The principal items of the July statement of Canada's chartered banks are as follows: Reserve fund, \$113,022,933; note circulation, \$123,530,451; demand deposits, \$431,958,188; notice deposits, \$789,363,919; total deposits in Canada, \$1,221,322,107; deposits outside Canada, \$171,167,615; current coin, \$65,694,805; Dominion notes, \$140,574,483; deposits, gold reserve, \$19,010,000; call loans in Canada, \$87,355,648; call loans outside, \$177,121,733; current loans in Canada, \$740,040,741; current loans outside, \$62,356,259.

The Monetary Times' analysis of the statement, together with comparisons, will appear in next week's issue.

MANITOBA'S NEW LOAN

Mr. Edward Brown, provisional treasurer of the province of Manitoba has begun negotiations in New York to raise a new loan for refunding purposes. The Manitoba cabinet has authorized an initial commitment of \$3,000,000.

An offering was made in New York at the end of July of \$1,000,000 of Manitoba's and \$1,000,000 of Saskatchewan's 10-year bonds. This apparently was made in connection with the refunding scheme. Part of these issues in New York were 4½s and part were 5s. The price of the 4½s, according to *The Monetary Times'* information, was 93½ less ¼ of 1 per cent. This financing, therefore, is done on approximately a 5½ per cent. basis.

Mr. Mortimer B. Davis, president of the Imperial Tobacco Company, of Canada, and Mr. G. H. Duggan, vice-president and general manager of the Dominion Bridge Company, have been elected directors of the Royal Bank of Canada, filling the vacancies caused by the deaths of Mr. T. J. Drummond and Mr. Wiley Smith.

A Free Course In "Salesmanship"

We have thought about the young man who sees no prospects ahead. Would you like to be in a business that will give you

A Good Living Wage

A Profitable Future

A Provision For Old Age

We teach a man the Insurance Business, which offers permanent success, does not fluctuate, is a professional occupation, and has been truly named "The best paid hard work in the world."

This is done by a correspondence course and personal assistance, free of charge.

When he is fully prepared for the work, we place him in a position and help him to make good.

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this.

All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policy-holders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.
